WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for **hard wood.** The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in **hard wood** We have combined two **principles in one,** and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

UNIVERSAL SHARPENING MACHINES.

HAND POWER MACHINES.

	EACH.
No. 2, Japanned,	$3.50
No. 4, Nickel-Plated	$5.00

For household and general use.

FOOT POWER MACHINE.

No. 1, $25.00 each

For Packers, Tanners, Butchers, Farmers, Hotels and Restaurants.

Liberal Discount to the Trade.

Most perfect knife sharpener made.

Easily operated and quick work.

The degree of perfection attained by the use of this machine is far superior to that accomplished by the ordinary method of hand work.

These machines are practical, based on correct mechanical principles and have reached their present state of perfection after many years of experimenting.

They are simple in their construction, very durable and sharpen with great rapidity.

Knives keep their proper shape and last much longer when sharpened with the "Universal" machine. Silver-plated knives can be sharpened without damaging the blade.

Every dealer and every family should have one of these machines.

We guarantee the "Universal" machine to be as we represent it, "practical, convenient and perfect."

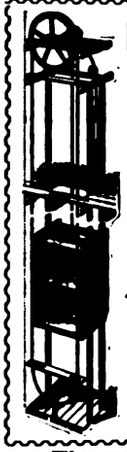
Berger Bros. Company,

Mfrs. Tinners' Hardware and Roofers' Supplies. PHILADELPHIA.



The Old Compared with the New.

THE credit belongs to the Welch of first making Roofing plate which has performed so large a part in sheltering humanity for so many years. The old Welch method of making tinplates was an honest one, but it had its crudities and imperfections.

The art of making the best tinplate has progressed, as have all other arts, so that the best product of to-day is superior to that made by the old Welch method. The superiority of the best modern plate lies largely in the thoroughly even distribution of the coating metal over the black sheet. This is an important thing for every buyer or user of tinplate to know.

Messrs. Merchant & Co., Inc., of Philadelphia, New York and Chicago, who have for so long a time made a specialty of the highest grade of plates, have contributed some valuable literature on this material within the last year, viz. their booklet *"HOW ROOFING TIN IS MADE"* and *"HOW A TIN ROOF SHOULD BE LAID,"* but not less interesting and valuable is their latest issue entitled *"NOT JUST AS GOOD BUT ACTUALLY BETTER,"* which minutely describes the difference between their method of making plates and the old Welch method. It will afford them pleasure to mail any one or all three of these little works to any name and address sent them to Philadelphia, New York or Chicago.

HARDWARE

"There is one form of prayer in which I have the utmost faith," said the cynic of the Hardware store. "And that is the praying for rain. It is absolutely sure to be answered —if you only keep at it long enough."

T. James Fernley, the omnipresent secretary-treasurer of the National Hardware Association, brightened the rooms of the Hardware Club by his presence a few days since. It was one of his numerous flying visits to New York.

A new salesman was sent into New England, and as he desired to make a double record, he sold all the goods he could and at the same time kept his expenses down to the lowest possible notch. When he came home the boss scrutinized his account carefully, and then turned about with the inquiry, "Did you walk?" The account was larger next trip.

Said the casual visitor to the head of a big manufacturing concern: "I don't see how you can get away from your business so often." "Get away?" was the response. "I should think there was something wrong about my management if I couldn't get away." There is a great deal in that response. There is nothing like having each department so arranged that it will run itself without expecting "the boss" to keep his hand on the lever all the time.

The Lancaster Machine & Knife Works, Lancaster, N.Y., seem to have been benefited in a business way by the fire which injured a portion of their plant some two months ago. Their new plant is twice the size of the old one, which was too small for the business they were doing. They are now in full operation, working twelve hours per day, full handed, and, as the manager recently told a visitor from this office, "If this rush continues, we will all stand a poor chance of getting vacations this summer."

There is an up-town Hardwareman who is afraid of recording too large a girth. In the summer he usually pants, and just in this particular summer he bants. He quotes that saying of Tom Reed, that "no gentleman ever weighs over two hundred pounds." He avoids all sweets and pastries, and sticks to lean meats. One day reduced him by four and one-half pounds; in an unthinking moment he went to a tea party and put on a pound and a half. He is now sticking to the flesh diet, and is daily reducing himself in flesh.

"Hardware Day" bids fair to become one of the recognized holidays of the West, at least, if the retail dealers of enterprising Chicago carry out their proposed programme. One day is to be selected in July or August, when all the retail Hardware stores will keep their shutters in place, while proprietors, clerks, bookkeepers, porters and office boys will attend a grand picnic at some given point. As the Chicago Retail Hardware Association have taken the matter in hand, the success of the scheme may be practically assured. There cannot be too many of these occasions of reunion and better acquaintance.

The Bissell Carpet Sweeper Co., whose trade has been most phenomenal during this year and who are far behind with orders at the present time on high-grade "Cyco" bearing sweepers, report a sale just made by T. Eaton & Co., of Toronto, Canada, on Bissell sweepers that beats the record. In a single day this house sold at an advertised sale three hundred and forty-eight Bissell sweepers, which was certainly marvelous. It proves what can be done with well known goods in Canada, as well as in the United States. This eclipses the best day John Wanamaker ever had on sweepers, and which was no small matter.

Reports coming from South Africa show that even now American manufactured goods are taking the precedence of those of other countries, and such articles as saws, axes, levels, claw hammers and grinding stones are recognized by the natives as being superior in style and workmanship to those made in any other country. One thing that has helped the American exporter is the fact that he has adopted the system of accompanying invoices with rates of freight, measurements and cubic contents of each case, as well as with the total of each line of cases. This helps in making estimates, and facilitates invoicing in up-country orders.

North Bros. Mfg. Co., Philadelphia, have prepared a very attractive and artistic set of signs of their "Yankee" tools, which they are furnishing to dealers who handle this line of goods. These signs are of heavy metal, so stamped that the articles represented stand out in raised form, and as they are printed in colors, conforming to those of the goods themselves, the sign when seen upon the wall seems to indicate that the actual tool is there represented. There are three of these signs, one of which shows their "Yankee" ratchet screw-driver; another their "Yankee" spiral ratchet screw-driver, and the third their "Yankee" automatic drill. These signs will make an attractive ornament to any Hardware store, and certainly must assist the dealer in attracting attention to these goods. The reputation of the North Bros. Mfg. Co. for the production of first-class articles in all their lines, is well known, and these signs are an indication that the artistic department of their factory has been placed in competent hands.

The board of governors of the Hardware Club of New York can appreciate good work when they see it. The fact that Alfred D. Clinch, a member of that board, has been charged with the responsibility of preparing each manual of the club since its organization, is a guarantee that he has a life job on his hands, as it is the yearly event for some member of the board to move "that Alfred D. Clinch be requested to take in charge the preparation of the manual which he has so successfully edited in years gone by." This action was taken a couple of months since by the board, and the result of Mr. Clinch's labor for 1899 is at hand. The manual conforms in size and character to those issued heretofore, and contains the usual list of officers and committees, tables showing the dates of meeting, the constitution, by-laws, articles of incorporation, list of members, etc. The work has been admirably done, and the manual is in every sense a complete and appropriate exposition of the character and aims of the Hardware Club of New York.

HARDWARE

VOL. XIX. JUNE 10, 1899. NO. 5.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

American Goods in England.

The recently published reports of the United States consular offices in Great Britain, contain information which is of the utmost value to the American Hardware manufacturer who hopes to extend his trade into foreign countries. If the conclusions reached by the consular agents are correct, England offers a surprisingly advantageous and profitable field to such American traders as would carefully study that market. The conclusion of these agents is that there is hardly a line of American manufacture, with special reference to American novelties, that could not be exported to England with profit, if the proper steps were taken, and such reasonable and common-sense methods of sale as are adapted to that market were adopted. One writer expresses it as his opinion that the American manufacturers are the best in the world, but they are also the poorest traders. This fact is impressed upon him over and over again in each day of his experience with American merchants, and manufacturers, by correspondence and otherwise, and of the methods which they are following in handling the new export trade which they are working so hard to get. As a third point, which will well bear quotation, he says: "It is my idea that American export trade is rolling up like a snowball because of a fifty per cent. superiority in manufacturing knowledge and natural resources, and despite a fifteen to thirty per cent. inferiority in trading knowledge, a heavy percentage of unwillingnesss to learn foreign trading customs and still greater percentage of lack of foreign merchant facilities and organization. If a small portion of the vast sum of money in the United States now seeking investment could be employed in some sort of export scheme to handle American goods, we would soon be able to record a greater export of American goods than of the raw products of the soil, though to-day we are boasting of an excess of manufactured exports over the manufactured imports."

It is a fact that American pig iron is going into British ports in increasingly large quantities, and this trade may be regarded as established on a healthy and permanent basis. In parts of England there is to-day an actual demand for American pig iron, which is well contrasted with the situation of but a few months ago, when the American salesman found it difficult to place even trial orders. Most of the foundry iron which goes to that country comes from the South, chiefly from Alabama, and the heaviest movements of this tonnage are confined to the cotton season, when "low freight rates for carriage across the Atlantic are obtained because pig iron serves admirably as ballast to ships loaded with light-weight cotton."

One agent states that the sale of American bicycles in England is only limited practically by the willingness of American manufacturers to make such wheels as are desired by British purchasers. He declares that the Englishman does not want wooden rims on his bicycle. He is afraid of them, and part of his fear is that damp weather will affect their value. Neither does the Englishman want a single-tube tire, as, says the agent, "The broken glass and thorns in the roads puncture the single tubes, and and when the single tubes are punctured; the English repairer either cannot or will not make the repairs." He adds that many consignments of American bicycles have arrived in England in poor condition, owing to the fact that they have not been properly packed. There is a further danger in regard to American vehicles in general that those made for sale in England will be of too light weight. The Britisher, he says, does not only demand solidity of construction, but this strength must be such as can be seen by the eye; there must be bulk, which, of course, means weight. It is his belief that the American carriage builder who will make exact copies of models of good English style, will find a ready sale if willing to accept a reasonable profit.

There is a fund of information of value to American manufacturers and exporters hidden away in these reports that are issued with such industrious regularity by our State department. Shrewd and careful observers in all parts of the world are in these days paying special attention to the needs of foreign markets, with direct reference to the supplying of those needs from home, and the American manufacturer who desires to extend his export trade would do well to place himself in communication with the State department and make sure of receiving these reports as they are published.

A Feast at Atlantic City.

The coming annual session of the Southern Hardware Jobbers' Association promises to be an occasion not only of great social enjoyment, to the members and the guests who will there assemble, but a programme of a business and literary nature has been prepared so replete with good things, that the only fear is that there will not be time permitted for the carrying of the same into full operation. The social feature is always a very prominent part of this annual gathering of our friends of the South, and the session of this year promises to be even more marked than ever in this respect, as there will be a large attendance of ladies in addition to the guests from the North from among the jobbers, and from the manufacturers in all parts of the country.

Almost every possible question is to be discussed in the papers which are to be presented.

There will be a formal welcome to the manufacturers, with a response; and among the questions which are to be considered during this three days' session, there is one devoted to the export trade, another to Hardware expansion, and others upon the effects of associations of this character the meeting of foreign competition, the question of equity as it should exist between the manufacturer and jobber, the necessity of trusts, and whether or not they are detrimental to the interests of

Digitized by Google

the jobbers; with several general talks, and one whole session devoted to the editors of the various trade journals, who will discuss the business man from the editorial standpoint, the progress of the twentieth century, the development of the Southern Hardware trade, the trade journal as a developer of closer relations between the jobbers and retailers the general progress of the South, and Hardware associations in general.

One half day will be devoted to the discussion of various questions of a searching and interesting character, which have been suggested by the executive committee of the Association. These involve the attempt of the buyer to do justice to himself and still please all the traveling salesmen who call upon him; whether or not a manufacturer can sell to both jobber and retailer in the same territory without injustice to the interests of either party; the difficulties that stand in the way of maintaining uniform prices for the present year, and the best methods to obviate them; whether or not manufacturers of standard brands of goods should sell their products to catalogue houses and department stores; and the question whether or not a traveling man has a right to go to the consumer in a given place, provided the trade in that city will not take hold of his line.

There is certainly meat enough in these papers, and in the questions which the executive committee have so ably propounded, to keep a Hardwareman, or any other man, busy during the several days in which this Association will be in session. The speakers are men who stand very high in the opinion of the trade, and a great deal of thought and information will be bequeathed by them to such as have the pleasure of being present on this occasion. These gatherings seem to become more important and more necessary as the years go by, and have done much toward elevating the general character of the Hardware trade everywhere, serving as a suggestion to the Hardware dealer that there is a great deal more connected with the proper conduct of his business and the securing of the best results therein, than simply the buying and selling of goods.

A Question of Vacation.

Editor Hardware: I wish you could do something or say something to persuade my boss into the belief that a Hardware clerk who works faithfully and industriously for fifty-one weeks in the year, ought to be accommodated with one little week at least, for his own personal use. I have been in my present position a little over seven years, and have never had a holiday for more than two days at a time, and if I should ask for a few hours' time for the purpose of attending the ball game, I would probably be out looking for a situation the next forenoon. We believe that you have the interests of the clerks at heart, and would like to hear your opinion on this subject. A CLERK.

—— Avenue, New York.

The above communication shows that this clerk has an abiding faith in the good will and the friendly intentions of *Hardware*, regardless of such possible results as might come from its attempted intervention in a delicate situation like that which our correspondent portrays. Without entering in any degree upon the questions which affect the relation of this identical clerk to the house in which he is employed we do not for a moment hesitate to express the opinion that in all well-regulated establishments more work can be secured from a clerk, or other employe, in fifty-one weeks in a year than could be possible in fifty-two. A young man whose nose is tied continually to the lines of a ledger, or whose hands and mental faculties and conversational powers are continually used in the sale of goods, has a pressing need for at least one full breath of ozone during the summer season. He will be a better employe during the whole year because of several days' frolic out under the face of Nature, on the mountains or by the seashore, and he will come back with a tan on his countenance, fresh air in his lungs, sunshine in his heart, and a possibility for better work than he could possibly have possessed under other circumstances. Give the boys a chance. Turn them loose at least once in the year, with full opportunity to oil the machinery.

One Scottish Method.

They do some things on the other side of the ocean that we don't do here. For instance, there prevails in Scotland a certain method of lending money, with a young man's honesty and industry as collateral. The method is thus described: "A bank permits an individual to open an account, not with a deposit or with a discount, but an actual credit for a certain amount, which the bank practically loans to him, charging him interest on his daily debit. The person is permitted to operate and check against the account just the same as though he had so much cash on deposit. It is not a time loan, but is permitted to stand as long as the bank and the customer are mutually satisfied. From $500 to $5,000 is the usual limit of these cash credits or advances. A young man may desire to start in business. He has no capital, and capital is necessary. He applies to a bank for a cash credit, say, $2,500. The applicant gets some of his friends to become surety to the bank, and the latter opens an account with him with a credit of $2,500. The sureties are careful to watch the operations of the young man, and careful scrutiny of his bank account is maintained. The bank will expect the account to be a live one, and checks are to be drawn and deposits made with reasonable frequency. Sometimes the total transactions based upon a very small cash credit are enormous, as much, sometimes, as $200 or $300 for a single dollar in a year."

On His Vacation.

Mr. John A. Walker, vice-president, treasurer, and general manager of the Joseph Dixon Crucible Co. is now on his vacation, which, as usual, means some recreation and relaxation and a good deal of business.

Although Mr. Walker is a staunch American in every particular, yet he has a strong liking for foreign countries, and has made several trips to the old world's cities and sights. This time he will again visit England, France and Germany, and possibly Italy. He will advise with the manager of the Dixon London branch and visit the several Dixon agencies on the continent. On this trip he will have some peculiarly difficult questions to settle, as the demand for Dixon's graphite products has so increased that many of the most prominent foreign houses are earnestly requesting to be made the sole agents.

Mr. Walker is accompanied by his wife.

Marion & Marion, patent solicitors, write as follows: The air brake was invented by Westinghouse, 1874; the torpedo, by Bushnell, 1777; watch, by Peter Hale, 1477; thermometer, by Drebel, 1609; telescope, by Lippersheim, 1608; printing, by Gansfleish, 1438; microscope, by Jansen, 1509; cotton gin, by Eli Whitney, 1793; lithography, by Senefelder, 1798; lightning rods, by Franklin, 1752; gunpowder, by Schwartz, 1320; balloon, by Montgolfier, 1783; barometer, by Torricelli, 1643.—*Canadian Hardware & Metal.*

Mr. Fernley's Busy Fifteen Minutes.

A representative of that enterprising English publication, the *Hardwareman*, has been interviewing T. James Fernley, the famous "hyphenated" official of the National Hardware Association, with somewhat uncertain results. On the face of the interview, the newspaper man did a good share of the talking, due perhaps to the fact that T. James made his responses while engaged on "the mountain-deep papers of the association." (By the way, some of those papers have been too deep for a taller man than the secretary-treasurer.) It seems to have been a busy morning, amid those classic surroundings of Philadelphia. "He would dictate a letter," says the careful observer of details, "to one of his charming lady secretaries, tot up a line of ledger figures, and talk to me in vigorous and entertaining fashion about the movement in which he is so enthusiastic a worker, all inside a quarter of an hour." It was probably the busiest hour that interviewer ever put in.

Some of the points made by Mr. Fernley are of interest. During the few weeks preceding the interview he had traveled three thousand two hundred miles, and visited nine cities in behalf of the Association. That organization represents $200,000,000, and is "supported by every grade of jobber." When asked as to methods, the answer was: "That's the easiest question you have asked yet. We proceed to get jobbers, each in their separate locality, to come together; our method is to work the oracle by engendering good feeling."

Then the interview proceeded along the even tenor of its poetic way:

"Easy answered; but is it as easily done?"

"American jobbers are sensible men, sir, and when they see the advantages that accrue, they promptly join."

"What are those advantages?"

"Firstly, we eliminate the element of acrimony out of our competition. We compete just as keenly as before, but on sound and reliable lines. Now when you feel eternally sore about some competitor, and you find that he is badly cutting some line, you leave him alone or retort in kind, but after our association has been started, you go to him and say: 'Look here, old fellow, this won't do.' And the other fellow promptly condemns his drummer or his foreman, and swears it was all a mistake. Then they smoke a cigar together—by the way, have one?—talk over business affairs, and parting, wish each other well."

"But you must not suppose that we attempt to control prices. We don't; nor is it probable that we ever shall. In some leading lines—a very few—we find that we can arrange prices by private conversation. Then again, we verify reports. For example, Smith's traveler reports that Robinson, the retailer, told him that Brown & Co. are selling Disston's saws at less than he (Smith) can possibly sell at. Smith disbelieves the story, and asks Brown. Then it transpires that that retailer, trying to be smart, gets found out."

"How do you get on with the manufacturers?"

"The manufacturers find us their most useful, and most reliable distributors. We cover big distances here, and accordingly it is supremely important to save freightage by the wise assembly of goods. The jobber is holding his own. Yes! We are quite friendly with the manufacturers and can often co-operate in many directions with them. There is, for example, the burning question of department stores—a mighty ticklish point, I assure you; but a little discussion all round, the manufacturer, jobber and retailer, each presenting his case, puts matters on a workable basis."

"How do you get on with the retailers?"

"Far-sighted retailers welcome us; the retailer with a short nose, and who can't see further than its tip, is apt to jib. But, you see, we protect the retailer in many ways. There is an all round stability in prices. It is valuable to the retailer to know that he is not being unfairly cut out by some jobber favoring his competitor. Then again, we take care not to supply the consumer—a point to which the retailer very naturally and properly attaches great importance."

"In short, you are benefactors to the erring human race."

"We are at least pioneers of civilization. I want you to emphasize the great fact that our Association, above all, aims to induce good feeling and fraternity amongst its members. Dollars and dimes roll into our pockets as the result of our efforts; but they count for little compared with the splendid spirit of good comradeship which prevails. You must come to one of our dinners."

"Alas! I shall be on the Atlantic, what time you next banquet together; but you must come to England."

"I should very much like to."

"It would pay our merchants to invite you over, and put you up at Buckingham Palace, so that you might tell them how you manage your Association."

"You are very kind to say so; but I guess I'm pretty well occupied here."

Pretty well occupied! We should say so. A man who can dictate a letter, tot up a line of figures, smoke a cigar and look pretty, while talking such solid horse sense—and all inside of fifteen minutes—don't need a trip to Europe for the purpose of occupying his mind.

Endorsing Mr. Foot.

The attitude taken by James D. Foot, president of the Kearney & Foot Co., in his article on the relations that exist, and those that should exist, between the manufacturer and the jobber, in our special Hardware Jobbers' Number of April 10th, has been endorsed by a number of the jobbers who have placed themselves upon record in letters to him. We are permitted by the writer of one of these communications, B. F. Atkinson, president of the Atkinson Hardware Co., to reproduce his letter, which is a sample of the others received by Mr. Foot.

Mr. Atkinson says: "You will please pardon our intrusion upon your pre-occupied time to say that we have carefully read your article in the anniversary number of *Hardware* concerning the relation between manufacturer, jobber and retailer. In our judgment it is a fair, frank and honest statement of the case; your position well taken, and argument well presented, and we fully concur with you in your logical and irresistible conclusion, i. e., that the only satisfactory course to pursue is to be honest in selling the jobber only, or else throwing the jobber overboard and selling the retailer only, which we think is utterly impracticable for the large manufacturer making reliable goods."

The value of a reputation for sterling worth and integrity was never better exemplified than during the past week when the Iver Johnsons Arms & Cycle Works, of Fitchburg, Mass., brought out two new models of their "Honest Cycles," listing at $25 and $35. Hardly had it become known that such bicycles could be furnished, when orders commenced to come in, the purchasers not even seeing the samples, but relying on the company's reputation for putting out nothing but honest, reliable goods. Their confidence is very gratifying to the makers, who claim it is not misplaced, and who say: "The new models have the same general construction as the higher-priced ones; drop forged connections throughout, and are the finest ever offered at such prices, and valuable additions to their line of 'Honest Cycles at Honest Prices.'"

The most secret of all earthly things are the unwritten, unspoken thoughts in which one indulges. They are absolutely beyond one's control.—*Exchange.*

Southern Hardware Jobbers' Association.

As previously noted in our columns, the ninth annual convention of the Southern Hardware Jobbers' Association will be held at Atlantic City, N. J., June 14th, 15th and 16th, 1899. A general invitation is extended to the manufacturers who cater to the Hardware jobbing trade of the United States, and also to the Hardware jobbers themselves, whether they be located in the South or in other sections. On account of the many attractions at Atlantic City and the delight with which the gentler sex look forward to a visit to that inviting spot, the officers of the Association have taken special pains to induce the gentlemen attending the convention to bring their families with them, and it is very gratifying to know that a very large number of the ladies will accompany the delegates to the meeting.

We are requested to state that the manufacturers and outside jobbers who attend the convention are not expected to extend any courtesies or entertainment for the benefit of the members of the Southern Association, nor will the members of the Association go to any extra trouble or expense by reason of the manufacturers and others being in attendance at the meeting. All are invited to the convention solely for the purpose of promoting more intimate social relations and consequently a more friendly feeling. They will be cordially received by the members of the Association, and will be welcome to take part in the conferences and deliberations of all sessions excepting those which are of an executive character. The morning session of each day of the convention, as well as the afternoon session of the 16th, will be devoted to joint sessions of the jobbers, manufacturers and their representatives and such other visitors as may care to listen or take part in the proceedings. A number of timely and interesting subjects to the trade will be taken up for discussion and the meeting promises to be an unusually interesting one. We are advised by James J. Mandlebaum, president of the Association, that the indications point to a representative attendance from the membership, and also a very large attendance from the manufacturers and their representatives. As in previous years, a reception committee, composed of the manufacturers' Southern representatives, has been appointed, consisting of thirty-seven of the most prominent Southern traveling salesmen, all of whom will be present.

The Islesworth Hotel, at Atlantic City, has been selected for the headquarters of the convention, and special rates will be granted those in attendance at the meeting. The Railroad Passenger Associations have also given the Association reduced rates, upon a basis of one fare and a third for the round trip, termed the Certificate Plan reduction. To those who contemplate attending the convention, and who are not familiar with this arrangement, if they will call on their local ticket agent and make inquiries, same will be thoroughly explained. Or if they will address the secretary-treasurer, C. B. Carter, Little Rock, Ark., he will gladly furnish the desired information.

The following is the full official programme prepared for the forthcoming Meeting.

Wednesday, June 14th.

Meeting called to order by the president. Calling of roll. Address of welcome by the president.

Address of welcome to the manufacturers. Chas. H. Ireland, Greensboro, N. C.; Odell Hardware Co.

Response: W. R. Walkley, New York City; Peck, Stow & Wilcox Co.

Annual address of the president. Report of Reception Committee. Informal reception manufacturers, guests and jobbers.

AFTERNOON SESSION.—Executive.

Wednesday, June 14th.

Reading of minutes of 1898 Convention.
Report of secretary-treasurer.
Report of transportation committee.
Report of grievance committee.
Report of manufacturers' committee.
Report of membership committee.
Report of executive committee.
Appointment of special committees.
Communications.
Miscellaneous business.
Opening of question box.
General discussion.

MORNING SESSION.—Thursday, June 15th.

Joint session of jobbers, manufacturers and their representatives.

Addresses by manufacturers: "Our Export Trade." W. H. Matthai, Baltimore, Md.; National Stamping & Enameling Co.

Addresses by jobbers: "Hardware Expansion." Cliff E. Speer, Fort Smith, Ark.; Speer Hardware Co.

"Associations and their effects." T. W. Gathright, Birmingham, Ala.; May & Thomas Hardware Co.

Addresses by manufacturers' representatives: "The Medium." V. A. Moore, Atlanta, Ga.; V. A. Moore & Co.

Address by representative of National Hardware Association.

Impromptu addresses by representatives of other Hardware jobbing associations, guests and members.

AFTERNOON SESSION.—Thursday, June 15th.

Executive.

How shall we meet foreign competition and secure the trade of our legitimate territory?" W. L. Sanford, Sherman, Texas; Roberts, Sanford & Taylor Co.

Retrospection.
Prospection.
Opening of Question Box.
General Discussion.

MORNING SESSION.—Friday, June 16th.

Joint session of jobbers, manufacturers and their representatives.

Addresses by manufacturers:

"A General Talk." Geo. H. Barbour, Detroit, Mich.; Michigan Stove Co.

Addresses by jobbers:

"Equity as it Should Exist Between the Manufacturer and Jobber." R. C. Carson, Charlotte, N. C.; Charlotte Hardware Co.

"Are Trusts Necessary Under Existing Circumstances, and are They Detrimental to the Jobbers' Interests?" John Donnan, Richmond, Va.; W. S. Donnan & Co.

Addresses by manufacturers' representatives:

"Our Prosperous Country." C.T. Boynton. Chicago, Ill.; American Steel & Wire Co.

Introduction and addresses by representatives of the press:

"My Friend the Business Man." Jas. H. Kennedy; editor *Hardware*, New York.

"XXth Century Progress." Daniel Stern, president *American Artisan Press*, Chicago.

"The Development of the Southern Hardware Trade." W. H. Wilson; manager Tradesman Publishing Co., Chattanooga,

"The Trade Journal as a Developer of Closer Commercial relations between the Jobbers and Retailers.' W. S. Hemby; editor *Iron and Steel*, Chicago.

"The General Progress of the South." R. H. Edmonds, editor *Manufacturers' Record*, Baltimore.

"The Beneficial Results from Associations:" R. R. Williams, Hardware editor *Iron Age*, New York.

AFTERNOON SESSION.—Friday June 16th.

Joint session of the jobbers, manufacturers and their representatives.

Open discussion on the following questions suggested by the executive Committee:

1st. "How can the buyer do justice to himself and please all the traveling salesmen who come to sell him?"

2nd. "Can a manufacturer sell a jobber and retail merchant in the same territory and conserve both interests?"

3rd. "The difficulties in the way of maintaining uniform prices for the year 1899 and best methods to obviate them."

4th. "Should manufacturers of standard brands of goods sell their products to catalogue houses and department stores?"

5th. "If a traveling man cannot place his line in a city, has he the privilege to go to the consumer to sell his goods?"

EXECUTIVE SESSION.

Miscellaneous business.
Reports of special committees.
Election of officers.
Selection of place for next annual convention.
Adjournment.

Harris—"Walters has been looking pretty sad since his daughter got married, hasn't he?"

Correl—"Yes; you see, he had no sooner got his daughter off his hands than he found he would have to put her husband on his feet."—*Exchange.*

The Care of Files.

ARTICLE VIII.

A file to do its work fast and well should be kept free from its cuttings. If the metal is of a non-fibrous nature, as with cast iron or brass, the cuttings pack solid between the teeth, thus holding the teeth out of the work and preventing the file from biting freely. A sharp blow of the file's edge against the vise back after every few strokes will remove most of these cuttings; if, however, too many strokes are taken before cleaning, they lodge so finely that a file brush as shown in Fig. 26, must be used to remove them. These brushes are usually made of fine wire mounted in leather, and tacked to a light wooden back. A stiff bristle brush serves this purpose well, and for very fine-cut files is preferable to the wire.

In filing steel and wrought iron, the character of the material reduces the disposition of the cuttings to pack between the teeth; but, under most conditions, a more serious trouble, that of "pinning" occurs. Cuttings "pin" when they lodge so finely that they cannot be removed with the brush. Unlike the particles of cast iron, which crowd down below the cutting edges of the teeth, and do not injure the work, but simply retard the cutting of the tool; the pin usually stands well above the teeth and scores the work surface at every stroke. The "pin" can usually be removed by drawing the wire file brush firmly across the surface; those that resist this treatment being removed by the scorer. The scorer is simply a piece of soft wire flattened thin at the point, and carried broadside, rather than edgewise across the file surface. After a few

FIG. 26.

strokes it becomes serrated and constitutes a short tooth comb, which picks out the pins quite easily.

Pinning may be somewhat reduced by chalking the surface of the file, which has also the effect of reducing its bite. A little oil on the file will frequently reduce the tendency to pin. It should be used, however, only on the fibrous metals, as it glazes the surface of the non-fibrous metals, making them harder to cut.

Chalk is usually applied to a file when a smooth, fine work surface is desired. The effect of the chalk is to prevent the teeth from cutting as freely as when it is not used, and thereby produces about the same result as would occur if a finer cut file had been used. It becomes necessary to rechalk the file after each cleaning, an operation requiring some time, and which can, by using the fine file, usually be avoided.

When oil has been used on a file it can readily be removed by thoroughly chalking and brushing two or three times, as the chalk soaks up the oil and leaves a dry surface.

In fine filing operations, where it is quite important to know the exact spot on the work surface where the file is cutting, the surface can be dimmed after every few strokes by passing the palm of the hand over it. The dry, soiled hand will deaden the surface enough to clearly show where the file cuts on its next few strokes, and will in no way injure the cutting of the tool.

Files are frequently injured by improper care while not in use. When boxed at the factory they are brushed over with oil and wrapped in oiled paper, which prevents them from rusting. When this oil has disappeared they will, if exposed to moisture, rust readily. As there is a large exposed tooth surface the deterioration due to rust is rapid.

Files should never be thrown together in a drawer, or even allowed to come in contact with each other, or with other tools, as the delicate edges of the teeth are most easily broken down, and the value of the file seriously impaired. They should be kept in a drawer, separated from each other by low partitions, and arranged according to length, section, cut and condition, thus facilitating the selection of any desired file.

Any form of file rack, in which the file hangs from its handle, is satisfactory. The tendency is for files to accumulate, a large number that are nearly worn out littering up the file drawer or rack, injuring the good ones and doubling the time required in selecting a file for any piece of work.

A number of these partially worn files are quite necessary in the file drawer of the mechanic who is engaged on work of a general character, as he will very carefully avoid putting the new or better ones on the hard scale of castings or forgings.

The machinist should at all times exercise good judgment in the selection of the proper file for any piece of work, as he cannot otherwise expect to get economical results from the files he uses. Except in cases where his work is all of one character, he will experience little difficulty in so selecting that he will always be able to use his partially worn files to good advantage on much of his work, thus saving the new ones for the best work.

The broad surfaces of cast metals require the sharpness of the new file to properly cut them, while the narrow surfaces are readily cut by the somewhat dulled teeth of the file that has seen a moderate amount of service. Steel and wrought work will reduce the file to a condition where its further use is uneconomical except as it may serve to protect the better ones by being used for cutting thin, hard materials and removing fins and scale from castings and forgings.

Thin castings, and especially the fins on them, are quite apt to be chilled, making them harder than the file, a condition not conducive to the health of that tool. The sand must be thoroughly removed from castings before applying even the poorest file, as otherwise the grindstone action will soon render the file absolutely useless.

The sand can be largely removed by brushing, but the scale only by a chemical treatment which softens rather than removes it. This process, commonly known as pickling, consists in the washing or soaking of the castings in a blue vitriol solution, or dilute sulphuric acid. The length of time the casting should remain in contact with the pickling solution depends on the strength of the solution and the degree of softness required. They should be thoroughly washed off with water when taken from the bath and after drying the scale can be brushed with a wire scratch-brush or rattled off.

The above article on the care of files forms the concluding part of the "Practical File Talks," which have been for some time in preparation by the Arcade File Works, No. 97 Chambers Street, New York. This series of articles will now form a volume of great utility to all file users and sellers throughout the country. Those who have not already sent their names for a copy to be mailed to them when the book is published, are advised to do so at once, as it will be forwarded without expense if requested at this time.

In associated effort there is power. The results that seem impossible of realization by individual effort frequently blossom into fruition under the rays of concentrated energy. High ideals as objects to be struggled for are essential to future greatness. The highest ideals inspire improvement by the influence of their perfections. Therefore, organizations should be sustained. They should be endowed with worthy ideals and through them there should be exerted a continuous and mighty effort for the realization of their mission.—*F. R. Boocock.*

At the Paris Exposition.

We have received from M. H. Hulbert, director of the department of varied industries to the Paris Exposition of 1900, information as to the programme he intends to follow, of having the manufacturers of watches and clocks, cutlery and fine leather goods combine in three large union exhibits. The Hardware articles included in these industries, as classified by the French authorities, are as follows:

1. Special equipment for the manufacture of cutlery, particularly for grinding and polishing.

2. Table cutlery; pocket knives; knives with fixed blades; cutlery for gardeners, for vine culture and for various trades; scissors and work box accessories; razors of all kinds; fine Hardware in polished steel; small silversmith's ware.

The three spaces allotted to the watches and clocks, cutlery and fine leather goods respectively, will be chiefly devoted to an exhibit of the manufactured articles, but all small devices and processes which can be operated without detracting from the dignity and value of the exhibit, will be placed in the same space. The manufacturers of heavy machinery, which uses oil or produces waste, will receive individual spaces nearby. Machines and processes shown in active operation are always of interest to the public, and will enhance the advertising value of the exhibit.

This suggests what Mr. Hulbert says is the primary object of the collective exhibits, viz.: to make one exhibit of the watch and clock industry, one of the cutlery trade and one of fine leather goods, each so instructive and attractive that the public will be impressed with the high perfection of the business here, and superiority over corresponding industries of the other exhibiting nations. Visiting Americans will also have cause to feel proud of the industries of the country.

Mr. Hulbert intends by using the services of able experts carefully to select from contributing articles and improved machinery and to combine them into the three exhibits. Though many of the manufacturers make a full line of their class of goods, they usually have some one thing which they make a specialty, and it will be the best of this specialty that will be selected as far as possible. Each section being thus represented by the manufacturer which excels in that particular article, the exhibits will be made up of the best from the best, and as a whole will cover a full line of all the branches of the industry. He says: "The expense to each exhibitor in this collective exhibit will be comparatively small, and the benefit to the trades should be large. It is therefore hoped that the manufacturers will co-operate in the undertaking. Those who desire to do so should address their applications to the Hon. Ferdinand W. Peck, Commissioner-General, Auditorium building, Chicago, naming the articles they wish to enter, and the amount of wall or floor space required. Information will then be sent to them at an early date what the expense to them would be and other details. They can make a binding application on the regular blanks of the commission."

An Englishman on American Exports.

The fact that the United States has overtaken and passed the United Kingdom as an export country and is now leading the world as a distributor of manufactures and natural products, is discussed at considerable length in an elaborate paper by Sir Robert Giffen, recently read before the Royal Statistical Society of England, and just received by the treasury bureau of statistics. The paper in question, entitled "The Excess of Imports," occupies 70 closely printed pages of the Journal of the Royal Statistical Society, and while it primarily discusses the excess of British imports over exports, incidentally gives much attention to the rapid increase in exports of the United States. Discussing this special subject, the paper says:

"There are obvious reasons why the United States should have an excess of exports. In the first place the United States has to pay in its exports for the share of the carriage of goods in its foreign trade which is performed by foreign ships. This is a very large figure. In recent years the proportion of the imports and exports of the United States carried in foreign ships has ranged between seventy-five and eighty per cent., so that the United States is a country which has to pay other nations for the carriage of its goods in the foreign trade. It may be mentioned by the way that the foreign country which does the carrying trade for the United States is mainly the United Kingdom, and in this difference between the two countries accordingly we have, *pro tanto*, an explanation of the excess of imports in the case of the United Kingdom, and of the excess of exports in the case of the United States. Next, the United States is a country which owes money in various ways to foreign nations. There is an annual stream of American visitors to Europe, and there is an American colony permanently residing in Europe whose expenses have to be paid for. More important still, a great deal of capital has been invested in the United States by Europeans—by English people, by Dutch people and Belgians, as well as by French and Germans, not to speak of minor nationalities in Europe. The interest on this debt has of course to be paid in exports, unless to the extent that in any given period re-investments are made in the United States. In these various ways then an excess of exports from the United States can be accounted for, and it may be questioned whether in recent years, when the excess of exports was so large, any great withdrawal of capital from the United States was in progress."

Discussing the changes in the export trade of the United Kingdom, Mr. Giffen's paper says: "One cannot but be struck by the incessant changes that are going on in the nature of our foreign trade. It is one thing at one period, another thing at another period, and a few years suffice to make a great transformation. Probably this has always been the rule. At one time in the history of our foreign trade the export of raw wool, to use a common phrase, was king: at a later, the export of woolen manufactures; at a later still, the export of cotton manufactures; and last of all, about twenty or thirty years ago, the export of iron and iron manufactures. What we see in the recent history is that other things than those mentioned have lately been developing the most rapidly. Coal and other articles have been exported more largely than ever before, and they occupy a larger proportionate place in our export lists. Some entirely new articles, such as cycles, appear in these lists for the first time. At the same time our shipping fleet, whose work, as we have seen, is an export in a special form, has developed prodigiously. Coal and shipping together, we may say, now occupy a chief place such as was formerly held by wool, then by woolen manufactures, and then by iron and iron manufactures."

Merchant & Co., Philadelphia, say: "We have recently prepared and are sending out three treatises on Tin Roofing, well worthy of consideration by architects, engineers and everyone interested in this material. The first thoroughly explains 'How Roofing Tin is Made.' The second tells 'How a Tin Roof Should be Laid and Painted.' The third shows in detail the difference of our method of manufacturing plates from the old Welch method, and the reasons for claiming superiority for our method. These pamphlets will be sent to anyone sufficiently interested in the matter to address a request on a postal card to us at any of our offices. Merchant & Co., Incorporated, New York, Chicago, Philadelphia, Brooklyn."

Wright's Trade Directory and Gazetteer.

George Wright, No. 121 Fulton Street, New York, has just issued the fifth edition of Wright's Australia, India, China and Japan Trade Directory and Gazetteer; this directory includes as well Canada, South and Central America, West Indies and South Africa. It gives a complete classified list of trades and professions throughout these countries, and has been thoroughly revised with the assistance of the postmasters of the different localities and is fully up to date. This work is claimed to have become a necessity and a standard book of reference in all countries of which it treats, and the only book of its kind before the public. It gives the trades, professions, population and

resources, and contains just the information that is required by business firms in all countries.

This directory not only gives a complete list of all trades and professions in the various countries which it contains, but serves as a gazetteer of each country, city, town and village, and is invaluable to merchants and manufacturers who are seeking an opportunity to extend their trade. This being the only book that has the trades classified under each town, it will be found to have a great advantage even over local directories, as one can locate the trades you require at once in each city or town. It is offered to the trade at ten dollars a copy.

Recent Trade Publications.

We have received from White Bros., No. 1347 Fulton Street, Chicago, a circular descriptive of their White Bros. Improved Stove Pipe Collars.

J. M. Litchfield, No. 458 Quincy Street, Brooklyn, N.Y., has issued a little catalogue of his Acme Ovens for gas, gasoline and oil stoves. It is tastefully arranged, and full of information.

B. Avery & Sons, Louisville, Ky., have sent us a neat little card bearing upon it a miniature sample of Avery's patent "U" Steel Tire, which they declare "will not bend; cannot break." It is made in all sizes for plows and wagons.

We have received from the Boston Belting Co., Boston, a little publication entitled, "Here It Is," in which they describe Forsyth's Hollow Piston Packing and the Forsyth Combination Packing. The good points of these articles are set forth in an attractive manner.

The Ferracute Machine Co., Bridgeton, N. J., have issued a new catalogue, 12, which supersedes all previous catalogues. The company are very extensive manufacturers of foot and power presses and all kinds of sheet-metal tools, and the catalogue illustrates and describes over three hundred sizes and kinds of presses, and is gotten up in good form and is exceedingly useful.

North Bros. Mfg. Co., Philadelphia, have issued an attractive little booklet in red and green, entitled "The Yankee Tool Book." In this little publication they illustrate and describe their "Yankee" ratchet screw driver, "Yankee" spiral ratchet screw driver, their "Yankee" automatic drill and their drill points. The little book is a complete compendium on these three articles so well known to the Hardware trade.

"Parry Buggies" is the title that stands out prominently on the front cover of one of the handsomest and most attractive trade publications that has come to hand this season. It is published by the Parry Mfg. Co., Indianapolis, Ind., who are known the world over as makers of high-grade buggies. It is printed upon heavy paper, with covers and type in colors, and contains a large number of full page illustrations. Some of the departments which it contains are described under these headings: Buggies, carts, extras, park wagons, phætons, road wagons, spring wagons and surreys. A full page illustration of their extensive plant at Indianapolis is also presented.

"Tools to Work With." This new catalogue is described as "A book describing some things which help to make life easier for the retailer." It consists of thirty-two pages, describing some of the best things in store fixtures under the head of "Tools." Part II. is devoted to advertising novelties; Part III. to books in which retailers might be interested; Part IV. relates to the information bureau. The catalogue is well gotten up, nicely illustrated and seems well designed to interest the retailer. It is more especially intended for grocers and general merchants, and to them it will appeal with special force. It is very nicely printed by the Electric Press of this city. Sent to any address by E. N. & F. J. Root, No. 143 Chambers Street, New York City.

The Ericsson Telephone Co., manufacturers and importers of telephones, switch boards and telephone supplies, who have been located at No. 20 Warren Street, have removed to No. 296 Broadway, New York. The officers of this company are Landon P. Smith, president, and John F. Hemenway, secretary and treasurer, who are members of the Smith & Hemenway Co., located at the same number. The Ericsson Telephone Co. have issued an attractive little catalogue preliminary to a larger catalogue which will follow at a later time, in which the line of goods manufactured by them is fully shown in illustration and description. The Ericsson telephone, with all the needed equipments and accessories, is set forth in unusual detail, with prices, sizes, etc. This catalogue will be sent to those who are interested in using or handling this line of goods.

The Erie Specialty Co., Erie, Pa., have issued their catalogue for 1899, and a handsome specimen it is of the compiler's and printer's art. They announce that owing to the constant change and additions to their goods they have adopted this plan of an annual publication. It shows their full line in illustrations and descriptions, covering their cork pullers, cork screws, soda spoons, lemon squeezers, candy hammers, shakers, ice shaves, ice crushers, ice picks, toilet paper holders, tobacco cutters, cigar cutters, cigar lighters, etc. In a note of introduction the company say: "Our former policy that has made our firm and goods so well known in every part of the globe will be strictly adhered to, viz.: The very best goods that skilled workmen and modern machinery can produce, the courteous treatment of every patron, however small the order, and perfect satisfaction guaranteed with the goods we furnish, we manufacture no seconds or job lots; every article being made as good as it is possible to make it."

The United States consul at Yokohama makes a report to the government in which he states that of the 320,000 kegs of nails exported annually, nine-tenths came from the United States and the remainder from Germany. A local factory established in 1897, now turns out about 32,000 kegs annually, and the product is not much inferior to the imported product. The local management is handicapped by the fact that a Japanese mechanic can only do about one-third the work done by an American, and in strength one American can lift the same quantity that requires two Japanese.

HARDWARE TOPICS BY THE WAY.

A Cleveland salesman sends in the following report from Kansas: "The outlook is the very best throughout Kansas, especially the wheat-growing and cattle raising districts. There is nothing left of populistic pessimism, and the last of Coxey's army recruits has either gone to work or war. The bankrupt land-owner and mortgage ridden tenantry have been superseded by the jolly, dollar-jingling agriculturist who is willing to buy everything in sight that would improve his lot, and can pay on demand. There has been more modern farm machinery, farm tools and other agricultural Hardware dumped into Kansas during a twelvemonth than during the old boom times, and no one seems afraid of his money."

There is a place in a Southern "drytown" bearing the sign, "Red Paint For Sale." Investigations proved it to be a pseudo liquor store. The little kegs, instead of being filled with white lead and such, contained liquor.

The automobile will add new laurels to Cleveland's industrial history, with the Winton invention as the avant courier. There is no doubt of the horseless vehicle deplacing at least 25 per cent. of business vehicles now in use, especially in delivery and truck service, within two years. The primary cost of introducing the automobile is the chief drawback now since its practical success has been attested. For pleasure purposes, ruling prices make it accessible to the wealthy only. Evolution will remove this drawback, and it will come fast, if we may take cycle history as a criterion. Indeed, the entire Hardware trade is now interested in the future of the automobile.

A Western dealer fills his advertising space with the following: "The anti-spitting ordinance will soon go into effect. You will have to carry your own spittoon around with you. Street cars will probably be supplied with racks, to be used for private spittoons, probably patterned after the barber shop mug racks. We are considering putting in a line of monogram spittoons, and invite your suggestion. Our clerks who are not busy chasing flies and dust, will gladly serve as advisory committee."

Every day we meet from one to several salesmen who have lost their usefulness through the economical regime of some trust. Young men whose brightest ambitions have been crushed and men who have grown gray in the harness. The latter are objects of our commiseration, for their chances of rehabilitation in the commercial world have grown very slim. Every employer wants young blood; the old trabants are cast ruthlessly aside. Men of the grip, be provident! Look out for the rainy days which are always seasonable in this trust era. Verily the travelers' associations are now fulfilling a divine mission. They are the good Samaritans of the discarded traveler.

The iron market is still soaring, and its associate, the Hardware market, soars with it. It's become too light as a drag. Activity, everlasting business, night and day hustle, is the true aspect now. No one seems to borrow trouble. Politics is of no consideration, though we are on the eve of another presidential year. If there is anything to disturb the equanimity of the trade at all, it's the report of some new trust appearing on the horizon. But trusts are to be dealt with in the future. We are doing well enough at present by ignoring them.

The foundry men organize everywhere. The Hardwaremen are organized, and regard their followers with complacent interest.

Trust or no trust, the Hardware jobber is a commercial fixture than which there is no equitable substitute. The combines that have tried to do business without the jobber have come to the conclusion that it cannot be done with unvariable success. They might establish their own distributing agencies and resort to all manner of uncommercial methods, but the Hardware jobber continues as the popular medium. The trust that undertakes to humiliate the jobber in order to render him subservient to its interests, will sooner or later fall of its own pride. The trust has no better friend than the jobber. To cultivate this friendship is the policy of the trust that desires to live.

In 1897 the production of iron and steel nails was 8,997,245 kegs of 100 pounds each. Last year it was only 7,418,475 kegs. This is a simple trust lesson. It will be still more frappant in the years to come.

The bicycle stand has become a great desideratum, and the demand is now regular. Evolutions in this device have been fast and furious, and the rivalry in its manufacture is almost as keen as in cycle manufacture itself. The latest approved model is a stand provided with a space for an advertising card. Among these, the device of the City Forge & Iron Works, of Dayton, O. takes a very creditable place. it seems, to judge from its wide distribution.

The trade in lawn mowers, garden hose and accessory lines has been very active this season, the volume booked thus far exceeding any previous record. It may be added, that Hardwaremen have done very little advertising, and bargain features are almost exclusively confined to the department stores.

Formerly it was, "Trade is too dull to advertise." Now it is, "We are too busy to advertise." Which of the two statements is the more reprehensible? The professional advertiser would probably say, "Both are ridiculous." One of Wanamaker's precepts fits this case admirably: "When business is dull, you must advertise; when business is good, you should advertise. You can never do enough business, nor should you ever miss an opportunity to do business. If opportunities are scarce, you can create more by advertising."

Said a trust president: "We invite newspaper attacks. They advertise us. Since the newspaper and trade press have made us a popular topic, we have been able to cut off $100,000 worth of advertising contracts without reducing our sphere of publicity. Why, this contingency of getting free advertising was a primary consideration in forming our trust."

From an ad: "We have no bonus stoves. We never give anything away, if we can help it, and never undersell anything, for we are in the business for profit only. But we need the space occupied by outseasoned stoves for refrigerators. We therefore make you this proposition: Help us to get rid of our refrigerators, and the stoves can stay where they are; or, anticipating the stove season, and the refrigerators will soon have room. We can't cut prices on the stoves, but we shall furnish every buyer with a ton of adaptable fuel free of charge. See the inducement? If you buy our refrigerators, we won't even furnish you with a pound of ice."

There is a Hardware store in a Colorado town painted in the colors of the rainbow, Joseph's coat and the Highland costume. It's a typical "Colorado" store. Over the door hangs the sign, "Don't push up against us. Our paint sticks. Just walk right in. We always have your color and tattoo. The man whom we can't please in colors would come out of the Colorado river as clean as castile soaped."

Cleveland, O., June, 1899. JOHN B. RINDFLEISCH.

Revised List of Files and Rasps.

Herewith will be found the complete new price list of files and rasps recently adopted by the file manufacturers of the United States. This new list, while adjusting some irregularities in prices previously established, shows an average advance over previous prices of over fifteen per cent. The increasing cost of material, and the necessity for carrying large stocks of the same, have made it necessary to make advances which have not previously formed a feature of the file market. The trade should act in this matter with a confidence in the maintenance of the new price list, and not throw away the positive advantages which changes in price on so extensive a line should invariably bring to the stock on hand.

Frank D. Carr & Co., general Hardware, Farmington, Iowa: "Cannot do without *Hardware.*"

FILE MANUFACTURERS ASSOCIATION OF THE UNITED STATES — SEAL

PRICE LIST OF FILES AND RASPS

ADOPTED BY THE

File Manufacturers Association of the United States,

AS THEIR SELLING LIST PER DOZEN,

To take effect on and after June 1st, 1899.

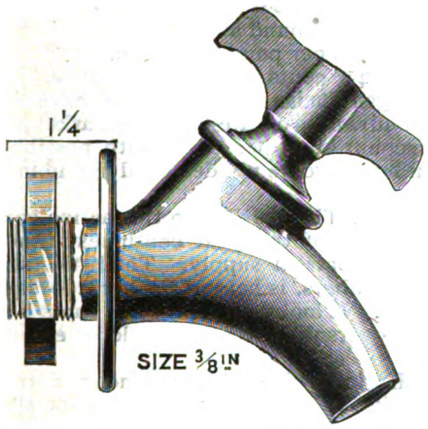
NEW GOODS AND SPECIALTIES.

White Mountain Ice Pick.



The Nashua Iron & Brass Foundry Co., Nashua, N. H., Allerton-Clarke Co., No. 79 Reade Street, New York, agents, are placing on the market the very seasonable article

which we illustrate herewith. It is marketed under the name of the White Mountain Ice Pick, having a fine steel pick, with a hammer head of malleable iron to give the necessary impact to crack the ice properly. It operates without springs, the head running freely on the steel wire forming the pick. The whole article being handsomely nickel plated, makes it a rustless, unbreakable, handy tool that should be welcomed in every household.

The Game Cooler Faucet.

The popularity of the Game can faucet has led to its being adopted for water coolers and filters. The new faucet, which is made by J. M. Litchfield, No. 458 Quincy Street, Brooklyn, N. Y., is shown herewith. It has been adapted for the new purpose by lengthening the shank so that it is

now 1¼ inches long, with a long thread and a hexagonal nut. Already the new faucet has been quite extensively used for filters. A new nickel polish finish has been adopted for the Game faucets that is well suited to water coolers. They are of the ⅜-inch size, and well made in every particular, so that they work smoothly and are capable of long service without leaking. Another attractive feature is the low price at which they are sold.

Patent Clothes Line Reel.

The patent clothes line reel here shown is manufactured by the Burr-Fesler Co., Batavia, Ill. In Fig. 1 it is shown

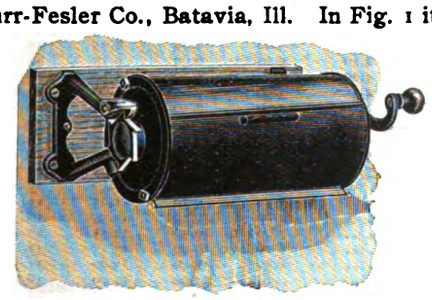


FIG. 1.

closed; and when opened, in Fig 2. In description of the same, the manufacturers call attention to the fact that drum is made of galvanized iron, the castings are non-rustable, the board is of hardwood, and the whole affair is thoroughly and artistically japanned. The manufacturers further say: "The Reel is simple, strong and durable. It is fastened to any substantial support (building, post or tree) by means of accompanying screws for the purpose. Open

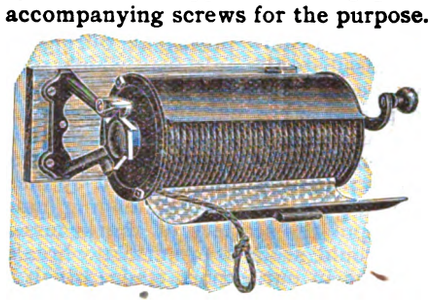

FIG. 2.

the door, draw out the line to the hitching point and then by means of the crank draw to the desired tension. When you wish to take down your line, lift the catch on left side of reel and wind the line into the case, shut the door and it will then revolve sufficiently to bring the door to the lower side of the case, making a perfect protection from all kinds of weather. It will save work, worry, wear and tear, and always keep your clothes line dry and clean. Since patent clothes dryers, patent clothes horses and their like have had their day, the old reliable clothes line again predominates, with its necessary evils, such as putting up and taking down each week; frequent washing, or have the clothes all streaked with dirt, and if by accident or neglect it gets wet while attached to its fastenings then the inevitable shrinking and breaking to say nothing of the rotting of the line. To woman in particular this reel will be a great benefit, it will save her worry and work, she will always know where her line is, and that it is clean, and will be able to put up and stretch her line without waiting for the men folks." Agents wanted in every county.

Death of John G Lane.

John G. Lane, a member of the Lane Bros. Co., Poughkeepsie, N. Y., died at his home in Philadelphia, some days since, after several weeks of illness, which had been preceded by poor health for the last two or three years. The firm of Lane Brothers came into existence in 1866, although John G. Lane had been engaged in the conducting of that business for some years prior to that time. The business was first located at Swift Mills, but was removed to Poughkeepsie in 1882, in order to take advantage of improved transportation facilities. The company are known the world over as manufacturers of barn and parlor door hangers, and of other articles in connection with the Hardware trade. Mr. Lane was a man of sterling character, of wide general information and of social qualities, which won for him a large circle of friends in all parts of the country.

The following announcement was made by the Russell & Erwin Mfg. Co., under date of Dayton, Ohio, June 1st, 1899: "On and after June 1st, this factory (Dayton Screw Co.) will be operated and known as the Russell & Erwin Mfg. Co. (Western Factory), who, in fact, have been the sole owners since 1885."

If you need exercise and haven't a wheel, get out in the street and dodge those who have.—*Exchange.*

REVIEW OF THE MARKETS.

Hardware: The constantly increasing prices on iron and steel material, give abundant evidence that there will be no retrograde movement in regard to prices on Hardware for fall trade. The principal trouble on most of the important staples, will be of the same character as prevailed during the spring; inability to obtain a full supply of goods, even after ordering them. There is a well defined demand for manufactured products already developed for Fall trade, provision for which must soon be contemplated if not already in hand. The stocks throughout the trade centers have been extensively drawn upon, even though they were in many cases abnormally large when compared with previous seasons. This fact will have the effect of making early orders prevalent during the summer months, and dissipate the only fear which some manufacturers have been harboring, that when the Spring rush was over a period of comparative inactivity might follow. The increasing demand from abroad, even under conditions consequent upon advancing prices, is of a most gratifying character; this is greatly assisted by the corresponding advances in price in the other leading markets of the world, based upon the scarcity of the necessary raw material. This would seem to promise no break during the rest of the year in our export trade, which is extremely promising and indicates increasing prosperity.

Wire Nails: Since our previous issue the American Steel & Wire Co. have advanced the price of wire nails 25 cents a keg, to go into effect from June 1st. This is simply in sympathy with the advancing conditions of the metal market, and has been anticipated by the trade to a great extent. The present quotations are therefore changed to read as follows, f. o. b. Pittsburg:

To jobbers in carload lots	$2.35
" in less than carload lots	2.37½
To retailers in carload lots	2.45
" in less than carload lots	2.55

The demand has continued with considerable activity, and less disposition to cut the current rate than was noticeable earlier in the season. New York prices are represented by the following:

To retailers, carloads on dock	$2.60
" less than carloads on dock	2.75
Small lots from store	2 85

Cut Nails: Keeping in harmony with the advance in price on wire nails the market on cut nails has been made the subject of an advance of 15 cents a keg. Quotations are now made f.o.b., Pittsburg, as follows: Freight being added to make a net price delivered at destination.

To jobbers in carload lots	$2 00
To " in less than carload lots	2.05
To retailers in carload lots	2 05
To " in less than carload lots	2.20

New York business is quite active under advanced prices, quoted as follows:

Carload lots on dock	$2 20
Small lots from store	$2.35

Barb Wire: An advance, to date June 1st, was announced by the American Steel and Wire Co.; the prices now are represented in the following: f.o.b. Pittsburg:

To jobbers in carload lots, Painted	$2.45
" " Galvanized	2.95
" in less than carload lots, Painted	2.47½
" " " " Galvanized	2.97½
To retailers in carload lots, Painted	2 55
" " Galvanized	3.05
" in less than carload lots, Painted	2.65
" " " " Galvanized	3.15

Smooth Wire: The same advance noted above also affects the current quotations of smooth wire, advancing previous prices 25 cents, and which are noted as follows, f.o.b., Pittsburg:

To jobbers in carload lots	$2 20
To " in less than carload lots	2.22½
To retailers in carload lots	2 30
To " in less than carload lots	2.40

The charge for galvanizing is 50 cents on sizes from 6 to 14 inclusive: on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Business is in the highest state of activity and complaints are constant that prompt delivery at dates specified are not always obtainable.

Files: We present on another page the new revised price list of files and rasps, adopted recently by the File Manufacturers' Association of the United States, to take effect June 1st, and which will in future transactions in this important line of goods, entirely supersede the previous standard list. It is stated by the Association that the discounts prevailing previous to June 1st will in every case apply equally the same to this new list, subject, however, to change without notice. The changes in list prices at this time are considered absolutely necessary on account of continued advances in the price of steel, as well as the general upward tendency in the cost of labor. They also suggest as important facts, that "the scarcity of raw material, and the unsatisfactory prospect of improvement in this respect, should impress the trade with the fact that a wise business policy calls for the realization of this advance on stocks in their hands, rather than to part with them at concessions in price, when the ability to replace them is uncertain."

Augers, Auger Bits, Etc.: The supply of these goods during the season has been backward from various causes, usually the inability to obtain the necessary material to enable prompt shipments to be made. Prices have been advanced at various times during the season, and the market may now be considered as ruling at a discount quoted by the manufacturers for common spur pattern of 70@70&5%, and for Jennings' pattern, 60&10%.

Picks, Mattocks, Etc.: In common with many lines of goods, which for a long time previous have been sold at unprofitable quotations, the price has been stiffening materially since the manufacturers agreed upon concert of action, and they are now quoting at 60&10% discount.

Shovels and Spades: The combined manufacturers of this important line of goods, on account of the increasing cost of material, have advanced the price of their product 50 cents per dozen over prices previously prevailing. Labor conditions more favorable for the workingmen, also exerted an influence in this increase in price. Prices generally through the jobbing trade seem to be well sustained with less disposition than usual to cut current quotations.

Coil Chain: Under date of May 26th, the manufacturers of coil chain have agreed upon the following prices which apply to quantities less than carload lots. Terms, net cash, f.o.b. Pittsburgh:

3-16 inch	Cents per pound,	7 50		11-16 inch	Cents per pound,	3.55	
¼ "	" "	5.65		¾ "	" "	3 50	
5-16 "	" "	4.65		13-16 "	" "	3.50	
⅜ "	" "	4.00		⅞ "	" "	3 40	
7-16 "	" "	3 85		15-16 "	" "	3.40	
½ "	" "	3.70		1 "	" "	3.40	
9-16 "	" "	3.65		1 1-16 "	" "	3 40	
⅝ "	" "	3.55		1⅛ "	" "	3.40	

B. B., 1¼ cents per pound advance.
B B. B., 1¾ cents per pound advance.
Dredge Chain, 4¾ cents per pound advance.

Trace and Wagon Chains: These goods have been subject to several advances of late until the market is now held firmly at a discount of 60 per cent, with possibly a slight concession on large orders not designed for immediate delivery.

Green Wire Cloth: The market on this active commodity, which at this season of the year continues in such steady demand, is almost bare of supply. The little, still in the hands of a few jobbers, is held at $2 per 100 square feet, and even higher. It looks very much as though the market was largely oversold, and sales would be extended later that usual.

Philadelphia Eagle Carriage Bolts: Under date of May 24th, a revised list was adopted by the associated manufacturers of Philadelphia Eagle carriage bolts. The change in list prices applying particularly to the ⅜-inch bolts. The discount allowed on the new list is 80 per cent., which carries with it the customary freight allowance. The Union Nut & Bolt Co., No. 107 Chambers Street, New York, issue the new list, which is as follows:

PHILADELPHIA EAGLE CARRIAGE BOLTS.—Price per 100.

Length.	3-16 & ¼	5-16	⅜	7-16	½	9-16 & ⅝
1	$3.00	$4.00	$5.40	$7.30	$9.50	.....

Agricultural Wrenches: The leading manufacturers of this grade of wrenches have agreed upon an advance on this line of goods; which makes the prices to the retail

Digitized by Google

trade quoted at 75 & 5 per cent to 75 & 10 per cent. discount.

Wrought Nuts: The advanced prices, noted below, have been agreed upon by the associated manufacturers of these goods, and the following quotations represent the market:

Hot Pressed Nuts, Square	Off List,	Cents,	5.50
" " Hexagon	"	"	5.75
Cold Pressed Nuts, Plain, Square	"	"	5.20
" " " Hexagon	"	"	5.30
" " C. T. & R. Nuts, Square	"	"	5.20
" " " " Hexagon	"	"	5.80

Wrought Washers: The manufacturers have also advanced the prices of wrought washers and the regular quotation is now 5½ cents off list. For a large specification this price, possibly, might be shaded a trifle.

Casters, Martin's Patent: Are now quoted at 50 & 10 to 60 per cent. discount.

Hay Knives: Nolan's, "Lightning Pattern," have advanced in price to $5.75 per dozen.

Window Stop Adjusters: Hobart B. Ives & Co., New Haven, Conn., have advanced the price of their window stop adjusters 10 per cent.; the advance took effect May 18th.

Binder Twine: The market for binder twine is at the present time fairly quiet, and prices remain about the same as previously quoted, being represented by the following:

White Sisal, per pound	9¼@9½ cents
Standard, per pound	9¼@9½ "
Manila, per pound	10@10½ "
Pure Manila, per pound	10½@10¾ "

Linseed Oil: Under date of May 31, 1899, the Dean Linseed Oil Co. quote as follows:

In lots of less than 5 barrels	40 cents per gallon.
In lot of 5 barrels or more	30 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE CLEVELAND TRADE.

In the beginning of this century, in fact fifty years ago, in almost every village was a carpenter shop a tin shop, shoemaker and tailor. Many of the farmers could do all this kind of work, and the wives spun the wool and flax, colored and wove the yarn, cut and made the clothing, knit the stockings, made soap and candles, kept the home and cared for the babies.

When we remember the improvements that have come and the manner of living through division of labor, and reflect upon the innumerable number of articles that we have not that would add to the comfort, convenience and pleasure of the people, there would seem to be little cause for alarm that consolidations and combinations will deprive the people of employment.

If what is useful can be provided with less human labor, it would appear to be cause for congratulation rather than alarm. If the things we need require less labor to produce, the surplus labor will be utilized to provide luxuries that we have been deprived of, because all our time has been required to produce necessities.

Unless the public are better served by large manufacturers they cannot succeed. A nailmaker was replaced by a machine; the stage coach by railroads; the sickle, scythe and cradle by the reaper; the country saw and grist mill by improved methods, and all these changes have been in the line of progress.

A past so crowded with lessons ought to suggest courage for the future. Combinations will surely fail unless they are an improvement upon what they displace. This law is as inexorable as the law of gravitation. It will punish every infraction; it is as sacred as the moral law. There is no monster that can engulf the people.

Nothing is more sensitive to public opinion than capital. It must for its own protection serve the people. A recent decision of a United States judge that the power conferred on a corporation by one State does not confer it in another, is suggestive. No successful attempt is likely to be made by capital to defy public opinion. Throwing people out of work has been used as an argument against every step of progress, and facts have continued to answer it. Success in business depends upon power to serve; greatness in the kingdom of earth, as in the kingdom of Heaven, comes from service, and the good or bad of combinations depends upon this.

It is so popular to condemn combinations that a trade journal may well afford space for a question of such importance. Consolidation and combination as an experiment may be a mistake, but if so, it will be the people that invest in them that will suffer. In a government by the people we can afford to wait until our rights are invaded. If combinations are successful for their promoters, that they will prove a public benefit would seem to be inevitable.

Consolidations are the logical result of the cruelty of competition that reduced prices so low as to make it an imperative necessity for manufacturers to reduce the labor of their employees or close their works.

If it shall enable them to pay American wages and meet the world's market with their products, we should be content. The outcry and denunciation is in keeping with the opposition that has been expressed against almost every step of progress.

Politicians will do well to make haste slowly, lest they shall be found fighting against the interest of those that party platforms are made to conciliate.

Everybody hoped we would not, and few believed that we would have a boom. Business men and manufacturers tried to prevent it—a large majority of them declined to advance prices until they were compelled to do so. Evidently the boom was not produced by speculators. For the last month a very strong conservative feeling has influenced wholesale merchants, actual demand has forced them to make purchases, as their stocks were depleted and had to be replaced.

Manufacturers have been compelled to purchase new material. The facts are, the demand has created a scarcity and compelled an advance in price. The price has become secondary if the goods can be furnished promptly.

More orders have been declined or accepted subject to ability to fill, and more quotations made subject to change in price in the past month, than for many years previous. This has been the only safe way to do business.

Many orders taken for March and April shipment are not yet shipped, but the retail merchant fails to write, "Ship my order at once or cancel."

We must wait for the next chapter.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE BOSTON TRADE.

We are still in the midst of the busy season and orders received from our travelling salesmen indicate that the retail trade is in a prosperous condition, judging from the

quantities and assortments of goods they are buying. It is almost impossible to get certain lines, orders for which were even placed early in the season in anticipation of present demand, and the trade seem to accept these conditions with good grace and are willing to make such substitutions as they think will be accepted by their customers.

Very little surprise was manifested in the recent advance of shovels, files, cut and wire nails. The changes in prices are being fairly well maintained, but basing the actual cost of the goods to-day on the prices at which they are being sold, the jobbers are realizing a very small margin of profit.

Builders' Hardware is moving freely, and the demand in this line is far in excess of last season. This is particularly noticeable at the seashore resorts, and a large number of cottages are being built and improvements made which were postponed last season owing to the war scare.

The long continued drought will have an effect upon certain lines, and reports from all parts of New England show that many of the crops will be a failure.

FRYE, PHIPPS & CO.

THE DAVENPORT TRADE.

Rainy weather; prices still going up; the higher they go the farther they will fall some day. Volume of trade, which is made up of general Hardware and seasonable goods, about the same as last year and collections are better. Speculative buying has ceased.

Captain Blair has added another steamer to his fleet, furnishing a daily packet each way between Davenport, Muscatine and Burlington.

The Iowa Hardware Jobbers will hold their regular annual meeting at Des Moines on June 7th. Hope they will devise ways and means for making some money during the closing years of the century.

We thank *Hardware's* retiring contributor of Kansas City for kind and complimentary words to his fellow trade reporters. May his star continue to lend its literary light and joy wherever he may be.

SICKELS, PRESTON & NUTTING CO.

THE BALTIMORE TRADE.

Industrial stocks may decline, the last cool wave of spring pass away and be followed by an area of high temperature sufficient to boil the energies of most men, but the iron man—the man with iron nerve—remains invincible. So far each month this year there has been a large record of advances, and June ushers in a new file list, an advance of 50 cents per dozen net on shovels and spades, further advances on Lull & Porter hinges, wire and cut nails, barbed and other wires, etc.

We would like to call a halt and stop this arbitrary and rapid rise in values, which we fear will some day drop like a balloon losing in high air its buoyancy of gas, causing it to succumb to the attraction of gravitation and tumble to earth.

The strongest anti-trust movement will likely be direct competition, and encouragement in this direction is becoming daily more apparent.

Small trade with us is much affected by the high prices now ruling, and orders are small in consequence. Many of our customers who purchased in large quantities in order to secure themselves against advances, are exceedingly slow in their payments and find collections hard to make. They are dependent upon the success of the farmers whose crops will shortly be in market.

The potato and tobacco crops are good, and if profitable prices are realized a good fall business is assured. We are moving as many goods as usual at this time of the year, but as this is our off season we are giving our men their customary vacations. H. W. WEBB & SONS.

THE COLUMBUS TRADE.

We have had fine rains since our last letter, and it has made thousands of dollars for the farmers. The Hessian fly was playing havoc with the wheat in some parts of the State, and the cool, dry weather that continued through most of May was hard on the meadows, so the hay crop will not be good. Still the farmers are in pretty good shape, and no doubt the crops will average up about as usual at the final wind up.

There have been some very sharp advances during the past week—wire and nails, shovels, files and lanterns. We have been expecting files and lanterns to advance as both of these articles have been too low, but another advance on shovels seems unnecessary. The same is true of wire and nails. These high prices cannot stand long, and the manufacturers will have to suffer from new competition before many months. The inducements for starting new factories are very great, and while some combinations apparently have control of the raw material now, we do not believe it can last long. It is well known that all these consolidations paid about three times the value of the different plants they purchased, and they think it the proper thing to make the consumer foot the bills. Consumers are doing this under protest, and will not use any more goods than they are obliged to. We know the sale of fence wire has dropped off considerably, as farmers will not build new fences if they can patch up old ones. Trade continues good and collections fair. SMITH BROS. HARDWARE CO.

THE MANCHESTER TRADE.

As regards business: there seems to be but one report, good business and fair profits. Cheerfulness seems to reign.

There is one matter that has given us much thought lately, and that is the new movement, charging by the banks for country checks. The customers of the banks are, I believe, generally large depositors, receiving no interest on their deposits, and the only benefit that I can see given them in the past has been receiving their checks on deposit as cash. Every well-conducted bank has been making money, and this move only tends to increase their profits at the expense of the depositors.

We have received several letters from a concern calling itself the National Association of Credit Men. This concern has advocated strongly this new move of charging by the banks for collection of such checks, and then have the assurance to invite us, and I suppose many others situated as we are, to join. We have paid no attention to their circulars, dropping them in the waste basket, but the last one seems to us the height of cheek and impudence, really threatening to boycott us unless we send ten dollars and join the association. The following is the resolution:

"Whereas, this association by practical, progressive and methodical efforts is endeavoring to improve credit conditions and trade customs, and

Whereas, The results achieved redound to the advantage and profit of the entire business community, thus meriting general co-operation and support, therefore, be it

Resolved, By the National Association of Credit Men in convention assembled that the members of this Organization be requested to decline trade references to those houses who do not indicate on their stationery that they are members of, or who are not known by other means to be identified with, this Association."

Their own statement shows them to be financially in a sad state and only to be improved by attempting to force merchants to join.

From our point of view we can only see that it benefits such officers as receive a salary and no benefit to arise to the people who make an annual remittance of ten dollars to help the association out of trouble.

JOHN B. VARICK CO.

THE ALBANY TRADE.

We report an excellent trade. Orders are coming in freely, and customers are in a hurry for goods. The higher prices now prevailing on many leading goods do not seem to check business, which is evidence that material is being used by artisans and mechanics.

Building shows considerable life in this section, and in fact all branches of business show quite an impetus over the period a few months back.

The change of the weather to a warmer condition has

drawn quite freely on season goods, and the dealer who has a good stock from which to fill orders promptly is to be congratulated.

The recent advance in wire and nails seems to be accepted as necessary on account of the scarcity and increased cost of raw material. A little complaint was heard when the change was first made, but this soon passes away, and dealers and consumers are using all material freely.

It is evident that quite a number of lines have not yet advanced in proportion to increased cost. It seems safe to buy for wants that will extend into the future for a few months at least.

Collections are improving and there is much less complaint in this department than heretofore.

ALBANY HARDWARE & IRON CO.

THE PITTSBURG TRADE.

The last few days of May were not quite so busy as the earlier part of the month, but June opens with a very good business doing. The daily advances are in most cases very cheerfully paid by the retailers, although there are some grumblers.

In the present condition of the pig metal and billet market even conservative manufacturers are forced to advance prices, to come out even, and so far as we can judge, the world's appetite for iron is still very good and shows no signs of abatement for a year ahead.

It would seem wise to keep full stocks of all goods to be had, which have as yet advanced but little. Any merchant can tell what these items are by looking over his bills for the past six months.

Bicycles and sundries are selling well, the employees of this district having more money to invest in pleasure than for several years. LOGAN-GREGG HARDWARE CO.

THE OMAHA TRADE.

The volume of May business was considerably in excess of anticipations, and June bids fair to reach even larger figures than May. The advance in price seems to make no difference in the volume of trade, yet we all of us realize that rapid and radical advances are only hastening the day of equally rapid and radical declines. It is particularly unfortunate for all parties concerned that the markets could not have been held down to a more moderate basis. Yet all that can be done under present conditions is to make the best of the situation as it exists and to hope that when the decline starts, it will not go as far below the average as it has gone above it. A great deal of difficulty and exasperating delay exists in securing anything like reasonably prompt deliveries from the factories and under the circumstances, of course, jobbers are compelled to largely anticipate their wants and provide far in advance for the requirements of their trade.

RECTOR & WILHELMY CO.

THE ST. PAUL TRADE.

The first half of the year 1899, which is now drawing to a close, has been remarkable in many ways. The oldest inhabitant will not hesitate to say that he has never before witnessed its like. For some years previous to the advent of this year, a condition has existed in the Hardware world that was wearisome to the spirit and trying to the souls of men, almost beyond endurance. In many instances, profits disappeared after the goods were purchased and before they could be placed on sale, owing to the decline that was continually taking place. The buyer looks back as to a "horrid dream" to those days when his chief anxiety was to get such protection in his purchases as would warrant him in anticipating his wants for a reasonable length of time.

H. H. MAYHEW CO.,

SHELBURNE FALLS, MASS., U. S. A.

With the coming of this year, a "change came over the spirit of his dreams." The conviction was carried seemingly in the air, that higher prices would prevail, and the anxiety now was to place orders. The buyer feels and enjoys the stimulus resulting in the knowledge that he is not only insured a fair profit on his purchases, but something beyond, which will, in some measure, compensate for past declines. During the past months of the year, this condition has existed, and looking into the remaining months, we think we can see indications of its continuance. We rejoice in the knowledge that these advances in prices are distributed to all classes of people; that labor is getting its full share of this prosperity, as well as capital. With this condition existing, ought not all to be well satisfied?

Business in all lines seems to be very active. An unemployed man is the exception, not the rule. The reports from all parts of our territory are that there is a great increase in building operations, thus stimulating the movement of builders' Hardware.

In regard to seasonable goods, such as painted wire cloth, screen doors, lawn mowers, steel goods, etc., the same condition exists here that, as we learn from market reports, exists in other localities, and that is, that there is a great scarcity, and many orders for the same are necessarily passed. The new prices on all lines, as soon as published, are put into effect by the jobber. Retailers, also, as a rule, are disposed to take in advances on stock on hand. It goes without saying, that this is as it should be.

In most of the wheat territory tributary to us, the weather has peen very favorable for this great staple, having been cool, with plenty of rain, and everything now promises a good crop. The season has been a little backward for corn, but a large hay crop is anticipated.

All things considered, the outlook could not be much improved. C. W. HACKETT HARDWARE CO.

THE GRAPHITE TRADE.

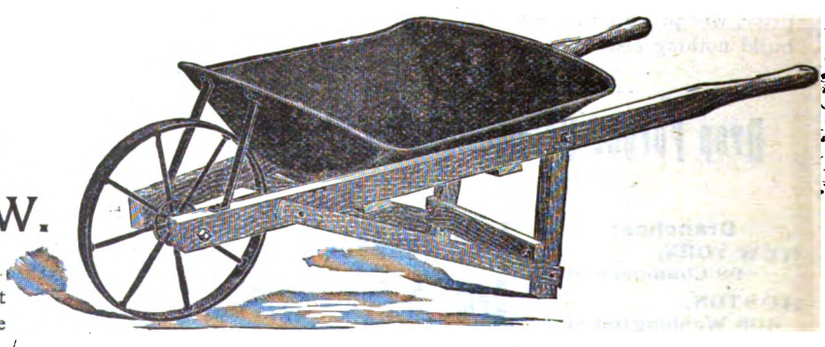
If the editor of *Hardware* will gather around him the "twenty-four busy and prominent men who are finer, brighter, more interesting and capable than the representatives of any other trade who find time to let the world know through his influential paper what is being done by and for the Hardware trade through this country," they could sit around after having done justice to the dinner which he would provide for them, and tell more fairy stories than otherwise could possibly be secured. The advantage would be that talks would be offhand and founded upon the actual facts of business and experience, and divested of the formality influencing articles which must be written for the public eye and criticism.

The phenomenal business now being done in graphite products is almost too great a subject to be formulated into a letter. Your readers would be more apt to appreciate its truths if accompanied by other truths from other branches of the Hardware business.

For instance,—we shipped one day last month two carloads of goods to Australia, stove polish, pencils, crucibles, axle grease, pipe joint compound, graphite paint and lubricating graphite making up the invoices.

Last week we were compelled to decline a large order for special pencils, because they were required by the middle of July.

Six thousand gross of pencils were shipped abroad on two orders. Eight tons of silica-graphite paint to a concern in a nearby city, and so on.



Crude graphite still continues high in price with a prospect of an advance, but we will not revise our catalogue until necessary.

Invoices received in our purchasing department bear in a number of instances the supplementary stamp, "Prices subject to change without notice." We have been obliged to apply this to some of our own invoices, but would rather not, and advise the placing of orders now for fall delivery. JOSEPH DIXON CRUCIBLE CO.

George H. Sargent, of Sargent & Co., and president of the Hardware Club of New York, will sail on June 24th on the steamship *Saale*, for a two or three months' pleasure tour in Europe. Mr. Sargent will be accompanied by his wife.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Avilla, Mo.—J. J. Stemmons.

Bristol, Tenn. — The Mitchell-Powers Hardware Co. has been incorporated by J. D. Mitchell, H. W. Powers, W. B. Gillespie, J. P. Young, and R. B. Mitchell. Capital stock, $100,000.

DuBois, Pa.—The DuBois Hardware Co. has been incorporated. Capital, $50,000. Incorporators: C. E. Turnbach, R. W. Zerby, DuBois; W. R. DeHass, J. G. Platt, M. A. Elder, all of Philipsburg, Pa.

Grand Forks, N. Dak.—Michael Londergan.

Louisville, Ky.—Articles of incorporation for the Korb Hardware Co. have been filed in the County Clerk's office. The company is capitalized at $10,000.

Red Lake Falls, Minn.—J. A. Bray.

Scotch Plains, N. J.—Louis Moore.

Warsaw, N. Y.—The Ballentine Hardware Co. has been incorporated. Capital stock, $12,000. Directors: William J. Ballentine and Orace V. Emery, of Warsaw, and Charles E. Vandorn, of Rochester.

Wells Bridge, N. Y.—Archibald Sisson.

Changes and Improvements.

Atlantic City, N. J.—The Albertson & Young Co., Hardware and plumbing merchants, have put in another department in their store. They have introduced electricity as a branch, and are prepared not only to do electrical work, but also to furnish all sorts of electrical supplies at short notice.

Bridgewater, N. Y.—James Howes has closed his Hardware store.

Butte City, Mont.—The Dart Hardware Co. have enlarged and otherwise improved their office.

Childress, Tex.—Keck & Bowman, Hardware, sold out.

Colfax, Iowa.—A. A. Brown, Hardware, etc., sold out.

Davenport, Iowa.—Horace K. Newbern, who has a Hardware store at No. 1407 Harrison Street, is building an addition for warehouse north of his present building.

Des Moines, Iowa.—J. A. Garver & Co. of this city have sold their Valley Junction Hardware stock to the O'Dea Hardware Co.

Richmond, Va.—B. Laughon has sold out his large stock of Hardware to Cassell & Pryor.

East Bloomfield, N. Y.—Alex. Davidson of Canandaigua, recently opened a branch Hardware store at this place.

Eastport, Me.—Very noticeable improvements are being made on the outside of George W. Capen's Hardware store on Water Street, and his large tin decorating works which extend along Union wharf. Several local painters are at work.

Elwood, Ind.—DeHority & Wolverton, implements, succeeded by De Hority & Co.

Foster, Iowa.—Anna C. Bixby, Hardware, moved to What Cheer.

Gordon, Neb.—Chas. A. Schrandt, Hardware, etc., sold out.

Grand Rapids, Mich. — The wholesale Hardware firm of the Clark-Rutka-Jewell Co. has changed its corporation name to the Clark-Rutka-Weaver Co. The capital stock has also been increased.

Kalamazoo, Mich.—The interior of the Waterbury Block is being remodeled to enlarge the room for the Edwards & Chamberlin Hardware Co. A fire wall is being built through the middle of the block which will give the above firm half of the entire block, greatly enlarging their facilities.

Livingston, Wis.—C. Lange has sold out his interest in the Hardware store to Mr. Miller, who will take possession immediately.

Louisville, Ky.—Vogt & Oswald, Hardware, No. 215 West Market Street, dissolved; succeeded by B. F. Vogt.

Madison, Ind.—Spaun, Welch & Co., Hardware and implements, succeeded by L. D. Spaun & Son.

Moundsville, W. Va.—W. W. Smith has disposed of his Hardware store on Lafayette Avenue to a party from East Liverpool, Ohio.

Naperville, Ill.—Perry & Co., Hardware, implements, etc., sold out.

Nashville, Tenn.—One of the finest business blocks in the city is soon to be erected by the Gray-Dudley Hardware Co. The building will run through from College to Market Street, and will stand opposite the new building being erected by the Phillips & Buttorff Mfg. Co. The new building of the Gray-Dudley Hardware Co. will occupy a half block, and will be erected at a cost of about $60,000

Oakland, Cal.—Ed Hoerst, a plumber and Hardware merchant of Elmhurst, has rented a store in the Hopper Block and will remove his business to this city.

Old Chatham, N. Y.—Josiah N. Wait, junior member of the firm of Wait Brothers, Hardware merchants, died on the 9th inst. The firm name will continue as heretofore, George N. Wait, son of the deceased, assuming his father's connection with John B. Wait. The firm have been in existence thirty-nine years.

Ossian, Ia.—Kleisart Bros. are getting ready to build a brick addition to their Hardware store.

Panora, Iowa.—Shrock & Zarger, Hardware, succeeded by Zarger & Denton.

Passaic, N. J.—J. V. S. Van Winkle, the Hardware dealer, will occupy the store in the Hemion building now occupied by Charles Rixton, the jeweler.

Peoria, Ill.—The Isaac Walker Hardware Co. are about to erect a big buiding for a warehouse and offices. It will be of brick and terra cotta, six stories high, 50 by 150 feet, and will cost $30,000.

Perry, Mich.—A. S. Olcott & Son, Hardware, etc., sold Williamston business.

Plainview, Minn.—E. R. Cornwell will erect a new Hardware store.

Poughkeepsie, N. Y.—Oscar Cookingham has purchased J. Howard Asher's interests in the Hardware firm of Asher & Co.

Pulaski, Iowa.—Law Bros. have traded for the building occupied by Boyd Bros'. meat shop, and will move their stock of Hardware into the new building in the near future.

Randolph, Vt.—J. J. Trerise is moving his goods from his Hardware store on Merchants Row to the store in Smith's block.

Sidney, O.—Gibson & McKee have moved their Hardware store from the Metcalf building to the Shie building, North Main Avenue.

Southampton, N. Y.—W. C. Gray's Hardware store has been moved to its new site just north of the Reid Building on Main Street.

Superior, Wis.—The Superior Hardware Co. will remove their store to Nos. 1016 and 1018 Tower Street, the new block being erected for them.

Business Embarrassments.

Anderson, Ind.—Mrs. Mary Catlin, Hardware, receiver appointed.

Lucan, Ont.—D. J. McCosh has assigned to Alfred Robinson, of London.

Moberly, Mo.—Bristow Bros., plumbers and Hardware dealers, have made an assignment to Frank M. Clark, for the benefit of creditors. Liabilities are about $4500. It is stated that their assets are over $5000.

New Haven, Conn.—Theodore J. Desser, Hardware dealer, at No. 437 State Street, has made an assignment.

Burglaries in Hardware Stores.

Champaign, Ill.—Miebach & Co., knives.

Crandall, Tex.—Willfawn & Crawford, knives.

Detroit, Mich.—Henry R. Ziegler, $30.

Frackville, Pa.—G. W. Leebold, $10

Freelandville, Ind.—Ernest Weitzel, $150.

Jacksonville, Fla.—Capper Bros., revolvers.

Leechburg, Pa.—J. C. McGeary, $100.

Oregon City, Ore.—Pope & Co., small loss.

St. Louis, Mo.—W. P. Richardson, $100.

Yarmouth, Me.—Griffin & Russell, razors.

Fires in Hardware Stores.

Adairville, Ky.—The Hardware store of R. L. Cunningham has been destroyed by fire.

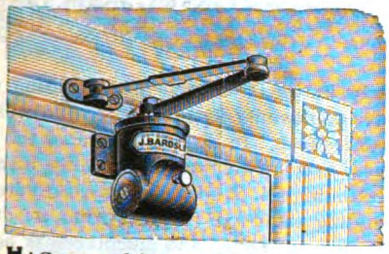
Bellbuckle, Tenn. — Mrs. W. Bowen's Hardware store has been destroyed by fire.

Biddeford, Me. — Geo. A. Anthoine's Hardware stock has been damaged by fire. Loss, $1500.

Kenmare, N. Dak.—T. W. Tasker & Co's. Hardware stock has been destroyed by fire.

Neosho Falls, Kans.—I. M. Baxter, Hardware, damaged by fire.

Parkman, O.—Bundy's Hardware store has been destroyed by fire.



Pomeroy, Ia.—R. Lempke's Hardware store has been destroyed by fire.

Sherbrooke, Que. — Johnston & Foss, Hardware dealers, stock damaged by fire to the extent of $500.

Scranton, Pa.—The Scranton Bolt & Nut Co. has been incorporated; capital, $150,000. Incorporators: W. D. Zehender, Lebanon; W. Connell, Scranton; L. M. Horton, Easton; J. Jemmyn, T. H. Watkins, J. A. Lansing, C. H. Welles, Scranton, and others.

Syracuse, N. Y.—The Automatic Lawn Mower Sharpener Co. has been incorporated. Capital, $50,000. Directors: William R. Kenyon, John McLennan, Peterson E. Jones, Charles A. Dennison, George C. Shafer, Syracuse.

Worcester, Mass.—Loring Coes & Co. has been incorporated to manufacture machine knives and knives for other purposes. Capital, $50,000. Incorporators: Loring Coes, F. L. Coes, Frederick Searle.

Youngstown, Ohio.—The Youngstown Range & Stove Co. has been incorporated by A. L. Pitney, M. Evans, J. O. Pew, G. M. McKelvy and H. W. Heedy, to manufacture stoves and ranges. Capital stock, $10,000.

Changes and Improvements.

Bellaire, Ohio.—The Novelty Stamping Co. are constructing a big addition to their plant to supplant the old buildings at the north side of the factory. The work of erecting the new structure upon the site of the buildings now in use without interfering with the operation of the plant is necessarily rather tedious, but the management expect to see the improvements completed early in the summer. The building will have one twenty-four foot story and will be 100x143 feet. In it will be located the furnaces and the dipping and pickling rooms.

Canning, N. S.—Blenkhorn & Son are rebuilding their axe factory. The new factory is now erected and machinery is being put in position.

Chicago, Ill.—The Falcon Iron & Nail Co. have increased capital stock from $2500 to $25,000.

Detroit, Mich.—The Detroit Tinware Mfg. Co. have sold out to the Standard Can Co.

Evansville, Ind.—The Whitney Hoop & Stave factory, recently destroyed by fire at Mt. Carmel, Ill., will locate here. The plant will cost $100,000 and employ 150 men.

Hastings, Mich.—The International Seal & Lock Co. will rebuild their plant, putting up a 50x100 feet brick building, with a 40-h. p. power plant.

New Britain, Conn.—B. H. Hibbard has been awarded the contract for building two additions to the Landers, Frary & Clark Mfg. Co.'s Hardware works on Commercial Street, and for building an additional story to the building occupied by the forging room. The aggregate contracts amount to $15,000. One of the additions is to be used for foundry purposes and will contain an annealing room, rolling mill, etc. It will be 75x25 feet. The other factory addition will be for the manufacture of general Hardware. It will be a three-story building, 75x35 feet, and will contain two elevator shafts. The work of building another story to the forging room has been commenced, and will be pushed forward as rapidly as possible.

West Superior, Mich.—The Gage Stove Co. plant has been secured by the Inter-State Malleable Iron & Machine Works, of Minneapolis.

Recent Fires.

Chester, Pa.—H. B. Black & Co., axe factory damaged by fire to the extent of $2000.

Massillon, Ohio.—Fire has destroyed between $75,000 and $100,000 worth of property at Russell & Co.'s threshing machine and engine works.

South Dighton, Mass.—The works of the Dighton Stove Lining Co. were almost completely destroyed by fire, with a loss estimated at $20,000.

Miscellaneous.

New York, N. Y.—At a meeting of the directors of the United States Rubber Co., the retiring officers were elected for the ensuing year, and Lester Leland and Charles L. Johnson were added to the executive committee of the company.

Paxton, Ill.—The Hardware Mfg. Co. have received an order from the University of Illinois for the finishing in antique copper of fifty medallion portraits of Lincoln and McKinley. This order follows a sample of their work executed recently, which highly pleased the faculty of that institution.

Tack Manufacturer.

One of the first processes in the manufacture of tacks is that of pickling the Bessemer steel or best quality iron sheets. These sheets are about 16 inches by 36 inches or 20 inches by 86 inches in size, and quite thin. The pickling solution is of blue vitriol, which removes all foreign substances and renders the metal more pliable to work. A bath of hot lime thoroughly dries the sheets. The sheets are next taken to the cutter, where carefully arranged steel knives cut the sheets into any width desired, ranging from ¼-inch to 2 inches; each strip retains its original length. The strips now have jagged edges, but after going through a powerful machine the rough edges are removed, leaving a very smooth surface. The strips are now ready for the tack machine, the knives of which cut the strips into the thickness required. Each little piece of metal as it leaves the knives is forced into a two-sided glove that closes tightly and gives to the tack the point and corrugations which lend to its holding qualities. At the same time a hammer strikes the broad end of the tack, putting a head on it, and it then drops into a receptacle beneath. The tack is now complete, save the placing in a revolving barrel, or tumbler, which gives a bright finish. Blued tacks are colored by heat, and tinned tacks, after being dipped in the metal, having been previously pickled, are riddled and sieved in a circular drum to prevent their "sticking" together.—*Iron and Coal Trades Review.*

"What appears to be the matter with your father?" inquired the doctor, as he hastily put his clothes on.

"He's got the plumbago," replied the boy. "I think that's what ma says it is."

"Pain in the small of the back, I presume," said the doctor.

"No, sir, he hain't got no small of the back. My paw weighs 284 pounds."—*Exchange.*

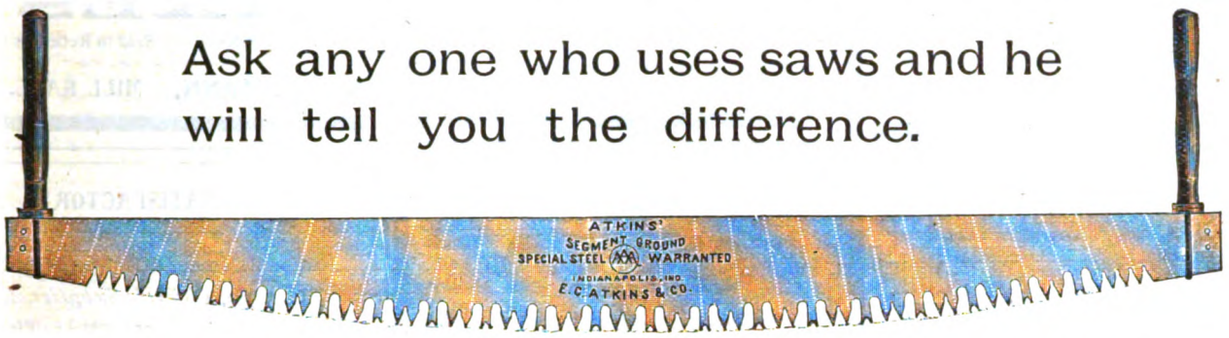
Physical and Accounting Examinations.

In addition to accounting examinations, the charter of The Audit Company of New York authorizes it to examine and report upon the physical condition and economy of operation among others of Electric Railway, Illuminating and other Companies. It also appraises the values of manufacturing and other plants.



Physical and accounting examinations combined afford a correct basis for corporation financing and for valuation of corporate securities or partnership interests.

"A PROFITABLE MEDIUM TO ADVERTISERS."

Gilbert & Bennett Mfg. Co., Chicago and New York. [*Wire Goods*]: You have reason to be proud of HARDWARE's success both as a journal of interest and of usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been steadily published in its columns from the first number, it must be concluded that we have found you a satisfactory medium.

"FOR YEARS."

Henry Disston & Sons, Philadelphia, Pa. [*Saws, Files, etc.*]: Our opinion of HARDWARE is contained in the fact of our having carried an advertisement in your paper for a period of four years.

"TRACE MANY SALES TO 'HARDWARE.'"

Philadelphia Lawn Mower Co., Philadelphia, Pa. [*Lawn Mowers*]: We have been with you for some years, and can trace many sales to HARDWARE's influence.

"ON OUR AD. LIST AS ONE OF THE BEST."

Troy Nickel Works, Troy, N. Y. [*Alaska Stove Hardware*]: You are on our advertising list as one of the best. We will be glad to keep you in this position.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

"BEST INVESTMENT EVER MADE."

Divine Bros., Chadwicks, N. Y. [*Buffing Wheels*]: Our advertisement in HARDWARE was the best investment we ever made in the advertising line.

"BEEN WITH YOU FROM THE BEGINNING."

Union Metallic Cartridge Co., New York. [*Ammunition*]: We have been with you as advertisers from the beginning and expect to continue.

Water	Oxide of Hydrogen
White Precipitate	Ammoniated Mercury.
White Vitriol	Sulphate of Zinc.

To Obtain the Weight of Grindstones.

RULE: Square the diameter (in inches), multiply by thickness (in inches), then multiply by decimal .06363.

EXAMPLE: Find the weight of a stone 4 feet 6 inches diameter and 7 inches thick.

4 ft. 6 in.=54 inch; square of 54=2916; multiplied by 7=20412; multiplied by .06363=ANS., 1298.815 lbs., which is weight of stone. All Grindstones weighing *less* than 200 lbs. are sold at "cut-weight." This is the actual weight over the scales as they come from the lathe (less a fair amount for moisture), and is cut into each stone. All Grindstones weighing *over* 200 pounds are sold by measurement-weight only, rule for which is given.

Hopkins' "Handy Notes and Queries."

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.

CHAMPION MODEL.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight, it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. List, per doz., Enameled, $30.00; Full Nickel, $42.00.

WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for hard wood. The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in hard wood. We have combined two principles in one, and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

THE STOWELL MFG. CO., Send for catalogue. NEWARK, N. J.

The Old Compared with the New.

THE credit belongs to the Welch of first making Roofing plate which has performed so large a part in sheltering humanity for so many years. The old Welch method of making tinplates was an honest one, but it had its crudities and imperfections.

The art of making the best tinplate has progressed, as have all other arts, so that the best product of to-day is superior to that made by the old Welch method. The superiority of the best modern plate lies largely in the thoroughly even distribution of the coating metal over the black sheet. This is an important thing for every buyer or user of tinplate to know.

Messrs. Merchant & Co., Inc., of Philadelphia, New York and Chicago, who have for so long a time made a specialty of the highest grade of plates, have contributed some valuable literature on this material within the last year, viz. their booklet *"HOW ROOFING TIN IS MADE"* and *"HOW A TIN ROOF SHOULD BE LAID,"* but not less interesting and valuable is their latest issue entitled *"NOT JUST AS GOOD BUT ACTUALLY BETTER,"* which minutely describes the difference between their method of making plates and the old Welch method. It will afford them pleasure to mail any one or all three of these little works to any name and address sent them to Philadelphia, New York or Chicago.

THE NEW YORK PUBLIC LIBRARY
ASTOR, LENOX AND TILDEN FOUNDATIONS.

HARDWARE

Mr. C. C. Woodruff, one of the most popular of the Bissell Carpet Sweeper Co's staff was married on the 14th inst. at the Church of the Incarnation to Miss Genevieve Willis, of New York City.

Neal & Brinker, No. 168 Church Street, New York, have been given the agency for New York City for the Wagner Mfg. Co., Sidney, Ohio, manufacturers of the important line of goods extensively known as Wagner Hollow Ware. The firm also represent the company with the export trade.

V. A. Kashenvenikoff and V. Kishewitch, engineers of the Chinese Eastern Railroad, are at present staying at the Hotel Majestic.

They are ordering huge quantities of machinery and supplies, but are experiencing great difficulty in obtaining prompt delivery of same. They have chartered a special steamship which is intended to sail from Philadelphia to Vladivostok in the first week of July. The ship was primarily chartered to carry the locomotives which the Baldwin Works are building for the railroad, and the engineers are anxious to get delivery of as many as possible of their orders so as to ship same by that steamship.

T. W. Williams, Eastern manager of the Bissell Carpet Sweeper Co., has made his home for many years past, during the summer months, at Belmar, N. J., a most delightful spot on the New Jersey coast where he occupies his cottage with his family.

Mr. James L. Pollitt, of the Bissell Carpet Sweeper Co. arrived on the 11th inst. via. Steamship *Marquette* on his first visit to this country. Mr. Pollitt has been instrumental in building up the London business of the Bissell Co. Mr. Pollitt is accompanied by his wife and they will remain in this country about two months, and after paying their respects to the home and New York offices of the company, will visit the leading points of interest in the United States.

It is not universally known that had the allurements held out by early associations in the Hardware business been sufficiently brilliant, the dramatic profession might never have produced that leader among managers, Augustin Daly, who made his final exit from the stage of life in Paris recently. He commenced his business existence as a handler of Hardware, with Windle & Co., who at that time (between 1855 and '58) had in Maiden Lane, New York, the largest house furnishing goods establishment in the city if not in the country, having a store about 75 feet in width and running through to Liberty Street. It is very evident he must have discovered that to the square inch of pay there was about a cubic foot of work in excess of every other line of business; and so pulled out before he got in too far. It was just as well for the world, for the field he afterwards adorned presented many more features of attraction than were possible in the prosaic and dignified lines on which Hardware was achieving prominence as an industry at that time.

The nail trust is given the credit of having caused the closing of the Everitt Nail Works, Seattle, Wash., which has been regarded as one of the most important and profitable industries in Washington. As the works are shut down, and the machinery being rapidly removed, a large number of people will be thrown out of employment.

Our cutlery trade abroad is making rapid progress in many of the best markets formerly held by Great Britain. This month sasisfactory shipments have been made to Freemantle, Sydney, Melbourne, Adelaide and Brisbane, Australia. A small lot also went to Lyttleton, New Zealand. A fair lot of pocket, ladies' and buttonhole scissors, barbers' shears, tailors' and ladies' trimmers was forwarded last month to Shanghai and Hong Kong. The same assorted shipments have been made to Rangoon, Burmah, and Calcutta and Bombay, India.

"Advertising Designs" is the title of a booklet issued by the Trade Paper Advertising Agency, No. 150 Nassau Street, New York City, containing specimens of high-class advertising for trade journals. The work shown is very effective and is a fair sample of the character of advertising placed by this agency. The booklet is free to all trade advertisers. It also contains an article on advertising by Harold McGill Davis, entitled: "You May Need This In Your Business," which is worth reading.

In consequence of the great demand for their Alaska Stove Hardware, the Troy Nickel Works, Albany, N. Y., make the announcement under date of June 10th, that they will not close their factory on July 1st for inventory purposes, as has previously been their custom. All orders forwarded to them will receive prompt attention, and there will consequently be no delay on the above account.

The sixth annual complimentary dinner of the Beck & Gregg Hardware Co., Atlanta, Ga., to the employees of that concern, was given some evenings since at the Kimball House. There was quite a large attendance of salesmen and traveling men, and others connected with the firm, the duties of toastmaster being filled by W. H. Carr, in an admirable manner. Speeches were made by A. W. Kennedy, Henry Franklin, W. M. Crumley, S. W. Adams, M. L. Alexander, G. P. Lowry and C. E. Mewborn.

It is not generally known, that in accordance with a treaty signed July 22d, 1894, all Japan will be freely thrown open to the citizens of the United States, England, France and other nations on July 17th. The statement is made that while other nations are zealously engaged in preparing to make use of this opportunity to foster commercial advantages, the Japanese consul declares he has not been in receipt of a single inquiry from New York merchants or manufacturers, as to the best places to establish factories or open stores. The treaty is regarded by the Japanese as being a good thing in every way for Japan, and we are not alive to our own interests if we let other competing nations for this important trade, reap any early advantage, which it may take us a long time afterward to overcome. It is believed the Japanese government will soon pass a law allowing alien ownership of real estate. This, with the belief, which is expressed without doubt, that Americans who establish factories and trade depots, will be favored, and control the large trade already initiated through present events in China and the Philippines, should impel us to regard with interest any movement that will redound so greatly to our commercial and industrial advancement.

HARDWARE

VOL. XIX. JUNE 25, 1899. NO. 6.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

James H. Kennedy, who since 1891, has been the chief editor of *Hardware*, and, after the death of its founder, Archibald Paull Mitchell in 1896, has been also its business manager, has resigned his connection with *Hardware*, with this issue.

During the many years he has had control of its destinies, he has seen *Hardware* grow from a lusty infant to a stalwart and athletic worker in the industrial field to which since its initial number, its energies have been devoted. He now leaves the editorial chair with all "his blushing honors thick upon him." He retires from this position, which he has so long and acceptably filled, to become the editor of a similar journal, in which field of continued usefulness he has our best wishes for his future prosperity, well knowing there will always be a green spot in our memory for our old-time associate and co-worker.

Since the summer of 1896, he has had as associate editor, Henry Hopkins, a veteran Hardwareman and trade journalist of many years standing, well and favorably known throughout the Hardware trade, in which he has been an indefatigable worker since 1860. He will be Mr. Kennedy's successor as chief editor in the control of the future trade usefulness of this journal.

Associated with him as general manager of the publishing and advertising departments, Warren C. Brundage has been appointed, who brings to the paper a wide experience gained in newspaper control covering many years. He will be found by our patrons a thorough business man, who, while studying to the utmost the general good of our numerous advertisers, will avail himself of every advantage in making *Hardware* useful to its patrons in its appointed field of utility in trade circles.

No changes are contemplated in the general policy of the paper, which will always be found in the forefront of any movement tending to benefit the Hardware industry, and increase its prosperity, bringing into closer and more harmonious relations the bright and intelligent master minds that have placed the trade at the present time in the van of industrial development.

Editorial Trade Review.

Notwithstanding the sudden advent of record heat for June, business still continues actively good, without, of course, sustaining the volume of trade so gratifying to the jobbers in April and May. The outlook is extremely bright, and as all sections are kept reasonably busy, the indications are the season's prosperous conditions will be brought to a well-rounded conclusion fairly productive in promises of dividends.

Crop conditions in the West enter into the calculations of the future, and the farmer, anticipating higher prices even if crops are short, keeps on buying quantities of farm implements to replace insufficient facilities, which have handicapped him in the past, and is thankful he is still able to pay cash for machinery even at advanced prices.

From every quarter come indications that a Fall demand from each division of traffic—consumer, retailer and wholesaler—will be phenomenal in extent. Preparations are being made even at this early date to place advance orders for regular supplies, the necessity for having which in stock creates the fundamental principle underlying a successful business. The great increase in the production of iron and steel, with boom prices covering every branch from blast furnaces to steel mills, has resulted in many unsolicited advances in the rates of wages, frequently of the most gratifying character, and as no strike conditions have made such movements compulsory, this makes it evident these advancing prices will know no reflex action. The trade hears of each succeeding advance with equanimity, marks up the price of the product already in stock, and prepares to replenish at the current rate; realizing even that will be advanced, when order books become plethoric with specified wants for months to come.

Already improved conditions conducive to prosperity among the workingmen are creating a demand for grades of goods not necessarily the cheapest obtainable. Bargain counter prices created by active competition for the low-priced purchaser will soon be reinforced by some quotations of a higher grade, and so prepare the consumer for the natural advances in prices made necessary by the ever-changing quotations on standard goods.

It is immensely appreciated by our manufacturers cultivating the export trade, that they are still able to hold that outlet for surplus products, even at advancing quotations that are compulsory. This important business is not favorably impressed by constantly changing quotations; it involves too much correspondence and explanation, too much loss of time, and possible loss of trade. The export trade admits of no jockeying in prices that are insincere when announced, and there is no chance to "back and fill," a feature so characteristic of the diplomatically sharp home buyer.

This different method of making sales to customers from abroad, occasionally creates the idea that goods sold for export are abnormally low in price, when compared with those intended for domestic consumption; in one case, the buyer hears the flat quotation, while in the other, the price may be quoted and then left to governing conditions that frequently make a material change before consummating the sale somewhere within cost restrictions.

Money is reported as being quite plentiful throughout the country, the rates of interest dropping from

Digitized by Google

the legal standard in many directions. Even in comparatively small towns money is freely offered at 5 per cent., and in the leading cities, 2½ and 3 per cent. being current. The advantages derived from this are shown in the greater development of local improvements, which naturally causes a big demand for building material of every description.

The Southern Hardware Jobbers' Convention.

There has never been a convention in the Hardware trade of the United States more successful in all its features, and more conducive to good feeling on the part of those who were present than the recently adjourned ninth annual convention of the Southern Hardware Jobbers' Association, held at Atlantic City. The character and spirit of this occasion, are quite fully demonstrated in the extensive report of the proceedings presented elsewhere in this issue. The attendance was very large, the best of feeling prevailed, and everyone present, whether a member or a guest, did everything within his power to make the time interesting and full of pleasure and information to all the others. The ladies appeared in large numbers, adding to the pleasure and social graces of the occasion. The Southern jobbers have always been noted for their hospitality, but on this occasion, they have gilded refined gold by outdoing themselves.

Fourth Annual Meeting of Michigan Hardware Association,

We have received the following from the secretary of the Michigan Hardware Association. Extending as it does a cordial invitation to the retail Hardware dealers of that State, it is to be hoped the invitation will be responded to with fervent interest:

The Fourth Annual Meeting of the Michigan Hardware Association will be held at the Russell House, Detroit, on Wednesday and Thursday, July 12-13, 1899. A cordial invitation is extended to all retail Hardware dealers of Michigan to attend this meeting.

The entertainment committee is making a special effort to make our stay in Detroit a pleasant one, and we know from past experiences that you never will regret the time spent in attending this meeting.

A specially arranged programme has been prepared, and it is expected that much interest and profit is in store for those who avail themselves of the opportunity thus afforded.

Special rates, on the certificate plan, will be granted on all railroads to those who desire to attend the meeting. For further information write to HENRY C. MINNIE,
Sec'y and Treas, Eaton Rapids, Mich.

The Workingman Gets His Share.

A general advance of 25 per cent. was made in the wages of the members of the Amalgamated Association of Iron, Tin & Steel Workers at Detroit a week ago. This raise applies to 45,000 men, and puts wages at the highest point since 1892. The workingman is getting his share of the good things passed around in these piping times of prosperity and the gold standard.—*Louisville Courier-Journal.*

West Australia will in future admit, duty free, asbestos covering composition for steam pipes, boilers, etc., gauges and screens for mining and machinery, and appliances for lubricating and cleaning wire ropes.

The Chicago Flexible Shaft Co., are shipping sheep shearing machines to England.

Trust Notes.

Emphasizing the fact that it is a devout believer in expansion, we are indebted to the *N. Y. Commercial* for the following expansion of Trust History, referred to in *Hardware* of May 25. It has left but little for the next fellow who undertakes to improve on it.

"The glue trust went through because the members stuck together. The leather trust put its whole sole into the matter and succeeded. The rubber men stretched a point and made an agreement. The wheel trust went spinning on to success. The yeast trust was followed by a rise in prices. The milk trust took the cream of the business. The screw men wormed their way together. The ice trust froze the outsiders. The gas trust inflated things to great proportions. The starch trust stiffened prices. The paint trust painted things red. The oyster trust proved to be no shell game. The elevator trust sent things up and down in a lively manner. The wringer trust put a squeeze on the little fellows. The saw trust ripped things open. The salt trust was far from fresh. The crockery trust smashed prices. The fertilizer trust caused a stir in the neighborhood. And the window-glass trust let in the light on many dark things."—*Hardware.*

"There was a clean sweep of the carpet trust. The chewing gum combine stuck. The umbrella deal got in out of the wet. The glove and knit goods trust were a perfect fit. The brick combine was built up well. The coffin concern was a stiff proposition. The corset trust was a tight squeeze. The cement pool stuck fast. The candy concern was quickly swallowed. The baking powder trust rose to the occasion. The peanut combine was a roast. The whiskey pool went down smoothly. The screw combine held firmly. The kitchen soap concern took the cake.

"The fish trust bit well. The cigar and tobacco trust were not all smoke. The air brake trust worked on wind. The woolen trust was a warm proposition. The varnish trust went off with a polish. The biscuit pool was quickly digested.

"The billiard table combine could not be used in the pool. The dyewood combine was off colored. The printers' ink concern made its mark. The upholstery pool was quickly sat on. The metallic roofing concern was on top, but the tile trust was trodden under foot. The beet sugar pool was a sweet subject. The flour deal was well cooked. The cab combine had a good drive, and the bicycle trust wheeled ahead. The Hardware pool was hammered home. The lamp chimney concern went off with a crack. The bottle combine was soon filled, and the farm implement trust was a harrowing affair. The pie combine is fruitful and an uppercrust concern."

Alder & Boyd, export representatives, No. 37 Warren Street, New York, have just issued a very complete and handy catalogue of 50 pages covering the products of the Knapp & Cowles Mfg. Co., Wrightsville Hardware Co., Jones of Binghamton, Williamsport Iron & Nail Co., Detroit Sprocket Chain Co., Hindley Mfg. Co., Keystone Lock Works, E. T. Fraim; Wells Bros. & Co., The Keystone Mfg. Co., The American Saw Co., J. H. Sternbergh & Son, Coryell Flint Paper Co., L. J. McCloskey & Co., and Wall Bros. Mfg. Co. For all of these important manufacturers, whose lines of goods are extensive and well-known at home and abroad, Alder & Boyd are the representatives and control the export trade of New York City. This catalogue will be found a great convenience to the exporter, the illustrations being small, yet easy to understand, and descriptions and list prices throughout, very complete and for which the compiler deserves great credit.

The W. F. & J. Barnes Co., of Rockford, Ill., are shipping wood and iron working machinery in considerable quantities to both Melbourne and Sydney, Australia.

Morley Brothers.

We have received the following sketch showing the progressive character of the above enterprising firm. This we know will be perused by our readers with considerable interest, as it indicates the career through hard work to permanent success, of more than one of the concerns now prominent among the leaders of the industry.

Thirty-six years ago, in June, 1863, George W. Morley and Edward W. Morley started in business, in a modest wooden building, set on posts, in a marsh, above a frog pond, in Saginaw, Mich., a small town composed of stumps, wooden buildings, sawdust and marsh, the only communication in the town, across the river, being a rope ferry. Seven months later, Charles H. Morley came to Saginaw, and the firm of Morley Brothers was founded.

In 1865, they moved from their wooden building, into a brick store on the river, which, in those days, was considered a very fine building. They used to load small lighters with goods, at their dock, which were poled up the river, to the lumbering camps. In those days, there were no railroads. At times the river was so blocked with logs, in the spring, that a person could walk from shore to shore on the logs. There was also good duck hunting, at times, near their store.

One summer, along in the sixties, a young bear was caught in the river, and a rope put around his neck, and taken through the store.

Unlike the present time, the main thing was to get the goods; 33⅓ per cent. was considered a low margin of profit and 100 per cent. only a fair one. The traveling men were very few, who came up to this part of the country then. William G. Smythe, of Russell & Erwin, used to come up here generally once a year, and take home with him a big lot of orders.

Since then things have changed, so that a person coming here would never think of the small lumbering town that Saginaw was in 1863.

In 1882, Morley Brothers moved into the elegant and substantial building on Washington Avenue, in which they are now doing business.

In February, 1883, the firm of Morley Brothers was incorporated with a paid up capital of $350,000, and the following officers were elected; G. W. Morley, president; E. W. Morley, vice-president; and A. H. Morley, secretary and treasurer. The above men are in the same positions now.

The present city of Saginaw, instead of having plank and sawdust roads, is finely paved with asphalt, is traversed by electric roads, has twelve lines of railroad; the river is spanned by several bridges, the city is lighted by electricity and gas, in fact, has all the modern improvements. Most of the saw mills on the river have gone out of business, and other kinds of factories have taken their place. Two piano factories, and a harp factory, and banjo, mandolin, and violin factories have developed from the old saw mills. In the old days, besides lumbering tools and lumbermen's supplies, Morley Brothers' sales were largely cow bells, spinning wheels, planters' hoes, iron-handled knives, forks, spoons, and muskrat traps, while now in this locality, the demand is for bicycles, solid silver and silver-plated ware, sewing machines and graphophones. They still manufacture, and do a large business in lumbermen's supplies, in the Western and Southern States, also in Canada.

Thirty-six years ago, there was no farming land around this section. It was all woods and stumps, even in the city limits, and everything had to be brought in that is now raised on the farms. Now there are farms on which are raised fine cattle, hogs, and sheep, wheat, corn, fruit and vegetables; and underneath the farming lands, are coal mines in operation, and others being developed.

Business is steadily improving, and the outlook for abundant crops seems good, and most everyone expects a good fall trade. We have had an abundance of rain, which insures a good hay crop; and the weather is very warm, and vegetation is jumping at a very rapid gait.

Yours truly,

EDWARD W. MORLEY.

Export Notes.

The Millers Falls Co., of Massachusetts, are about to make a shipment of their miscellaneous Hardware specialties to St. Petersburg.

The Browne & Sharpe Manufacturing Co., of Providence, have shipped five grinding machines to London; also screw and other machinery to the Societe de la Usines de la Hestre, Belgium.

The Acme Machinery Co., of Cleveland, O., are shipping bolt threading and heading machines and nut tappers to Schuchardt & Schutte, Berlin, Germany.

The Thomas & Lowe Machinery Co., of Providence, last week made a shipment of machine tools to Pforzheim, Germany.

The Athol Machine Co. are shipping mechanics' fine tools and meat choppers to Stockholm, Sweden, through Henry W. Peabody & Co.

The Yale & Towne Manufacturing Co., of Stamford, Ct., are about to export their Yale locks and other specialties to Shanghai, China.

F. E. Kohler & Co., of Canton, O., are about to make a shipment of Hardware specialties to Oscar A. Nissen, Copenhagen.

The Pittsburg Woven Wire Fence Co. recently shipped a large quantity of fencing to Helsingfors.

Fully $100,000 worth of lathes, drills, planers and other machine shop tools will be ordered if delivery can be made by July 1. It is feared, however, that with the present existing conditions of the machinery market, it will be well-nigh impossible to get execution of orders by that time.

The Eastwood Wire Mfg. Co., of Belleville, N. J., recently exported 1400 high-pressure valves and special fittings for use in the large electric light plant at Buenos Aires, Argentine Republic.

Eight thousand dollars' worth of valves, fittings and steam specialties were recently shipped to the British Admiralty, by the Lunkenheimer Co., Cincinnati, Ohio. The German navy also use this company's goods extensively.

The Niles Tool Works, Hamilton, Ohio, have shipped thirty-five cases of machine tools to August Brucke & Co., of Antwerp, Belgium. The shipment included a big lot of pulleys, manufactured by the American Pulley Co., Philadelphia.

Machinery for use in the distillation of spirits will be admitted to British India free of duty.

The Detroit Emery Wheel Co., will this week make an important consignment of emery wheels to Sydney, New South Wales.

The Northampton Emery Wheel Co., of Leeds, Mass., have recently made large shipments of emery wheels to Australian ports.

The Plymouth Mills of Plymouth, Mass., are making large shipments of steel wire brads to Cuba, through Topping Bros., of this city,

The Kelly Ax Mfg. Co., of Alexandria, Ind., are about to export 200 cases of Yankee pattern axes to Melbourne and Sydney, Australia.

SOUTHERN HARDWARE JOBBERS' ASS'N.

The Ninth Annual Convention of the Southern Hardware Jobbers' Association, was held near the famous Boardwalk, in sight of old ocean, Atlantic City, N. J., on June 14th, 15th, and 16th, 1899.

It was an ideal gathering, in an ideal spot, with ideal weather favoring from first to last. Everything was planned on a broad scale; everything was carried out in a successful manner. It was a broad-gauge affair. There was nothing omitted; nothing small about it.

The dear little girl representative of the Turner Hardware Co., from far Indian Territory, expressed the general sentiment of the occasion when she first caught sight of the ocean and said: "That pond is bigger than the one at home." So was the Convention the biggest, the best, the most successful of any yet recorded in the memorable history of the organization, and that is saying a great deal.

The very cordial invitation extended by the Association to their friends in the North to come and bring their wives and daughters was responded to in a hearty manner, and there was a large representation present from among the manufacturers of all parts of the country, and as for the ladies—they were there to burn (by old ocean and the sun) as they sat on the sands and became acquainted with each other, while the men were up at the Islesworth talking and being talked at.

The arrivals began as early as Monday, while Tuesday saw a procession of travelers and trunks from dewy morn to darkening eve. President Mandlebaum, Secretary-Treasurer Carter, and Sergeant-Major Beers (with a badge larger than himself) were on hand and with the aid of the active members of the Entertainment Committee, made it pleasant for each member and guest as he put in an appearance. Tuesday evening was spent in introductions and the distribution of badges, and the badge was a souvenir highly prized and worth prizing, as will be seen from the reproduction and illustration elsewhere.

THE FIRST SESSION

was held in the attractive Sun Parlor of the Ilesworth at 10:30 Wednesday morning. It was open to all, and was graced by the presence of a large number of ladies. The roll call showed a large attendance. When it was concluded President James J. Mandlebaum, of Fones Bros. Hardware Co., Little Rock, Ark., asked the delegates to unite in singing "America," which they did with a will. The President then delivered his address of welcome, as follows:

PRESIDENT MANDLEBAUM'S ADDRESS OF WELCOME.

Ladies and Gentlemen: This, the 14th day of June, is the beginning of the ninth annual gathering of the Southern Hardware Jobbers' Association in the United States. It becomes my pleasant duty to bid you welcome. We all feel highly honored that such a distinguished and influential body meets at this delightful watering place. It will give us much pleasure to minister to your comforts and entertainment during your sojourn with us. Necessarily, much of our time and attention will be given to the consideration of matters pertaining to our work, but we hope to have considerable time for enjoyment and recreation.

It is not necessary for me to reiterate the subjects that influenced the formation of the Southern Hardware Jobbers' Association. Its members and magnitude testify to united efforts and high aims. I speak of it with no conceit, but with the purest pride of the human heart. What can be more precious to any man than to feel that he has been one of the number who delighted in bringing their fellow beings into closer social intercourse?

I congratulate the members upon the full attendance of this meeting, and I feel that the time and expense incurred will result in benefit to all. Among the membership, I notice particularly, that you are accompanied by your mothers, wives and sisters. I see in the midst of this congregation, a large attendance of manufacturers, countless numbers of that ideal of our manufacturing industry, the "angel of the road;" a full representation of the press of the country and last and best of all, the inspiring countenances of many ladies. I am delighted that at this convention, you have flattered the association with your presence. I look upon this brilliant gathering with satisfaction.

It is with sorrow that we place the word "absent" opposite the names of those who are prevented from being with us on this occasion. Mr. James Moroney, Texas member of the executive committee, was prevented from attending on account of the death of his wife, which occurred quite recently. It is with deep regret we chronicle this sad event.

On the other hand, we are glad to report, however, that death has not entered the ranks of our members during the past year. I believe this is the first meeting during the association's existence, that the memorial committee has not had to report the loss of one of our members. I heartily welcome those members who have come from a great distance, particularly from Texas. We extend a cordial greeting to the jobbers present, who are non-members. We appreciate the honor conferred by their attendance. We expect to present to them sufficient inducements to unite with us in our efforts, and honor the future president with their application of membership. However, if such is not their desire, we wish them to share in common with us, all the privileges which we enjoy, and we welcome them to our family reunion.

TO THE MANUFACTURERS.

In the name of the Association, a hearty welcome is extended. Without your large factories and numberless employees, without your good will and co-operation, without your liberal dealings and concessions, without your influence, to-day, perhaps, we would not be mingling with you. This attendance, on your part, the liberality shown in aiding us in our deliberations, we accept as encouraging signs of hearty co-operation. We desire to have you spend your lifetime pleasantly and profitably. We welcome you to our 9th annual gathering. Your presence in our past conventions has left the most pleasant recollections. This one, we know, will bear good fruit. We look forward to your attendance at our future gatherings with feelings of pleasurable anticipation.

"THE PRESS."

You are welcome. And the press—what of it? Symbol of grand, glorious, sublime America—the world's civilizer—of the divine trinity, free men, free speech, free press; unpurchasable protector of free men, fearless advocate of our God-given institutions, unswerving missionary of our expanding commerce. It is the fitting representative of the ever conquering Anglo-Saxon; it is the very essence of true expansion. Where the starry flag goes, trade fast follows, and with it speeds the press, and on its heels, you see the hustling advertising agent pushing the sales of the wares so deftly placed on the market by the polished and persuasive commercial traveler. The success of our busi-

Digitized by Google

ness, of all business, depends on the press, not only as to sales, but as to forming public opinion and building up the communities. As an educator, it is an open door for everybody to see the storehouse of knowledge. An honest press makes honest men, and to their credit be it said, that the vast majority of American journalists are of unquestionable integrity. And right here, one word as to our trade journals, devoted to the Hardware business. No branch of trade has better papers. Conducted on a high plane, they are invaluable to our business. I wish them long and continuous prosperity because they eminently deserve it.

"THE DRUMMER."

On an occasion of this sort, it would be like the play of Hamlet, with the melancholy Dane omitted, were I to omit our faithful allies—our missionaries, the traveling salesmen. Located as I am, in the far Southwest, my position is such that I have special opportunities for observing the indefatigable efforts and the successful work of our drummers. As a class, they are unsurpassed by those in other lines of business. For the success with which our business has been attended, I give them full credit, and desire to say, their employers are very appreciative. It is a matter of interest to observe the successful Hardware traveler. He invariably makes his mark, and his experience as a drummer serves him well in coming to the front. All honor to the Hardware drummer—civilizer, missionary, explorer, politician and statesman. A patriot wherever you find him, and an American, tried and true under all conditions. We welcome you into our midst. Call for what you want and it is yours.

"THE LADIES."

I welcome the mothers, the sisters, the sweethearts here present. We have all been strengthened by a mother's and sister's love. Who of us have not felt the influence of true and noble woman? Many of us know that a wife's unselfish devotion has lifted the burden from our heavy hearts and made life a Paradise. What is more true, than when a hero has won the battle and vanquished the foe, or when man has achieved success in any field of life, he is sure to exclaim, "Caused by his mother, his wife, his sweetheart, or putting it all in one, 'Woman.'" In all his daily business transactions, who can be of more service to him? Who is it that gives him the best advice? Who is it that is continually at his side in sorrow or joy? We welcome you here, for without you, we would feel as though we were in the wilderness. Your presence causes us to feel that our labors will bear golden fruit. We welcome you for the reason that when, during our deliberations and discussions, one half of our members will claim to be right, and the opposing faction claim the contrary, someone will arise and say, "Let us adjourn and consult the ladies." After our deliberations and discussions are over, and we wend our way homeward, I hope the ladies will not regret having graced this occasion with their presence. We welcome, and thank you for your presence, and want to see you often amongst us.

At the conclusion of these opening remarks the formal welcome of the Association to the manufacturers present was voiced in a witty and eloquent manner by Charles H. Ireland of the Odell Hardware Co., Greensboro, N. C., who spoke as follows:

MR. IRELAND'S ADDRESS OF WELCOME.

Members of the Southern Hardware Jobbers' Association, Manufacturers, Sergeant Major, Visitors and Friends:

I esteem it a great privilege to extend to each and every one of you in behalf of the officers and President of this Association a most hearty welcome to this our Ninth Anniversary.

When instructed by our President to perform this duty, I tried to get out of it on the grounds that I had appeared before this body so often in like capacity that I thought it best to have some one else do it. He replied, "Oh, never mind, we don't expect much, just make it as short as you can."

Unfortunately for me, the gift of brevity is not numbered among my accomplishments. However, I desire to be loyal and shall endeavor to make my address as short as possible. In order to do this, I find it necessary to apply the rule adopted by Sunday-school teachers, known as the four Ws.

What, Who, Where, Why.

"WHAT."

If one had been called upon to deliver this address thirty years ago, he would have found himself cramped by the limitations of that territorial scope commencing with the Gulf and ending with its extreme limitations of Delaware on the North. But I rejoice to-day that as we stand here under these happy auspices, bathed in the sunlight of God's favor, we do not find it necessary to limit ourselves by any territorial bounds, but rejoice in that grandeur which knows no latitude, or longitude in designating the South. In fact, I find that we may lay claim to the unique phrase of one of the Bishops of the Southern Methodist Church, when called upon to justify his position in maintaining work in Montana. He was asked the question how it happened that he was preaching the Gospel, when he was supposed to confine his labor to Southern territory. Said the good Bishop, "I am in Southern territory, the south means south of the North Pole." In the language of this good man, I feel justified in appropriating this interpretation as being comprehensive of the real South, when we view it in the light of transactions that have taken place during the last twelve months. He must be a man of narrow ideas indeed who thinks of the South as limited territory marked by the imaginary divisions of Mason's and Dixon's line. Yea, blessed be God, there is to-day no north, no south, no east, no west, but one grand, united, homogeneous, patriotic nation, true and loyal to the best, most glorious movement the world has ever known. And from where yon stately pine crowns the headlands of Maine, as sentinel in his uniform of green, westward to where the soft waters of the Pacific and Puget Sound sing their soft lullabies to departing day, from the gentle breezes and sweet scented atmosphere of Southern California to the sand dunes of the Florida Coast, from which so recently went the grandest spectacle that the eyes of the world ever beheld, of a nation offering its treasure and blood to redeem another from bondage and oppression and give it the right to live—between these limitations has arisen a new and broader South that we should ever become in our mind's eye, when we speak of it in the future.

"WHO."

If thirty years ago, one of us had been called to perform this duty, he would have felt it incumbent upon him to point to the peoples, customs, habits and civilization, than which the world has never looked upon a superior. He would have dwelt upon the chivalry of her men, their fidelity to high and lofty ideas, and scrupulous exactness in caring for the small amenities of social exchanges that has made the old life in the South distinctive in its character. He would have pointed with pride and patriotism to the bravery of her soldiers, the wisdom of her statesmen, while a reference to the beauty of her women, their noble, self-sacrificing devotion to duty and sympathy for the depressed would have been made with such emotion and tenderness as to have awakened in each breast such a sympathetic thrill that would have electrified this audience as I never hope to do. But when we raise our eyes to-day and take in the wide expanse of this new South, I find it necessary to refer to these things, for chivalry is no longer the peculiar characteristic of our locality nor confined to any single section, for in busy, rushing, restless New York I have seen the difference shown in street car and elevated

Digitized by Google

by tired men in offering their seat to a lady who was standing; while in Philadelphia I have seen the hat raised and head bared in deference to women as much as if it had been in Georgia or Mississippi. While Boston in its present municipal government, if its plans are not fustrated, bids fair to rival the most advanced civilization the world has ever seen.

The bravery and daring of Bagley, Hobson and Wheeler have their complement in Dewey, Schley and Lawton. The humane command of Philips of the Texas in his thrilling order, "Don't shoot boys, see those poor fellows are dying!" has its corresponding act of gallantry in Robley Evans of the Iowa, who in receiving the commander of the Vizcaya, refused his sword with the statement, "Keep your sword, sir, you are a brave man and deserve to wear it."

The same voice that grows husky and eyes dim in speaking of Winnie Davis, grows melodious and clear, and the eyes fill with gladness, as they are lifted in faith for God's richest and best blessings to rest upon Helen Gould.

"WHERE."

It is well for us in this bustling day of nervous energy and rush to apply the question of the Congressman from Alabama which, though ungrammatical, is wholly pertinent, "Mr. Chairman, where are we at?" I answer we find ourselves in the fertile soil of New Jersey where a seed of aught dropped soon develops into a monopoly or trust. The fact is no monoply or trust can be successfully launched to-day unless it has the fetich of Jersey emblazoned upon its mast head. In this connection I am reminded of the custom that is said to prevail among the Alaska Indians. In those regions of snow and ice the Jones's, Browns and Smiths are not known, but in front of each door there is set a Totem which designates the character of the inmate, whether he be of the bear, wolf, panther or fox. After a while I expect to see on every large trust certificate the Totem of a mosquito, or possibly there may be a graduation of the Totemic figure indicative of the character of the trust desired to be represented, somewhat after the following order:

One hundred million dollars or over, A Mosquito or Frog.
Fifty to ninety-nine millions, - - A Poly-Wog.
Twenty-five to fifty millions, - - Infantile Swamp.
Less than ten millions, - - Nothing but Jersey,

it being entitled to a character that is hardly worthy of note. The key to the Totemic figure is as follows:

Less than ten million, or no emblem, would be something like English aristocracy without its coat of arms, never having attained enough publicity to entitle it to a distinctive character.

Ten to twenty-five million, or miniature swamp indicates that it has not attained any great degree of notoriety, but that it has all the necessary paraphernalia and equipments to produce even the full-grown mosquito, time alone being required with proper directions.

Twenty-five to fifty million, or the Polly-wog indicates that the formative period has passed and that there is a struggle going on to attain its highest ideal.

Fifty to one hundred million indicates that it has passed the formative period, and the goal of its ambition is in sight, that it is nearly ready to drop its tail and assume its real shape. This being often controlled by circumstances as to whether it will become a frog or a mosquito. If the time really requires swallowing, it assumes the frog shape, if blood-sucking, then mosquito.

While one hundred million and over, or the mosquito and frog indicates full growth, under the most favorable circumstances, and that it is now launched upon its road of consumption, rapine and destruction, that it has an open track and right of way. Legislature, Congress and Senate are no longer to be feared, but as each is very largely the creation of these giant corporations, they become the tools by which they carve out their own selfish ends and aims.

The only cloud on the horizon of their perfect equanimity is that speck known as public opinion, and their most earnest desire is that the great hubub, uproar, confusion and dust of its activity, that this little speck may become obscured. Should the speck assume ordinary proportions it will be the office of the mosquito to suck all the blood and vitality out of it. But should it assume large proportions, it will be the duty of the frog to swallow it entirely.

May we not hope for a repetition of an act that is no doubt familiar to every one here present who has seen a frog swallow shot until it became so weighty that it could not perform its natural locomotion, and what has happened to one frog may happen to another.

Yea, may I ask if it would be inopportune for every lover of American freedom and mercantile emancipation to earnestly pray that back in the hills there may yet be some obscure man, who like the prophet of old, having watched with jealous eye the years of dearth and drouth and famine of our individual industries and who, having faith in the justice of his cause and sympathy for his own nation, may yet be able to announce that the clouds have come which shall give us a rain of prosperity on the individuality of our commercial, industrial, social and political life.

It may be, however, that I am treading on delicate grounds here, and that within the sound of my voice there may be those who in part if not altogether, are in sympathy with the present trend of affairs, and may represent in some degree some of these gigantic trusts and combinations.

If so, I will relate for your entertainment a circumstance which took place with me about a year ago. A traveling salesman came into my office smiling and self-confident, extended his card, announcing that he had the pleasure of representing ——— firm. I replied, "Is not this a trust which has recently been formed in the State of New Jersey for the purpose of controlling the item you are selling?" My complacent friend smilingly replied, "Yes, I am frank to admit that it is." Then said I to him, "My friend, with every desire on my part to extend to you any courtesy within my power, I am compelled to say to you that I cannot buy any goods from you, but will patronize those factories that are not in the trusts." "But," said he, "I can't leave before I call attention to the very similarity between your views and mine respecting these trusts." I replied, "How is that?" "Well, sir," said he, "I am cussing every one of those institutions that I don't own stock in."

As this is not an experience meeting, I will not call for testimony at this time, but seriously, how much difference is there between each one of us in our opinions of trusts and that expressed by the drummer. I desire, however, to have you seriously consider this thought. How long will it be with the present drift of affairs before individuality in the administration of your business will be a useless article, for we will all be managed by a Central Office in New York or Chicago. An individual thought or action will result in decapitation. Then again I would suggest the timely inquiry of the Alabama Congressman, "Where are we at?" and whither are we drifting? Did you think to ask yourself this question since or before leaving home? "Why am I here?" I know the usual reasons assigned for diversions of this kind of business is the quotation of the adage, "All work and no play makes Jack a dull boy," and that is true in a large degree, but if your purpose in coming, was to escape work and indulge in frolic, then I think economy might have been consulted and the play ground placed nearer the field of labor. May we not hope that a better and more serious purpose actuated you in coming. Social intercourse and good cheer, of course, can

Digitized by Google

be had and should be helpful and beneficial to all who use it in moderation, but as I look in your faces this morning, I realize that nearly all of those who compose this body have passed the age of thirty-five. This means that we have attained the average age of men of this generation, and that what time we have hereafter we hold it tentatively, and what we would do, we must do quickly. There are responsibilities to meet, problems to solve and intricacies to ravel that are of such vital importance to our craft. Let us apply ourselves to these things first, and we will be better prepared to enjoy the pleasures to follow afterwards. There will be many subjects for you to deliberate over that will be suggested by our able President, but there is one which I desire to submit for your consideration that may have been overlooked by him in the rush of other duties. It is this—that we may do something to change the typography of the obituaries of Hardware men. Have you ever noticed these in comparison with those of men of other callings? I have, and have been struck with the difference. They generally run thus: "John Smythe, Esq., departed this life, etc. Mr. Smythe was well known in this community, in fact he may have been termed our foremost citizen. Twenty-five years ago Mr. Smythe retired from the firm of Smythe & Browne, wholesale drygoods, of which firm he was for fifteen years the senior partner. Having amassed a large fortune, he has for the past twenty years devoted his time and money to philanthropic works."

Or possibly it runs thus—broad head and foot lines, indicative of mourning, with something like the following words, "A Tall Oak Smitten. On last night the manly form of our most prominent citizen was laid low by the ruthless destroyer, Death. William Browne, head of the large and wealthy grocery house of W. Browne & Co., President of the Gold Link Bank, Director in two Jersey Railroads, and a large shovel manufacturer, departed this life and leaves a community under a pall of sorrow and distress. Mr. Browne might truly have been termed a success. Commencing his business life forty years ago as an office boy for the firm of Sugar & Salt; round by round he climbed the ladder of successful business life, and twenty years ago, having decided that he had accumulated enough money for this life, he determined to devote his broad brain and immense fortune to the amelioration of the distress about him. A number of charitable institutions established by him remain as monuments of his wisdom and liberality We shall not see his like again."

But with a Hardware man it generally runs thus—you usually find it printed in small type, and if in a trade journal, under the head of New Discovery. If he was particularly prominent there may be a bad wood cut that even that patient man would have felt called upon to resent, had he been caricatured by such a picture while living. "A Toiler Gone. Jno. Smith dead. We mean working John, iron John, grindstone John. Yes, 'tis true, he is actually dead, died at his desk at 1:30 o'clock this A. M. He has been somewhat indisposed for some days, in fact for the last six months he has not been himself, he frequently did not work more than eighteen hours per day. How strangely we grow accustomed to things we've seen and known so long, and it is hard to disconnect our lives from associations with these familiar places and men. The community awakened this morning by a rude shock and it will be hard indeed for it to realize that working John could ever die. One of the serious problems that confronts the public today, "Who will now furnish us with sad irons and tape lines?" It is really a public calamity. Seventy-two years ago he came to this country from Killarney, Ireland. For sixty-eight years in heat and cold, through all kinds of weather, he has gone to and fro, attending to his business. He employed a number of men, some of whom have attained high positions in other callings. He never amassed any wealth, though those in his employ have always done well. The business we understand will be continued by his clerks. His widow received an insurance policy which was taken out in her name. Rest to your bones, Johnnie, you never got one in this life, you deserve a long one in the world to which you have gone."

Is this picture overdrawn? I refer you to the trade journals of this country. If you find I am right, lend me your assistance to correct this inequality.

But I have been asked to extend special greetings to the manufacturers present. This is a day of changes. The fiat has gone forth—the old must give way to the new. Things are not done now as of old. We see this in every phase of life.

I am aware that it is the custom (and it sounds very nice) to sigh and yearn for the good old times, but I believe the present time in which I live is the best the world has ever seen and that the next generation will see better than we of to-day. I believe the brotherhood of man will ultimately prevail over the whole earth and the mantle of peace and good will, will eventually be the heritage of the race.

In no sphere of life have changes been more manifest than in the attitude of the manufacturers towards the jobbers, and vice versa.

No longer does the veil of mystery enshroud the manufacturers's cost of production, nor is the desire for an increase in product so great that any reputable manufacturer would be willing to overstock a jobber. Indeed so far has this gone, that it is to-day no longer a difficult matter for an untrained man to embark in the Hardware business with more than a majority of chances of success, if he happens to have two qualities—prudence and common sense—for I believe that the ordinary manufacturer, if intrusted with the fitting out of a new jobbing stock, would in many instances, be less likely to overstock a man, than an inexperienced man would himself. I do not believe that this is due wholly to unselfishness on your part, but it is due more to an intelligent recognition of that fact that your interest and the jobbers' are identical and common.

If this be true of you gentlemen, I desire to say in behalf of those whom I have the honor and pleasure to represent, that all these feelings and attitudes are reciprocated by them. It is no longer necessary to use mystery and deceit in trying to interest the jobbing trade in your wares, nor is it necessary to reiterate how little you are making on an article or how close to cost you are selling it. I believe I could get a unanimous vote in the affirmative here to-day if I were to ask the jobbers if they were willing to grant the manufacturers a legitimate profit on his wares, or if asked, "Do you prefer that a manufacturer shall sell goods at cost or make a profit?" They would answer, "We prefer the latter always." Twenty years ago, I do not believe, this was the case. But that it is a fact to-day one has only to investigate to satisfy himself.

It is in this spirit we desire to welcome you here to-day, and we hope that our professions of friendship and goodwill will not be received as simply the utterances of one who performs a courteous act, but as the sincere expression of what I believe to be the truth. Then, gentlemen, if these things are true, and our interests are common, would it not be well to consider well the results of your merging into the maw of a giant frog or mosquito, and when the siren song of the promoter falls upon your ear, enticing you to the shady paths of peace, plenty and the honor of retirement from your business which either you or your associates have builded from very small beginnings, would it not be well, if you find yourself unable to resist his persuasive lay to do as did the ancient Greek hero who, rather than be entranced by the siren who had wrought death to so many of his countrymen, bound himself to his mast-head and sailed past the Enchanted Island? Gentlemen, I know it is hard to resist the plea of dollars and

Digitized by Google

cents, but I believe manhood is worth more than dollars, and blood should never be measured in coin, and if you haven't a mast-head, tie yourself to the factory door, or smoke-stack; stand upon your individuality and American manhood and be free.

Again, gentlemen, I extend to you a most cordial and hearty Southern welcome.

When the applause which accompanied the conclusion of the address had subsided, the President introduced the Hon. Webster R. Walkley, of the Peck, Stow & Wilcox Co., New York, better known as "the silver tongued orator of ths Hardware Club," who spoke as follows:

RESPONSE OF WEBSTER R. WALKLEY.

Mr. President, Members of the Association, Ladies and Gentlemen: I should feel unworthy of your esteem and high regard if I did not acknowledge my appreciation of the honor you confer upon me in asking me to respond to this most cordial welcome on the part of your Association. I cannot. perhaps, make my reply in as eloquent language as was expressed in the welcome; but orators are Southern born and South Carolina has produced not a few whose words and eloquence have been almost as convincing as the speech of our friend Ireland.

I may say I count myself most happy to stand with you to-day, within the sound of the rolling surf of the restless ocean, and in behalf of the manufacturers of the North, whose shops and mills—whose hammers and forges—whose thought and toil—have done so much to develop and elevate the various industries here represented. Somehow there seems to be a personal fitness in my addressing this Association. A whole volume of history is written in the lives of those gathered here this morning.

My given name, for which I am in no way responsible, suggests New England, its eloquent orators, its learned, uncompromising statesmen, even Plymouth Rock and the *Mayflower*, witches and Puritans, freedom and liberty. My youth was passed amid these New England men and scenes. When, in early manhood, I began to dream love's dream, how strange that I should choose a Virginia girl to share my burdens, to cheer me on my desolate way. Yet this I did, and for more than a third of a century she has walked and toiled by my side. Again, our only daughter, born in a New England village, within the sound of factory hammers and whistles, pledged her life to a man Southern born, and now lives on Southern soil, and knows something of Hardware and its value. Two sweet buds born of this union are blooming into a sweeter life and are breathing the perfume of Southern flowers in a Southern home. Why, then, should I not speak if not to the manner born? We are brethren. Our aims, our interests, our ambitions and our hopes are in common. The cotton that is growing in Texas and the corn that is growing on New England hills and on the Western prairie lands, shall contribute to the supply of our wants and the luxuries of our desires. The iron mined in Alabama and in Wisconsin are alike in commercial value. The interests of Southern Hardware jobbers and the interests of the American manufacturers, wherever located, are alike. Twice two make four in Maine and in Louisiana. The success and prosperity of Tennessee merchants add to the success of Connecticut mechanics and cotton spinners, whether in Georgia or Massachusetts.

These, we think, are facts which need no proof. Indeed, they are axioms, self-evident propositions. They touch every department of human activity, whether it relates to the labor of the hand or the brain. Go higher. They influence all moral actions, compel heroic men to do and dare heroic deeds, mold and shape the lives and character of men and the destiny of nations.

Gentlemen, I do not look into your faces and the faces of your wives and daughters about you, without recalling the long line of illustrous names which have graced the pages of our American history, and added lustre to your States and our Nation. I have walked through your shaded groves and gardens of flowers. I have often sat with you at your tables, bountifully supplied, and have enjoyed your hospitality, wit and humor. I know you have reason to be proud of the blossoms of your orange groves and of your homes. I know how you honor manly deeds and brave men. I know how you despise base actions and condemn fraud. I know how your women are braver than heroes of battle-fields, than commanders of battalions, when they watch over loved ones stricken by fever, become nurses in hospitals and sing back to life many a desponding one.

One of your late presidents, a man whom you all honor for his goodness of soul and greatness of heart, for qualities which are unweighable and unmeasurable, has always seemed to me a hero. You all know how, at Memphis, when men were fleeing from that dreadful scourge, the yellow fever, he remained almost alone and watched by

HON. WEBSTER R. WALKLEY.

night and by day, by starlight and by sunlight, over the stricken, and the breath of disease came not upon him.

Let Langstaff be honored as a hero, and may this Association and the trade which we represent sometime build a memorial of granite to commemorate the virtues of so good a man.

I thought to speak of trade—our relations as manufacturers and jobbers, of the infinite line of goods made of iron, copper and other metals. The iron products of our country have become larger than the products of gold. They outweigh in avoirdupois the gold and silver, they also outcount them in dollars and influence. The iron market has become the barometer of American industry and progress. I might speak of trusts—an absorbing question—a question of expansion—a question of conflict—an undecided question; but to the learned men, of whom there are many here, I will leave this topic.

I lay aside my tables of figures denoting products and values, I will not speak of the greatly increased business activity in all sections of our country, of the scarcity of raw material, of constantly increasing values—facts which are known to you all. I may say, however, prosperity seems to move in great waves, coming sometimes as stirred by the cyclone's breath, carrying all with and before it. Then the receding waves leave exposed sand bars and

Digitized by Google

rocks, and sometimes the wreckage of great ships. Smooth seas do not make skilful navigators. You who are at the helm should be wise and discreet pilots. You remember that the skilled pilots that guide the steamers through the Thousand Islands of the St. Lawrence and down the rapids, do not watch the shifting currents of the river, do not mind the beating of the eddies about the hull or the creaking of timbers, but ever keep their eye upon the eternal, never-changing landmarks on the shore.

My theme is as wide as the world, for in its relations it seems to touch all obligations from the horizon to the zenith of our lives. They reach even to the border land. Let each man act well his part. May I urge the highest standard of action, the fairest dealing, a measure pressed down and running over. Honesty, integrity, character,—are not dreams; they are not high ideals only—they are actual realities. We should not give the best of our lives and the best of our thoughts to business. Our homes, our wives and children need and deserve the best and sweetest gifts we can bring. Their cheer and smiles, their love and joy, will be a better reward than dollars or any currency we can count. Life is real, its demands more pressing than ever. The contest is earnest, the weapons keener pointed and the steel better tempered. Yet the brain is more active, the hand more skilled and toil and thought win surest victories.

At early morn this tiny flower, whose petals kissed the dewy drops that night distilled, then gave promise of a life most beautiful and fair. Yester eve, rocked in the cradle of the winds, or lulled to rest by zephyr's gentle breath, the moon's pale beams and light of glimmering star shone upon the opening bud. At early dawn Aurora from her gilded couch looked across the eastern hills and smiled upon its beauty. At sunlight's touch it blushed in crimson as blushed the waters at the Master's voice at wedding feast in Cana. Painted by hand Divine in colors rich which limner's art nor brush can trace, ere the noontide hour plucked from its parent stem through which it drew its breath, it lost its life and power, yet in dying yields sweet fragrance.

Oh, simple flower! Thy life of but a day should teach us pilgrims on the way by grace of thought and speech, by kindly act of charity and love, to yield sweet fragrance like thyself.

When he retired from the platform, Mr. Walkley had a right to feel that, so far as the South was concerned, he had made the hit of his life.

Next followed the annual address of President Mandlebaum, as follows:

ANNUAL ADDRESS OF THE PRESIDENT.

To our members and invited friends: As our Secretary will, in his report, inform you of what our Association has done during the past year, I will not dwell upon matters pertaining to this part of the Association work, but will endeavor to devote my time to statistics concerning our welfare.

This Association, from its origin, was never an unknown quantity. It has continued to be full of life and vigor, and its usefulness is acknowledged by every important community of this country. We want to continue on this line and avoid mistakes, taking into consideration that other interests besides ours will be largely influenced by our actions. Those interests are watching us continuously, and will weigh carefully whatever we may do. While we are sure of their support and co-operation, we may expect their disapproval and censure if we become arbitrary in our demands. This being exclusively a Southern organization, I am naturally more conversant with its resources, development, etc.

What does the South possess? In 1899 the agricultural products were over $700,000,000, and when the census returns for 1900 shall have been completed we will be astonished at the improvement within the last ten years.

The world was virtually at peace for the past twenty years, when our nation flew to arms under the masterful leadership of Wheeler, Shafter, Lawton, Otis, Roosevelt in the fields, and Dewey, Schley, Sampson and Hobson on the waters. The Republic has been cemented and consecrated anew by the efforts of the whole nation. American valor has been applauded and the blessings of liberty are assured to ten millions of alien people. This has been accomplished within the comparatively short space of eleven months. Not a ripple of disturbance has been felt on the surface of our commercial life. The president has commissioned major generals; the people have commissioned general prosperity and increased trade throughout the land.

The United States is the greatest manufacturing nation in the world. Our imports for 1888 were over $725,000,000, our exports, about $690,000,000. Within the last decade these figures are reversed as follows: Our imports, about $655,000,000, and our exports, $1,255,000,000, reversing our excess of imports in 1898 from $33,000,000 to our excess of exports in 1898 of $620,000,000.

The Clearing House exchanges for February, 1899, were seven billions against five billions six hundred millions in February, 1898.

The South produce now eleven million bales of cotton, which, together with the seed and fertilizers, realizes over $450,000,000. The South now sells in all of the American markets and has driven Scottish pig out of existence. The coal supply of the South is inexhaustible. The value of its lumber products cannot be estimated; and I am glad to note that it not only produces cotton, iron, coal, marble, but each year, the diversity of crops is increased to such an extent that we shall, within the course of a few decades, be able to dictate to the world. What we are lacking now is immigration and factories and more money to foster new enterprises. The United States, as compared with other nations, is on the top round in agricultural resources, mining and manufacturing. In population and riches we have amazed the entire world.

As a business community we should encourage our government in building the Nicaragua Canal. It does not require much figuring to prove that by accomplishing this object our objects would be much greater than already shown as thousands of miles of transportation could be saved.

Another move in the right direction by the business men would be the inauguration of our own line of steamships carrying our own flag, and a resolution of this character to Congress, would, in my estimation, not be amiss.

Relative to wages. Since the advance in prices took effect, beginning the latter part of December, I find that while goods have advanced, wages of the laboring men have advanded proportionately. In the aggregate, during a year's time, it will amount to hundreds of millions of dollars. The wages of American labor, as compared with foreign labor, are more than double. Germany at the present time is our most dangerous competitor, and in order to keep wages at the present standard it is necessary for us to increase our export trade. I feel certain that we will do this, and the South will share in proportion. We shall be able to furnish her sister republic with a large share of her wants, if wise legislation will open the dooor, and prohibitive blindness does not exclude our products.

We note the following causes of increased trade. No idle labor. Payment of wages by all manufacturing interests the day it falls due. Placing large amounts of money into circulation; advances on all classes of goods; expansion of trade; stability and confidence by our people in our government; democrats and republicans rejoicing alike in a general prosperity, Crop prospects in all parts of the

Digitized by Google

country in good growing order; a large and increasing demand for our products; the gradual decrease of long time credits; farmer and merchant depending upon their own resources in place of commission merchants and mortgages.

In regard to grievances among the members, not a solitary complaint has reached this office.

As the formation of our organization and the work done has now convinced the manufacturers that we are liberal in our propositions, they have likewise favored us. At the present time but slight differences exist as to the manner of conducting sales. Fewer complaints of this nature reached our office this year than in previous years. Those still remaining unsettled, we hope during this convention, to adjust satisfactori y to all concerned.

On the 25th and 26th of April, the Jobbers of Texas convened at Sherman. As a representative of our association, I deliberated with them during their convention, and I am gratified to report that I found them an intelligent, upright and sound business people. They work in harmony, and their manner of transacting business is worth patterning after. I am strongly convinced that such an organization should be inaugurated wherever possible and practical to do so.

You will observe that at this meeting, for the first time, you have been requested to register your names. Our secretary-treasurer also in his report will speak of these registers. I desire now to extend the thanks of this membership to the various manufacturers who assisted us in being able to present each of the hardware organizations with one of these registers.

If nothing is accomplished, you must not blame your officers; they are willing to carry out your wishes, but they are not expected to furnish the brains for the entire membership. You must work as hard for results as they, for in reality they are not your masters, but your servants. To accomplish results is as much your business as the buying and selling of goods. This year, turn over a new leaf, and counsel with those whom you have placed at the helm, and at the end of the term note the good results. There will be no poor ones.

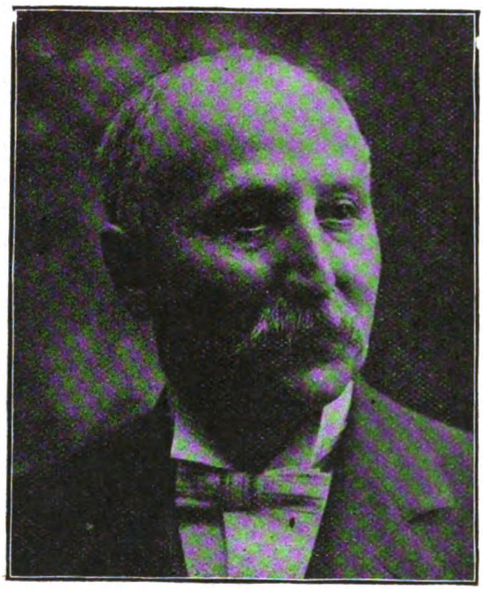
This body consists of men whom the world respects and esteems. No anarchism, socialism, antagonism, is found in its ranks. They are purely business men who desire to conduct their transactions on a righteous basis and strongly maintain your rights. This constitutes the objects for which you were created.

I would suggest to the members, instead of individually writing letters to manufacturers to consult the officers first, and in that way you will avoid confusion. This association has accomplished a change among competitors. It has produced sincere co-operation. Retailers are our friends and we their beneficiaries. Our travelers, in the course of selling their wares mingle with their competitors as though they all represented the same house. Local associations have sprung up from ours, in consequence of which your competitor no longer refers to you as a slasher, cutter, etc.

If I have erred in my administration I will not be the good Samaritan, as my shoulders are not broad enough. I will take upon myself only the blame to which I am entitled, and the remainder will have to be borne by my helpmates.

I have a few suggestions to make in regard to our constitution and by-laws. I believe it to be to the interest of the association that the president be permitted to appoint the executive committee, instead of the association electing this body. I would also recommend that the selection of the secretary be placed in his hands. I would further recommend that the president shall not succeed himself. To this, I think, there should be no objection, for there is always good material on hand to fill the office.

You will observe in our secretary's report that our membership has increased from fifty members in June, 1898, to sixty-six members in June, 1899, and for this increase in membership, thanks are due to the membership and to the salesmen of manufacturers for the interest manifested.



The many favors extended during my administration leave a green spot in my memory which will not soon fade.

WEDNESDAY AFTERNOON SESSION.

The session of Wednesday afternoon was executive, confined to members of the Association only. The report of Secretary-Treasurer Carter was presented, and covered matters of detail only. Reports of the various standing committees were also presented. Several matters of miscellaneous business also came up for consideration and disposal.

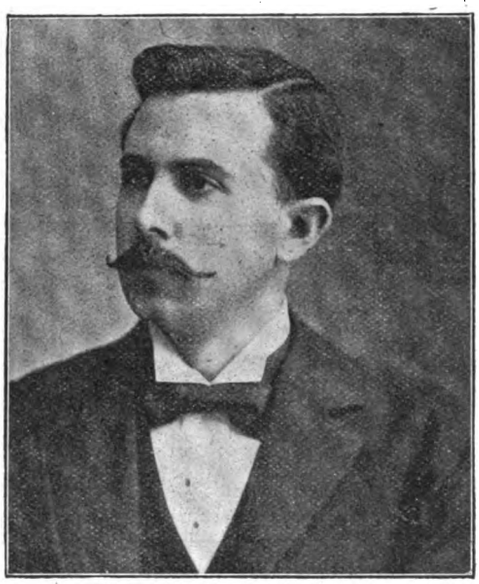
THE THURSDAY MORNING SESSION

was once more an open joint meeting of members, manufacturers, and ladies. The first paper on the programe, "Our Export Trade," had been prepared by W. H. Matthai, of the National Enameling & Stamping Co., Baltimore, Md., who was unable to be present, because of the death of a

PRESIDENT JAMES J. MANDLEBAUM.

brother. On request of the president, this paper was read by R. R. Williams, of New York. It was as follows:

ADDRESS OF W. H. MATTHAI.



Mr. President: When your letter reached me with the request that I make some remarks to your Association at this meeting and to state the subject on which I desired to base such remarks, I was at a loss to know just how to reply. An unusual press of work induced me to postpone the matter for that time, and then I wrote you requesting that you select the subject about which I was to talk. When I saw from your programe that you had selected "Our Export Trade," I realized that you had given me an opportunity to cultivate a large field with but very poor implements. I will, however dwell largely on statistics obtained from the Government reports, and which will apply more specifically to the business with which you and I have been connected.

There are few topics to-day of more practical importance to American business men than our export trade. At all periods of our national history, our industrial and commercial activity has been greatly effected by the extent of the foreign demand for our products. In the future, more than ever before, the conditions of our export trade will influence the industrial health of our country. The last few years have witnessed a revolution in certain departments of our trade, the full significance of which has not

Digitized by Google

yet been but perfectly understood by most business men, and has made scarcely any impression at all upon the great body of even ordinarily well-informed citizens.

For very many years we sent abroad little, except the raw products of our fields, our forests, our mines and our fisheries. In 1870, nearly a century after the Declaration of Independence, our exports of manufactured goods amounted to less than $48,000,000, or not quite $1.30 per head of our population, yet 1870 was, in the way of export trade, a record-breaking year. The total value of goods of all kinds sent abroad by us that year exceded by nearly $40,000,000 the amount in any previous year. From that time on, for about fourteen years, our export trade in manufactured goods was subject to some fluctuations, but on the whole it expanded with great rapidity and steadiness, and by 1884, had reached the comparitively large total of $144,000,000, or just about three times as much as it was in 1870, the actual increase having been nearly $100,000,000. For the next nine years there was but little further growth, and in the fiscal year ending June 30th, 1893, we sent abroad $158,000,000 of manufactured goods, or but $14,000,000 more than we did in 1884. Then came the change, the full extent of which I trust has not yet been experienced. In 1894 our exports of manufactured goods increased $25,000,000 and we sold to foreigners nearly $184,000,000; in 1895 we did as well; in 1896 we added another $35,000,000 to the 1895 total, and sent out $228,000,000 in value of the products of our factories. In 1896 the total was increased by another $25,000,000; and in 1897 we added nearly $50,000,000 more. In 1898 we piled $11,000,000 on top of the total of '97.

SECRETARY-TREASURER C. B. CARTER.

The monthly report of the Bureau of Statistics of the Treasury Department, issued last week, shows that for the ten months of the present fiscal year we have exported $41,000,000 more than we did last year. It is, therefore, safe to assume that our exports of manufactured goods will, in the twelve months which will end on the thirtieth day of the present month of June, be valued at not less than $330,000,000 of our money. These are big figures. They exceed the entire value of our domestic exports of all sorts in the year 1860, and the year 1860 was one of the export trade of which was at that time unprecedented. The exports of the current fiscal year of manufactured goods are over seven times the value of our exports of the same class in 1870, when our population was probably more than half as numerous as it is now. Bearing in mind the great decrease in the price of the manufactured articles, it is probable that the actual quantity of goods sent abroad is now at least twelve times as great as it was thirty years ago. It is still more significant when we consider that they are more than twice the value of our manufactured exports in the year 1893, which was only six years ago.

Our export of crude goods, principally agricultural products, has added enormously to the wealth of the nation. It has, however, in its nature one great disadvantage; its extent and profitableness are subject to great fluctuations. When in Europe, the Argentine Republic and in India the crops are short and ours at the same time abundant, we ship enormous quantities of cereals at a profit. Fortunately for the rest of the world and probably, therefore, in the long run for us also, such conditions do not always prevail. The sun and rain comes in the natural course to the valleys of the Danube, the La Plata and the Ganges when they are needed, and when we have good harvests the prices are at a point at which the American farmer can make nothing; or, if our crops are short, we have little to send abroad at a price which the wheat-consuming countries are willing to pay. The fluctuations to which some of our principal agricultural productions are subject are well illustrated by the fact that, while in the crop year of 1879-80 we sent abroad wheat to the value of $190,000,000, in the year 1895-96 it was but $39,000,000 in value. While in 1897-98 it was worth $144,000,000.

An export trade to many different countries, in various kinds of manufactured goods, once firmly established will, of course, be subject to some fluctuations, but they will not by any means be as great as those which affect agricultural products, because neither the demand nor the supply are so largely controlled by weather conditions here or abroad. It follows, therefore, that a large foreign trade in manufactured goods, when once built up, is more certain than is the trade in agricultural products. It is to our advantage to do as much as possible of the work of turning our crude productions into finished goods, ready for ultimate consumption. Besides, there is in the nature of things a limit to the possible expansion of our foreign trade in agricultural products. The opening up of extensive and rich agricultural sections in Russia and closer railroad connections with the Orient, will make the competition greater than heretofore in agricultural staples, and will cause a smaller normal demand under normal conditions for them. More intensive farming on our part and better methods of cultivation may, and doubtless will for a number of years to come, add more rapidly to our production of agricultural staples than the increase of our population will add to their consumption. But in the nature of things there is a limit to such expansion. During the five years from 1880 to 1884, both inclusive, the average annual export of unmanufactured goods was $688,000,000; fifteen years later, in the five years from 1895 to 1899, the average annual value of such exports was $758,000,000, or but little more more than ten per cent. greater than it was a decade and a half before. In the same time the average annual value of the exports of manufactured articles increased from $106,000,000 to $262,000,000, an increase of $156,000,000, or twice as much actually, and about fifteen times as much relatively, as was the case with the export of unmanufactured goods. There is, therefore, no necessary limit to the possibility of expansion in our export trade in manufactured products.

Take a department of industry in which both you and I are especially interested. We have always sent abroad some iron and steel, but until recently we were, so far as these metals and their products were concerned, an importing and not an exporting country. Legislation seldom changes as rapidly as do the conditions which brought it about. The present tariff law, passed less than two years ago, contains all through its iron and steel schedules evidences of what was once the relation of this country to Europe with reference to the production and consumption of steel. That relation does not now exist, and it appears

Digitized by Google

probable that it will never exist again. Steel rails are still subject to a duty of $7 per ton, yet in the last ten months we have imported 154 tons of them, and we have exported 236,000 tons. Less than twenty years ago the imports of iron and steel were five times as valuable as the exports. 1894 was the first year in the history of this country in which the imports of iron and steel were exceeded by the exports. In that year we sent abroad $29,000,000 and $20,000,000. In 1895 our exports were $32,000,00 and imports were $24,000,000. In 1896 our exports were $41,000,000 and imports $26,000,000. In 1897 our exports were $57,000,000 and imports fell to $16,000,000. In 1898 the latter were $12,500,000, and this year will be about the same. while last year the exports were $70,000,000, and this year they will exceed $90,000,000. In ten years we have changed from a country importing twice as much iron and steel as we exported to a country which exports seven and a half times as much as it imports. There are some very significant thoughts suggested by these figures. In the first place, they raise the question whether periods of depression, or, as we call them, "Hard Times," have not their economic value, especially in their bearing on our export trade. It was during such an era, following the panic of 1873, that our export trade in manufactured goods began an upward movement which carried the exports of $47,000,000 in 1870 to $144,000,000 in 1884. There was no further expansion then until after the panic of 1893, when the movement started which has, up to this time, raised the value of our export trade in manufactured goods to $330,000,000.

There is another thing to which I wish to call your attention. Whatever may be the other effects, beneficial or the reverse, of combination of large industrial plants now going on so rapidly around us, there can be no question whatever that it tends to promote our export trade. Large producers can manufacture more cheaply than small ones. Whether after they have manufactured they will sell their products more cheaply than the small concerns would have done is, as has been said, "another story," This much, however, is certain, the cheaper you produce goods, the cheaper you can sell them, if you want to. The more and greater facilities you have, the cheaper you can produce goods. Now, you will pardon me, I trust, for speaking about the business with which I have been connected for a number of years, because it is of that business that I can speak more definitely. Up to the present time no important export trade in manufactured sheet metal goods was profitable, for until very recently we have been very large importers of tin and steel plates. Prior to 1891 we bought abroad all we consumed, and before that year our imports had for a number of years averaged more than $17,000,000. In 1891, in anticipation of the duty levied by the McKinley bill, our imports amounted to $36,000,000; in '92, $12,000,000; in '93, $17,000,000; in '94, $12,000,000; in '96, $9,000,000; in '97, $5,000,000; in '98 there were less than $4,000,000; and in this fiscal year it appears probable that they will but little exceed $2,000,000. So that we can now produce our tin and steel plates at home. But even under these conditions we have not been able to compete in the markets of the world with the German producers of what is known as enameled ware. The German concerns have been and are operating on a very large scale, having their own rolling mills, which enable them to finish their products from the steel bars. None of the American firms engaged in similar business, large as some of them were, had the facilities or the capital to carry on such extensive operations. The company with which I am now connected, and which has purchased the plants of a number of firms heretofore engaged in the business, has now almost completed furnaces and mills which will enable it to take in the iron ore at one side of the works and turn out finished enameled coffee pots or other sheet metal goods on the other. As a friend of mine said some time ago, relative to the large industrial plant through which we had just gone, "The only way to be more thorough would be to construct a plant capable of taking in at one door the deed of the land containing the iron ore and turning out a certified cheque for the product at the other." There are other ways in which these large combinations of capital can stimulate foreign trade. They can afford, as no single firm or corporation can do, to study systematically the demands of foreign markets. They can send men abroad to find out just what the conditions in France, in Russia or in China may be; just how much business can be done; just what the local taste requires; how the goods shall be packed. The expense of so doing will prove a comparatively small item in the budgets of the great national corporations. They would prove very serious factors in the expenditures of a single firm. Those things can all be done. The corporations which are well managed will do them, and will succeed thereby in building up a trade which will be profitable to their stockholders and their country, and in so doing will keep employed the vast army of wage earners, whose employment has such an important bearing on the prosperity of the country. Those that will not do this, but, protected by tariff walls, look only for profit by raising prices and reducing the consumption, cannot hope for export trade or permanent success here or elsewhere. Unless our manufacturers operate steadily to command foreign markets, our export trade cannot increase, and, in the long run, cannot maintain its present dimensions. If our export trade declines I do not believe that the present industrial prosperity of America can be permanent. It is, therefore, incumbent upon us to use our best efforts in every legitimate manner to keep the balance of trade in our favor, and if through our inventive genius and perseverance we can increase our foreign business in the future in the same ratio as in the past six years, there need be no fear of a recurrence of the "hard times" of '73 and '93.

The next paper was on "Hardware Expansion," and was read by Cliff E. Speer, of the Speer Hardware Co., Fort Smith, Ark., as follows:

ADDRESS OF MR. SPEER.

It is a pleasure to have with us so many manufacturers and listen to their words of wisdom and experience. It proves conclusively that in us they recognize friends and co-workers. Were there no other compensating features connected with this meeting, it would be enough to repay us for the thousands of miles travel to feel the kindly presence of so many of our daily callers, the "Knights of the Grip."

While we readily recognize that this whole thing belongs to them, as does everything else when they are around, they are so considerate in their treatment of us that we are almost persuaded we are also participants in the proceedings. I would gladly continue in this strain and forget the real subject of my address, but our friends of the press who have been supplied with copies of this gem would never forgive me. Expansion, therefore, being the word to conjure with at the present time, and feeling that however much we may differ on national expansion. we are one voice as regards hardware expansion, along the proper lines, I ask your indulgence for a few moments.

Tradition assigns to Tubal Cain the discovery of extracting iron from its ores. We can readily imagine him hammering out the machete with which his father, Lamech, committed the second murder. If while he was forging the belt for his sister Naamah's fig leaf dress, he could have had a vision of the possibilities his discovery opened up for the artisan and mechanic, he would surely have prayed the Lord to not only extend his life 935 years but 4935 years, that he might enjoy the fruits of his discovery and meet with the Southern Hardware Jobbers.

Two or three thousand years after this, Solomon picked

Digitized by Google

up Hiram of Tyre, who seemed to be the most progressive hardware man of that period, as he was able to supply brass hinges and various other articles of Hardware for the temple. Passing from the Israelitish development of this business across the Hellespont to the land of beautiful myths and artistic genius, our attention is next directed by Vulcan arguing with Hephæstus over the best method of distributing his creations. He claimed Jupiter had thrown him from heaven in a fit of anger, because he posed as a friend of the consumer, and thought it an injustice to the overworked and downtrodden to allow the middleman to mix up in the matter at all.

Hephæstus, however, being a Greek, and therefore more advanced in thought and civiiization, contended Jupiter was entirely right, and while it would no doubt be rather hard on heaven to lose the divine artist, yet a principle was at stake and many sacrifices could be made to preserve a principle.

After a long and vexatious wrangle, Vulcan conceded the point and the first expansion in hardware resulted, inasmuch as it was an expansion of an idea among two old Hardwaremen.

We pass without notice Aristotle endeavoring to make a powerful steel battering ram for Alexander. We will not consume time by a long dissertation on Franquoy's discovery of the inventor of the valved bellows, but will pass by easy gradation to the Twentieth Century and overhear the following colloquy in one of our large western jobbing houses:

President, who has assembled all of his traveling salesmen. "Gentlemen, you are aware that it has been for some time a custom of ours each year to add some new line to our stock. This year, before making the selection, we thought best to have an expression from each of you as to what would be the best seller in your territory. I now ask you to express freely your ideas."

The general impression seemed to be that there wasn't anything more to be had, when the Texas drummer spoke up and said, "Mr. Jones, I have thought over this matter a great deal and very seriously, knowing its importance, and after going over the entire field, find only two articles that we haven't already, and they are cheese and hot tamales, and we had better take both of them." This was another expansion in Hardware.

Since the days when iron was hammered into battle axes and sold to the Knights of the Crusade the standard of our trade has been high, and I am opposed to dragging into our business anything and everything, simply because some profit can be made thereby. Numerous articles are being distributed through the channels of the Hardware trade that do not belong there. The tendency of this is to place a bar sinster upon our escutcheon as true followers of Tubal Cain and Vulcan, and to carry us to the level of the department store.

Too many of our jobbers indulge in the practice of instilling into the minds of their salesmen that all they are expected to do is to make an average profit; it is immaterial to them that their salesmen sell axes or saws at a loss, if by cutting these they can secure an order and thereby make up the average. This is license to cut everything in the catalogue and as long as this nefarious practice is kept up, just so long will we be on the hunt for odds and ends on which we hope to bring up this average, and the end of profits cannot be far off. Now is the time, while this great upheaval in prices is going on, to correct this evil. Let's resolve to make every article bear its burden of profits. There can be no more sense in disgracing horse shoes and barb wire than pocket knives or rat traps.

Many manufacturers have discovered this cancerous growth and have administered an antidote by fixing prices at which their goods must be sold. That we are in need of this medical attention of the manufacturer, who oftimes administers distasteful doses, is a serious reflection on the intelligence and business capacity of the jobber.

I now turn to a phase of Hardware expansion with pride and pleasure and extend the right hand of fellowship to the manufacturer, who is putting forth his greatest efforts in an intelligent and vigorous manner to give us new articles of beauty and value that are legitimately ours. How many of us have experienced pleasure in taking into our hands a beautifully designed lock, a saw in blue, or a level true, with what keen enjoyment we have watched the evolution of the ice cream freezer and lawn mower. How eagerly we scan the pages of the iron and Hardware journals in search of the latest and best works of the inventive genius of things our own! With this vast field before us, can we not be content to leave the rubber coat to the clothier, the baby carriage to the furniture man and the cheese to the grocer?

Let us expand our minds, our hearts and our pocketbooks to those manufacturers who are our friends, who need our encouragement and energies. The burden of the distribution of this ever accumulating output of factories rests upon us. Let us therefore not falter in the least. Let us stand shoulder to shoulder with them in this march of progress. Let us show ourselves as able to distribute as they are to create.

We jobbers of the South owe it to ourselves and to our countrymen to remove the stigma that rests upon us of being distributors of the poorest classes of goods, in many instances mere trash. If we are not careful, we will allow ourselves to be put in the position of followers in place of leaders in the wonderful industrial expansion now going on all over the Southland. I speak for Arkansas and our neighbor, the Indian Territory, when I tell you that the demand is ever increasing for improved farming tools, better cooking utensials, better everything, and we must prepare to supply them or lose them to the catalogue houses.

In conclusion permit me to express the pleasure I have had at this, my first meeting with you. I will go home inspired to be a better worker for our Association. Now let me ask the maker of keys to make a master key, that will unlock the hearts of everyone here and leave the floodgates of good will wide open, that we may all look back upon this meeting with feelings of satisfaction and pleasure at having done a good work.

"Associations and Their Effects," was the next paper on the programme, and was presented by T. W. Gathright, of the May & Thomas Hardware Co., Birmingham, Ala., who spoke as follows:

ADDRESS OF THOMAS W. GAITHRIGHT.

Webster defines the word "associations" as follows:—

A union of persons in a society formed for transacting or carrying on some business for mutual advantage.

This I conceive to be the purpose for which our Association was formed, and it should be the ambition of every member to accomplish this object.

We have several associations, all of which I think are beneficial.

There is the Local Association that benefits those doing business in the same town; then there is the District or State Association where men come together from different towns and discuss the different methods of conducting business, from which each one learns something that is beneficial, and again we have our Southern Association, composed of all the states. We might compare all these to the different courts of law, and begin by classing the Local Association the Justice Court, where one man has the deciding of cases, which decision is then carried to the Circuit Court, which we will liken to our State or District Association. In this court the judge is a more learned man than in the lower court and expounds the law to the jury, who decides the case, which from this court is carried

Digitized by Google

NEW YORK PUBLIC LIBRARY ASTOR, LENOX AND TILDEN FOUNDATIONS

to the Supreme Court of the State, which we will consider as our Southern Association. In this court are to be found what are considered the most learned men in the State, from whose decision an appeal is rarely ever taken, but whenever it is carried to the Supreme Court of the United States, that we will class as our National Association, which is presided over by men that are chosen from the front rank of the brightest minds of the nation. In our Local Associations, we have some things that are of no interest to others but many things in common with all, and after discussing these matters and learning all we can from the experience of each other, we go to the State Association, where these same questions are handled by perhaps men who are wiser and of more experience than ourselves, and together with these we go to the Southern Association, where we have the brightest flowers culled from all the Southern States, who take up the same subjects and handle them in such a manner that we get information never dreamed of before. Then finally we go to the National Association, where we find the wise men of the East. The cool and deliberate from the snowy clad hills of the North. The men with broad and expansive minds from the rolling prairies of the West, and last but not least, the good natured and hot tempered sons of the Southern clime, and from this array of talent we get information that has, no doubt, enabled many of us to steer our business ventures clear of the rock of failure into the smooth sea of success. I believe in each and every one of these Associations, and would regret to think there should ever come a time when they would cease to exist.

The effects of these Associations on our business lives are so wonderful that it seems strange we were so long getting together in our locations (and I am pleased to say we have one in our town). We got together and agreed to maintain prices on certain staple goods that were formerly handled at a loss. In our State Associations, we meet our immediate competitors, and very much to our surprise, find they are not the rascals our traveling men have led us to believe they were. Through the Southern Association we have been able to make contracts and agreements that have paid us back many times over the small amount we contribute for its maintenance, and in the National Association we come in contact with most of those who compose all the other Associations and on account of our Union are in a position to ask and receive concessions that we could get in no other way. The jobber is not the only one that feels the effects of these Associations; but the manufacturer as well. He can feel that the distribution of his products is in the hands of men that will maintain a price which he tells them is the best that can be made and leaves sufficient margin to yield a fair income on the money invested. The manufacturer should, therefore, protect the jobber, for in doing so he advances his own interest just as much as he does that of the jobber.

Paul, the Apostle, in one of his letters to the Corinthians, likens the church unto the human body, composed of many members whose duty it is to perform each their separate functions, and whenever one fails in its duties it affects the whole body. Therefore, let each and every member so act that whatever he does will redound to the honor and not discredit of his body of which he is a part.

George Washington, in his farewell address, said, "Observe good faith and justice towards all nations."

If such a rule is applicable between nations, why does not it apply also to individuals, and I would admonish, each and every one of you, both manufacturer and jobber alike, that in all your dealings with each other, to let this be the maxim from which you will never vary.

The addresses from manufacturers' representatives were fittingly opened by V. A. Moore, of V. A. Moore & Co., Atlanta, Ga., as Mr. Moore is the direct representative of the following well-known concerns: J. H. Sternbergh & Son, Reading, Pa.; Standard Tool Co., Cleveland, O.; National Screw & Tack Co., Cleveland, O.; C. E. Jennings & Co., New York; Chisholm & Moore Mfg. Co., Cleveland, O.; Finished Steel Co., Youngstown, O. and the Birmingham Rolling Mill Co., Birmingham, Ala. Mr. Moore spoke as follows:

ADDRESS OF MR. V. A. MOORE.

Mr. President, and Gentlemen:—When your committee did me the honor of requesting me to read a paper before this convention, and, at the same time, asked that I name my subject, I felt that the compliment demanded my acceptance; yet, I must confess that I was at a loss to find a subject with which I felt myself sufficiently conversant to profitably consume fifteen, or even ten, minutes of your valuable time. When I finally selected as my subject "The Medium," I had in mind the prevailing industrial conditions of the times, and the comprehensiveness of this subject will, I believe, allow me to treat of all these conditions, under this general head.

The commodities in which you are interested, enter into every department of our industrial system, and to such a vital extent, that the condition of the iron, steel and Hardware market is the barometer of all values. This needs no elaboration by me. When the great iron and steel interests of this country are in a languishing state, all other interests necessarily suffer. For the past few years, conditions have been such that the manufacturer could not obtain a remunerative market for his products. Political conditions have, in my opinion, been largely the cause of the depressed market, resulting in ruinous competition, closed factories, and almost universal suffering among the mass of people. Under such conditions, it is natural to seek some means of relief, by which the price of commodities may be controlled, and a just remuneration for work and capital secured.

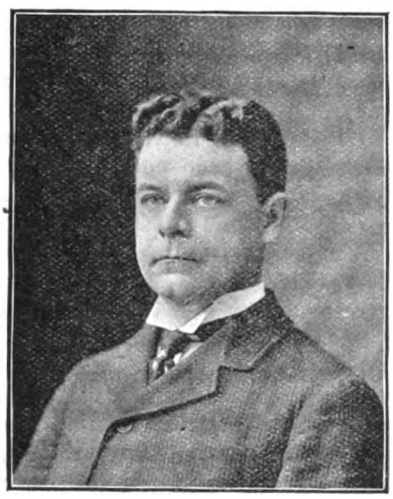
Industrial consolidation, the spirit of the present time, seems to be the means by which these results will be obtained. Organizations on a reasonable basis, for the purpose of correcting existing abuses, will have the effect of benefiting not only the manufacturer, but the consumer, as well. Combinations and consolidations, however, cannot safely pass beyond the limit of legitimate profit, and what we may in a general way term legitimate commercial usages.

A consolidation of many industrial interests, organized for the purpose of centralizing power in the hands of a few, and eliminating all competition, will result, ultimately, in a state of paternalism. This will entail a vast disorganization, serious loss to the mass of the people, destroy commercial values, and finally menace our very political institutions.

If the trusts now established in this country, pursue this latter and unwise course, it is not difficult to foresee the end. The spirit of individual independence and progressive enterprise, the mainspring of American advancement, will no longer exist. The brains and genius, which have, from small capital, developed magnificent industries, will be throttled, and the independent spirit of the American, which has made him the standard of manhood for the world, and which has made our people the invincibles of the earth, will give place to the subservient and passive spirit of the employee.

But I do not anticipate such a condition. The patriotic spirit which makes the individual right subservient to the general good, will assign to its proper place that army of industrial promoters who never produce, who, regardless of all instincts of right and justice, seek, for selfish purposes, alone, to acquire that for which they have not labored.

Legitimate competition is the means of all commercial advancement, and is the incentive to increased effort. The competitive spirit has raised the American manufacturer to



Digitized by Google

the position where he has made the quality of his product, and the price at which he sells, the standard for the entire world.

Conservative association or combination is one of the milestones in the evolution of commercial progress, and, while abuses may arise in the initial steps of this evolution, no sensible man can fail to admit that organized effort will control where individual effort might fail. The good accomplished by this, your organization, is sufficient evidence, and this association of Hardware merchants, representing an actual investment of nearly six millions of dollars, and doing a business approximating twenty millions of dollars, annually, influences a consideration which could be obtained by no individual effort. The inherent principle of right, however, must underlie this organization and all others.

Radical change entails disorganization, and coercive measures, to free born American spirit, are intolerable. Conservatism is the medium of permanent progress, and, paradoxical as conservatism may seem under competitive conditions, this statement will bear the closest analysis.

The trust promoter has paid to the traveling salesman and manufacturer's agent a compliment, which these gentlemen do not, in all cases, appreciate. He has issued millions of dollars of stock, and to balance the economic scale,

V. A. MOORE.

he has eliminated the direct agent, that the cost of his services may pay the interest on this enormous volume of water. In these estimates, however, the fact is lost sight of, that whether it be a combination of manufacturers, or an individual manufacturer, what is produced must be sold and personal contact, through the medium of the direct agent, accomplishes this, and has accomplished this, since the days of the primitive pack peddler.

The direct agent has always occupied a unique position in the commercial and political economy of this country, and you will pardon me for paying a tribute to my predecessor of thirty years ago, since youth at that time excluded me from the fold. He did more than all other elements combined, to break down intense sectional feeling; to re-establish, through personal commercial relations, the old feeling of a unity of interests; to convince the man from the South, that his Northern brother had a soul, and to show the North, that the Southern gentleman was not a fire-eating barbarian.

Neither time nor conditions can arise for the successful elimination of the agent. He has been, is now, and will continue to be, the link that connects you with the producer.

Three component parts are required in all things to make a perfect whole. I care not whether it be spiritual or material. This principle was proclaimed to the world nearly two thousand years ago, and the evidence of the ages has proven its truth. In nature we see the root, the stalk, and the flower; in man, we have the body, the mind, and the soul; and in the Hardware business, we have the manufacturer, the medium of production, his agent, the medium of transmission; and the jobber, the medium of distribution;—all three elements so closely related that injury to one, means injury to the other. Destroy the one, and you cripple your means of accomplishing the perfection of your purpose.

You, gentlemen of the Hardware Association, are the means of carrying to the remote corners of the earth, articles of necessity, usefulness and comfort. By your commerce, you make it possible for every individual to know and possess the implements of civilization. Your position is one of power, usefulness and necessity, and cannot be successfully assailed.

In the march of progress, and in the whirl of changing conditions, let us take a broader view than that of the mere selfish interest. Consider that we owe an obligation to posterity, and that your boy, and my boy, is entitled to equal rights and opportunities that you and I have enjoyed. Let the spirit of conservatism be the medium of our dealings, and commercial prosperity must stay with us for some time to come.

On invitation from the president, other gentlemen who were present, spoke briefly.

REMARKS OF MR. SUPPLEE.

William W. Supplee, ex-president of the National Hardware Association, was received with great applause, and when it subsided, said:

I thank you for your kind applause in advance, for there is nothing to entitle me to it. I have had the pleasure upon several occasions of being present before this body which we all think of so highly, as president of our National Association.

I fully expected our present president, Mr. Bishop, to be present on this occasion, but Mr. Bishop found it impossible to come. He asked me to represent him, and I could not forego that pleasure and honor of meeting the manufacturers' representatives who gather around this body, no matter whether you meet in Arkansas or in Savannah or Richmond, or whether in the place of your last meeting. I did, however, say to our president, Mr. Bishop, that I would be present on one condition: That I would be permitted to participate in the deliberations of that body, but with the understanding that I shall not be called upon to make a speech or write an article. This was promised me, but I find on the programme it is not altogether carried out, and I came in this morning without knowing what I should say before you.

It is a very peculiar coincidence that the meeting of this Association was called on the anniversary of what is known as "Flag Day." One hundred and twenty-two years ago the American flag was accepted by the Congress of the then few colonies. One hundred and twenty-two years ago thirteen stars were all that were on that beautiful flag—the emblem of our country, which was destined to carry liberty with it from a great nation. We were then fighting under thirteen stars; now we have forty-five. Your members have also gathered from a very small beginning. It is therefore a very happy coincidence that you hold your meeting on the 122d anniversary of that flag. It is very noticeable at the same time, that representatives of all the great nations of the world are now gathered in that beautiful city of the Hague for arbitration, or to see if some means cannot be devised to prevent the horrors of warfare.

The organization that I represent—the National Hardware Association of these United States—was not thought of until it had passed through the hardships, trials and unnecessary evils, as we thought, that encompassed the country. A large number of jobbing houses have sprung up throughout the country, and it seems desirable that

Digitized by Google

some means should be adopted to gather together persons from all these various States, and consider the conditions that exist, and the terrible warfare and unnecessary slaughter and incessant and unnecessary harshness of feeling which have existed between them.

One of the by-laws of the National Hardware Association recognizes and calls for a Committee on Fraternal Relations. It is the business of that committee to aid, as far as possible, all local Associations in cities or towns to expand into State Associations, where possible, as probably you cover more States than any one of them, next to the Pacific Association and the New England Association, and you should see what can be done to meet the conditions which confront the average business man.

The conditions that surround you, gentlemen, are not the same as those in the far and distant West, nor those that exist in the New England States or in New York City. Articles with which you come in competition more vigorously in one section are not competitive articles in distant sections. Therefore it is very natural that sections should be arranged in local sections. But there are certain conditions that exist between all jobbers, which exist throughout the country. The conditions of honesty and integrity from one man to another exist throughout the broad land. Differentials exist as between the customer and the small trader. Thus conditions exist of the right and proper method to market their goods throughout the entire country, and by the consensus of the opinions of these various sections which the National Hardware Association endeavors to penetrate—by getting the consensus of opinion of those various sections, the conditions may be modified.

To respond to the call of the president. These gentlemen respond to the call whether they are in the extreme Northwest, on the Pacific Coast, in Kansas City, Minneapolis, or as far as New Orleans, in almost any of the sections of country which you gentlemen represent, they respond to the call of the president. For the first two years especially, it was my privilege to meet almost every manufacturer we came in contact with. The various views of members were not known; we had no opportunity to consult together; the pathway was to be hewed. It may be dangerous ground; unwise, experimental actions were nowhere to be considered. It was a question of honesty; it was a question of differentials, of protection as between manufacturers and consumers. When I say to the retailer—these things were brought before the manufacturers to meet their approval, and there has never been any feeling in this meeting—not the slightest. We found after one year they were the strongest advocates we had; and stand today the strongest advocates of the jobbers. The strongest opponents to arbitration, some of those who were most vigorously opposed te concerted action then are persons who are now our and your strongest friends.

I therefore will not attempt to take any more of your time.

Brief remarks were also made by Webster R. Walkley, James P. Kelly and others.

AN EXECUTIVE SESSION

confined only to members of the association, was held on Thursday afternoon. A paper that was to have been read by W. S. Sanford, of the Roberts, Sanford & Taylor Co., Sherman, Texas, was not presented.

THE SESSION OF FRIDAY MORNING

was opened at the usual hour, with President Mandlebaum in the chair. The president departed somewhat from the printed order of the programme, and the first paper called for was entitled: "Equity as it Should Exist Between the ...nufacturer and Jobber," and was presented by R. C. ...n, of the Charlotte Hardware Co., of Charlotte, N. ...

...t paper called for had been prepared by R. H. Edmonds, Editor of the *Manufacturers' Record*, Baltimore, Md., and was entitled: "The General Progress of the South." As Mr. Edmonds was unable to be present, the president requested D. T. Mallett, editor of *The Hardware Dealers' Magazine*, New York, to read the paper in his stead. It was a strong and able presentation of the commercial and financial development of the South in recent years. It recited the remarkable industrial progress made by the South, showing that where, in 1880, the South had $257,000,000 invested in manufacturing, with a total production of $659,000,000, it now has $1,000,000,000 capital invested, and an annual output of about $1,500,000,000. "The South, and the South alone," said Mr. Edmonds, "combines in itself all the natural advantages for the development of diversified manufactures, the creation of wealth, and the support of a dense population."

The next paper was called: "A General Talk," and was presented by its author, George H. Barbour, of the Michigan Stove Co., Detroit, Mich., who spoke as follows:

ADDRESS OF GEORGE H. BARBOUR.

When our business interests are affected, as has been the condition during the past five years, does it not behoove not only the manufacturer, but the jobber as well, to carefully look into the situation and see what can be done to better their conditions? Have we not all been placed in many trying positions when we stop to consider the past five years of depression? We have all been waiting for an improvement which, in my opinion, has now presented itself, and we begin to see a little daylight through the heavy clouds which have so long hung over us.

The manufacturer has continued to do business to a greater or less extent; he has seen much of his product shrink in value; while he has made his purchases of materials, we admit, at low prices, he has realized too often reduced prices for his manufactured products, with a decreasing demand, so that to keep the institution running to its full capacity at times was one of the impossibilities, thereby resulting in idleness of willing employes who wanted and needed the work which the manufacturer was unable to furnish. When such a condition as this exists throughout this great country of ours, it is almost impossible for anyone to calculate the great disaster which is sure to follow.

Show me any of our manufacturing institutions with the smoke issuing from their chimneys, and their employes well employed six days of the week and I will vouch for prosperity. I rejoice to say, so far as I am informed, that the majority, if not all, of our manufacturing institutions are to-day in a changed condition—all busy. This being the case, can we not say that a similar condition, if not a better one, exists to-day with the jobber, for the prosperity of one means the prosperity of the other.

I realize fully that you, the members of this organization, and the jobbers of this country have, during the past five years, passed through a siege, a repetition of which you would not care to encounter for many years to come. I have always held that there is, and must always be, a mutual interest existing between the manufacturer and the jobber, and that success to the one must bring success to the other. If the manufacturer does not manifest an interest in the jobber, he is not entitled to success, for the prosperity of his business depends largely upon keeping the jobber in close relation with him.

While I have endeavored, briefly, to show you the mutual good fellowship which must exist in order to bring about desired results, may I be allowed to carry this subject a little further, and call your attention, as jobbers, to the necessity in your dealings with the retail merchants of seeing to it that this may always exist. Thus mutual interest I claim is necessary to make your business a great success. No doubt all of you are willing to admit that many large institutions are not built up in weeks, months or

Digitized by Google

years; many a business man, as you well know, has grown gray haired in his business, and I have come to one conclusion, namely, that no manufacturer, jobber or retailer, can say truly to himself, "I have my business under control—no competitor can take it away from me." Oh, what a mistake for any business man to even think this, and I want to urge him to not continue in this mistaken thought, for as sure as you live that day has gone by. "Eternal vigilance" seems to me to be the words we should keep before us, and then if we do not look out the other fellow is after us and close on our tracks.

I have mentioned the retailer, because I consider him a very important factor to both the manufacturer and jobber. My first business education was in a country retail store in old New England, where I was born. The business was established by my father back in the year 1837. The stock carried consisted of a somewhat mixed variety—dry goods, Yankee notions, boots, shoes, hats and caps. I was obliged to start in at an early age, and I shall never forget the experience, and never have regretted the schooling if I may so term it, that I received at the time referred to. Perhaps it is from this experience that I have such a tender spot in my nature for the retailer.

I want to occupy a little of your time on the subject of associations, and may I be excused if I state that I speak from a good deal of experience on the subject? You know it is often said that in "union there is strength," so I unhesitatingly say that in "association there is a power for good." Do not understand me as advocating any association that will misuse its power—not so—but I advocate associations because they bring together business men engaged in the same lines of business, and if they do nothing more than come together at regular stated dates, there is sure to be much good result from their deliberations. In the manufacturing business in which I am engaged, we have now, and have had for years past, an association which has enabled the majority of our manufacturers engaged in the same line to become better acquainted and exchange ideas, and instead of many of us concluding, as we often did on the old lines before associations were formed, that the majority of those engaged in the same lines were the meanest kind of fellows, we have had the experience of finding out that they were a lot of jolly good fellows, and in all the different associations of which I have had the pleasure of being a member, at all times, and under all circumstances, I feel at liberty to write them letters, and if I am informed that any member thereof has or is doing something different from what he has agreed to do, I never hesitate to so state to him in person or by letter, and I want him to do the same by me. We must have confidence in each other. Associations, properly organized, do not call for rigid rules, but always agree to what is reasonable and right. These are the days of associations. The city of Detroit, where I reside, we claim is the Convention City of the world (please do not consider this egotism), for the reason that last year we took care of sixty-eight different associations that met in our city, and this year we expect to have this number increased to nearly one hundred. Among the number may I mention the Christian Endeavor—an association or society, if you so choose to call it, numbering, I am informed, over one hundred and fifty thousand members; and right here I wish to say that we hope to have the honor of having the Southern Jobbers' Association with us sooner or later. You know you have already been invited, and I will vouch for the invitation to hold good at any time, and when you come, you shall receive a hearty welcome. In conclusion of this subject of associations, I urge that your present [illegible]bers be looked after carefully; see to it, individually, [illegible]o member resigns, and, in my opinion, your officers [illegible]ent members, should not feel satisfied until they [illegible]lled every Southern jobber. Then continue on until you have secured all the jobbers in the East, West and North; then you can well call yourselves the National Jobbers' Association of the United States.

A word about travelers and salesmen—concluding that you employ both—and I want to classify and make a distinction between your traveler and your local salesman. First, let me ask what constitutes a good traveler? From my standpoint, he should be an intelligent man—I do not mean he must be a college graduate, but a man of fair education at least. He should be an excellent judge of human nature, because he will come in contact with a variety of different characters, and if he is to meet with success, he must not be self-opinionated; he should endeavor on his first visit to study the customer; if the merchant is engaged, wait until he is not busy before he shoves a card in his face. When the opportunity affords itself, he should approach him in the right way—not by commencing to criticise unfavorably some competitor's goods, but bring to the attention of the merchant intelligently the line of goods he represents; he should not appear interested to his customer in some competitor's goods.

It is always well for a traveler to keep posted himself in regard to competitors' goods, but never admit to his customer that he is; he should talk from start to finish on what he has to sell. The traveler should always be a man of good appearance, well dressed and, personally myself, I look to see if he has on a clean shirt and collar and his shoes well blacked. In my opinion there are many little things that go to the credit of the traveler if he only carries them out. Of course it goes without saying that he must be a man of good habits and not over extravagant. Now the word "extravagant" I do not wish misunderstood. I am no believer in false economy; I want our travelers to always travel by the best route; I want them to stop at the best hotels, even if it costs a little more, and if they are traveling on daily expenses, I want them to be reasonable, but the item of sundries we always strike out.

Now, what shall we say of the local salesman? Many things which I have said of the traveler apply to the salesman, so far as the jobbing trade is concerned, but the situation is somewhat different. The salesman, being a local fixture, he must at all times be prepared to receive and attend to the wants of the merchants who visit the firm in whose employ he is. He, too, must be a gentleman in every sense of the word—pleasant, agreeable, never tiring, and if, after the merchant has finished his business with him, he can, in any reasonable way, assist him or do a favor for him, he may be sure the merchant will stand by him, and fully appreciate it, and when he returns to the city again to make his purchases, rest assured if the salesman leaves the right impression with him, and his name is Smith, the merchant will not be satisfied if there is another clerk by the name of Brown to have him wait upon him.

The salesman wants to labor to get the merchant to think well of him—he should never deceive him, even if he could gain an order by so doing; let the other fellow have the order if it is to be obtained by such methods, because he will get only one. When a salesman once gets the confidence of the merchant, and he continues to do business with him on the square, never deceiving him in any way, every time that man or firm will stand by the salesman. In a nutshell, my idea of a traveler, as well as a local salesman, is that he must be a gentleman—a man of good habits, agreeable, straightforward and honest.

Of late we have been hearing a good deal about trusts and consolidations of different interests. I am not quite sure that this subject will interest you, so I will only touch upon it lightly.

First let me say that I am not favorable to an investment when you take a dollar, real value, add water, as it is termed, then ask me to invest to the extent of double or triple the amount of real value. The holder of any such

Digitized by Google

securities will, sooner or later, get left, and this is just what our people have been doing with their investments during the past twelve months or more, until securities, called bonds, preferred stock and common stock, have been issued during the year 1899 to date to the amount of one billion five hundred million dollars. In 1898 the amount was nine hundred and sixteen million.

Now I believe that a consolidation of interests can be carried out to a successful issue, if they are treated as real values. I mean by this—to illustrate: If five jobbing houses, located, we will say, in one of our Southern cities, find their competition so sharp that ruinous prices are the result, and, at the end of the year's business they all find they have made no money, it would be much better for them to consolidate their interests on a sound basis, each and every concern to be allowed the real value of its stock, measuring all by the same yard-stick, and giving each sixteen ounces to the pound, then issue bonds or preferred stock to the real value, they would then simply be partners, their holdings greatly improved in many ways, they would be able to sell goods just as cheaply, and perhaps more so, because by this consolidation they would do away with the cutting of prices and would establish market prices, which would result in their being able to show

GEORGE H. BARBOUR.

a saving in many ways, which it would take too much of your time for me to discuss. I promised you when I alluded to this subject that I would be brief. My reason for referring to it was to remove from your minds certain prejudices that might exist against consolidation of interests, for which I do not blame any one when you consider consolidations that are not organized on the basis of real values.

One more very important subject which affects us all, and to which we may give a little thought, with benefit to ourselves. I refer to "profit earnings." Is there a single individual jobber in this country of ours who has not realized, during the past years of business depression, a gradual decrease in his profits year by year? You have been able to purchase your goods at very low prices, many times below the cost of production, and you may have said to yourselves, we will purchase a little freely of this or that article, thinking the bottom had been reached and that prices could go no lower, but in this you have been disappointed, and instead of a profit on your business, you have experienced a loss.

To do business you must, as jobbers, meet competition and take the results. You have been patient, and let me state at this point, I know of no line of business that has come out of the wreck with less disaster and fewer failures than the Hardware jobbers, and you are to be congratulated, as can also the retail Hardware dealers.

Now a change has taken place, and the question arises are you, as good business men, going to take advantage of the situation and get full market prices for your goods? You are certainly entitled to them; it should make no difference if your entire stock was purchased at extremely low prices. The question you want to consider is, what is the value of these goods at the lowest market prices? If you have a large supply of nails or bar iron or general merchandise, of which the market value to-day is fifty per cent. more than what you paid, are you going to sell it at a twenty-five per cent. advance, simply because some competitor of yours has concluded to do so? Let him do this kind of business; he will soon get out of stock; then let him go into the market and try to replenish his stock. Do you not think you would soon have the best of him? This is the harvest time; do not allow it to pass without your getting the benefits which you deserve and which will make up for the losses you have suffered.

No doubt you have already experienced difficulty in getting many of your orders filled; and as the fall season comes on, mark my prediction, you will find greater difficulty than you have yet experienced in securing sufficient goods to meet your demands, and my advice to you is to not delay your purchases for anything in your line of which your stock may be short. Prices will not decline on any iron or steel product, but, to the best of my knowledge and belief, will still further advance. Predictions are now freely made that Southern grades of pig iron will reach twenty dollars per ton. To-day, No. 1 Southern is worth in Detroit close to seventeen dollars (last June the same iron could have been purchased at ten dollars). Here you have a 70 per cent. advance. Figure out any manufactured article in which iron is a prominent factor of cost, and convince yourselves whether the manufacturer has his prices up to a point to equal the advance in material. I give it to you as my opinion he is nowhere near it; but next year, or the last half of this year, when he comes to purchase his material, he certainly will be forced to further advance his prices.

The subject given me, "A General Talk," I now leave to you. You must have decided that what I have presented to you has been more in the nature of a talk than an oration. To the latter I make no claim.

In conclusion, fearing I may have talked too long on the subjects I have discussed, perhaps to the extent of wearying you, if so, I would offer an apology, I have enjoyed being with you, and have felt highly honored at receiving an invitation from your worthy president to meet with you, and I assure you you have my very best wishes for the success of your organization, and if each officer and member will feel the responsibility resting upon him and do his duty, you need have no fear for your future success.

The next address was delivered by James H. Kennedy, editor of *Hardware*, New York, who spoke on the subject: "My Friend, the Business Man," as follows:

ADDRESS OF JAMES H. KENNEDY.

The study of the Business Man, as he is revealed at close range, has been to me one of great pleasure and some profit, during several recent years. Perhaps unfortunately for my general angle of vision, and power of discernment, I was sent direct from the school-house to the office of a daily newspaper, and was thenceforth, for a troubled series of years, thrown into hourly communication with a miscellaneous class, consisting mainly of editors, ministers, public officials, politicians, and jail-birds. Of the Simon Pure business man, as such, I gained only an occasional glance. Now and then one of these would enter politics, but in so doing, he immediately lost the saving characteristics of his class, and soon stepped back into private life for fun[illegible] tion, or remained and lost his reputation.

The transition, some eight years ago, from this [illegible] tion, to one where my daily walk and conversa[illegible]

Digitized by Google

with the business man upon his own chosen premises, was like the passing from a darkened fever-ward into the sunshine of the great, white, brilliant outdoors. The shadows one encountered were still shadows, but there flooded about and among them so much of brightness and sunshine and pulsing life, that the penumbra penetrated almost to the centre of the shade.

In this study of a new species, I have seen some things, of course, that could not be altogether approved, but they form so small a fraction in the total measurements that it is needless to dwell upon them here. If there be any force at all in this brief screed, it must accomplish this one purpose: Become a tribute to the honesty and good faith of the modern business man.

Let us here state a truism: That without this recognized and almost universal good-faith of one unto the others, the business methods of our modern civilization would be impossible.

How much could be accomplished if our ways of commerce and finance were set along those of the Chinese plan? Confucius, the inspired son of heaven, taught many things, but mutual trustfulness does not seem to have been among them. I recently read of a Chinese firm in San Francisco which consisted of six members. They bought a safe and set it at the centre of the counting room so that the four sides might be in the sight of all, and then hung six padlocks upon it, to each of which there belonged an individual key; and each key went into the keeping of a member of that firm. No one could take a dollar from that safe, unless the other five were there to watch him. If one member was kept away from too large a pipe-dream, (or smoker) all payments had to be suspended for the day.

How would this method work in your counting room? What would become of such gatherings as these if each of you was compelled to remain at home lest your partners should rifle your safe and rob your store?

Let us admit that there are scamps in the mercantile profession. There are storekeepers who have too close an acquaintance with kerosene cans as applied to insurance policies. There are men who have recurrent seasons of failing, the same as other men have fits. There are shysters of finance who exhaust all the resources of knavery for the money there is in it. There are dead-beats who systematically establish a credit for the purpose of a grand smash and premeditated spoliation. But were you to assemble all these—the scamps, the firebugs, the intentional bankrupts, the knaves, and the dead-beats, the sum of their operations as compared with the general volume of business would be so small as to scarcely merit mention. And of all the lines of commerce and finance known to-day under the name of American business, I honestly believe that the special line represented here to-day will furnish as small a proportion of these clouded specimens as any that can be named.

It is a splendid commentary upon the average honesty of commercial life that there are so many whom one can safely trust. In this I make no restriction in favor of your partners, your heads of departments, your cashiers and chief clerks. It takes in the twelve-dollar clerk, the girl who writes your letters and never gives away their contents (that is if you stick to business affairs and bar personal information), the porter, the truckman and the office boy. There are gentlemen here who employ help by the hundreds, and I don't believe that one of you can think of two people out of each hundred of whose honesty you have the slightest doubt. There are many of them who could steal you blind at a moment's notice—but they don't.

I was in an office in Wall Street some days ago, when an express messenger walked in, dumped down a package of one hundred and forty thousand dollars in currency, took a receipt, and walked away. He was probably in receipt of a salary of from twenty to twenty-five dollars a week, and from one end of the year to the other was handling packages of great value and easy negotiation—and every package went straight upon its appointed course.

There never passes a day in that great centre of cash and its equivalent that millions are not passed along by the hands of messenger boys to whom the tip of a dime assumes a financial operation of some importance. Think of the things you trust to your office boys, and the trouble and loss to which they could put you, were the prevailing sense of the day one of dishonesty, rather than the reverse. These cases are so usual as to become commonplace or trivial, but are never trivial when used to illustrate the one great fact that is the grandest possession of the commercial world of to-day.

Don't take it so much for granted, as to belittle this sterling honesty of business life. Teach the boys who look up to you as the sum total of business success, and as their surest guide to a like success, that indeed a good name is to be chosen even above the riches of the Hardware trade.

Put it on the lowest plane of business morals, if you will. Honesty is the best *policy*. It pays, in the long run in dollars and cents. It is the richest asset with which the young man can start in business life; it is the surest reliance of the business man with which to face the wearing trials of daily life; it is the best heritage he can leave behind him.

Put the taint of recognized commercial dishonesty upon a man, and let him pass through this room. One will meet him with a bow; one will say "Good Morning"; all of you may greet him—and yet there lies an atmosphere about him that he will feel, and you will feel; that intangible something which shows that he is with you but not of you; that narrow line of demarcation across which you may send the friendly word, but that your soul will not pass!

What amount of money is there that will requite a man for this separation from his kind?

It is not to be supposed, however, that a man shall be so guileless as to be transparent to all eyes. There are some things in which an average amount of diplomacy is needed, even in the Hardware trade. If you have a few cards in your sleeves, it is not necessary to throw them all down on the first call. There was a dear old mother out on an Ohio farm, and when the drover came along and asked her, "How much for the old cow?" she simply responded: "Pa said that I was to ask forty dollars for her, but to take thirty rather than miss a sale!"

In fact, the highest form of honesty—the widest power of shrewdness—make seemly and powerful yoke-fellows in this steady pull of business. They are seen combined in their highest form, in some of the greatest and most successful commercial enterprises. It is the right of each to use to the best of his ability, all the powers that have been bestowed upon him. No one should be afraid to use all the appliances and methods of modern experience and thought, as aids for the accomplishment of success.

Were this addressed to a body of young men, who were about setting out upon a quest for riches and fame—rather than to a lot of old fellows who have achieved them both—I would say: Be as sharp, as shrewd, as hustling as you can. If you don't push on your own account, the Lord won't send a tornado to lift you along. Muscles, brain power, will power, heart power, the seeing eye, the calculating mind, the business instinct—all these were given you to use. You have got to think for yourself; to act for yourself. Each line of business must, by the law of self-preservation, look after its own fortunes. The retailer and the manufacturer are not lying awake at night in order to preserve the interests of the jobber. Make all the money you honestly can; get all the business that is within your legitimate reach; make it yield all the profit it will,

Digitized by Google

You have got to do your own work; your own thinking. Despite Mrs. Hemans' opinion, the greatest fool in song or story was the boy who stood on the burning deck, whence all but him had fled. There he stood until he was blown up, simply because he did know that the time had come when he should get a move on, and do a little thinking for himself. He was too good to be successful. Like some of our sons, he depended too much on the old man.

Yet with all that can be so strongly urged in favor of legitimate enterprise, of mercantile power, organization and push, let it be remembered that the right of one man ceases where that of another begins. I don't know whether there are more or less temptations in business life than in other forms of enterprise. I do know, however, that Solomon said something about sin lying between buying and selling, even as the mortar holds between the stones in the wall—and Solomon belonged to a people who can give us all points as to the buying and selling of goods.

Perhaps if Solomon had been discussing some of the professions, his remarks might have been even more emphatic.

Summing up the business man, as I have seen him since becoming, in one sense, an associate member of the Hardware trade, I am led to the conclusion that, with the exception of a black sheep here and there, he is an honest, honorable, hospitable, enterprising and patriotic member of society. He does more than the statesman and lawmaker to keep the world moving in an upward groove. He is political economy reduced to a tangible form. He is the channel of intercommunication between men and men. He is the medium by which the maker of things finds his market; by which the user of things is supplied his daily needs. He came into being when Adam began to look about for agricultural impliments, with which to earn his bread in the sweat of his brow; his profession was established when the first grower of fig leaves used his neighbor as a medium through which to find a ladies' tailoring establishment in need of material. He loaded those caravans of Chaldea and Ur in those early days of Abraham, His were the fleets that sailed over the unknown seas; his have been the wagons that have toiled over the hills; he has loaded the railroad trains that traverse the continent. His commercial ventures have opened new lands, and blazed the way for civilization. He has been, and is, the missionary of practical things, in a world that may do without ideals and theories, but that must have ploughshares and axes, clothing and bread. He came into being because the world could not do without him; he will be a moving factor in affairs, so long as the world shall endure.

"Are Trusts Necessary under Existing Circumstances, and are they Detrimental to the Jobbers' Interests?" was next presented in a strong and thoughtful article by John Donnan, of W. S. Donnan & Co., Richmond, Va. Mr. Donnan said:

ADDRESS OF JOHN DONNAN.

Mr. President and Gentlemen: When requested by our President and Executive Committee, to make a brief address which would be of mutual interest to both manufacturers and jobbers, and to select my own subject, I must confess that, for awhile, I was at a loss for a theme. But upon reflection, knowing as I did, the personnel of this representative body, and its interest in every up-to-date question, concluded that if I made a few remarks upon the subject, "Are trusts necessary under existing conditions?" "And are they detrimental to the jobbers' interests?" I might, possibly, open a discussion upon a topic which is of the most intense interest to us all.

Never, in this country's history, has there been such a tendency towards consolidation. Never, in the world's history, have such aggregations of capital been employed. Not only we, in our own lines, see springing into life such gigantic corporations as the American Steel & Wire Co., and the Republic Steel & Iron Co., but when we look around and perceive the existence of such enormous trusts as the Standard Oil Co., and American Tobacco Co., the latter so powerful as, recently, to have absorbed a firm of such great wealth as Liggett & Myers, of St. Louis (whose annual output of tobacco was not less than forty million pounds), does it not strike you that the time has arrived for thoughtful men to stop and ask themselves the question: Where do we stand, and whither are we tending? To ask is not to answer a question; nor have I the temerity to think, for an instant, that I possess the ability to do so. 'Tis a subject as deep and broad as the blue Atlantic, which rolls before us; one so profound and complex, that the deepest thinkers fear to penetrate its intricate mazes. Says an eminent writer: "There is nothing more salutary to active men than occasional intervals of repose, when we look within and examine, almost insensibly, what we have done, what we are capable of doing. It is settling, as it were, a debtor and creditor account with the past, before we plunge into new speculations."

Gentlemen: do you not think that the new conditions which confront us, the bare facts as they exist, have brought us to a point where it is absolutely necessary for us, both manufacturer and jobber, to take our bearings? To get, as it were, our latitude and longitude and, if possible, try to see if we can find some reasons for existing conditions, for reasons there certainly must be. I think as a basis for our argument, we may safely state, as a fundamental principle, that no effect was ever produced without a cause; and grave reasons must surely have existed, which compelled large corporations, whose interests, heretofore, have been antagonistic to join hands.

I do not propose dealing with the motive which may have actuated individual firms in going into trusts; whether from mercenary reasons, or from compulsion, but rather, if possible, to analyze some of the existing conditions which made their formation almost a necessity to the manufacturer, for self-preservation. If both jobber and manufacturer will only let their minds revert to the past, for a period of twenty-five years, we can easily recall a few of the many lines which were imported, such as table cutlery, files, screws, curry combs, pad-locks, hand-saws, trace chains and many others, Why were they imported? For the simple reason that they could be brought into this country, plus duty, at a lower figure than they could be manufactured here. But why were they not manufactured here? Could we not at that time compete with Great Britain, and other foreign markets? *No*, and for many good reasons. Not only were our industries comparatively in their infancy, but our country was only partially developed. The Pacific Coast was then further away from us or the Atlantic Seaboard, than the Philippines are to-day. No great trans-continental lines connected the Pacific with the Atlantic. The great Northwest was an almost unknown wilderness, and the cities of that vast section were but villages. Coming closer home, we find that even we of the East were in the infancy of development. Few railroad systems were in existence. The Chesepeake and Ohio was an incomplete line. The Georgia Pacific unthought of, and the majority of the roads which, to-day, form the vast railroad systems of this country, were then short, independent lines.

The vast coal and limestone deposits of West Virginia were almost untouched; and Birmingham, which to-day dictates the price of iron to the world, not in existence. Our few manufacturing establishments were scattered from Virginia to the New England States, and the whole South devoted to agriculture. The infant factories, then existing, having to pay high prices for raw material at the mines, and high freight rates to each independent railroad line for the transportation of the raw material to their works, were in no position to keep out foreign goods

Digitized by Google

entirely, even though protected by a high tariff. But, although unable to eliminate foreign competition altogether, still they made handsome profits on their output, for notwithstanding the high cost of raw material, machinery not having reached the high state of perfection it has to-day, our manufactories had not then reached a point where production exceeded consumption.

But we have been looking at conditions as they existed in the past. Now let us examine the facts which confront us to-day, and see if we can find some of the reasons why the great manufacturing interests of this country have been forced into combinations. Within the past two decades, marvelous changes have taken place in our development; no country on this globe has having made such wonderful strides. Every section North, South, East and West has been brought into instant communication by telephone and telegraph. Four great trunk lines connecting the Atlantic and Pacific, and vast railroad systems, intersecting the whole interior, annihilate distance, and pour the wealth of one section at the doors of the other. The rapid development of our inexhaustable mineral resources; the discovery of electricity and natural gas; the perfection to which machinery has been brought, are all new factors, and the manufacturers of to-day find themselves confronting entirely new conditions. Instead of the few factories of New England and the Middle States, which, formerly, supplied the country with its requirements, monopolizing the trade, we find both the South and West, once wholly devoted to agriculture, entering the field as active competitors. Where, formerly, raw material had to be transported hundreds of miles, manufactured, and then reshipped to various sections of the country, we to-day find our factories not only established at, or near, points at which the raw material is produced, but where coal or natural gas is found in abundance. Here, then, we find two factors: increased competition and cheaper raw material, causing the commencement of the downward tendency; and as each year has passed, and we have seen perfected machinery, manipulated by skilled labor, producing commodities in quantities far in excess of consumption, declines have come still faster, as competition has become keener.

I do not propose to begin an argument as to whether protection does or does not protect; or if it was protection which enabled the manufacturing interests of this country to reach the enormous proportions to which they have attained; but, as far as I can, to look at facts as they exist, for the reasons which have driven our manufacturing interests into combines. Certainly, two indisputable facts stare us in the face: one, that our heretofore infant industries have grown to be giant corporations: the other, that perfected machinery makes our output far in excess of home consumption. These conditions had existed for sometime past, and each year competition had grown sharper, manufacturers, in their efforts to unload their surplus, cut each other, until the time came, when it was nothing unusual to purchase goods far below cost of production; dividends became a rarity; and many holding stock in our most valuable plants would gladly have disposed of it at half cost. Factories were run on half time to curtail production, and wages were cut to reduce cost of manufacture; the tariff did not protect; for, while protected against foreign markets, nothing protected the giant corporations of this country from cutting each other; and, finally, competition reached such a pass that, had the tariff been eliminated altogether, no foreign markets could have placed their goods in this country. Such a state of things could not last; it eventually meant bankruptcy to the individual corporation, and ruin to the country at large. Something must be done. If, on the other hand, production was curtailed, it meant loss in wages to the labor employed, as well as loss of interest on capital invested. On the other, if the factories were run to their full capacity, it was necessary that the prices be advanced, in order to make a living profit. Never were manufacturers of any country confronted with harder problems. Thousands of laborers employed, and millions of invested capital, attested the fact, that this country had progressed too far to think of curtailing production; consequently, the only solution must be, to devise some scheme by which to market the output, and do so on a profitable basis; and, in the formation of combinations, the keen, wide-awake American manufacturer rose to the occasion.

Well do we know that the names Trusts and Combinations are abhorred by the American people at large. Every means has been employed to prevent their formation; the finest legal talent has been brought into requisition in the endeavor to stamp them out, and yet, gentlemen, viewed from a broad standpoint, which of us will say that, under the conditions which existed, their formation was not necessary? Has the intellect of this country as yet been able to devise any other plan by which our manufactured products could be marketed at home upon a profitable basis? I think not. Whether the future will develop any other plan, remains to be seen. For the present, at least, we face the fact that these great combines exist, and are powers in the country; and the question of the most vital importance to the jobber is: Are they detrimental to his interests? I think the jobbing trade can safely say, no. For the past twenty-five years, there have been no greater sufferers from the awful declines which have taken place than the jobbers themselves, and I think I can unhesitatingly state as a fact, that we have sustained greater losses from declines in values, than from bad debts. That being the case, then who should more readily welcome any plan devised to raise values than the jobber? But what position have trusts assumed towerd the jobber? To the present time, at least, they have regarded him as the legitimate channel through which to market their products, well knowing that through him, they are reaching the consumer in the most economical way. Yet, no matter what their motive, still we must confess that, thus far, they have displayed the liberal spirit, and our margins on such lines as nails, wire, shovels and ammunition are most satisfactory.

What of their position toward us in the future? Have we cause for apprehension? I think not. True, trusts are corporations possessing vast wealth, and while, doubtless it would afford many of the officials infinite pleasure to pay their stockholders even larger dividends than they do at present, yet the executives of these mammoth interests are keen, farseeing, business men, and clearly perceive the point beyond which they dare not advance values, and that point is foreign competition. In foreign competition they recognize their great balance wheel, which if it could speak, would say, "I am greater than thou." Therefore, no matter how great their capital, trusts will never possess the power to raise values to a point higher than the tariff protects; and were the government, to-day, to open its doors and put our country on a free trade basis, all the trusts of America combined, could not raise values a point beyond foreign competition. And not until the day dawns when trusts shall own this round globe, do I see any reason for apprehension, or any cause for feeling that trusts are detrimental to our interests.

But, gentlemen, does it not strike a thinking man that, in the tendency of the times, there is a deep undertone, an almost audible voice, which would say to us, that ours is a land of destiny? Have all the lessons of the past no hidden meaning? Do we not, in the trend of events, discern the guiding hand of a higher power than man's? Has it been an accident that the hidden mineral resources of this great land have lain undeveloped until within the past two decades? Is it an accident that this is the only land on the round globe which, within itself, possesses every re-

Digitized by Google

source of manufacture and agriculture, and that can give a needing world of its plenty and still have abundance at home? Is it an accident, that adversity, and keen competition, at home, have developed the inventive genius of our people, until, with perfected machinery and cheap raw material, we are able not only to compete with, but to undersell the world? Is it an accident, that just when we have reached the point in our country's history where the output of our manufacturing establishments is so great as to congest the home markets; and wealth, cheap raw material, and the most improved machinery have given us the ability to compete with the world, at a profit, without reducing the price of labor, at home, that Cuba, Porto Rico, Hawaii, and the Philippines, should have come into our possession?

No, gentlemen, to thinking men these are not accidents. They are providences, which say to us plainly, this country is one of destiny, and has reached the turning point in its history. We must either retrograde or progess: Which shall it be? The days of our infancy have passed; the period necessary to protect our infant industries is ended. We, to-day, stand as giants equipped, and ready to battle for the world's commerce. To live within ourselves, to let over-production and home competition again bring prices to a point, from which even combines shall be unable to raise them, is to retrograde, and bring ruin and disaster upon our fair land. To open our doors to the world, thereby removing the last vestige of reason for foreign prejudice; to throw down the gauntlet to foreign competition; to seek and find, in export, our relief from a congested market, is to progress; for we well know that foreign labor can never compete with our skilled workmen, perfected machinery, inexhaustible resources, and the greatest wealth the world has ever seen. And further, if over-production and keen competition have made trusts necessary, in order to raise values to living profit, then, is not the conclusion equally logical that if, by export, we can relieve congestion, and do away with the necessity for such sharp competition at home, we, thereby, eliminate from the situation the necessity of combine?

But will the world take our goods? The trade balances, for months, have been in our favor. Can we export our goods profitably, and in competition with the world? Ask the manufacturers. There are many here to-day who could say, and truthfully, that had they, during the past five years, been able to bring their domestic, to the profitable mark of their export price, they would have been perfectly satisfied with the profits earned, and the necessity for becoming members of combines would never have arisen.

And now, gentlemen, in view of these indisputable facts, does there remain in your minds a doubt as to the course you should pursue? Does not necessity for relief from congestion at home drive you onward? Does not commerce, the world's great civilizer, draw you onward? Do not the ships of every nation moored to our wharves, in readiness to transport our products to the four quarters of the globe, say onward? Do not the isles of the sea and the dark places of the earth beckon you onward? And shall such calls go unheeded? Shall such opportunities be slighted? No, gentlemen, a thousand times no; but rather, let us give abundantly as we have received, and not only will we be a prosperous and happy nation at home, but ere long, nations now semi-barbarous, enlightened by the benign influences of Christian civilization, will arise and call us blessed!

C. T. Boynton, of the American Steel & Wire Co., Chicago, was to have presented a paper on "Our Prosperous Country," but was unable to be present. In his absence, the president called on T. H. Taylor, one of the New York representatives of that company, who spoke as follows:

REMARKS OF T. H. TAYLOR.

I want to say to you gentlemen, that it is a great pleasure to be with you for two reasons. Because with you I am with the Hardware men and all the terms that you are claiming I am familiar with. Then again, I am very glad to meet you as a representative of the American Steel & Wire Co. Mr. Boynton was unfortunately prevented from being here. While I do not undertake to say what our future policy is going to be, I want to say this to you; that we have endeavored to demonstrate that our interests and yours are mutual. I believe that you will concede that we have endeavored to put into effect such methods as would be for the benefit of the jobbing interests of the country. I can remember only a few weeks ago when the difference between the buyer by the single carload and the buyer of sixty kegs at a time was infinitesmal; perhaps it was five cents and sometimes nothing. We had a conference with some of your people—more particularly of the National Hardware Association—and we very willingly and at once put into effect an arrangement which enabled some better profits to be secured. I do not think we did that as a matter of philanthropy. Hardwaremen do not conduct their business along philanthropic lines, but on honorable lines I have found always to be the case. I believe that among the very substantial of all the commercial people of the world the Hardware people stand very near at the top. We have a large product to market and the guiding hands in our great enterprise have been marketing that product for many years, so that we have the strongest minds with the greatest experience guiding the affairs of our company at this moment.

A great deal has been said about trusts. It is something we all should consider carefully, but the American Steel & Wire Co. is not built on the basis and was not intended as a stock jobbing scheme. If it had been, I question if the gentlemen who are to-day at the head of its affiairs would ever have come back from private life to take up the actual business of the company as is the case.

The American Steel & Wire Company is building for the future, and the gentlemen who are engineering its business are endeavoring to build a structure that will be just as lasting as the structure which any of you gentlemen are endeavoring to build, and I believe that you will agree with me that the action of our people of the past ninety days which we have been conducting this business, has indicated a desire not to get rich in a minute; not to advance prices more than was reasonable, but to secure for our goods a reasonable amount in line with the price of our material, and in furthering the line of action of having our business built for the future we have laid down a broad principle that we desire to deal with you gentlemen, and we endeavor to bring in such methods and arrange such plans as to make you feel that we are dealing with you fairly.

There are differences that will come up between us from time to time. There is one feature which has been brought out by Mr. Donnan of great interest to us. This country is able to produce far more in the line of metals than the country can consume. There are large markets outside of this country where those metals are used. Now, in the past, that foreign business has been secured in a very uncertain way; if one of these concerns which we now own had a surplus of material, they would hasten it across the water, and for a short period of time unload that material; and then when they could sell about as much in this country they would stop that foreign work and market their goods here.

Now, the Germans and the English who have had the foreign market for many year have never conducted the business in that way. They have seen that they must take the business continuously at all times, and under all conditions, and they proceeded to do that very thing; and if

Digitized by Google

there is a number of large corporations—which I do not call trusts—and there is no more trust than your Hardware firms that are corporations. Many of your Hardware firms have been built up by buying half a dozen firms. You will see in our large cities that this is a fact. If these large corporations are to prosper to the fullest extent, they must to the fullest extent keep their machinery going.

Now, I happen to know that a number of those corporations have laid down a definite policy that they would have that foreign business, and would have it continuously. Now, it transpires that a large corporation with which I am acquainted, markets 800,000 tons of stuff. That concern never had such a market before, and but a very small fraction of their products has ever been sent out of the country. Now, if that concern increased its sales by twenty per cent. by marketing its goods in foreign countries to the extent of twenty per cent., it increases production in this country, and to that extent it increases the number of men it must employ, and you can see the result at once.

Now, if these large corporations, as Mr. Donnan suggested, go ahead and carry out that broad policy of taking the foreign markets of the world, it is a foregone conclusion that we can do it to-day. If they will follow out the policy with their present opportunities of taking these foreign markets, that means a greater number of people to employ and a larger business to be done.

"Twentieth Cenury Progress" was next discussed by Daniel Stern, president and editor of the *American Artisan*, Chicago, who ably presented the several important questions which the coming century will be called upon to face. "The Development of the Southern Hardware Trade," was handled in an able manner by W. H. Wilson, manager of the *Tradesman* Publishing Co., Chattanooga, Tenn.

"The Beneficial Results from Associations," had been the subject upon which R. R. Williams, Hardware editor of the *Iron Age*, New York, was to speak, but because of the lateness of the hour, Mr. Williams excused himself in a few witty remarks, which were just enough to suggest to those present the treat they had missed. The concluding paper of the morning was entitled "The Trade Journal as a Developer of of closer commercial relations between the Jobbers and the Retailers," and was presented by W. S. Hemby, editor of *Iron and Steel*, Chicago.

THE FINAL MEETING

of the Association was held on the afternoon of Friday, and was an executive session, to which members only were admitted. There was no discussion of the questions presented in the regular programme, as the time was limited. The chief business transacted was the election of officers for the ensuing year, and the result was that the old staff were re-elected, with the exception of two members who declined to serve—Fred Orgill, of Orgill Bros. & Co., Memphis, Tenn., and James Moroney, of the Moroney Hardware Co., Dallas, Tex. The officers are as follows:

President, James J. Mandlebaum, Fones Bros. Hardware Co., Little Rock, Ark.

First Vice-President, O. B. Barker, Barker-Jennings Hardware Co.; Lynchburg, Va.

Second Vice-President, R. E. Bell, R. E. Bell Hardware Co., Weatherford, Tex.

Executive Committee, W. E. Gibbons, Woodruff Hardware Co., Knoxsville, Tenn.; W. A. Parker, Beck & Gregg Hardware Co., Atlanta, Ga.; C. E. Speer, Speer Hardware Co., Fort Smith, Ark.; C. N. Roberts, Roberts, Sandford & Taylor Co., Sherman, Tex.

C. B. Carter, who has ably served as secretary-treasurer for several years, declined a re-election, and expects to again engage in business in the South at an early day.

The place for the convention of 1900 was not selected, the question being left to the executive committee.

ENTERTAINMENT OF THE GUESTS.

There may have been occasions in the social history of the world where more hospitality, warmth, good feeling and personal enjoyment were crowded into a given number of days, than was the case in Atlantic City, during this convention week, but, if so, the writer of this has failed to come across the record.

The members of the Association, the officers, the members of the reception committee, the proprietor of the Islesworth, the guests themselves—all united in a hearty manner to make the occasion one of rare enjoyment, and their efforts were crowned with success. There was not a moment outside of business hours that was not filled in with something planned by the reception committee, and possible because of the generosity of the manufacturers, whose purses were so generous in response to each demand made upon them.

The chairman of this committee, was of course, Irby Bennett, of the Winchester Repeating Arms Co., who has made an enviable record in like labors in years past. He was ably seconded by such members of the committee as were present; that body, in its entirity, being as follows:

Irby Bennett, Chairman; Winchester Repeating Arms Co.
W. E. Austin; Southern Agricultural Works.
George Brown; Southern Plow Co.
C. L. Campbell; Peck, Stow & Wilcox Co.
W. A. Chenoweth; Henry Disston & Sons.
A. B. Clarke; Old Dominion Steel & Iron Works Co.
F. F. Conner; Eberhard Manufacturing Co.
Tom Ellis; Herman Boker & Co.
F. H. Forman; The American Steel & Wire Co.
C. M. Fouche; Park Brothers & Co.
Edward H. Garcia; Trenton Rubber Manufacturing Co.
N. A. Gladding; E. C. Atkins & Co.
T. H. Gossett; John H. Graham & Co.
J. H. Grubb; Hussey, Binns & Co.
Frank L. Guildener; Sargent & Co.
Geo. H. Harper; National Enameling & Stamping Co.
J. M. Hottel; G. & H. Barnett Co.
W. P. Hudson; Russell & Erwin Manufacturing Co.
H. B. Lupton; American Steel & Wire Co.
F. M. Huggins; Landers, Frary & Clark.
Jas. P. Kelly; Kelly Axle Manufacturing Co.
C. T. McKinnie; Stanley Works.
Guy Mitchell; Mallory Wheeler Co.
V. A. Moore; V. A. Moore & Co.
W. D. Mounger; Michigan Stove Co.
E. E. Paine; B. F. Avery & Sons.
H. Rashco; Nixdorff-Krein Manufacturing Co.
Henry F. Reese; Fairbanks Standard Scale Co.
Banks Rucker; Russell & Erwin Manufacturing Co.
J. F. Schroeder; Henry Keidel & Co.
Fred Seeley; Wiebusch & Hilger.
W. P. Smith; J. C. McCarty & Co.
A. R. Sullivan; Towers & Sullivan Manufacturing Co.
L. D. Vogel; Charter Oak Stove & Range Co.
F. C. Wheeler; Hermann Boker & Co.
Charles H. Wier; Wier & Wilson.
C. K. Woodburnt; Warren McArthur,

It would, indeed, be an invidious distinction were no metion made of the labors of that general, genial, ever-present and always-on-hand-when-needed official, Sergeant-Major H. H. Beers, of the Southern section of the house of Schmachtenberg Bros., New York. He blossomed on the expectant vision behind a badge that combined the colors of the rainbow; suggested a railroad turntable in size, and a West Point graduate in the matter of gold lace. But brighter than the badge was his look of welcome; larger than the badge, was the smile upon his face; better than the shine of the gold lace, was his word of hearty welcome. He made all the guests—and the ladies especially—feel at home, and made happier everyone he shone upon.

Presidents may come and go; vice-presidents have their brief terms of honor, and flutter out; committees be dis-

Digitized by Google

solved—but there can be but one sergeant-major, and his name is Beers! Zwei Beer!

A GRAND CAKE-WALK

was the event planned for the entertainment of the guests for the evening of Wednesday. It was admirably arranged and successfully carried out, by a special committee of the general reception committee, constituted as follows: Chairman, George H. Harper, National Enameling & Stamping Co.: H. B. Lupton, American Steel & Wire Co.; James P. Kelly, Kelly Axe Manufacturing Co.; Howard M. Davis, American Tin Plate Co.; C. L. Campbell, Peck, Stow & Wilcox Co.

The talent of Atlantic City had been drawn upon, and a large number of contestents were seen upon the floor of the Islesworth Palm Garden when the music struck up and the "walk" was fully on. The prizes were choice and valuable; the excitement was great; and the music fine. Then came choice refreshments served by order of the committee, and then came dancing to such as cared to remain and take part.

CARRIAGE RIDE AND SAIL.

A sail on a choice fleet of yachts had been arranged for Thursday afternoon, with a carriage ride for such as did not care to go upon the water. A number of ladies and several of the gentlemen preferred the latter form of enjoyment, and spent a couple of hours in comfortable carriage, in seeing the sights of Atlantic City. The others were carried in busses from the Islesworth to the wharf, where seven beautiful sail boats awaited them, and a sail of rare enjoyment followed. The special committee having the matter in charge, consisted of the following gentlemen: Irby Bennett, chairman, Winchester Repeating Arms Co.; F. G. Seeley, Wiebusch & Higer; James P. Kelly, Kelly Axe Mfg. Co.; Charles H. Wier, Wier & Wilson; George H. Harper, National Enameling & Stamping Co.

Thursday evening was the occasion of an entertainment arranged by the committee in which the latent talent of the Association and of the guests was ably demonstrated. Mr. Bennett presided, and introduced the gentlemen and ladies who had kindly consented to take part.

A brief but taking address was delivered by William F. Rockwell, president of the Miller Bros. Cutlery Co., Meriden, Conn. He spoke of several things in a semi-humorous vein, and in conclusion made the following telling points: "A little over a year ago war with Spain was declared. The so-called toy ships of the American navy, under command of Dewey, sailed into Manila harbor. They met the British-built craft, armed with the German Krupp guns and manned by foreign skill. The flag that bore the blue of heaven dotted thickly with fixed stars, floated its red and white stripes as serenely as the white stars of the firmament twinkle on a winter night. As steadily and unswerving as a ray of light from a planet, those star-bedecked ships launched the combined skill and intelligence of the centuries into the belated knowledge of the Old World. In a brief hour the standards of Europe had sunk forever, and the American stars could be seen the world over. This was not luck, as a few weeks later, another detachment of the same great fleet caused the stars to sing together and flaunt their stripes at the destruction of the remnant of a nation's foreign-built ships and guns at Santiago. The moral of this is plain. The ships were American built; the guns were American contrivances; they were manned by American citizens. American is a term synonymous with success. It is to be hoped that the great respect for this country and its products which the war with Spain has inspired in all parts of the world will extend more fully among our own citizens."

A vocal solo was most acceptably rendered by N. A. Gladding, of E. C. Atkins & Co. This was followed by an entertaining speech from Col. B. F. Atkinson, of the Atkinson Hardware Co., Fort Smith, Ark.; a vocal solo by Mrs. Frank Wright, of New York; an eloquent speech from Webster R. Walkley, of Peck, Stow & Wilcox Co.; a choice and excellently rendered recitation from Mrs. H. B. Lupton, and the "Negro Coon Hunt," most graphically presented by William Teague, of Montgomery, Ala.

Refreshments were again served by order of the committee.

A smoker of a pleasant and orderly character followed. The gentlemen who remained all retired at an *early* hour.

A VISIT TO PHILADELPHIA.

Philadelphia is only one hour's time from Atlantic City, and the representatives of that hospitable and generous city were present in every gathering, and on hand when anything was to be done for the pleasure of the guests. It was in this spirit that a cordial invitation was extended to the convention on behalf of the Enterprise Mfg. Co. of Pa., and Henry Disston & Sons, to visit their great establishments on Saturday, the 17th. A hearty acceptance was the response, and on the morning named, the members of the Association, almost without exception, with many of the guests, left Atlantic City, some via the Broad Street station, Philadelphia, and others by way of Camden, landing at Market Street, Philadelphia. At these respective points the members were met by representatives of the Enterprise Mfg. Co., who were in readiness to convey them in carriages to their plant. A very pleasant ride was had through Chestnut, Market, Broad and Diamond Streets, passing en-route many of the city's prominent points of interest, all of which elicited much praise from the Hardwaremen.

Arriving at the Enterprise Mfg. Co.'s factory about 11 o'clock, they were met and formally introduced to the president of the company, T. Henry Asbury, subsequent to which they were taken through some of the more important departments of this mammoth establishment.

The members seemed to greatly appreciate the efforts put forth for their entertainment, and carried with them pleasant recollections of their sojourn in this factory.

Among other things prominently distributed through the factory was a card bearing the following inscription: "The flags are up to-day in honor of a visit from the members of the Southern Hardware Jobbers Association." This was a delicate tribute to the visiting members.

Upon the completion of the tour of inspection the individual members were pleased and surprised to receive in the form of a momento of this visit, one of the company's most recent additions to their varied line of goods, this being a meat and food masticator, after which the carriages were again taken and the delegates conveyed to the Hanover Street wharf, at which point was found in waiting the handsome tug, *William S. Stokley*. Stepping aboard the delegates were treated to a splendid lunch served in the usual generous Disston fashion. This was served while en-route to the works of Henry Disston & Sons, at Tacony, about seven miles up the river. An inspection of this great plant was cordially enjoyed by each member of the Association present, and it is no disparagement of the enjoyment which the members found in their convention work to say that many of them stated that this day's visitation was enjoyed even more than was their stay in Atlantic City.

The guests of the Enterprise Mfg. Co. and Henry Disston & Sons were then conveyed by the same tug to the Chestnut Street wharf, Philadelphia, whence they wended their several ways in peace and happiness.

RESOLUTIONS OF THE ASSOCIATION.

The following resolutions were adopted by the Association:

Resolved: That the hearty thanks of this Association are hereby tendered the President, Mr. J. J. Mandlebaum, and to the officers associated with him, for their untiring, faithful and efficient services in behalf of the interests of the Association during the past year, and that we bespeak for

Digitized by Google

them the earnest support of every member during the ensuing twelve months.

Resolved: That we hereby express our thanks to the members of the Hardware Press, also to the various manufacturers and their representatives, individually and collectively, for their attendance at this convention, and for the very able papers with which we have been favored by a number of these gentlemen.

Resolved: That we most thoroughly appreciate the very successful and pleasant entertainments that have been given us by the manufacturers and their representatives, through the energetic efforts of the reception committee, of which Mr. Irby Bennett was the chairman, and we hereby tender them our heartfelt thanks for same.

Resolved: That we feel our indebtedness to Mr. A. C. McClellen, the courteous and liberal hearted manager of the Hotel Islesworth, who has so kindly and graciously favored us in every way possible to make our visit pleasant.

Resolved: That we take great pleasure in expressing our gratitude and sincere thanks to Mr. Henry H. Beers who has served this convention so carefully and efficiently as sergeant-at-arms.

The following was also adopted:

Resolved: That the Southern Hardware Jobbers Association request the manufacturers and importers to accept local checks at par in payment of our purchases.

TELEGRAMS RECEIVED.

The following telegram and response, recorded during the session, speak for themselves:

Southern Hardware Jobbers' Association.

From Shasta's snowy peak to the Atlantic's sandy beach, in annual session, 14th, 15th and 16th, Greeeting: To the jobbers of the Sunny South in ninth annual session, promotion of more friendly relations among jobbers and with manufacturers, resulting in increased prosperity to both, is the earnest desire of the jobbers of the Golden West.

Pacific Coast Hareware and Metal Ass'n.

Brace Hayden, President,
Pacific Coast Hardware & Metal Association
Castle Craig, Cal.

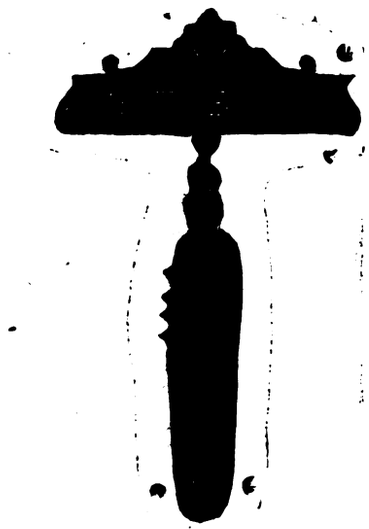
The Southern Hardware Jobbers' Association, in convention assembled return greeting and congratulate their brethren of the Golden West on the happy career of your Association. May its usefulness increase and our recently acquired possessions open up still further fields of commerce. Our earnest aim is to secure equal benefits to the entire Hardware jobbing trade.

Southern Hardware Jobbers' Association.

J. J. Mandlebaum.

It is with sincere regret I was obliged, because of matters entirely beyond my control, to forego the pleasure of meeting with you. It is my pleasure to enjoy an exceedingly pleasant acquaintance with some of your members which makes me anxious to increase that acquaintance until it shall extend to the whole of the Southern Jobbers' Hardware Association.

I know your meeting will be a pleasant one, and trust it may be a profitable one to all concerned. You certainly have our best wishes, and it shall be our effort in the future to make the relations of this company of the most pleasant nature and greatest profit to all your members. We trust Forman is still on earth. C. F. Boynton.



SOUVENIRS AND BADGES.

While some of the members and guests were becoming acquainted with each other, and others were renewing old friendships, on Tuesday evening, Seargeant-Major Beers went behind the office counter—over which the top of his head could be plainly seen—and opened a register in which the guests (ladies first) were asked to inscribe their names. As each did so, he or she became the recepient of a handsome and artistic badge, the shape and character of which may be understood by the accompanying illustration. It was provided by the Association, as a fitting memento of the occasion. Two hundred of these had been ordered, but the attendance was so much larger than had been anticipated, there were not enough to go around; but the guests were all cared for first, and some of the members of the Association were compelled to go badgeless. The badge consisted of a silver pin upon which was the word "Souvenir," and dependent from which was a pearl-handled knife, the steel blades and back of which had been gilded with real gold. A corkscrew of like character was set into the back. On the blade was the following: "S. H. J. A., June, 1899." It was an artistic and beautiful ornament and was in great demand.

Other souvenirs were distributed in abundance. A handsome little case containing a finely finished nail file, and bearing the famous words, "Black Diamond," was presented with the compliments of the G. & H. Barnett Co., Philadelphia. N. A. Gladding, representative of the well known saw manufacturers, E. C. Atkins & Co., Indianapolis, gladdened (no pun intended) his friends with a handsome and useful fountain pen, upon which were inscribed the words, "Write your orders for Atkins' saws." A sterling silver case won the especial thanks of the ladies, and contained a highly finished nail file. On the two sides of the case were artistically etched the inscription, "Compliments of the Nicholson File Co." A sea shell to which was attached a little thermometer, was presented with the compliments of the Fairbanks Scale Co., Baltimore branch.

THE HOTEL ISLESWORTH.

The convention was fortunate in securing a hotel so well situated and so admirably arranged for convention purposes as was the Islesworth, which fronts on one of the main avenues of Atlantic City, with a frontage extending

to the board walk and the ocean. The convention owned the whole establishment while there. The Sun Parlor was admirably adapted for the meetings; the Palm Garden for social occasions; the halls and piazzas for loafing and visiting. Mr. McClellan, the proprietor and his efficient staff, did everything within their power to make the time and occasion pleasant for their guests.

THOSE WHO WERE THERE.

There were many visitors of prominence who graced the occasion by their presence. Among these were George H. Sargent, of Sargent & Co., and president of the Hardware Club of New York, whose modesty compelled him to decline to make any public appearance, although urged again and again by the president; William W. Supplee, ex-president of the National Hardware Association, who spoke briefly as the representative of that organization; T. James Fernley, the secretary-treasurer of the National Association, who graciously permitted himself to be seen (even in a bathing suit), but refused decidedly not to be heard; C. S. Van Wagoner, of the Van Wagoner & Williams Hardware Co., Cleveland, O.; Gen. P. H. Withington, of the Withington & Cooley Mfg. Co., Jackson, Mich., R. K. Carter, R. K. Carter & Co., New York; Clarke Merchant, Merchant & Co., Philadelphia; Hugh McCaffrey, McCaffrey File Co., Philadelphia; Russell W. McKee, Bruce & Cook, New York, and Wm. H. Cole, Tower & Lyon, New York. The Russell & Erwin Mfg. Co., New York, were especially well represented, the following gen-

Digitized by Google

tlemen from that establishment being present: B. A. Hawley, W. P. Hudson, Banks Rucker, S. B. Bispham, E. H. Mansfield and J. H. Van Newkirk.

The record in full, was as follows:

W. R. Walkley, Peck, Stow & Wilcox Co., N. Y.
George H. Sargent, Sargent & Co., N. Y.
Geo. H. Harper, National Enameling & Stamping Co., Baltimore.
Harry C. Disston, Henry Disston & Sons, Phila.
Henry B. Lupton, American Steel & Wire Co., N. Y.
T. H. Taylor, American Steel & Wire Co., N. Y.
Joseph M. Hottel, G. & H. Barnett Co., Phila.
J. P. Kelly, Kelly Axe Mfg. Co., Alexandria, Ind.
C. S. Van Wagoner, Van Wagoner & Williams Hardware Co., Cleveland.
Hugh McCaffrey, McCaffrey File Co., Phila.
B. A. Hawley, Russell & Erwin Mfg. Co., N. Y.
E. H. Mansfield, Russell & Erwin Mfg. Co., New Britain, Conn.
J. H. Van Newkirk, Russell & Erwin Mfg. Co., Phila.
Russell W. McKee, Bruce & Cook, N. Y.
E. F. Cooper, Henry Disston & Sons, Phila.
Wm. Miller, Henry Disston & Sons, Phila.
G. M. Landers, Landers, Frary & Clark. New Britain, Conn.
H. Scovil, D. & H. Scovill, Higganum, Conn.
T. H. Russell, Geneva Tool Co., Geneva, Ohio.
Geo. E. Holton, Bryden Horse Shoe Co., Catasauqua, Pa.
Banks Rucker, Russell & Erwin Mfg. Co., N. Y.
N. A. Gladding, E. C. Atkins & Co., Indianapolis, Ind.
H. W. Scattergood, G. & H. Barnett Co., Phila.
A. B. Rinehart, Whitman & Barnes Mfg. Co., Akron, Ohio.
T. H. Gossett, John H. Graham & Co., N. Y.
Thos. Ellis, Hermann Boker & Co., N. Y.
T. H. Forman, American Steel & Wire Co., Chicago.
H. W. Caldwell, Cleveland Stone Co., Cleveland, Ohio.
W. T. Rockwell, Miller Bros. Cutlery Co., Meriden, Conn.
S. B. Bispham, Russell & Erwin Mfg. Co., N. Y.
W. S. Hudson, Russell & Erwin Mfg. Co., N. Y.
W. P. Smith, Knoxville, Tenn.
Frank Guildener, Sargent & Co., Baltimore, Md.
Paul E. Heller, Heller & Bros., Newark, N. J.
Elias G. Heller, Heller & Bros., Newark, N. J.
Fred. Barr, Peck, Stow & Wilcox Co., N. Y.
H. S. Dormitzer, Wiebusch & Hilger, N. Y.
T. A. Alexander, Yale & Towne Mfg. Co., N. Y.
L. D. Vogel, Charter Oak Stove & Range Co., St. Louis.
Henry E. Cooper, Nicholson File Co., Providence, R. I.
E. D. Fisk, Nicholson File Co., Providence, R. I.
Geo. L. Irvin, Carlin & Fulton, Baltimore, Md.
Chas. L. Campbell, Peck, Stow & Wilcox Co., N. Y.
I. Hirsch, American Cutlery Co., Chicago.
J. J. Teeple, Van Wagoner & Williams Hardware Co., N. Y.
L. F. Blue, Van Wagoner & Williams Hardware Co., Cleveland.
Chas. H. Wier, American Axe & Tool Co., Baltimore.
H. H. Beers, N. Y.
F. S. Seeley, Wiebusch & Hilger, N. Y.
R. K. Carter, R. K. Carter & Co., N. Y.
John S. Sanders, Hartley & Graham, N. Y.
H. F. Reese, Fairbanks Scale Co., Baltimore.
Howard M. Davis, American Tin Plate Co., Chicago.
T. James Fernley, National Hardware Association, Phila.
Clarke Merchant, Merchant & Co., Phila.
Frank Wiswell, Enterprise Mfg. Co., Phila.
E. W. Clark, E. C. Atkins & Co., Indianapolis, Ind.
G. L. Bowen, Rhode Island Perkins Horse Shoe Co., Providence, R. I.
Wm. W. Supplee, National Hardware Association, Phila.
Arthur B. Clarke, Old Dominion Iron & Nail Works Co., Richmond, Va.
Edward S. Jackson, Miller Lock Co., Phila.
John R. Scott, American Steel Hoop Co., St. Louis.
Robert N. Peck, Stanley Rule & Level Co., New Britain, Conn.
H. B. Guthrie, American Steel Hoop Co., Pittsburg.
P. B. Noyes, Oneida Community, Kenwood, N. Y.
Chas. L. Gilpin, W. Dewees Wood Co., Pittsburg.
G. B. Durell, Harriman Hoe & Tool Co., Harriman, Tenn.
A. H. Potter, E. C. Atkins & Co., Norfolk, Va.
I. R. Leonard, Oneida Community, Kenwood, N. Y.
F. S. Kretsinger, Iowa Farming Tool Co., Fort Madison, Ia.
J. F. Handy, Chas. Parker Co., N. Y.
W. S. Troyle, Kearney & Foot Co., N. Y.
Thos. Parkes, Jr., Sargent & Co., Nashville, Tenn.
R. S. Waddell, Du Pont Powder Co., Cincinnati, Ohio.

Sisal, and Process of Preparation.

Sisal, or sisal hemp, is the product of one of the numerous fibrous plants known as agaves. Nearly all the agave family bear a close resemblance, so that anyone having seen a specimen of the "century plant" can form a good idea of the general appearance of all other varieties of the genus. All the agaves are indigenous to the American continent, and nearly all can be found in the Republic of Mexico. Only a few species flourish within the boundaries of the United States. While fibre can be derived from all these plants, only the quantity and quality obtained from a limited number of the species is such as to make them worthy of commercial attention. The agave rigida, variety sisalona, is one of the most valuable and yields fibrous raw material in abundance. No other plant has attracted so much attention among the manufacturers of cordage.

The leaves of this variety are of a dark green, from four to six feet in length, with a width of from three to six inches, and are covered with spines. The full grown plant presents a striking if not beautiful appearance, bristling all over with its long spine-tipped leaves, thickly radiating from its short cylindrical trunk, which terminates in a short cone-like bud. In arriving at maturity the plant sends up its flower stalk, called the "mast," to a height of nearly thirty feet. The circumference of this mast is from eighteen to twenty inches at the base, but it gradually grows smaller between that point and its termination. One of the peculiarities of the plant is that it seldom or never sets a seed. The flowers fall, carrying the ovary with them, then the young plants develop on the ends of the branches, which, when they have attained a height of from three to four inches, fall to the ground and take root. The old plants reproduce themselves by means of scions.

Sisal hemp is a distinct production of Yucatan. It takes its name from the town of Sisal, the second port in the province, located on the northwest side of the peninsular of Yucatan. Before the Spanish planted colonies on the American continent the natives had discovered its value, for when De Solis and Pizon, the Spanish navigators, landed there in 1506, they found the Indians using crude cordage made from the agave fiber. Some years ago this particular variety of the agave family was introduced into the Bahamas, Cuba, Porto Rico, Jamaica, and even Southern Florida, but in no place has the experiment proven a success. It is in Yucatan only that the plant found a congenial soil and climate. Sisal grows best on barren, rocky land that is useless for other agricultural purposes. Drought affects it but little, if at all. The yield is continual. An acre of plants yields a liitle over a ton of fiber.—*Bureau of American Republics.*

Albany Hardware & Iron Co's New Departure.

The growing importance of the business done by the Albany Hardware & Iron Co. may be estimated by the fact that finding the bicycle and athletic goods part of their business developing so extensively, they were unable in their old premises to give it the space it required; so they have opened a new store at the corner of State and Green Streets, which will be devoted exclusively to that branch of their business. The new store, which has been entirely refitted, contains over 4500 square feet of show room space, and possesses 71 feet of show windows. Across the rear end of the room an elevated platform 35 feet long, 10 feet wide, and 16 inches high, will afford seats for their patrons where the entire stock can be brought under inspection. The premises also include a fine bicycle store room, 76 feet long and 26 feet wide, where they can place all their surplus stock. It is the intention of the company, with such greatly increased facilities, to carry the finest sporting goods stock between New York and Cleveland. It will include not only bicycles, and bicycle sundries; but golf, tennis, baseball and football outfits; gymnasium equipments, revolvers, rifles and ammunition of every description. The extensive premises will admit of a larger and more elaborate display, that will be greatly to their advantage.

Our Cutlery Exports.

It is very evident from the reports being received by the manufacturers of this description of goods, that American cutlery is making considerable headway, based on its superior cutting qualities, not alone in England but also on the Continent. We possess considerable advantage in this preferred distribution of the product of our well organized factories, by the underlying quality of even our cheapest goods. On shears and scissors alone, our export trade to England has more than doubled even within the last few months. Many of these goods go direct to Sheffield, the principal cutlery mart of England, and being ordered in an unstamped condition, the English makers are enabled to put on their established trademarks, and by this means keep their own distributions up to date. On shears and scissors they follow in their legitimate product, the antique shapes made popular by their grandfathers; while the more modern shapes and convenient forms of the American goods, wherever introduced, entirely superscede the shears and scissors previously in vogue. Among the points in England where this important line of the productions of our skilled labor have achieved the greatest success, may be mentioned: Not only London and Birmingham, England; but also Glasgow and Edinburgh, in Scotland; and Dublin and Belfast in Ireland. In Australia which is also a heavy buyer of American cutlery, as in many other of our best goods, we are rapidly destroying all competition with the British market.

Death of Joseph F. Matthai.

We regret to announce the death on June 12th, at "Linden Hill," near Arlington, Md., of Joseph F. Matthai, of the Baltimore plant of the National Enameling & Stamping Co., and formerly known as Matthai, Ingram & Co. His death was due to an attack of laryngitis which complicated a throat complaint from which he has been more or less of a sufferer for years. Mr. Matthai was but forty years of age. His education was due to the advantages given by the public schools of Baltimore. His business career commenced in his youth, when he became associated with the house of Matthai, Ingram & Co., his father having been one of its founders. This was recently merged into the National Enameling & Stamping Co. He leaves a widow but no children. Mr. Matthai having been one of the staff of travelers for his old firm in the past, is very well known and appreciated through an extended territory by a large circle of personal friends and customers, many of whom have known him intimately for many years.

Since the formation of the new company, he has been at the head of the sales department in Baltimore, and residing at his father's home near Arlington, where he passed away. He was a member of the Masonic fraternity, and a Knight Templar, and was connected with the Southern Methodist Episcopal Church, at Arlington.

The South African Customs Union has announced that ad valorem imports which have already paid duty at one port of entry, shall on production of a certificate to that effect from the customs house, be admitted into other parts of the union without the payment of further duty.

NEW ENGLAND HARDWARE ASSOCIATION.

The annual summer outing of the New England Hardware Dealers' Association, was held at Lee's Hotel, Auburndale, Mass., on the afternoon and evening of June 14th.

This yearly function, which is designed to cheer the path and lighten the way of the hard-working tradesman, has formerly taken the phase of an excursion, but this year the committee decided that the famous hostelry above mentioned should be the scene of the festivities. Of course, as business is not a feature, the ladies accompanied their husbands, brothers and sweethearts; and the spacious verandas of the hotel, as your scribe approached through the exclusive, well-kept grounds, presented a scene of life and color sufficiently enticing to repay even the wetting received from an inconsiderate thunder storm.

The members and their guests, numbering something over a hundred, spent the afternoon in strolling about the fine grounds, and playing tennis and golf, until dinner, which was served at 5 P. M. The dining room was taxed to its full capacity and even extra tables had to be laid.

After dinner the guests re-assembled on the broad piazza and a grand piano was rolled out.

In opening, President Parlin delivered the following address of welcome.

MEMBERS AND GUESTS OF THE NEW ENGLAND HARDWARE ASSOCIATION.

LADIES AND GENTLEMEN:—It is my special privilege at this, our regular June Association Meeting, to extend to you all a cordial greeting and heartfelt welcome. We decided that the comforts of an evening in the country, with the beauties that are so richly spread about us here, would be much more agreeable than the hot, dusty, noisy apartments of our Boston Association Home. We can here transact our business just as well, or better, especially with the help of our lady friends. Our railroad facilities, the ease, quickness, and delight of the journey here, causes little discomfort to any of us, but is rather a pleasure.

Our wives, lady friends and sweethearts can be our companions in all the enjoyment—making it doubly delightful. We all know that pleasure is enriched by sharing it with others, and we all ought to know that the happiness of it all is immeasurably greater when shared with a certain another.

We have been for months trying to build up local business associations; to bring men in the Hardware trade in the various cities and towns throughout New England into closer touch with one another. We believe by this to put an end to envious jealousy and malicious rivalry; to bring about a kindlier feeling, a warmer fellowship that shall put a stop to cutting each other's throats, in our business warfare. We are glad to talk over these things with our lady friends. Their interests are identical with ours. Why could we not enlist them in the good work? They have a way of bringing to pass about everything they start out for. That is my experience. Isn't it yours? They do it sometimes differently from what we should, and there is a persuasiveness in their manner that we could not use if we tried our best. I think, perhaps, they mesmerize—hypnotize us. I wonder just how they would plan to bring our competitors into line if it were left to them? I have faith—unbounded faith—in them. I would almost pin my hope of another life to one lady I know. God bless her! Women are usually discreet, where we are sometimes unwise; shrewd where we are careless. A woman looks as by intuition straight through a problem that men have to figure out, and usually she lands on solid ground, where perhaps our feet tremble.

There is another kind of local association in which we are all mutually interested. The ladies understand it better than we, in fact, they know it all and could give us plenty of points. They are the most delightful associations in the world. Emerson says supreme felicity is reached by four feet on a fender. There is no more charming sight than a young lady and a young man agreeing to harmonize all their interests; consolidate their energies; cut off their needless expenditures; close out their misunderstandings; their waste of money and strength; half the fuel, most of the gas; pooling their capital; forming a companionship, partnership, combination, trust—a syndicate in the great work of life. Perhaps our friend, Holbrook, here will touch on such a combination; perhaps our other friend, Adams, will have something to say about his "experience" in this line—most of us here have been sworn into just such local associations, and know whereof we affirm.

So let us make merry this day with our speeches, conversation and music, not forgetting, however, that this is an association for social as well as business education. Let us combine both and learn to make our business thoroughly enjoyable.

The President's speech elicited the proper amount of applause, after which he introduced those who were to furnish the musical part of the entertainment saying that each one had taken a course in Hardware. As a matter of fact each of these ladies and gentlemen is connected with the firm of W. D. Parlin. Miss D. Emily Lucy, Miss Helena J. Jacobs and Chas. McIlvain, soprano, contralto and basso respectively, sang most acceptably; while the efforts of Harry Balcom, flutist, and Leslie F. Mansfield, pianist, were most creditable.

After a flute solo the president presented the names of Chas. H. Stevens, of R. W. Shattuck & Co., Arlington, and Fred. A. Healey, of Healey & Wyman, East Boston, for membership. These gentlemen were duly elected.

A report from H. G. Janvrin, Chairman of the Committee on Local Associations, followed. Little progress in this direction was reported. Circulars inviting membership had been used freely with no appreciable results, and it was the conviction of the committee that personal solicitation only would bring good effects.

Z. S. Holbrook, of Cambridge, a guest of the evening, spoke at some length on "Combinations." He said that he believed the question of the next presidential campaign would be that of Trusts. That these corporations were beneficial when used for the good of the consumer, and when under proper control, but that the past showed that they had been allowed to use their great power for the personal aggrandizement of the few wealthy stockholders, and as such they were a public menace. Mr. Holbrook's speech was illuminated by a running fire of apropos jokes and illustrations and provoked many a hearty laugh.

After an interlude of music the president introduced Chas. Clark Adams, of Sargent & Co., who had consented to tell the members of his recent trip to Europe. Mr. Adams spoke at length and most entertainingly describing the various cities he had visited; the methods in vogue there as to manufacturing and business, and the many points of historical interest visited by him. His hearers paid the closest attention throughout his address and

Digitized by Google

evidently were impressed with the advice to see other countries for themselves if they had not already done so.

As the evening was now far advanced the company dispersed after another solo.

Among other prominent guests were: W. C. Brine, of H. H. Fuller & Co., Halifax, N. S., who is president of the Nova Scotia Hardware Association, and Rev. Mr. Weston, of Natick, Mass. It was subsequently announced that monthly meetings of July and August would be omitted.

The Cycloid Air Gun.

The Cycloid Cycle Co., Grand Rapids, Mich., are placing upon the market their new air gun, illustrated herewith, which is claimed by the manufacturers to be the only air gun produced that is manufactured entirely of metal. Among its important features may be mentioned the following: The barrels are of uniform tubing, sufficiently strong to withstand any amount of use; and are highly polished and heavily nickeled. The stocks are formed from sheet steel, shaped similar to the modern rifles of standard makes, having full pistol grip, finely finished in enamel and bright attractive colors or nickel plate. The inner barrel is solid drawn brass tubing, extra heavy, true to gauge, for the size of shot used. The breech end is so constructed that the shot will not roll out when muzzle is pointed downward; is threaded at breech and is screwed solid and firmly into breech block, and also securely fastened at muzzle. The breech block is solid, and so fastened

in the barrel as to make it impossible to loosen or blow out. The plunger is malleable iron, with leather washer riveted on end, rendering it air tight and very durable. The sear is cut from heavy sheet steel, and the catch so constructed that it will not break or wear out. The trigger-holding device is not on two points continually but on a revolving plunger, machined off, thus insuring against wear on these parts; the sight hole provided in the repeater allows operator to see the ball when being carried from the magazine to the inner barrel and also allows in case of ball clogging in carrier block, of its being removed or worked through by means of a wire, without taking gun apart; the magazine holds from 200 to 300 shot. All guns are finished with globe sights and have the regular lever action in cocking. There is no doubt but that this gun may be handled by any Hardware concern in the country and be considered as a popular addition to their stock. It is claimed that it is the strongest and most accurate shooter, and looks more like a real gun than is usual with guns of this description. Every care is taken to construct it properly, to prevent its being returned for slight deficiencies, to the dealer after the sale is made. All springs used in its construction are made of spring wire, and are claimed will last the life of the gun. They will not break or wear out with the ordinary usage. Dealers should write for this catalogue.

It is not always easy to be polite. Witness this from the Chicago *Post:*

"Why don't you answer?" said madame, impatiently, to the Scandinavian on the step ladder engaged in putting up new window fixtures.

The man gulped and replied gently:

"I have my mout' full of screws; I not can speak till I svaller some."

The weakest as well as the most dangerous flattery is that which we bestow upon ourselves.—*Exchange.*

Bronze Powders.

Gold colorings have ever been a popular form of ornamentation, but it was not until the introduction of bronze powder, long since recognized as an indispensable adjunct to every trade interested in decorative art—that it could be brought into effect for ordinary purposes. For up to that time nothing but genuine gold leaf, which was necessarily too expensive an article for general use, was known in this country. The distinction of introducing this important source of color and effect into the United States is claimed to belong to the firm of J. Marsching & Co., No. 27 Park Place, New York, who first commenced its importation some thirty years ago, and whose enterprise and constant possession of late and striking improvements in their line has kept them conspicuously to the front. The increased use of this article of late years has been enormous. The wall-paper factories alone now consume upwards of one million pounds a year, while in lithography, and for gilding of steam fittings, mouldings, picture frames, and a thousand and one other familiar objects of use and ornamentation, its importance cannot be overestimated. In the Hardware line, gold bronzes have for years been recognized as one of the most appropriate and satisfactory means of decoration. Everyone is familiar with the fine appearance which is given by the gilt work on axes and edge tools, scythes, forks and other agricultural implements, and on office railings, etc. The neat effect of a fine gilt stripe on japanned ware of every description is acknowledged, by the vogue which it enjoys among bicycle manufacturers, carriage makers, etc., etc.

Marsching & Co., it is claimed, were also the first to manufacture and put up in convenient packages for retailing, a line of high-grade gold paints for house use. Their French and India gold paints and Imperial red enamel are widely and favorably known all over the country. Attention is called to their advertisement on page 5, offering to send samples and prices upon application.

The Fan Season.

The advertising methods of the Bissell Carpet Sweeper Co., are invariably up-to-date. As an evidence of that fact, the following, addressed to their customers, has just been issued:

Grand Rapids, Mich, June 15, '99.

To our customers:—Agreeable to our perennial custom, we beg to emphasize the return of hot weather by making our usual summer offer to give away Japanese fans with "Cyco" Bearing sweepers shipped between June 15th and July 15th. We found last season that the fans were so thoroughly appreciated by the trade that we have felt warranted this year in arranging to give away, free to our customers, between June 15th and July 15th, 100,000 good quality Japanese fans, and the number of fans you receive can only be limited by the extent of your order for "Cyco" Bearing sweepers.

Our proposition is this: With each dozen "Cyco" Bearing sweepers ordered and shipped between June 15th and July 15th, we will include, absolutely free, one hundred good quality Japanese fans. You can easily put your name on the fans with a rubber stamp, and in this way carry an effective advertisement into one hundred homes or more, and besides your sales on "Cyco" Bearing sweepers will be greatly stimulated.

Now, please do not wait until after July 15th to order, and then expect to get the fans, as they will be all gone by that time. Remember, no matter how many dozen "Cyco" Bearing sweepers you order, one hundred Japanese fans go with each dozen. Under no circumstances can we supply the fans with other than "Cyco" Bearing sweepers; also, as this special offer is made to stimulate business during the dull season, it must be positively understood that fans will not be furnished gratis on account of any goods shipped prior to June 15th.

Trusting you will see the advantage to be gained by securing as many fans as possible, and hoping to be favored with your order, we remain Yours truly,

BISSELL CARPET SWEEPER CO.

Foreign Appreciation of the United States Consular Service.

Consul-General Mason, of Berlin, on February 2, 1899, writes:

La Revue Diplomatique, the organ of the French diplomatic and consular service, contains, in a recent number, an article on the United States consular service which may be of interest to American readers. A translation is herewith submitted:

The Americans are practical men, and their instinct for business is marvelous. Nothing is more characteristic in this respect than the organization of their consular corps. The consular service of the United States is a remarkable instrument of expansion. It is unique and resembles none other. Its duty is that of a sort of bureau of information at the expense of the State. It is recruited principally from journalists, who carry into their official career the trained instinct of observation, the quick grasp of passing events which belong to their former profession. They remain in close and sympathetic touch with their former readers. Their letters, which their colleagues reprint, have the familiarity of an interview. They describe how their family enjoy their new residence, whether their house has exotic character, and the following Sunday supplement reproduces it with photographs. They address their reports to the Government, but they know that as soon as they are received, the press will reprint them and that the whole country will derive advantage from them.

In some countries, the official printing office leisurely prepares the proofs of consular reports. These are returned for correction by the consuls, and when they finally appear they are no longer of interest. They are of an historic rather than a business character. But the American consul knows that his notes will go without delay immediately to the public, and he gives in them, like a good reporter, information down to the latest hour.

The American consul does not understand that he has a commercial situation to maintain, but always a commercial situation to conquer. His ingenuity is exercised to invent and find new markets, and in his study of ways and means he descends to the most minute details.

For instance, the Americans have wheat to sell. The consul at Amboy proposes to import it into China. (See *Consular Reports* No. 218, (November, 1898,) p. 443.) But the Chinese do not eat wheat. They must then be opportunities for, or obstacles to, the extension of sales for United States products abroad.

Then there are the monthly *Consular Reports* from the consular and diplomatic representatives of the United States.

Two other publications are issued, the *Special Consular Reports*, dealing with tariffs, post regulations, money and prices, railways, canals, irrigation, and so on; and *Declared Exports*, which gives the exported goods to the United States, with their invoice values.

These reports, valuable as they are to the commercial community, have not satisfied the American Government, and, since the beginning of 1898, they have issued a daily edition of the *Consular Reports*, so that within a few hours the manufacturing and commercial communities are in receipt of the information. Here is a report dated January 31, which gives the American engineers notice of the growing market for freight motors in England. It explains the high rates for railway carriage, shows where the English motor manufacturers are failing, and an American agent was landed here in a few days to take up the new industry. Such a report from our English consul would have been months before it reached English manufacturers. It would have been sent in proof to the consul before being issued, and I have known a case in which it was eighteen months before it was published. The newspapers would print it, but it was not available.

Our consular reports should be made promptly accessible in abstract, as well as being published in monthly volumes; we should appoint commercial attaches at the chief consulates, with clear instructions as to their duties; and they should be Englishmen wherever possible, but speaking the language of the country in which they are located. The reports from all these sources should be as widely circulated among those most immediately concerned as possible. The American Government print their advance copies daily, on one side of the paper only, in order that they may be convenient for use by the press. The English journals are quite patriotic enough to give publicity to such matters, if the information is circulated properly and in convenient form.

Trade With South America.

The field for American goods in South America, and the opportunity for its enlargement is the subject of a letter just received by the bureau of statistics of the treasury department. It points out the popularity of American goods, and the fact that American merchants and manufacturers are not apparently making the effort to extend their trade in South America that those of other countries are making. Imports into Argentine Republic from Germany increased from 8,045,000 pesos in 1886 to 13,895,000 in 1896; those from Italy increased from 4,647,000 pesos in 1886 to 11,305,000 in 1896; those from the United Kingdom, from 33,433,000 in 1886, to 44,730,000 in 1896, while those from the United States, which in 1886 were 7,673,000 were in 1896, 11,210,000, out of a total importation in 1896 of 112,164,000 pesos in value. An examination of our own export figures by countries show that our exports to Argentina, which in 1889 were 9,293,856, were in 1896, $6,429,070.

The letter in question says: "A statement in a periodical referring to the commerce of Argentina in regard to the manufactures which Europe exploits exclusively for its own benefit, is worthy of consideration, when it is clear that the United States, for many reasons, should supply the South American merchants with its manufactures of a quality superior to the German, similar to the English and French. One advantage of the United States is the possession of the raw materials, cotton, wool, etc.; although it may not have wool in sufficient quantity, it can procure that of other places, as Europe has done, in exchange for its merchandise. To obtain satisfactory results, it is necessary that the North American manufacturers should put themselves in direct contact with competent persona, who should be natives of the country where they wish to plant their business, in order that the dealer may understand the needs, tastes and customs of the consumers, and all necessary modifications of which the trade may be susceptible; width, design, color, etc., in which each country has its own customs and tastes, which vary but do not change."

A lady who had an Arabic glass cup of the fourteenth century and did not know its value took it to the British Museum. After due consideration, the expert, to her surprise, said that though the Museum did not want it, it might be worth £400. The lady shuddered, because she had been carrying in a crowded London omnibus a bit of glass worth so much money and it had miraculously escaped smashing. Finally, wanting money more than Arabian glass, she sent the object to Christie's. Fancy her amazement, when, starting at £500, the Arabic cup went by leaps and bounds up to £1,000, and was finally knocked down (with applause) for the nice sum of £1,300. Actually the Arabic cup was worth very much less than $6,500, but it so happened that there were two rivals at the auction, who bid against each other.—*China, Glass and Lamps.*

Recent Trade Publications.

The Osborn Manufacturing Co., Cleveland, Ohio, have recently published what is claimed to be the most complete book that has ever been issued, to set forth particular branches of the brush and broom business. It is numbered 91 in their series, and supersedes all their previous issues. Among its contents are shown very complete lines of house brushes, including floor brushes, counter brushes, window brushes, sink brushes, etc., also special brushes for railroad use, and a large line of push brooms, a very complete line of brushes and brooms for brewer's use, and a variety of tumbler and billiard table brushes; there are several pages devoted to special brushes for dairy and creamery use; also a complete line of butcher block brushes, together with a full representation of brushes for foundry and plater's use, among which is noted the "Economy" wire wheel brushes, which have gained an enviable reputation during the past year; the assortment includes the "Safety Tampico" wheel brushes for bicycle makers and other metal finishers. On page 67 is shown a larger line of special wire brushes for furnace and heater manufacturers than is usually offered the trade. The Osborn Manufacturing Co. are willing to send a copy of this book to anyone in the trade, and it would prove an addition to any Hardwareman's library,

The Corbin Cabinet Lock Co., New Britain, Conn., have recently issued a handsome catalogue of modern post office equipments, which includes everything needed for that purpose from the necessary locks, lock boxes throughout, and including the post office cabinets for counter use and general cabinets, such as would be needed by almost any post office in the country. They state, which is true: "The worth of a good equipment is out of all proportion to its cost in the increase it affords in the receipts of the office, and the postmaster's income. Particularly is this true of fourth-class offices, where all the box rentals belong to the postmaster, and in rural districts, where residents can pick and choose from among several post offices, selecting the one that affords the best service. Postal money orders have a larger sale where facilities for doing the business attract the attention of people visiting the office, and the postmaster's revenue is consequently increased. In many cases, the purchase of a good cabinet has been the only thing required to bring the receipts high enough to advance the office to a higher class, with a higher salary." The catalogue is certainly a very useful one for the purpose, and is gotten up in a very attractive style.

George F. Owen & Co., Grand Rapids, Mich., have issued a catalogue covering a line of acetylene gas generators, which is something that is needed by the trade at large, and is now having considerable popularity. They state that the Owen Acetylene Gas Generator, which this catalogue endeavors to introduce to the public, has met with an extended use by a due trial and thorough examination by leading experts, having been pronounced as among the most practical, economical and modern generators on the market; constructed upon thoroughly scientific principles, modern in every feature, and is recommended with the fullest confidence as to its ability to produce favorable results. The catalogue is one worth having, and should be sent for by those interested in this line of business.

The Ferracute Machine Co., Bridgeton, N. J., have recently issued a very ambitious catalogue of between forty and fifty pages, covering, their entire line of presses, dies and other sheet metal tools, for the manufacture of which this concern is noted. They have material enough in it to fill three times the number of pages, and make a more favorable display, but they have endeavored to condense the descriptive matter as much as possible, and include in its limited number of pages every machine they are now constructing. They have undoubtedly done so. Parties interested in this class of machinery will do well to write for catalogue No. 12, which is dated April 1st, and supersedes all catalogues previously issued by this company.

The E. W. Bliss Co., Brooklyn, N. Y., have issued a small catalogue covering their special machinery in the way of presses, dies, shears and other tools necessary in the manipulation of sheet metal work. This small catalogue, with reduced illustrations, is very nicely printed, and covers all their new styles that they are making popular this year.

American Trade With Australia.

There is not the slightest doubt that since the freight war America has made immense encroachments in British trade with Australia, which will still increase even with the ordinary rate of freight. American competition is not being carried on by reducing the quality of the article sold; the American article is as good as the English, and the prices, generally speaking, far lower. In agricultural implements America has almost taken possession of this market. The goods are lighter, as durable, and more neatly got up. In builders' Hardware an increasing trade is being done, large due to the way in which they are put up, all fittings required being sent together. Fully 2000 tons of wire have lately arrived in Sydney alone; in fact, all kinds of wire are coming in freely. In barbed wire the Americans take the lead. For the last six months large orders have gone forward for hoop iron, gas pipes, cast iron pipes, steel rails, steel plates, boiler plates, joists, angle and T iron; in fact, most of the materials used in the building trade, railway construction, waterworks, bridge building, etc. Steel plate and steel rail contracts are mentioned in another article. A growing trade is being done in ammunition for guns and rifles; in fact the opposition to British trade is very much more serious than the British manufacturers imagine.—*Australasian Ironmonger.*

South African Trade.

An evidence of the gains which American manufacturers and producers are making in their export trade in direct competition with those of European nations, is found in some recent figures on the trade of South Africa. The British and South African *Gazette*, which has just reached the bureau of statistics, publishes a series of articles on the imports into South Africa, in which it shows that American imports are making a greater proportion of gains than those from Great Britain. The exports of British manufactures from the United Kingdom to South Africa in February, 1899, are shown to be $32,500 in excess of those for the same month of 1898, while our own export figures to British Africa show an increase in February of the present year of $362,941 over February of last year, the general increase in our exports to Africa during the eight months ending with February being about one million dollars, as compared with the corresponding months of the preceding year.

Why?

Why doesn't the sea cow give watered milk?

Why isn't a dirt cart a real estate conveyance?

Why shouldn't a chiropodist be partial to corned beef?

Why does the silent partner in a business always have so much to say?

Why does a small boy's face always look as if he had been eating something?

Why isn't a doctor attending a patient's funeral a case of cause and effect?

Why is it wrong to hit a man when he's down after working so hard to get him there?

Why shouldn't some genius crown himself with glory by discovering a process for extracting gold and silver from mining shares?—*Chicago News.*

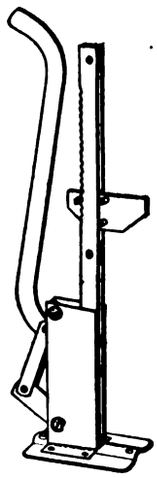
The Abuse of Credit.

Nothing, perhaps, was more clearly demonstrated during the years of depression now just passed, than the weakness of our credit system. It was proven to be weak in almost every essential part; in legal protection, in business customs, in confidence between buyer and seller, in banking relations and in all matters where co-operation is essential to success. It is not sufficient to explain that panics are occasioned by lack of business due to the contraction of wants and the consequent paralysis of the manufacturing industries. There are other factors to the situation lying far deeper than these and which are of a character not to be so easily recognized. I venture to say that reduction in trade has less to do with the majority of failures than the abuse of credit. I mean the abuse both in the asking for and giving of credit. I believe that the abuse of credit largely occasions reduction in trade.

In 1892 we witnessed a phenomenal year in business activity. Credit was used to its fullest extent by buyers and freely conceded by sellers. Consumers bought lavishly. Retailers stocked their stores to their greatest capacity, wholesalers ordered extravagantly from manufacturers and manufacturing industries ran night and day to supply the demand. The market became congested and stagnation followed. The collapse found hundreds of business houses with immovable stocks of far greater size than good judgment would justify and the liability for which occasioned their embarrassment. There were also hundreds of business houses that had been so loose in their extension of credits and so lenient in their collections that the depression found them with enormous stocks on hand and large outstanding accounts in addition. Heavy losses inevitably followed. It was the houses whose credits were intelligently managed and whose collections were closely made that found it possible to withstand the panic without strain or special embarrassment. With less failures there would have been less consternation, and with more confidence there would have come quicker recovery.—F. R. Boocock.

Don't Give Up.



Jonah was an unwilling guest. He wanted to get out. However much he may have liked fish he did not want it three times a day and all the time. So he kept up a fidget and a struggle and a turning over, and gave the whale no time to assimilate him. The man knew that if he was ever to get out he must be in perpetual motion. We know men who are so lethargic they would have given it up, and lain so quietly that in a few hours they would have gone into flukes and fish bones, blow hole and blubber.

Now we see men all around us who have been swallowed up by monstrous misfortunes. Some of them sit down on a piece of whalebone and give up. They say: "No use! I will never get back my money nor restore my good name nor recover my health." They float out to sea and never again are heard of. Others, the moment they go down the throat of some great trouble, begin to plan for egress They make rapid estimate of the length of the vertebrate, and come to the conclusion how far in they are. They dig up enough spermaceti out of the darkness to make a light and keep turning this way and that, till the first you know they are out.

Determination to get well has much to do with recovered invalidism. Firm will to defeat bankruptcy decides financial deliverance. Never surrender to misfortune or discouragement. You can, if you are spry enough, make it uncomfortable for the whale as the whale can make it uncomfortable for you. There will be some place where you can brace your feet against his ribs, and some large upper tooth around which you may take hold, and he will be as glad to get rid of you for a tenant as you will be glad to get rid of him for a landlord.—*Christian Herald.*

The Lane Steel Jack.

Lane Brothers Co., Poughkeepsie, N. Y., have added a smaller size to the line of steel jacks made by them, which are now all furnished galvanized; and from their greatly increasing production, bid fair to become the standard for excellence in this class of goods. The new size will be

known as "No. o," and is available for a great amount of light work.

It can be sold at a popular price, and will surely work its way in a field where previously many inferior productions in the past have formed the only reliance, when jacks were used at all. Attention is called to the advertisement of Lane Bros. Co. on the second page of cover.

A Zinc Town.

There is a six months' old town in Africa called Beira, the houses of which have been constructed entirely of zinc, "millions of tons" (so we are told), of this commodity having been contributed for the purpose by Great Britain, France and America. From the Governor's House down to the humblest laborer's "shanty" all is zinc, a material which is hardly the best, we should imagine, for a very hot climate. Even the tram cars which traverse the town are of zinc, and if a man gets knocked down by a falling wall of zinc they send for a zinc stretcher, on which he is conveyed to a zinc-built hospital, and if he dies he is buried in a zinc coffin. In short, if we hadn't an American paper as the source of our authority (and we all know that the American papers, like Washington, simply can't tell a lie), we should say the whole thing is zincredulous.—*Hardwareman* (*Eng.*)

Erastus Wiman on Credits.

"The question of credits, like the question of currency, is all pervading. The safety of both are essential to the commercial health of the country. If the relative importance of the two questions were to be decided upon, the problem in relation to the safety of credits would be of greater consequence than those in relation to currency. This is because of an internal commerce in this country almost exceeding computation the element of credit played so large a part. While in the currency, in the shape of wads of bills carried about in the pockets of the people or on tap in safes and banks, formed a large volume, its uses dwindled into insignificance when compared with a volume of credit, which like a vast stream overleaping its boundaries, pervades the entire surface of the continent."

The question used to be, 'tis true,
"What work is there for girls to do?"
But now we've reached an epoch when
We ask, "What is there left for men?"

They're still enlarging woman's sphere,
And e'en the stoutest of us fear
Man will be useless after 'while,
And go completely out of style.—*L. A W. Bulletin.*

Bronze.

The antiquity of bronze and the knowledge of the use of a metal made harder than native copper by the admixture of a suitable alloy is well known. After the Neolithic, or later Stone Age, implements of warfare, domestic utensils, and articles of ornament were made of bronze. This alloy was of a simple character, that used by the prehistoric inhabitants of Britain being native copper and native tin.

The earliest forms of bronze spears, axes, and palstaves, were cast in moulds carved out of the local stone. Moulds of this character are scarce, although they are occasionally found in undisturbed districts; one in the writer's collection (a cast of which may be seen in the British Museum) was found by a farmer upon the wild moorland heights of Yorkshire.

The finest examples of bronzes coming to us from an historic period are the bronzes of Greece and Rome, which were so beautifully modelled in wax upon an iron core, the mould being formed of soft clay. This was afterwards baked, the wax running, and thus leaving a cavity for the bronze. Most of these old pieces still retain their smooth surface and perfect form, but are covered with a beautiful patina of green.

Bronzes are now cast from models of plaster covered over with piece-moulds of sand backed with plaster; the sectional moulds being afterwards dried and then rebuilt. Castings, when completed, are dressed and finished by hand. Some wonderful examples of bronze castings are seen in the beautiful groups and figures which adorn our principal cities and their chief buildings. The Orientals have long possessed the art of casting bronze in wonderfully delicate patterns and designs; the art, too, in Great Britain has developed considerably during the last few years. Many of our founders turn out some beautiful works of art, not only in bronze panels and other architectural decorations, but in delicate ornamental goods.

The use of bronze has widely extended in connection with engineering plant and mechanical uses. A greater chemical knowledge of the various properties of different alloys has led to the preparation of such compounds as steel bronze, phosphor bronze, aluminium bronze, etc. A number of new compound metals have sprung into existence, the principal ingredient of which is undoubtedly bronze, containing the old alloys in a greater or lesser degree. Machine bearings, shaftings, couplings, and other frictional parts of machinery are being made of these bronzes. As science advances, and a more skilful control and use of powerful natural forces becomes possible, the necessity for metals of greater resistance and more adaptation to one another increases. In this way bronze comes into greater prominence, and its use for commercial manufacturing purposes is certain to increase.—*Ironmongers' Chronicle.*

Petit Bleu, of Brussels, recently had a curious experience in which it was shown that no one is indispensable in this world. The compositors having struck, the text accompanying the illustrations was written out on the typewriter; then the typewritten sheets and the copy for the pictures were pasted on large sheets of cardboard and the whole was reduced by photography to the required size. From this negative a photo-engraving was made from which the paper was printed.—*Scientific American.*

An Italian medical journal states, according to the New York *Medical Journal*, that while water will not quench the flame of burning petroleum in a limited space, milk accomplishes the object by forming an emulsion with the oil, distributing its cohesion, and thus attenuating the combustible element.

Table Cutlery in the Old Days.

Think of a dinner party where the guests hungrily grabbed choice bits from the dishes in their immediate neighborhood, and having dipped their "gobbets" in sauce-boats which were commonwealths of gravy, then proceeded to get the dripping morsel "indoors" with the best grace they might. Truly there are compensations for not having dwelt in ye good old times. Silver forks were considered the last extreme of foppery in the seventeenth century, and even early in our own good queen's reign, black-handled, steel-pronged instruments were the only wear of lower and middle classes.

In the days of Queen Anne forks were treated variously to prongs, some being made with two, while many counted to six. Yellow handles had a vogue one year, green another, and so on, until every shade in the rainbow was reached. Many of these quaint relics are still preserved as heirlooms, and in one north country mansion a set of pink coral-handled, pearl-inlaid forks are used on great occasions, which tradition has it once graced Mistress Anne's own royal board.

Now the electro-plate has spread itself over the land. Mayfair and Belgravia are harking back to something away and apart from even the cheapened sterling silver of wide-spread use, and fancy china-handled forks, stained ivory and jade were seen on many dinner tables of the social elect during last season.

Aluminium is being pressed into the service, too, and it is not unlikely that the present plain fork of unornamental aspect will be shortly relegated to the lodging-house or suburban abode, as out of tune with the artistic tastes of this highly ornate generation.—*Ironmongers Chronicle.*

United States Firms in Mexico.

The following extracts are from a letter to a Western correspondent, by Consul Kindrick, of Ciudad, Juarez:

You desire to know, in the first place, if a company organized in the United States can do business in Mexico, by filing a certified copy of the articles of incorporation in the district in which it desires to be established.

The laws of Mexico seem very plain on this point. Provision is made for the establishment of companies such as you have in mind. It is necessary that the companies shall register their constitution and by-laws, contracts, and other documents referring to their business; also, their inventory and, if they have it, a certificate showing they are constituted in accordance with the laws of the United States or their respective States where they have been organized. This certificate must be signed by the embassador of Mexico to the United States, or by the American consul.

You desire to know if the Mexican Government taxes a mining corporation upon its capital stock, and at what rate.

There is no provision in the mining laws for taxing capital stock. The Federal Executive promulgated the mining-tax laws June 6, 1892, and therein provision is made for a yearly or annual payment of $10 (Mexican) for each 1,000 square meters of land.

The legislative bodies of the different States can impose a tax upon the output of the various mines located and worked within their borders. Each State has a different law. In this State (Chihuahua), the tax is 2 per cent. on the gross amount or value of the mineral extracted.

The per capita circulation of money in the United States on April 1, 1899, was the largest ever shown at that period of the year in the history of our country. At that date it was, according to the official statement of the Treasury Department, $25.45 per capita, while that of April 1, 1898, was $23.69; April 1, 1897, $23.01, and April 1, 1896, $21.53.

How White Lead is Made.

Very few people know how white lead—the base of so many paints—is made, and even those who sell it ought to know more about it than they do. Now and then one may find a person who will tell you that the same lead which is moulded into bullets is the white lead seen in the paint pots, but an inquirer will ask a great many people before he finds one to explain the process of manufacture. Here, then, are a few notes that may be of interest to those who are expected to know. Iron, it is pretty generally known, is melted into what are called "pigs" for shipment and for convenient use. It is the same with lead, only the pigs are not as large and heavy. The first step in the manufacture is to corrode the lead. We will take what is called the "old Dutch process," because that makes the best article. The "pigs" are tossed into a melting furnace, and when reduced to a liquid state the metal is drawn off into moulds, which are called "buckle moulds." The lead thus moulded is called a "buckle," being a little round cake nearly as large as a saucer, but not so thick, and perforated in many earthern jars of various sizes. At the bottom of each jar is a small quantity of acetic acid. When a jar is full of "buckles," which have been dropped in without regard to order, it is removed to the corroding house. Here the jars are placed in a row, covered by boards, the boards are covered by two inches of tan bark, and then another course of jars is added until all the room is taken up. There is nothing more to do for ninety days except to wait. It is not the acid direct, but its fumes, and the perforations which permit the fumes to get at all parts of the little cake. At the end of ninety days the lead should be corroded. The "buckles" are then bleached out until they look like biscuits and will crumble to pieces at the touch. The same acid which has befriended the maker in the corrosion is now his worst enemy, and must be got rid of. Many people have rubbed their hands along the boards of a building and found them smeared with a white powder. That house was painted with the lead from which the acetic acid was not thoroughly washed out, and the paint "killed" and powdered up. The jars are taken to the washing-troughs and their contents emptied in, and the water is then let in and the bath is sluiced until we have a mixture the color of milk and scarcely heavier. After a deal of washing the water is drawn off, and the lead is found at the bottom of the troughs. If the acid has been taken out it is shoveled into the jars again, and then carried into a hot-air room and left for the water to evaporate. When this has been accomplished, the contents of the jars are emptied on copper drying pans heated by steam. The stuff now looks like ice cream, but soon dries until it is as fine and white as flour. To make paint it simply has to be ground in oil. To prove that this white paint was once metal, a simple experiment may be made. Take a piece of charcoal, dig out a small hole in the center, and fill the cavity with paint. Now light the charcoal and put the blowpipe at work, and what is the result! A ragged button of lead. Acid made it paint—fire burns it back to its original state. The lead corroder ships to the paint factories by the barrel. At the factories the dye stuff is poured into paint mills, oil added, and the stuff is ground through three different mills before it comes out as seen in the paint cans. If the paintman is making pure lead he adds nothing. If he so desires, the lead is adulterated while grinding. There is a species of quartz rock called barytes. When this is pulverized it closely resembles lead, and is largely used to adulterate it.—*Ironmongery.*

Among the curious things found in the Philippines are vegetable gems. Occasionally these are found in the stem of a bamboo, having the appearance of an opal. Other treasures rarely met with are the tiny pearls which have been known to form in cocoanuts.—*Exchange.*

Twine Made From Grass.

Twine made from grass which grows abundantly upon the marsh lands of Wisconsin, Minnesota and other western States is the product of a new American industry. Some years ago the high price of twine led a member of a large northwestern binder manufactory to attempt to make it from the raw material mentioned. The process was so far developed that the twine produced could be used on the binders manufactured by this firm. But, owing to the sudden fall in price of sisal and manila hemp, and the death of the member of the firm referred to, the project was abandoned for the time. Shortly after, however, other parties became interested in the process and a company was organized for its further development some years ago. This concern began the development of the new business in a quiet way, with the result that a large and well equipped grass twine plant is in active operation at Oshkosh, Wis., while another and still more extensive grass twine plant has been recently established at St. Paul, Minn., both of which are now manufacturing twine, matting, rugs, bagging for cotton bales, vegetables, etc.; floor deafening, carpet lining, bottle covering, ropes, and in fact, anything for which cord is made or required in the manufacture.—*Exchange.*

The Mica Output of India.

There are four kinds of mica recognized by the Indian dealers, the qualifications being as follows: Hard and tough ruby mica; white transparent mica; the third division is discolored and smoky mica, while the last class is called black mica, and in it are included the mica flakes obtained in trimming the other varieties. The latest authority estimates the total output per annum at about 17,000 hundred-weight, of which about half is exported. The growth of the export trade is clear from the following figures: In 1892 only 2,298 hundred-weight of mica was exported from Bengal, whereas in 1896 the amount had risen to 8,835 hundred-weight. The supply of mica in India is considered practically inexhaustible, and some of the veins are extremely rich. The present method of mining is, however, very wasteful, as practically nine-tenths of the mineral extracted is injured and rendered useless for export. This waste mica could, nevertheless, be used to advantage in the manufacture of micanite, and the manufacture of this commodity should prove a remunerative adjunct to any company taking up mica mining on a large scale in India.—*Exchange.*

Fuller's Earth.

Fuller's earth was formerly used for removing grease and in "fulling" cloth; its name was derived from the last named use. At present, however, the chief use is for clarifying oils. Its use for this purpose is increasing rapidly.

The chief supply at present comes from the clay beds near Quincy, Florida. Most of the deposits there and elsewhere are believed to be controlled by the Standard Oil Co., which uses a large part of the product. In 1897 the quantity used was 17,049 short tons; in 1898 it was about 20,000 tons. The value on the spot is about $5 a ton. At the present time ordinary lump sells in New York at $15 a short ton; powdered and specially prepared at $17 a ton. Besides the Florida supply, the *Mining and Engineering Journal* states that there are deposits in Colorado, Florida, New York and South Dakota.

The mainmast of the *Shamrock*, the yacht that is being built in Ireland for the purpose of competing with America's crack yacht next fall, is of Oregon pine, alias Douglas fir, and was cut on the Washington side of the Columbia River. The stick is over one hundred feet long, and entirely free from defects.—*Exchange.*

REVIEW OF THE MARKETS.

Hardware: Vacations are now in order and the conventional close of the active season for business is near at hand. Still the demand is being felt for a further supply of many staple lines, the shipments of which on the specifications already in hand have by no means overstocked the houses who have ordered them. There is a feeling of satisfaction at this time that all orders given early in the spring for staple goods, have not been entirely filled. Close comparisons are made and everything due and not delivered will be claimed with a keener deliberation than has been the case in previous seasons. The assurance of a good trade for fall, under advancing conditions, is evident on every hand.

Wire Nails: The 25 cents per keg advance, which on June 1st became the established price on wire nails, by the American Steel & Wire Co., has been well sustained by the manufacturers. The demand from the trade becoming less important as the season advances, has made but little hesitancy noticeable, when ordinary requirements are forwarded for immediate shipment. Notice has been given the trade, that after July 1st the rebate at present allowed of "2 per cent. for cash in ten days," will be withdrawn. Terms will then be 30 days from date of invoice, net cash, f. o. b. Pittsburg.

Present quotations by manufacturers remain as previously quoted f. o. b. Pittsburg:

To jobbers in carload lots	$2.35
" in less than carload lots	2.37½
To retailers in carload lots	2.45
" in less than carload lots	2.55

New York prices are represented by the following:

To retailers, carloads on dock	$2.60
" less than carloads on dock	2.75
Small lots from store	2 85

Cut Nails: The advance established on cut nails in harmony with present prices on wire nails, has not lessened to any material extent, the demand for these staple goods. Prices remaining as quoted previously. Quotations now made are f.o.b., Pittsburg, as follows: Freight being added to make a net price delivered at destination.

To jobbers in carload lots	$2 00
To " in less than carload lots	2.05
To retailers in carload lots	2 05
To " in less than carload lots	2.20

New York Business is fairly active under the advanced prices, being quoted as follows:

Carload lots on dock	$2 20
Small lots from store	$2.35

Barb Wire: A good trade is being done in the barb wire market, and quotations are held firmly at the prices named in our previous issue, f.o.b., Pittsburg.

To jobbers in carload lots, Painted	$2.45
" " Galvanized	2.95
" in less than carload lots, Painted	2.47½
" " " " Galvanized	2.97½
To retailers in carload lots, Painted	2.55
" " Galvanized	3.05
" in less than carload lots, Painted	2.65
" " " " " Galvanized	3.15

Smooth Wire: Smooth wire, continues in indifferent supply, the capacity of the mills being taxed to the utmost in the endeavor to fill the many orders entered, requiring prompt shipment. Previous quotations remain without change, as follows, f.o.b., Pittsburg:

To jobbers in carload lots	$2 20
To " in less than carload lots	2.22½
To retailers in carload lots	2 30
To " in less than carload lots	2.40

The charge for galvanizing is 50 cents on sizes from 6 to 14 inclusive: on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Files: The new file list seems to have been welcomed by the trade with a greater degree of satisfaction than is usually the case with advanced prices. But the fact is acknowledged by the trade that no change in prices was made, until the steel bought at low prices was exhausted in completing old orders, rendering new purchases of stock at greatly advanced prices imperative.

Metal-Keyed Faucets: While special changes in the prices of such goods as Sommer's wood and metal-keyed faucets may be anticipated at an early date, no present advance is contemplated on any of the metal goods in this important line, as long as the stock of material already secured shall last. It is the desire of the manufacturers to give their customers the benefit of ruling prices until this supply is exhausted.

Stove, Sink and Tire Bolts: At a meeting held 15th inst. the present prices of Stove, Sink and Tire Bolts were reaffirmed, the printed discounts being 67½ per cent.

Wrought Door Bolts. Stanley Works in their recent revision of base discounts made present discounts on their line of door bolts to read as follows:

	Discount Per cent.
Barrel Bolts Nos. 1078, 1078½, 1080, 1081, 1082, 1084, 1086	70 and 5
Square Bolts, Nos. 1088, 1090, 1092, 1094, 1098	66⅔
Shutter " " 1110, 1112, 1326	50 and 10
" " " 1114, 1118	20
Bronzed Barrel Bolts, Nos. 402, 404, 406, 407, 408, 409	40 and 10

Bonney Vise & Tool Works. The specialties manufactured by this company have been advanced in price an average of ten per cent., such step being made necessary by the increased costs of raw material.

Table Cutlery. We have received the following, which bears date of June 16. To our customers: Owing to the large advance in all kinds of material, we find it necessary to make a small advance in the prices of cutlery, to take effect from this date. We will be glad to quote new prices when you are in the market. GOODELL COMPANY.
Antrim, N. H.

Peck, Stow & Wilcox Co. A new discount sheet, No. 2, applying to their 1898 catalogue, has recently been issued by the above company. As a general revision of prices previously current has been undertaken, it marks to a great extent the discounts now controlling the market. These changes show considerable advances in many lines. Special goods marked A are subject to a discount of 10 per cent. beyond the discount printed, and special goods marked B are net. Other quotations in the discount sheet are subject to an additional discount of about 20 per cent. A special circular accompanies the discount sheet, the following discounts applying to the same:

	Discount per cent.
Scale Beams	40 and 10
Steelyards	40
Agricultural or Standard Wrenches	75 and 5
Socket Firmer and Framing Chisels	75 and 5 and 2½
Socket Corner Chisels and Slicks	75 and 5 and 2½
Carpenters' and Razor Blade Drawing Knives	75 and 5 and 2½

Stone and Market Ware: Quotations are firm in this important line, and at prices prevailing, although quite high by comparison with those earlier in the season, the market has anything but a full supply of leading goods. Prices vary with the different sources of supply as affecting the dealer, but the following approximates those generally current in the market:

	Discount per cent.
Bright or Annealed, Nos. 6 to 16	70 to 70 and 10
Coppered, Nos. 6 to 16	67½ to 67½ and 10
Galvanized, Nos. 6 to 16	67½ to 67½ and 10
Tinned, " 6 to 16	70 and 10 to 75
Stone, Bright or Annealed, Nos. 19 to 26	75 and 10
" " " " 27 to 36	75 to 10 and 5

Screw and Strap Hinges: Another advance, of ¼ cent per pound, has been made in the prices of heavy screw hook and strap hinges, and the market is now represented by the following:

6 to 12 inch, per pound	3¼ to 3½ cents.
14 to 20 " " "	3 to 3¼ "
22 to 36 " " "	2¾ to 3 "

Cordage: The advancing market on Manila hemp strengthens materially the prices on cordage thereby affected. Quotations at present are liable to change without notice. When the market is in this healthy condition it is not apt to suffer so much from cut prices.

The following quotations may be said to represent the market at the present time.

Manila, 7-16 inch and larger	per pound,	10 to 10½ cents
" ⅜ inch	"	10½ to 11 "
" ¼ and 5-16 inch	"	11 to 11½ "
Sisal, 7-16 inch and larger	"	8¼ to 8½ "
" ⅜ inch	"	8¾ to 9 "
" ¼ and 5-16 inch	"	9¼ to 9½ "
" Lath Yarn	"	7¾ to 8 "

The price of jute rope is 5½ cents.

THE ALBANY TRADE.

Trade is holding well in this section and promises to continue so up to the usual time for easing off, viz., July 4th, when the vacation season is dated by precedent to commence. The rush for field and garden tools has been unprecedented, and the broken assortments have been heavily drawn upon by dealers who will have what they can get, instead of insisting upon getting just what they want as heretofore. The factories have been unable to fill orders completely or promptly.

No one will object to carry goods over this season in the face of the higher prices for raw materials, which must of necessity have its influence on prices of next spring.

General complaint of high prices of shovels is made, and smaller quantities are noticed among the orders. The day laborers who use the shovels say the increased cost of this necessary article is out of proportion to their wages, and the retailer is lessening his purchases accordingly in the belief that prices in some way may be reduced.

Hammocks, freezers, lawn mowers, screens and screen doors have had remarkable sales, and the long spell of dry weather has made the sale of rubber hose, lawn sprinklers, hose fixtures, etc., about double that of ordinary seasons.

The demand for nails continues good notwithstanding the advanced prices. Considering the cost of billets, are not nails still low, and is a further advance not improbable?

The revised price list and discount of bale ties shows an advance of at least fifty per cent., and the present scarcity of these goods and slowness of filling orders is evidence that full specifications for contracts were sent in prior to the time limit, thus affording to the past liberal purchasers a handsome margin on early fall orders.

New prices of some leading lines, also some scattering goods which have not yet moved in keeping with advance of material, may be looked for the first of the coming month, and is generally thought probable and in keeping with past records. This may cause some guessing and call for best judgment on the part of buyers.

Collections are improving steadily, and indicate a continued healthy tone to trade.

ALBANY HARDWARE & IRON CO.

THE PHILADELPHIA TRADE.

The vacation season is now upon us, and trade is usually lighter in consequence. Unless, however, we are greatly in error in our judgment, we confidently expect a much livelier summer trade than has been the rule for the last two or three years, and we base this upon the fact that many dealers have refrained from buying as heavily as they might during the last sixty days on account of the greatly advanced prices now ruling.

Despite this staying out of the market, general business has been considerably larger than last year, and buyers who have been standing out, will now practically be compelled, owing to increased sales, to re-enter the market as purchasers, and as already stated, we shall be greatly surprised if this does not largely increase the volume of summer trade.

The market shows no signs of weakening—on the contrary, iron and steel are still forging ahead. Consumption seems to be ahead of the production and there seems to be no prospect of lower prices this year, at least, while we are, already, hearing of contracts which are being placed for 1900 supplies, and even further, and there seems to be every reason to believe that goods which have already advanced heavily will make some further liberal advances in the near future.

One of the most noteworthy incidents in the last few days has been the action of the American Steel & Wire Co. in withdrawing their cash discounts on nails and wire and other goods, making terms net cash thirty days. This will naturally result in jobbers being compelled to adopt the same course, and to bill nails, barbed wire and wire, and probably other lines of goods, on a thirty-day basis, with no cash discount allowed for earlier payment. The American Steel & Wire Co. state the trade will approve the wisdom of their action and justify their action in taking this step. It still remains to be seen, however, how this will be received by the trade at large.

One of the most gratifying signs of the times is the improved state of collections. Money seems to be easier and remittances are made much more freely than has been the case for some time. There seems to be a general prosperity and it is naturally to be expected as a result of the immense amount of money which is now being paid out in wages—the amount in volume and per capita in excess of any of the past few years. As long as this is the case, there seems to be no reason to look for any other but good and prosperous trade. BIDDLE HARDWARE CO.

THE PITTSBURG TRADE.

Business continues good and while the increase over previous years for the first half of June is not so great as during April and May. This is mostly due no doubt to unfavorable weather conditions.

Ability to make shipment from stock continues to be a great inducement to buyers and is thoroughly appreciated by those who have experienced the more than usually exasperating delays of factory shipments this spring.

Salesmen report an exceptionally large number of orders for future delivery of fall goods, such as gas stoves, etc., so that indications are that the fall trade will be very satisfactory.

An ordinance requiring the use of lamps on all vehicles (which includes bicycles) has recently been enacted in Pittsburg to take effect July 1st. The demand for these goods has consequently been greatly increased and sales of this nature will help to swell the June account especially in the bicycle department.

The "summer season" with its shorter business hours and Saturday half-holidays is now with us and as we near the end of the month, the gradual "let up" of the spring rush becomes noticeable.

Vacations appear in more immediate prospect and the anticipation of a few days where we may forget the cares of business after an exceptionally busy season comes as a welcome thought. LOGAN-GREGG HARDWARE CO.

THE BALTIMORE TRADE.

One of the serious features in the management of many of the mills which have entered into consolidation is the amount of labor, previously found necessary in conducting them, that is now thrown out of employment. And another is the arbitrary method pursued in making prices and terms of settlement.

In consequence of the peculiar conditions existing this year possibly seventy-five thousand traveling men will lose their positions, and also a much larger number, including office men and those holding minor positions.

With such a large army losing employment, individual hardships will be numerous and a great decline in the value of efficient labor will follow.

That railroads, hotels, liverymen, etc., will keenly feel the absence of the bright and intelligent faces that have been visiting them periodically there is no question, and the loss of their patronage will run into many millions of dollars annually.

Traveling salesmen are happy fellows, endowed with genius, brains and the lucky faculty of accustoming themselves to circumstances, of braving danger and suffering discomforts with a smile. They are the best readers of human nature, and whilst toiling in the interests of the

Digitized by Google

manufacturers, can be found in every city, town, village and hamlet; on steamer and tram, and like the stars, everywhere and radiant, reflecting credit upon their houses and in a general way exerting a most salutary influence upon the community at large through their liberality, kindness and sensibility.

We trust their paths may be strewn with flowers, and that with the commercial changes which are rapidly developing, a new and more profitable field of labor will call their services into requisition.

It is clearly evident that the large monopolies are building immense profits and that greed actuates them in working the jobber for all they can get from him.

The American Steel & Wire Co., by way of illustration, are not satisfied with the advances they have already made, the extra charge of 2½ cents per 100 lbs. on less than carload shipments, and the reduction of cost of production incident to dismissals, but send out a circular letter advising the jobbing trade that after July 1st, the 2 per cent. cash discount will be discontinued.

The amount of protection now given the jobber on their goods is so small that he handles them as a leader and at a loss, if he figures his cost of doing business; and as foreign buyers can secure much lower prices than we are compelled to suffer, we all have just grounds for dissatisfaction, and should extend a warm support to the first opposition established.

Trade has been unusually active the past week, and collections are improving. H. W. WEBB & SONS.

THE COLUMBUS TRADE.

Business is holding up remarkably well and seems to be as good now as it was in April and May. We cannot remember a year when there has not been a very perceptible dropping off in trade after May, but 1899 is an exception not only in continuance of good trade but in a great many other things. Wheat harvest is here now and we are glad to report that the crop is going to be very much better than was expected, and in some localities the crop was never better. The same is going to be true with the hay crop. Timely rains have made a wonderful change. Farmers will have more than average crop all around. Prices have been more steady for the past two weeks but do not show any weakening, while a number of articles have made slight advances, among which we may mention hammers, hatchets, sledges, wrought goods, glass, padlocks, etc. Prices are more or less irregular owing to the fact that jobbers are not keeping up with the manufacturers in advances; but as soon as they have to replenish their stocks they will be obliged to get the full market price for goods. Jobbers and retailers are a clever lot of fellows and are liberal with their customers. Manufacturers have been liberal but they are getting pretty stiff in the neck these days. Want their money in thirty days and no discount. It looks very much as though business was settling down to a cash basis and it would be the salvation of us all if it could be adopted. But it is not right for manufacturers to adopt such an arbitrary rule and allow no cash discount. Thirty days net in place of sixty days two per cent. off in ten days is quite a difference. Jobbers and retailers are lucky if they get their money in sixty days.

SMITH BROS. HARDWARE CO.

THE CLEVELAND TRADE.

For the first time in many years, the iron and steel manufacturers will run their works through the year without the usual shut-down. The oldest inhabitant has never seen such a condition in the trade. Everybody was opposed to a boom; most business men have steadily believed that it would be a bad thing, but have been compelled to increase purchases to supply their trade, and the aggregate has been so large, that consumption has overtaken the supply.

Who started the boom, is the conundrum. To one who has been a part of it, it seems to have started from the bottom and not the top. There seems to have been a vacuum to be filled. Long depression made limited stocks and prosperity suddenly created a demand which startled the merchant, and he in attempting to supply it increased his orders until the manufacturer's stock was depleted and he began to find himself short of material.

Both manufacturers and jobbers hesitated about advancing prices, as they had contracts for goods and material for future shipment, and neither of them expected a radical advance. Demand increased compelling advances, more to decrease demand than to increase profits, but the demand continued until the boom was on; speculation had very little to do with it.

The Glidden Varnish Co., Cleveland, Ohio, U. S. A.

The farmer seems to have produced the boom, and so long as consumers are prosperous and continue to buy freely, it will continue. It will require genius to devise legislation in such case, as the ones to be restrained are the ones who do the voting. It will be dangerous to provide for their punishment in party platforms; there are some things difficult for the legislature to handle, but it may be important to find who the criminals are. If combinations are the criminals, it is a combination of consumers, which Bryanism might have prevented if it had succeeded.

The state of things has so depleted the crowd of idlers that nobody but demagogues are out of a job.

Taxation based on nominal capital, reports verified by public officials; repeal of duties on goods where monopolies are attempted, would seem to be a reasonable remedy.

Legislation against corporation that includes them all as trusts is likely to severely injure the business of the country, unless it can be directed by wise business knowledge. The classes that seek to have their securities entered and listed on the stock exchanges to be sold to the public should be restricted by wise legislation as banks and insurance companies are. It would not be arbitrary to compel them to publish statements and have them verified by a public official.

It should be made criminal for the officers to misrepresent facts or misuse the funds. This is due to the public that they ask to invest in their securities, The State should have the right to protect citizens from being defrauded. This would relieve honorable corporations from suspicion and make it comparatively safe for people to invest in these securities, and it would in no way injure the business. In the purchase of so many plants the large amount of money released can find profitable investment in industrial stocks, which would only be a change of owners.

It is clearly the duty of the State to place such neccessary restrictions around such investments as it can without detriment to the business. This is sure to be attempted and it is important that it be wisely done. Consolidation is a process in evolution, and experience alone can determine what legislation is necessary to restrict its dangers.

Corporations will promote their own interests by a moderate exercise of their powers in any direction open to public criticism, until experience shall allay the apprehensions of fear that are now manifest. The condition of business forbids the time to write long letters and seriously threatens a vacation. The approach of July does not relieve the strain; it is a nerve-straining and brain-wearing year. THE LOCKWOOD-TAYLOR HARDWARE CO.

THE CHICAGO TRADE.

We have to report an exceedingly busy time filling orders all through June. In fact, it promises to be the best June we have ever had. The advances made the first ten days of the month have been well received and goods are going off fine. It looks as though the demand for wire cloth, poultry netting, screen doors and window screens was going to continue for the next six weeks. We have been extremely fortunate in being able to secure a good stock of all the above-mentioned goods. We have taken first-class care of our regular trade right through the season and have a fairly good stock, especially of wire cloth at the present time, for which many of our competitors are thankful, as we have been helping out a good many jobbers not so well favored as ourselves.

We learn that within the last few days another advance has taken place in pig iron, billets, wire rods and other similar lines—hence we should not be surprised if our friends in the trusts would advance nails, wire, sheet steel and kindred lines. Would it not be as well to let people catch their breath and become a little more accustomed to high figures before advancing much further at the present time?

It is of course true that many goods in the Hardware line are still low in price compared with the figures in 1892, and some considerable many items have *not advanced at all*—so that for the last mentioned better figures would be in order. But the so-called staple articles seem to the writer to be advancing with rather rapid strides. The manufacturers, however, seem to have matters pretty well in hand and, as a matter of fact, can place prices on a much higher level and make the jobbers pay whatever they ask—but in the interest of the retailer and consumer, we would like to see fair play. WELLS & NELLEGAR CO.

THE PORTLAND TRADE.

Business still continues good and there is every reason why it should. Prices are certainly as low in all lines of Hardware as we shall probably see them for a number of months, and the trade seems to realize it.

The drought bids fair to seriously affect business in New England. Unless we should be favored with some rain very soon business must suffer. As it is, we think it will have a tendency to increase the sale on haying tools, as more hand tools will be used, because the farmers will mow every place no matter how small, that has any grass on it.

Prices are well maintained and collections are fair.

EMERY-WATERHOUSE CO.

How Corn Cobs Are Utilized.

Corn cobs are made into pipes, or, dried and soaked in kerosene, they form excellent fire-coaxers. Corn pith is used as a lining for warships, and is packed in narrow slits abutting the steel packing. When a shell perforates a ship's side it tears a hole through the corn-pith packing. The inrush of water saturates the pith, which enlarges enormously. It swells and quickly covers the breach, damming the flow, and perhaps saving the ship to the nation. This is an American idea, tested and approved by Chief Constructor Hichborn, of the Navy Department.—*Exchange.*

The first practical test of a fire engine mounted on rubber tires was made at New York the other day, in response to an alarm. It was a five-ton engine, and was drawn noiselessly to the fire at a gallop, running in and out of the street car tracks in a way which often means an upset, and which appeared to be very much easier for the horses.—*Exchange.*

Stanley's Improved Plumbs and Levels.

All our Levels have the "HAND-Y" feature, rightly so called.
And only PROVED GLASSES are used.

In climbing ladders, walking on stagings or on the frame of a building, this form of the Level gives a feeling of steadiness.

Proved Level Glasses.

Made of extra thick tubing. Each Level Glass is marked at its highest, or crowning point, by two indelible lines; and each Plumb Glass with a single line.

Antiquity of the Saw.

Saws were used by the ancient Egyptian. One that was discovered, with several other carpenters' tools in a private tomb at Thebes, is now preserved in the British Museum. The blade, which appears to be of iron, is ten and a half inches long, and an inch and a quarter broad at the widest part. The teeth are irregular, and appear to have been formed by striking a blunt-edged instrument against the edge of the plate, the bur, a rough shoulder, thus produced, not being removed.

A painting, copied in Rosellini's work on Egyptian antiquities, represents a man using a similar saw, the piece of wood he is cutting being held between two upright posts. In other representations the timber is bound with ropes to a single post, and in one, copied by Rosellini, the workman is engaged in tightening the rope, having left the saw sticking in the cut.

In an engraving given in the third volume of "Wilkinson's Manners and Customs of the Ancient Egyptians," a saw is represented of much larger dimensions, its length being, by comparison with the man, not less than three or four feet. It does not appear that the Egyptians used saws worked by two men.

The invention of saws was variously attributed by the Greeks to two or three individuals, who are supposed to have taken the idea from the jawbone of a snake or the backbone of a fish. There is a very curious picture among the remains discovered in the ruins of Herculaneum, representing the interior of a carpenter's workshop, with two genii cutting a piece of wood with a frame saw, and on an altar preserved in the Capitoline Museum at Rome there is a perfect representation of a bow-saw, exactly resembling in the form and frame and the twisted cord for tightening it, those used by modern carpenters. From these remains it is evident that these forms of instruments were known to the ancients.

"Watch the Red Bundles."

Over at the little town of Robinson, Ill., is a merchant named Murphy who owes his success to a roll of red wrapping paper. Murphy has the biggest store in the town now and ought to be rich in a few years. About four years ago he received his customary shipment of wrapping paper, and on opening it up, found it to contain, among the usual rolls of manila, one big roll of bright red paper which he had not ordered. It had gotten into his shipment by mistake. His first impulse was to return it, but on second thought it occurred to him that it could be used, even if it was off color. Then he thought about it some more, and concluded to turn it to good account. As in all farming communities, Saturday is the great trading day at Robinson. So Murphy advertised a special sale for the next Saturday, and stated in the advertisement that all purchases would be wrapped in red paper. "Watch the Red Bundles!" was the bold catch-line of his advertisement. People did watch the red bundles. They were so conspicuous that it looked as though everybody had been to Murphy's. The farmer coming into town would see so many red wrapped packages being carried around that he was instantly reminded of Murphy's advertisement and would make a bee-line for the same store himself. The result was the biggest Saturday in the history of Murphy's business. That afternoon he telegraphed to Chicago for a big shipment of red wrapping paper. I presume that it cost him a trifle more than the plain manila, but it has built up a big business for him. Everything you buy at Murphy's is done up in brilliant red, and in every advertisement he prints appears the impressive line: "Watch the Red Bundles!"—*Advertiser.*

Hope is a beacon that illuminates the desirable things of this world. When its light is extinguished life becomes a dismal blank.—*Exchange.*

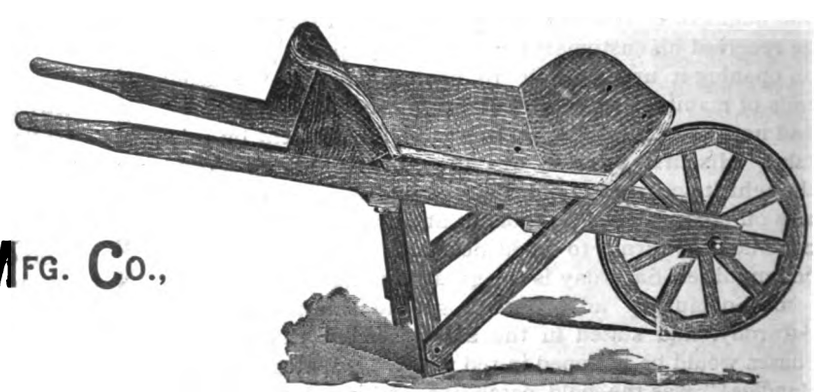
About Horse Bits.



We may take it for granted that in prehistoric times "the connecting link" was hacked about with a raw-hide bridle in place of the now popular solo bit, says the writer of an illustrated article in *Bailey's Magazine*. But there were evidently disadvantages in riding with a rudimentary halter, because our forefathers subsequently adopted wooden and horn snaffles, and later on added sides or "cheeks" to them. There was no further improvement for many centuries, until the iron period, when the snaffle obtained a higher degree of perfection. So far as we can gather from historians, the ancient Romans were the first to introduce the principle of the "lever" or curb; it is humiliating to find that we have made hardly any advance in effective snaffles during the last thousand years. Dates are dangerous things to quote in connection with this interesting subject, for the evidence of the recognized authorities is conflicting. In order, therefore, to be on the safe side, let us state that horses were bitted in Egypt certainly 1500 to 2000 years before Christ, and probably much earlier. A very curious wooden mouthpiece, shaped like a badly-drawn horse, and believed to have been made about 1000 B. C., was found in Germany not long ago. Then, again, in the horn and bronze period—according to old records—a primitive half-twist-barmouth-turn-cheek-pelham came into vogue; of course, the original maker did not call it by that name, but it was one all the same. Virgil mentions a Roman bit, which was termed in his time *lupatus*, on account of its jagged structure. Berenger, in his "History and Art of Horsemanship" (1776), gives the figure of a bit which was found in a large barrow called Silbury Hill, which stands near the road from Bath to London. The mouthpiece is not unlike that of a modern snaffle; the cheek pieces are peculiar, and would not serve to carry a curb chain. This bit is supposed to be either Roman or early British. All bits, practically speaking, come under the heading of either curbs or snaffles, excepting those which partake of the character of both. In the fourteenth century the long lever bits had formidable spikes attached to them, so that a rider's enemy might not attempt to arrest his progress by catching hold of the charger's mouthpiece. The sixteenth century was responsible for chain snaffles, which restrained hard pullers; and in a curious little black-letter volume published in 1566 we find numerous plates showing curb bits more or less severe, and more or less ornamental. These resembled the handsome cavalry bits of the present day.

A new alloy has been discovered which is said to be a wonderful substitute for gold. It consists of 94 parts of copper to 6 parts of antimony. The copper is melted and the antimony added, together with a little magnesium and carbonate of lime to increase the density. The product can be drawn, wrought and soldered like the precious metal, to which it bears a striking resemblance when polished. The cost of manufacture is about 24 cents a pound.—*Ex.*

Instead of the current type metal consisting of lead, antimony, and tin of a specific gravity of about 11, a new alloy containing a large quantity of aluminum and possessing a specific gravity of 2.56-2.67 is said to have been invented in Germany. Besides being non-poisonous, other advantages, such as the quality of taking and giving off the ink more readily, etc., are claimed for this alloy.—*Exchange.*

"SCIOTO" for R. R. or Canal Work.

IMPORTANT NOTICE.

TIN, 25¾c. ANTIMONY, 10c. COPPER, 18½c.

The high level of prices for Tin, Copper and Antimony and other Metals continues, and in the meantime **TRUSTS** are being formed and **COMBINATIONS** made to keep up the prices. This will, of course, seriously affect the cost of babbitt metals for some time to come.

WE DO NOT BELONG TO ANY TRUST OR COMBINATION and are therefore free to give users of babbitt every possible advantage in price.

We are prepared to make you prices on High Grade Babbitt and on cheap metals as well, which will save you considerable money, especially if you are large users and are willing to contract for your requirements. We will save you money and also guarantee to you quality of the metals.

We ask that we may be permitted to prove what we can do.

We quote to-day on the following grades of metal, f. o. b. New York or Chicago:

No. 1,	6 cents	per lb.
No. 2,	5⅞ "	"
No. 3,	4¾ "	"
No. 4A,	4½ "	"
No. 4,	4 "	"

and **ON COMBINATION ORDERS WILL MAKE REDUCTIONS** from these figures.

Prices subject to change without notice.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Bakersfield, Cal.—The Bakersfield Hardware. Co. has been incorporated by B. A. Hayden, R. J. White, L. C. White, J. N. Crosland, and F. S. Benson. Capital stock, $40,000.

Columbia, S. C.—A commission has been issued to Thos. B. Gibson and Edward H. Everett, of McCall, as incorporators of the Marlboro Hardware Co. The capital stock is to be $3000, divided into shares of $100 each.

Elk Rapids, Mich.—Meyers & Flanelly.

Fairfield, Wash.—The Lay Hardware Co. has filed articles of incorporation with the secretary of State. The officers of the company are: C. G. Lay, president; J. F. Cobb, vice-president; J. C. Lodge, secretary; T.D. Hench, treasurer. The main office of the company will be at Fairfield, with stores at Fairfield and Waverly.

Gouverneur, N. Y.—A. B. Cutting & Co.

Rockaway, N. J.—The Rockaway Hardware & Stove Co. has been incorporated. Will deal in all kinds of Hardware. Capital, $10,000· Incorporators: Morford B. Strait, Pearce Rogers, David C. Berry, all of Rockaway, N. J.

Changes and Improvements.

Ann Arbor, Mich.—James Harkins, Hardware dealer, has sold business to John Fischer.

Avoca, Penn.—T. J. Dunn has purchased the Hardware stock of Lewis Baltimore, of Duryea. He will conduct business there and in Avoca.

Bay City, Mich.—The McDonell Hardware Co. have purchased the Hardware stock of D. B. Martin & Co., in the McCormick block on Water Street.

Big Timber, Mont.—Busha & Bailey, Hardware merchants, are building a large stone addition to their store.

Bristol, Tenn.—Mitchell, Powers & Co. are erecting a large brick building on Main Street, which they will occupy with a wholesale Hardware business.

Chicago, Ill.—Dan Young has moved his Hardware stock from No. 921 West Madison Street to the new one-story building at No. 929 West Madison Street. He has made many improvements in his stock.

Constantine, Mich.—Will Roberts and Floyd Nesbitt, who recently engaged in the Hardware business at this place, have dissolved partnership and the business hereafter will be conducted by Mr. Nesbitt.

Crescent City, Ill.—W. B. Davis, Hardware, has sold his business to W. W. Parkman, of Philo. They will conduct business under the style of Parkman Bros., handling lumber, coal and Hardware.

Denver, Col.—In order to keep up with the great increase in their business during the past year, the George Tritch Hardware Co. have been forced to purchase a new warehouse. The property secured was the carriage warehouse of the Wall & Pursel company, and immediately in the rear of the present warehouse of the Tritch Co. The price paid for the building is $26,000.

Houston, Tex.—John Catron, Hardware, will remove to Rosenberg.

Jacksonville, Fla.—The Renecke Hardware Co. bankrupt stock has been purchased by J. M. Hodges, who will embark in the Hardware business.

Johnson, Neb. — Herman Holtgrewe, Hardware and implements, succeeded by Sone, Galt & Koster.

Lowell, Mass.—W. T. S. Bartlett, the uptown Hardware dealer, has just enlarged his store, having secured about 1500 square feet floor space in rear of present store to accommodate his fast increasing trade in iron, steel and shafting, vises, anvils, horse shoes and heavy Hardware of every description, and proposes to keep a complete stock of these goods in addition to his regular stocks of general Hardware and painters' materials.

Ludington, Mich.—The B. J. Goodsell Hardware Co., D. E. Cartier has purchased a one-third interest in the business.

Ludington, Mich.—Frank Bradl, Hardware, Nels C. Madesen has purchased a half interest in the business, and it will be hereafter conducted under the firm name of Bradl & Madesen.

Luverne, Minn.—D. McKeeth has sold his Hardware stock to J. N. Barkee, of Marshall, Minn.

Neche, N. Dak.—W. J. Briden, Hardware dealer, is building a warehouse.

North Java, N. Y.—The Hardware firm of Mason & Crahan have dissolved partnership after having been in business twenty years. Mr. Mason will continue the business.

Owego, N. Y.—F. M. Baker & Son's Hardware establishment is being remodeled and a handsome plate glass front is the result.

Prescott, Ark.—The Prescott Hardware Co. will erect a business block.

Pueblo, Colo.—The partnership heretofore existing between John M. Killin and Louis G. Kleespies, doing a general Hardware business in this city under the firm name of John M. Killin & Co., has been dissolved by mutual consent. Mr. Kleespies retires from the firm, his interest having been purchased by Mr. Killin, who will continue business at the same stand, No. 206 South Union Avenue and under the firm name of John M. Killin & Co.

Racine, Wis.—John Dixon has sold his interest in the Dixon-White Hardware Co. on Sixth Street and purchased the Hardware stock of John O. Jones, corner of Main and Third Streets, and the firm of J. Dixon & Co. will conduct the business at this place.

San Antonio, Tex.—The corporate name of the Heusinger-Basse Hardware Co. has been changed to the Heusinger Hardware Co., by authority of the State department at Austin.

Sheldon, Vt.—Dixon & Mower, Hardware, succeeded by Maynard & Mansfield.

Shenandoah, Pa.—The local firm of G.W. Beddall & Bro. has been enlarged by John Taggart, of this town, and Joseph Beddall, of William Penn, purchasing a one-quarter interest each, and hereafter the firm will be known as the Beddall-Taggart Hardware Co. There are no withdrawals from the business and the change is intended to greatly enlarge the firm's interests.

Standish, Mich.—The Saginaw Hardware Co. have sold their store here to a gentleman from Gladwin.

St. Joseph, Mo.—The Wyeth Hardware & Mfg. Co. have completed all arrangements for the erection of a four-storied brick building on property owned by them on Third Street. The new building will be 40 feet wide by 180 feet in length and will be used as a warehouse.

Valdosta, Ga. — W. H. Briggs & Son, Hardware, dissolved; succeeded by W. H. Briggs' Son.

Warsaw, N. Y.—Morris & Co., Hardware, succeeded by Ballentine Hardware Co.

Watertown, N. Y. — James O'Shea has bought the Hardware stores of Bancroft and Donaldson & Co., which will be run in the Donaldson block.

Give You Your Money's Worth.

Coldwell Lawn Mower Co., Newburgh, N. Y. [*Lawn Mowers*]: We think HARDWARE is enterprising, pushing, up-to-date, so to speak, and has a certain amount of get-up-and-get spirit about it, combined with a certain flavor of "I give you your money's worth when you advertise with us," that we like it—not for fun or sentiment, but for real business, and so long as you continue thusly you can count on our continuance.

Digitized by Google

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, over the country are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Blue Island, Ill.—The Export Implement Mfg. Co. has been incorporated; capital stock, $5000. Incorporators: R. B. MacPhall, Andrew L. Reiner, and L. L. Morrison.

Bridgeport, Conn.—Articles of incorporation of the Bradley & Author Mfg. Co. have been filed in the Town Clerk's office. The company is organized for the manufacture of light Hardware and metal novelties. The capital stock is $25,000. The principal stock holders are William H. Bradley and George F. Author. All of the capital is paid in in cash. The factory will be located in this city.

Carthage, Mo.—The Massachusetts Lead & Zinc Co. of West Virginia, have filed evidence of incorporation. Capital stock, $300,000. Capital to be employed in the State of Missouri, $50,000, with headquarters and office in the city of Carthage, Jasper County.

Chattanooga, Tenn.—The newly organized Glenwood Land Co. will build a large scale factory on their property in East Chattanooga. All manner of weighing scales will be manufactured, it is said, and employment will be given to a large number of white skilled laborers.

Coatesville, Pa.—The new plant of the Lukens Iron & Steel Co., which is now in course of construction, will, when completed, be one of the finest of its kind west of the Alleghenies. The industry will cover a large space and is located just west of the Brandywine and nearly opposite the present works. A member of the firm stated that the structural work is now going up, and that by the first of September the firm will be ready to resume operations, giving employment to at least 300 people. The present mill employs 500 men. The steel mill proper will be 110x290 feet. It will have four open hearth steel furnaces, and will be operated by the Basic method. Each furnace will have a capacity of forty tons each. The Universal mill will be 130x400 feet. The design is entirely new. With the exception of the large engine to be used, all handling and power of operating will be electrical. This will include the operation of the large traveling crane covering the various departments, mill tables, shears, etc. The entire plant will embrace every known device that can be used to advantage.

Denver, Colo.—The Denver Sheet Metal works have filed articles of incorporation with a capital stock of $25,000. The incorporators are Frederick Stapp, August Spetnagel and J. Grattan O'Bryan. They will operate in Denver.

Gowanda, N. Y.—Another addition to Gowanda's long list of manufactories will be made within a few days, when W. R. Smallwood, the jeweler and owner of the local telephone system, begins the manufacture of corrugated nail fasteners. He has purchased the patent and manufacturing rights of the fasteners, which have heretofore been controlled by Pratt & Letchworth of Buffalo. Mr. Smallwood will occupy the old axe factory for the purpose and will use water power.

Hustburg, Tenn.—There is being a large axhandle and spoke factory erected at Trotter's Landing, three miles west of Hustburg, by T. J. Trogmorton and G. G. Jarrell.

Jersey City, N. J.—The Ideal Lock Co. has been incorporated by George H. Pings, Herman L. Pings, and Carl L. Thiele; to manufacture locks. Capital stock, $100,000.

Jersey City, N. J.—The Jarvis F. Underhill Co. has been incorporated. Principal office. No. 49 Hudson Street. Manufacture machinery, implements, tools, etc. Capital, $20,000. Incorporators: Jarvis F. Underhill, Henry A. Gartin, John Collins, Jersey City.

Moravia, N. Y.—The Moravia Mfg. Co. has been incorporated to manufacture wood and iron machinery and agricultural implements. Capital, $10,000. Directors: Fred. C. Reynolds, Frank B. Ryan, Charles H. Springer, Jeremiah D. Mooning, and John Andrews, Moravia.

Providence, R. I.—Articles of incorporation of the Eagle Mfg. Co. have been filed at the office of the Secretary of State. According to the articles the company is formed for the purpose of engaging in the business of manufacturing and selling machinery, tools, iron and other materials and all kinds of manufactured products. The incorporators are: Isaac H. Sisson, George S. Boutwell and Isaac L. Goff. The corporation is located in this city and the amount of capital stock is $100,000.

San Francisco, Cal. — The Atlas Pipe Wrench Co. has been incorporated by R. O'Connor, J. N. O'Brien, T. J. Watson, H. L. Keenan, and T. E. Ryan; to manufacture all kinds of wrenches, machinery and Hardware. Capital stock, $50,000.

Terre Haute, Ind.—Articles of incorporation of the Surbaugh Drill & Tool Co. have been filed for record. The company is capitalized at $5000, and intends to manufacture and sell mining machinery, tools and supplies. James H. McClelland, J. Smith Talley, John S. Surbaugh, Hugh Shirkie and H. P. Townley are directors of the company.

Changes and Improvements.

Chattanooga, Tenn. — The Southern Queen Mfg. Co. has reorganized, and taken the name of the Chattanooga Implement & Manufacturing Co. It will increase its capital stock of $25,000 and make improvements to its implement works, adding new machinery.

Chicago, Ill.—The Home Stove Works will erect a new foundry building, 70x150 feet.

Chicago, Ill.—The Hall Safe & Lock Co. have certified to an increase from $5000 to $50,000.

St. Louis, Mo.—The Columbia Lead Co. have filed notice of increase of their capital stock from $150,000 to $500,000, half paid.

Thompsonville, Mich.—Delaney & Hyatt will rebuild their mill and handle factory and enlarge their output.

Waynesboro, Pa.—The Landis Tool Co. will erect an addition, 120 feet long, to their factory.

Recent Fires.

Bridgeport, Conn.—The foundry of Burns, Silver & Co. manufacturers of furniture Hardware, has been destroyed by fire, causing a loss of $6000. Hot metal that lodged on the roof of the building is believed to have caused the fire.

Camden, N. Y.—A few evening since fire was discovered in the Meeker rake factory on the Wolcott hill road. An alarm was sounded and the fire department responded, although it was soon apparent that they could do nothing to extinguish the flames, as the nearest hydrant was at a great distance from the fire. The blaze which was first discovered in the dry kiln, spread rapidly through the building, which was built of wood and stocked with a large quantity of small timber used in the manufacture of rakes. The entire property was soon reduced to ruins. The building was but partially insured.

Cleveland, O.—Fire broke out in the Vulcanus Forging Co.'s plant, on Hamilton Street, near Wason, a few days ago, shortly after the men had quit work. The burned building was a one and a half story frame. It contained valuable machinery. The company started in business about two months ago and the machinery was new. The loss is about $15,000, partially covered by insurance. The cause of the fire is unknown.

Cleveland, O.—The building and contents of the Barker & Chard Machine Tool Co., at the northeast corner of Pioneer and Culvert Streets, has been swept away by fire. The loss on the building, which is now but a mere shell of charred timbers and twisted, blistered, corrugated sheet iron, is estimated at $5000. The company's loss will reach $15,000. All of this is covered by insurance, distributed among the various agencies in the city.

Lebanon, Pa.—Fire broke out in the sixteen inch mill of the Pennsylvania Belt & Nut Co., and for a moment the destruction of the mill was threatened. A hasty alarm was sent to the city fire department. Meantime the fire brigade, composed of employees of the mill, set to work and by their determined efforts succeeded, after a hard and quick fight, in subduing the fire before the city department responded. The loss is slight.

Manchester, Va.—Fire has practically destroyed the building in which were located the foundry, machine, and carpenter shops of the Watt Plow Co. The loss to the company will be about $5000. George Watt owned the building, which is damaged to the extent of $4000 or $5000. Both losses are covered by insurance.

Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of

EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

ROOFING SLATE.

GENERAL RULE FOR THE COMPUTATION OF SLATE.

From the length of the slate take three inches, or as many as the third covers the first; divide the remainder by 2, and multiply the quotient by the width of the slate, and the product will be the number of square inches in a single slate. Divide the number of square inches thus procured by 144, the number of square inches in a square foot, and the quotient will be the number of feet and inches required. A square of slate is what will cover 100 feet square, when properly laid upon the roof.

TABLE OF SIZES AND NUMBER OF SLATES IN ONE SQUARE.

Size in Inches.	No. of Slate in a Square.	Size in Inches.	No. of Slate in a Square.	Size in Inches	No. of Slate in a Square.	Size in Inches.	No. of Slate in a Square.
6x12	533	9x14	291	10x18	192	11x22	137
7x12	457	10x14	261	11x18	174	12x22	126
8x12	400	12x14	218	12x18	160	14x22	108
9x12	355	8x16	277	14x18	137	12x24	114
10x12	320	9x16	246	10x20	169	14x24	98
12x12	2'6	10x16	221	11x20	154	16x24	86
7x14	374	12x16	185	12x20	141	14x26	89
8x14	3 7	9x18	213	14x20	121	16x26	78

The weight of a square of Slate is estimated in a general way (varying according to the thickness of the different makes) at from 600 to 700 lbs. per square.

A *square* of Slate is 100 superficial feet.

Gauge is distance between the courses of the slates.

Lap is distance which each slate overlaps the slate lengthwise next but one below it, and it varies from 2 to 4 inches. The standard is assumed to be 3 inches.

Margin is width of course exposed or distance between tails of slate.

Pitch of a slate roof should not be less than 1 in height to 4 in breadth.

Length of a slate is taken from nail-hole to tail.
Thickness of slates ranges from ⅛ to 1/16 inch.

WEIGHT PER SQUARE FOOT.

Thickness.....	⅛	3/16	¼	⅜	½	⅝	¾	1
Weight.....	1.81	2.71	3.62	5.43	7.25	9.06	10.87	14.5 lbs.

Weight per cubic foot, 174 pounds.

It requires, on account of laps, an average of nearly 2½ *square feet* of slate to make one of slating.

Hopkins' "Handy Notes and Queries."

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished th dealer upon request, by the manufacturer quoted.

APPLE PARERS.

SINCE 1864 the making of apple parers has been an important feature of our business, and, as we are constantly looking for improvements, and making use of them too, our present line, which consists of nine different machines, although not all new, may be said to be the culmination of thirty-five years of practical experience.

The illustration here given represents the WHITE MOUNTAIN PARER, COREER and SLICER. It has been imitated (not once or twice), but never equalled, and is to-day the most durable, substantial and satisfactory low priced Parer, Corer and Slicer for family use; and, we may also say, the one most widely known and used.

We have made it a point to supply every need in the line of apple parers for homes, hotels, restaurants, bakeries and evaporating factories.

Our new machine, THE TURN TABLE "'98" (it pares and knocks off the apple) is meeting with wonderful favor. We verily believe it has more good points to the square inch than any other parer we ever saw. If you haven't seen it, you should. Most jobbers are selling our parers. Catalogue free. . . . .

NEW YORK OFFICE, 10 WARREN STREET.

GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

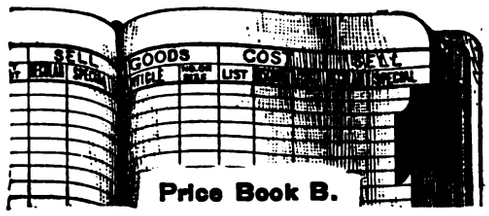
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

A



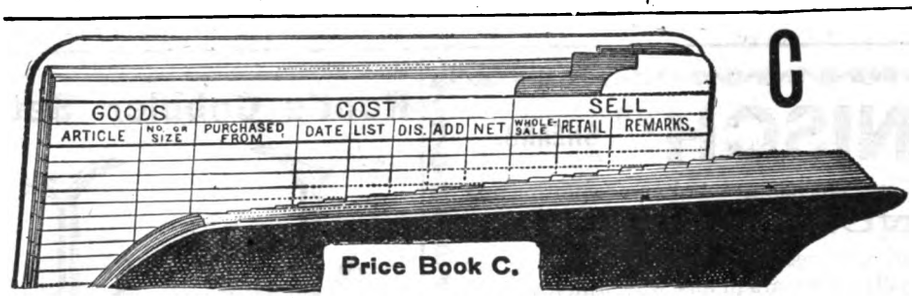
Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

A, 200 pages,	$1.00	**A 2**, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2**, 400 pages with flap,	1.75

B



Price Book B.

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

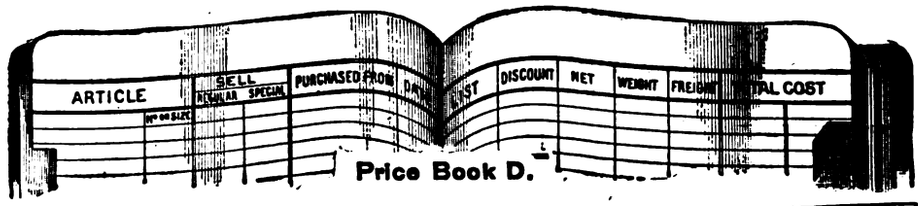
B, 200 pages,	$1.00	**B 2**, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2**, 400 pages with flap,	1.75

C

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¼ inches.***

FOUR EDITIONS:



C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

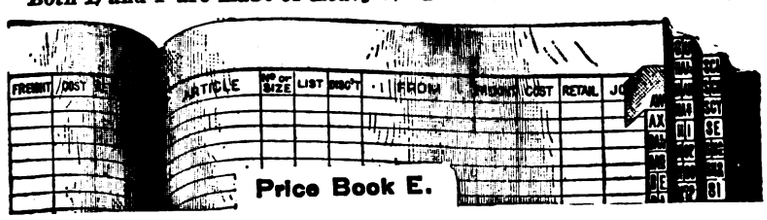
Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50

D

Price Book D.



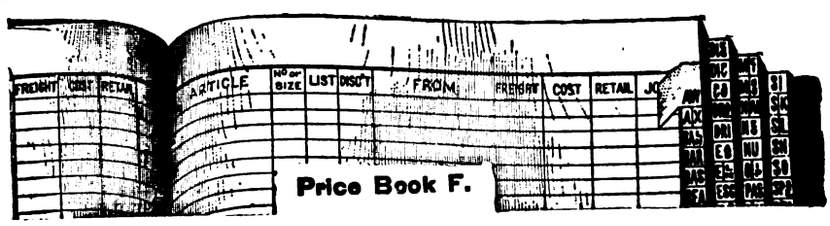
MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to AU	For Chisels,	turn to CHI	For Iron,	turn to IRO
" Parers, Apple	" PAP	" Cutlery,	" CUT	" Irons,	" IR'S

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

E



Price Book E.

AD GU SCI
AN HAM SCR
AU HAN SCY
AW HAT SE
AX HI SHE

Fac Simile of Indexing.

Price Book E—350 pages, 7 x 10 inches, canvas tab indexing. Price, $5.00.

F

Price Book F.

AD DIE MF SI
AN DIP MO SK
AU DO NAI SL
AW DRA NE SN
AX DRI NU SO

Fac Simile of Indexing.

556 pages, 8¼ x 11 inches, black leather tab indexing with gilt lettering. Price, $7.50.

Note.—In Price Books B and F there is an Index Character to EVERY PAGE.

Send for Free Sample, List and Prices.

Can You Afford- to carry in stock unknown brands of stove polish that your customers know nothing about, brands they do not call for, the quality of which is inferior, gives them dissatisfaction, and the consequent sale of which brings discredit to your store? Your best judgment answers NO! Then sell ENAMELINE, the Modern Stove Polish. Paste, Cake or Liquid. If you are doing business for a profit it will pay you to handle our whole line.

WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for hard wood. The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in hard wood We have combined two principles in one, and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.

CHAMPION MODEL.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. **List, per doz., Enameled, $30.00; Full Nickel, $42.00.**

No. 4, Nickel-Plated	$5.00

For household and general use.

FOOT POWER MACHINE.

No. 1. $15 00 each

For Packers, Tanners, Butchers, Farmers, Hotels and Restaurants.

Liberal Discount to the Trade.

Most perfect knife sharpener made.

Easily operated and quick work.

The degree of perfection attained by the use of this machine is far superior to that accomplished by the ordinary method of hand work.

These machines are practical, based on correct mechanical principles and have reached their present state of perfection after many years of experimenting.

They are simple in their construction, very durable and sharpen with great rapidity.

Knives keep their proper shape and last much longer when sharpened with the "Universal" machine. Silver-plated knives can be sharpened without damaging the blade.

Every dealer and evety family should have one of these machines.

We guarantee the "Universal" machine to be as we represent it, "practical, convenient and perfect."

HARDWARE

"The open door." Stewart's, about 11 A. M.

"The Eastern question." "What are you going to have?"

The burning question. Are all the "imported" cigars the real thing?

A Summer revival. The old "Homestead" has made another strike.

The return of a Drey-fus. When the excise law is rigidly enforced.

What are Dewey's terms. "F. o. b. New York, four months" from starting.

No "taffy" please. The up-to-date Samoan says: "Settle the dispute by talking as sweet to me as you like, but don't give Ma-taafa."

It is said that Alger is the only Secretary of War who, during his term of service could "make both ends meat," and deliver it canned.

Joe Limeburner thinks the present Nicaragua Canal Committee ought to "do the subject up brown," because Senator Frye is a member.

The National motto now decorating our coins runs a great risk of being changed to this new combination. "In God and trusts we put our trust."

The reason why Teddy Roosevelt will not get the nomination in either 1900 or 1904, is because, judging from his San Juan experience, he couldn't be persuaded to "run."

The reason why Alger sought Pingree's assistance in his Senatorial aspirations was because he firmly believed that Gubernatorial cobbler could be relied upon "to stick to his last" selection.

Robert E. Shanahan, Secretary of the Bissell Carpet Sweeper Co. is enjoying the pleasure of building a fine cottage on Ottawa Beach, where he has hopes of being able to spend the Summer with his family.

Mr. Maurice Shanahan, treasurer of the Bissell Carpet Sweeper Co. is spending all the time his business permits during the Summer months, on his fine fruit farm which is located in the suburbs of Grand Rapids. In this way he enjoys farm life to its utmost.

Charles T. Lee, who has been with the Wells & Nellegar Co., Chicago, as buyer, since 1886, has resigned that position to accept a place in another line of business. The many friends in the Hardware business made by Mr. Lee while with Brintnall, Lamb & Co., and Keith, Benham & Dezendorf, the predecessors of the Wells & Nellegar Co., will regret his departure from the ranks of Hardware. He will be succeeded by James H. Patterson who is a member of the company and a thoroughly practical Hardwareman.

The radical change in the terms of sale on wire nails made by the American Steel & Wire Co., by which sales are made "net cash 30 days," instead of "two per cent. discount in ten days," will doubtless result in nails being sold for "net cash on delivery," which was the rule among the Hardware jobbers in this city previous to 1860, on cut nails, then the staple article. This would no doubt be welcomed by the trade generally, and being justified by the action of the manufacturers would meet with no opposition from those most affected by the change.

Around to the Club the latest joke worked off was to ask one of the members if he had "seen that list of names in todays *Herald*, of people who under no circumstances would join the Hardware Club." The questioned member would invariably express a doubt of any such list being in existence, but is immediately silenced by the joker saying: "Knowing you would be interested in it I cut out the list and have it with me," following it up by handing the member for perusal the alphabetical list of names which daily heads the column of deaths in the paper referred to. Tableau.

There has been a misleading paragraph distributed by the Associated Press, conveying the idea that at the recent convention the Southern Hardware jobbers passed a resolution favoring trusts. As no such resolution was ever presented, nor any discussion had before the convention from which such resolution would have been a natural outcome, few statements by so widely a distributed influence could prove more erroneous or even mischievous. It is to be hoped under the circumstances that the papers which have been led into publishing this incorrect statement will do what they can to counteract the prejudicial effect.

One of our indefatigable "pick up" buyers, with a local reputation, needed, to make a bill complete, a package of cockeyes—used occasionally by harness makers. Believing the easiest place to obtain them was a well known saddlery Hardware house in Warren Street, away he sped with that conscientious energy which is the badge of all the "pick-up buying" tribe. On reaching the Mecca of his purchasing pilgrimage, the salesman who started to wait on him had the most unpromising pair of crossed eyes that were ever left untouched by an oculist; would you believe it, the pick up buyer never said a word about wanting "cockeyes," but simply asked the discount on ring traces.

An amusing anecdote was whispered as a good thing at the Hardware Club recently, by an old friend of the president, Mr. Sargent. The president has a fund of dry humor, on which he never fails to draw, when he needs an illustration to clinch an argument; and he tells his *bon mots* with an unctuous exaggeration which brings the laugh to every one, his own face being the only one able to hold its well-trained rigidity.

It was necessary, when the Chambers Street store was occupied by the company, to bring to a fitting use the skilled labor of a plumber; and with the best intentions in the world Mr. Sargent, taking a postal card, addressed the following to Kedian & Brother who kept a well-known lead pipe "joint" some where up town: "Mess. Kedian & Bro. Gentlemen. We need a plumber! God help us!" It told the whole story; brother Jim's funny bone was so tickled with it, emanating from such a distinguished source, he actually had the postal card framed.

HARDWARE

VOL. XIX. JULY 10, 1899. NO. 7.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
W. C. BRUNDAGE, - Business Manager.
HENRY HOPKINS, - - Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

As announced in our previous issue, commencing with the present number, the position of editor will be filled by Henry Hopkins, who has been one of the regular staff of *Hardware* from the earliest period of its usefulness as the organ of the Hardware trade, and since the death of its founder, in 1896, has also enjoyed the closer relationship of acting as its associate editor. His chief ambition in his higher position as sole editor, will be to make *Hardware* a trade journal of sufficient interest and importance, to the Hardware dealer, that each and every one of its semi-monthly issues will be read with pleasure from cover to cover, by every active Hardwareman in the industry whether manufacturer, jobber, wholesaler or retailer, and thus promote by their appreciation the high standard of excellence already achieved in its present field of usefulness.

Editorial Trade Review.

The reports from our friends in trade centres indicate that dullness will have no chance to reign supreme this season. In fact, there will be no dullness until the wheat and hay harvests are over. Vacations will necessarily be shorter than usual. Business having extended its fulness to so late a date will crowd the usual pleasurable pauses into a few days instead of weeks for both employers and employes.

In the various readjustments in the interest of labor in all the mills, mines and factories increased wages make an excellent showing, which will last for some time. It is increased pay and extended pay rolls that make prosperity permanent; for the workman whose Klondike is his capacity for labor in the use of horny hands is invariably a good distributer of the cash he earns, knowing that each and every dollar can be duplicated in the widening arena of honest employment.

A continued demand in many lines has kept purchases prevalent even up to the end of June. In builders' Hardware the demand continues excellent. In all the centers of increasing traffic stores are being well rented and a demand created for more. The old bugbear of department stores "hoo-dooing" general business is this season retired to the rear. Even in real estate transactions the changes show improved conditions gratifying to witness, which act as an incentive to improvements where present facilities are lacking.

Speculation in purchases ruled during the spring to a considerable extent, but the results have more than justified the ventures that then seemed problematical, judging by the past; the increasing demand in excess of anticipations having resulted in depleting the stocks as far as deliveries were made possible by cautious makers. Manufacturers took care not to overstock the dealers to the disadvantage of their own interests for fear of unsettling the market, and they frequently filled smaller orders at higher quotations for the purpose of averaging a more substantial state of profit than these earlier specifications seemed to promise.

A stronger feeling now pervades the anticipations of the buyer for fall and winter trade, and at present prices stocks will be held as nearly as possible on a conservative estimate of fulness, in order that inventories may show by comparison a larger percentage of profit by the way of outstanding accounts, instead of as usual in-standing stocks on floors and shelves. These facts alone will make spring orders assume an importance gratifying to witness all around. And it will greatly assist in keeping prices uniformly strong, no element of weakness being possible to become established under a constantly strong demand, and a progressively prosperous trend will be felt throughout all channels of trade, notwithstanding the Presidential election "hoodoo" which in the past with each recurring quadrennial disturbance created well grounded fears; it will be found that these no longer have the disturbing influence which was possible only when seasons were of a more clearly defined character and more limited in scope and influence.

The Law of the Profits.

There is one phase of business—more or less intimately connected with the Hardware trade in days gone by—that has passed away never again to return under the same auspices, and that is the "old fashioned" profit. It was the opinion of our forefathers in this our chosen vocation that, better is a business of $50,000 with profits galore, of a percentage that frequently hovered on the edge of highway robbery, than an increased volume of trade of five times as much, with a net profit merely doubled.

The old fashioned dealer who revelled in the old fashioned profits, did too much of the work himself, and knew the drawing quality of an opportunity to "gather ye rosebuds while you may," and that was when you were making a sale of an article *wanted*. Now, the price stimulates the said wants of the average man or woman, and with a little comparative wear and tear of gray matter the sales are more than quadrupled in amount and net profits increased in a welcome ratio. May be the department-store methods of some of our hustling competitors have had an influence in increasing sales for the purpose of gaining the advantages of being a large buyer instead of a small one, and of getting rid of an excess of stocks without the necessity of unloading them at cost to a nearby competitor, often done rather than unsettle current prices that were covered with the moss of ages.

At the present time it is the price that makes the sale, and it is the merit of the goods sold that keeps the customer. On such a basis as this our foreign trade as well holds its present preeminence and will penetrate every port in the world where a demand exists for goods

Digitized by Google

which our unequalled resources may be relied upon to supply.

On the Selling of Sewing Machines.

On another page in this issue of *Hardware* will be found an interesting and valuable paper on the possibilities of the sewing machine product being successfully marketed throughout this country under the auspices of the Hardware trade. This is a movement, now in its early stages of successful endeavor, which is worthy of a close consideration by an industry so well fitted for its profitable development; a plan of operations deserving of encouragement by the manufacturers, who are themselves called upon to be the arbiters in such a worthy effort to advance their own interests.

The close touch enjoyed by the Hardware trade as affecting the domestic economy of the household in almost every hamlet, town and large city on the continent, would seem to urge its selection for such an important object as the wider distribution of so valuable an adjunct to the peace and harmony of every domestic equipment in the land.

We hope to follow up the present article on the subject, with others of equal interest, from those who can speak as experts on such a valuable addition to a modern stock of Hardware; from merchants whose success in that line, will doubtless induce others to make an attempt that will redound to the credit of the sagacity, wisdom and profit of those to whom the innovation can present no serious objection.

The Ad-Smith's Happy Thought.

One of the journalistic fraternity who loves to be called an "ad-smith," and who has constantly on his pen's point, on the edge of his acute faculties, or on the spur of his ambitious thoughts, the fitting expression of what is in him; and the which responds to the magnetism of his impulse, let it call for it when it may. This gentleman was asked, off hand, recently, to name a new cracker, giving it a "trade mark" comparable in genuine originality and catchiness, to the late phenomenal money-maker "Uneeda." Like an inspiration his mind conceived the combination word which he felt would fill the want expressed.

"How much is it worth?" asked he, "if I give you a name that will be recognized in every community where the English language is spoken, and acknowledged as well as a fitting word for the purpose intended, and once heard would never be forgotten, but would linger in the memory, and suggest crackers, and crackers only?"

The enthusiastic cracker baker mentioned $500 as being a fair honorarium for the inventor of a trade mark of such marked ability. Put it in writing said the ad-smith, to be subject to your decision after twenty-four hours refusal of the same. The bargain was drawn, and the word was coined at once. The talismanic word was "Pollewanta." And as soon as the necessary contracts for advertising can be given out, and posters prepared, the bill boards and triple column corners of the leading papers will be devoted to the exploiting of the "Pollewanta" Cracker.

The C. W. Hackett Hardware Co., St. Paul, Minn., had a loss by fire recently, which fortunately was kept well in hand by the promptness with which the fire department came to their aid. The fire was discovered very shortly after closing for the night, and the loss, which is covered by insurance, will not exceed $5,000.

Hawaiian Enterprise.

One of the oldest Hardware houses in Honolulu, Hawaiian Islands, is that of E. O. Hall & Son, Limited. They handle a full line of Hardware, ship chandlery, paints and oils of all kinds, rope and cordage, agricultural implements, bar and sheet iron and steel, wire rope, etc. The business was established in 1850 by the father of the present manager, Mr. E. O. Hall, who is now in this country visiting the various trade centers from San Francisco to New York, having already stopped at Omaha, St. Louis, Chicago, Detroit and other important cities; staying from a few days to a week in each place, studying the modern features of store construction, it being the intention of the company to build on the site occupied by them at present a modern store, 75x100 feet, two stories high with a plate glass frontage on two streets, of 175 feet. It is contemplated that the establishment will have all the modern conveniences and special facilities for conducting business possessed by any house in the States.

It is designed that the finest display will be possible for a stock of goods without a parallel in Honolulu. Among other improvements they have ordered from the J. D. Warren Mfg. Co., Chicago, a complete outfit of shelving, boxes, sample cases and such other appliances of this character, for the providing of which this company has achieved a deserved preeminence. When completed, few stores in this country will surpass it in easy facilities for doing a large and successful business, and the adoption of the "Warren" system of improved store fixtures, should be considered as a national compliment to this enterprising manufacturer.

Private Mailing Cards.

By the terms of an order issued by the Postmaster General recently, the regulations covering the use of "private mailing cards" in this country, are extended so as to conform with those adopted by the International Union for the foreign mail service. The act of Congress which provides for this, was approved May 1st, 1898. Under the new regulations, which are merely a fuller statement of the law given, postal cards are to be not larger than 5½ inches long or 4¼ inches wide. The address may be either written or printed on the face, or printed on a gummed slip, not more than one-half inch wide by 2½ inches long and pasted, and the address of the sender subject to similar restrictions, may be gummed on the back. A printed or engraved design may be placed on the face of these cards, providing it will not interfere with the address. The postal card now in general use by the government will continue to be issued as usual.

The Providence plant of the Brown & Sharpe Mfg. Co. will be shortly increased by the addition of a foundry and a large four-story brick building to be used as a machine shop. Ground has already been broken for the foundry and the foundation for the other building will be laid this Fall, though it is doubtful if more than this is done on this building until Spring. This increase means that between 600 and 700 additional hands will find employment.

Tiffany & Co. have succeeded in making a crystal ball 5½ inches in diameter from an American quartz crystal taken from the Old Green Mountain mine, in Mokelumne hill, in Calaveras county, California. This is the largest perfect ball that has ever been made of American quartz crystals and is valued at $3,000. The largest Japanese ball ever brought to this country was 7½ inches in diameter. It is not, however, entirely free from flaws.—*Ex.*

Canada needs only 237,000 square miles to be as large as the whole continent of Europe. It is nearly thirty times as large as Great Britain and Ireland, and is 500,000 square miles larger than the United States.—*Exchange.*

Export Notes.

Large shipments of bicycles have been made to Genoa, Italy.

Exports of Pastime lawn mowers have been made to Paris.

The Douglas Ax Mfg. Co. are shipping shingling hatchets to Antwerp.

The Verona Tool Works of Pittsburg are exporting their specialties to Genoa.

North Bros. & Co., of Philadelphia, are shipping ice shavers to Genoa, Italy.

Hobson & Co., of this city, are shipping agricultural implements to Carthagena.

The Hamilton Tool Works, of Hamilton, O., recently exported several drills to Hamburg.

Phœnix Hardware Co., Phoenix, N. Y. are shipping their specialties to Roffo & Co., of Paris.

The Cleveland Foundry Co. are forwarding Puritan needle valve gas stoves to Rotterdam.

The Goulds Mfg. Co., of this city, recently shipped two carloads of steam pumps to Singapore.

Two carloads of George Hayes' steel fireproof lathing were shipped recently to Algoa Bay, South Africa.

The Union Manufacturing Co., of New Britain, have ready for export 20 cases of combination chucks to go to Germany.

W. & B. Douglass, of Middletown, Conn., recently made a large shipment of pumps for household purposes to Holland.

The Ferracute Machine Co., Bridgeton, N. J. recently shipped a small lot of its specialties to Southampton, England.

The American Stove Board Co., of this city, have commenced to ship stove boards made of aluminum to Australian ports.

Pratt & Whitney's recent shipments included ten cases of various machine tools to Copenhagen and a smaller lot to Genoa, Italy.

The American Hardware Co., of Knoxville, Tenn., are shipping quantities of 36-inch ax-handles to Sydney, New South Wales.

The Cleveland Twist Drill Co., of Cleveland, Ohio, recently shipped 20 large cases of drills to Andree & Wilkerling, of Hamburg.

Collins & Co., of Hartford, Conn., recently shipped various quantities of edge tools to Denmark, South Africa, Cuba, Uruguay and Australia.

The Niles Tool Works of Hamilton, O., shipped recently a 37-inch boring mill to Rotterdam, 15 lathes to Japan and 35 heavy cases of machine tools to Copenhagen.

Large shipments of American axes and saws to Tasmania have been made lately, and it is very evident that our manufactures are cutting out all foreign competitors.

Quantities of Hunt's Ohio pattern cast steel axes are being shipped to Norway, the orders having been received through Hammacher, Delius & Co., of this city.

The Avery Stamping Co., of Cleveland, Ohio, are shipping elevator buckets and special metal work to Antwerp; the order coming through Henry W. Peabody & Co.

T. N. Du Bois, of this city, recently exported several carloads of miscellaneous plumbers' supplies, including a big lot of toilet closet traps, to San Juan, Porto Rico.

The Gutta Percha & Rubber Mfg. Co., of this city, have shipped a large quantity of hose for use in the fire stations on the Port Arthur sections of the Trans-Siberian Railroad.

Peck Bros. & Co., of New Haven, Conn., are shipping brass goods and plumbers' supplies to Durban, South Africa. The orders come through Henry W. Peabody & Co.

The H. W. Johns Manufacturing Co., of this city, are making important consignments of both Standard and Brooks' asbestos roofing, to Havana and other points in Cuba.

The Browne & Sharpe Manufacturing Co., of Providence, R. I., last week shipped universal grinding machines to Antwerp, and also to Genoa, Italy; Stockholm, and Berlin. Orders were received through Knauth, Nachod & Kuhne of this city.

The National Machinery Co., of Tiffin, O., are about to ship a $15,000 lot of bolt and nut machinery to Vladivostock for use in the machine shops of the Trans-Siberian Railroad. The order was placed through Manning, Maxwell & Moore by one of the engineers of the railroad, now purchasing supplies in this city.

The Oil Well Supply Co., of Pittsburg, recently shipped to Sumatra a complete outfit for sinking artesian wells to a depth of 2000 feet. The value of the order was $6000. They also shipped recently piping, casing and pumping outfits to Clarkson & Co. of Vladivostock, Eastern Siberia, through W. R. Townsend of this city. The order amounted to $4500.

Remarkable Inventions.

Some of the inventions patented in Washington are as eccentric as they are ingenious. An odd, if useful, invention consists of a frame from which corks are suspended by means of strings. As the hour for waking draws near this framework is gradually lowered over the heads of sleepers until, as the hour strikes, the corks perform a tattoo on the noses and faces of the sleepers until they awake.

Another invention enables a farmer to feed his horses and cattle in their stables without leaving his bed. He simply pulls a cork dangling at the head of his bed, and forthwith valves are opened and the proper allowance of fodder falls into the troughs.

This burglar alarm is sufficiently ingenious to deserve success. As soon as the would-be burglar steps on the mat in front of the safe or strong room, his weight closes an electric circuit, a flashlight is ignited, the cap removed from a camera, and the burglar's photograph taken without charge, for use as evidence against him.

By another clever device the street lamps of a town are electrically connected with a central clock. When the hour for lighting arrives, the circuit is closed, the gas turned on, and the lamps simultaneously lighted.

A really sensible and useful invention is one which dispenses with the ponderous and expensive machinery in use for tower clocks. The timekeeping is done by a small master clock, which is electrically connected with motors in the tower. These motors move the giant hands and strike hours by means of a "make-and-break" mechanism in the master clock, which may be small enough to be carried to the clockmaker for any necessary repairs.—*American Exporter.*

Conventional Gems in a New Setting.

AN HONEST PRESS.

The press—what of it? Symbol of grand, glorious, sublime America—the world's civilizer—of the divine trinity, free men, free speech, free press; unpurchasable protector of free men, fearless advocate of our God-given institutions, unswerving missionary of our expanding commerce. It is the fitting representative of the ever-conquering Anglo-Saxon; it is the very essence of true expansion. Where the starry flag goes, trade fast follows, and with it speeds the press, and on its heels you see the hustling advertising agent pushing the sales of the wares so deftly placed on the market by the polished and persuasive commercial traveler. The success of our business, of all business, depends on the press, not only as to sales, but as to forming public opinion and building up the communities. As an educator, it is an open door for everybody to see the storehouse of knowledge. An honest press makes honest men.

President JAMES J. MANDLEBAUM.

LEGITIMATE COMPETITION.

Legitimate competition is the means of all commercial advancement, and is the incentive to increased effort. The competitive spirit has raised the American manufacturer to the position where he has made the quality of his product and the price at which he sells, the standard for the entire world.

Conservative association or combination is one of the milestones in the evolution of commercial progress, and while abuses may arise in the initial steps of this evolution, no sensible man can fail to admit that organized effort will control where individual effort might fail. T. W. GATHRIGHT.

OUR UNITED COUNTRY.

Blessed be God, there is to-day no north, no south, no east no west, but one grand, united, homogeneous, patriotic nation, true and loyal to the best, most glorious movement the world has ever known. And from where yon stately pine crowns the headlands of Maine, as sentinel in his uniform of green, westward to where the soft waters of the Pacific and Puget Sound sing their soft lullabies to departing day, from the gentle breezes and sweet scented atmosphere of Southern California to the sand dunes of the Florida Coast, from which so recently went the grandest spectacle that the eyes of the world ever beheld, of a nation offering its treasure and blood to redeem another from bondage and oppression and give it the right to live—between these limitations has arisen a new and broader South that we should ever become in our mind's eye when we speak of it in the future. V. A. MOORE.

THE INFLUENCE OF CHARACTER.

Honesty, intregity, character—are not dreams; they are not high ideals only—they are actual realities. We should not give the best of our lives and the best of our thoughts to business. Our homes, our wives and our children need and deserve the best and sweetest gifts we can bring. Their cheer and smiles, their love and joy, will be a better reward than dollars or any currency we can count. Life is real, its demands more pressing than ever. The contest is earnest, the weapons keener pointed and the steel better tempered. Yet the brain is more active, the hand more skilled and toil and thought win surest victories.

At early morn this tiny flower, whose petals kissed the dewy drops that night distilled, then gave promise of a life most beautiful and fair. Yester eve, rocked in the cradle of the winds, or lulled to rest by zephyr's gentle breath, the moon's pale beams and light of glimmering star shone upon the opening bud. At early dawn Aurora from her gilded couch looked across the eastern hills and smiled upon its beauty. At sunlight's touch it blushed in crimson as blushed the waters at the Master's voice at wedding feast in Cana. Painted by hand Divine in colors rich which limner's art nor brush can trace, ere the noontide hour, plucked from its parent stem through which it drew its breath, it lost its life and power, yet in dying yields sweet fragrance.

Oh, simple flower! Thy life of but a day should teach us pilgrims on the way by grace of thought and speech, by kindly act of charity and love, to yield sweet fragrance like thyself. WEBSTER R. WALKLEY.

COMMERCIAL HONESTY.

Honesty is the best *policy*. It pays, in the long run in dollars and cents, It is the richest asset with which the young man can start in business life; it is the surest reliance of the business man with which to face the wearing trials of daily life; it is the best heritage he can leave behind him.

Put the taint of recognized commercial dishonesty upon a man, and let him pass through this room. One will meet him with a bow; one will say "Good Morning"; all of you may greet him—and yet there lies an atmosphere about him that he will feel, and you will feel; that intangible something which shows that he is with you but not of you; that narrow line of demarcation across which you may send the friendly word, but that your soul will not pass! JAMES H. KENNEDY.

No Iron Famine.

In the opinion of the leading minds of the iron and steel industry it is considered doubtful if there will be any famine in pig iron; furnaces are filling orders with a commendable degree of promptness, and working hours have not been reduced in consequence of inability to get the necessary ore. As the price of pig iron increases, old furnaces long dismantled are again brought into play, and old fires are again lighted, and even to a limited degree products are increased and anything in the nature of a famine averted. The furnace men in many sections, especially in Ohio, have but little or no iron for the open market, every pound of a possible product being sold up. Vessels are being chartered to load iron at Bilboa, Porman and even Guaymas in Cuba for various ports in the United States.

Almost any place that promises material will be laid under tribute, a complete revival in the trade having been the feature of the last few months.

As stated by James M. Swank, general manager of the American Iron and Steel Association: "Spain, having lost her foreign possessions, is now being forced to develop her resources more thoroughly; until within the last few months not a pound of iron ore has been imported from Spain for many years; now, it is expected that hundreds of tramp steamships will visit Philadelphia this Summer and Fall, laden with the products of the ancient mines of Bilboa and Carthagena."

"That fellow's got a cheek you could write a novel on," said the Montclair boss barber as the previous shave left the shop.

"Why? What did you do to him, cut him?" I asked, taking an interest in the discussion.

"Cut him! Not on your life!" continued the boss in the Verona vernacular. "It was like shaving a bronze statue of Lincoln! You see he has travelled for seven years for a Hardware house in Trenton, and with his cheek you couldn't cut him if you shaved him with a drawing knife." The boss is quite a sharp blade himself.

Nine-tenths of the trouble in this world is directly due to indigestion. This is not an advertisement for somebody's dyspepsia cure; it is just a plain, hard, ungetoverable fact.—*L. A. W. Bulletin.*

"The noblest roamin' of them all." The two months trip laid out by President Sargent.

The American Bicycle Co.

The American Bicycle Co. have at last perfected their organization and become an accomplished fact. Combining in one company 45 separate plants, would seem to preclude the possibility of any company outside this aggregation of talent, being able to produce and distribute wheels at a satisfactory profit.

The company will have a capitalization of $35,000,000 of preferred stock and $45,000,000 of common stock. It is generally understood that the preferred stock represents the cash value of the plants, while the common stock may be calculated upon as representing the good will of the company, of course including all patents, agency equipments and many other items which go to make up the intangible assets which are notwithstanding held to be of great value.

Wherever it was possible, plants were purchased at a price agreed upon, payable in stock only, or stock and cash in proportion. It is understood that stock placed upon the market will be in amount equal to the cash paid out in completing the consolidation.

The following plants form the new company, and it will be found in going over the list there are very few leading manufacturers but what are identified with the combine; the "Overman Wheel Co." being one of the few who remain outside and prefer to act independent:

Ames & Frost Co., Chicago; American Saddle Co., Cleveland; Acme Mfg. Co., Reading, Pa.; Barnes Cycle Co., Syracuse; Black Mfg. Co., Erie, Pa.; Buffalo Cycle Mfg. Co., Buffalo; H. A. Christy & Co., New York City; Crawford Mfg. Co., Hagerstown, Md.; Colton Cycle Co., Columbus Bicycle Co.; Cleveland Machine Screw Co.; Eagle Bicycle Mfg. Co., Torrington, Conn.; Fanning Cycle Co., Chicago; A. Featherstone & Co., Chicago; Fay Mfg. Co., Elyria, Ohio; Gormully & Jeffery Co., Chicago; Grand Rapids Cycle Co., Grand Rapids; Geneva Cycle Co., Geneva, Ohio; Hartford Cycle Co., Hartford; Hartford Rubber Works, Hartford; Hart & Cooley Mfg. Co., Indiana Bicycle Co., Indianapolis; Indianapolis Rubber Co., Indianapolis; Indiana Novelty Mfg. Co.; Indianapolis Chain & Stamping Co., Indianapolis; H. A. Lozier & Co., Cleveland; Lamb Mfg. Co., Chicopee Falls, Mass.; A. D. Meiselbach, Chicago; Monarch Cycle Mfg. Co., Chicago; Milwaukee Engineering Co., Milwaukee; Milwaukee Mfg. Co., Milwaukee; Nuttall Mfg. Co.; North Buffalo Wheel Co., Buffalo; Pope Mfg. Co., Hartford; Peoria Rubber & Mfg. Co., Peoria; Sterling Cycle Works, Kenosha, Wis.; Shelby Cycle Mfg. Co., Shelby, Ohio; Stover Bicycle Co., Freeport, Ill.; C. J. Smith & Sons Co., Milwaukee; E. C. Stearns & Co., Syracuse; Syracuse Cycle Co., Syracuse; G. L. Thompson Mfg. Co., Chicago; Viking Mfg. Co., Toledo; Western Wheel Works, Chicago; White Sewing Machine Co., Cleveland.

Upon effecting a temporary organization, A. G. Spaulding was made chairman and C. W. Dickerson, secretary.

It is thought to be the policy of the new company to abandon eventually the sale of wheels by retail as heretofore conducted, simply having branch stores in the leading cities for wholesale requirements and the larger distribution of their varied products. It is believed, however, that for the coming year, commencing July 1, no changes of a radical character are contemplated, in order to retain the good wishes of every one now in touch with this important industry.

Bicycle riding cures biliousness, and when all the bilious people have been cured we can then pick out the really pious.—*L. A. W. Bulletin.*

Ride on the saddle, the handle bar is for another purpose.—*L. A. W. Bulletin.*

Hints to Advertisers.

Samson, the strong man we read about, was the first man to advertise. He took two columns to demonstrate his strength; seven hundred people tumbled to his scheme immediately, and he brought the house down.—*Exchange.*

A New York clothing and furnishing firm, located in the downtown office district, are in new quarters and make this unique announcement:

"Connected with our premises will be a barber shop, boot cleaning parlors, needle, shower and plain baths and other conveniences. This novel idea will be appreciated by those who wish to go to an entertainment in full dress direct from their business, and whose families may be in the country, or their homes some distance away."—*National Advertiser.*

A novel advertising scheme is being introduced by S. S. Connell, who was at the Stubbins Hotel yesterday. The advertising device is a figure of a man or woman, made of steel three-sixteenths of an inch thick. The statue represents the person walking in the direction of the store to be advertised and carrying a grip on which the name of the store is painted in large white letters. The figure is six feet tall and realistic. By stationing a dozen of these on the highway half a mile apart the impression might be created that the entire community is rushing to a certain store.—*Indianapolis (Ind) Sun.*

An Iowa drug store, dealing in paint, displayed in its window recently a simple pyramid of pails and cans which attracted attention and talk. The base was a box covered with white paper. Upon this, beneath one of the pails, a quantity of paint was spilled, which, running down the front of the box and onto the floor of the window, gave all who saw it the impression that the pail had sprung a leak. Within five minutes after the curtain was raised the scheme began to work. People at first notified the druggist, but as time wore on and the pool of paint grew no larger, they began to grasp the idea. No display of paints in that store ever attracted half the attraction that this attracted, and the device was simplicity itself.

He sat at his desk opening his morning mail when I entered his office, and had a stack of letters eight inches high. Among the letters opened were many circulars, catalogues, circular letters, etc., nearly all under two-cent stamps, to convey the impression that they were "honest Injun" letters. Every one of these letters, circulars, etc., were thrown into the wastebasket, not one of them being read. Finally he finished his mail, and after sending the letters to the various departments, he turned to me with the remark: "We have determined to change our method of advertising this year. We are going to send out circulars and write soliciting letters, and send out thousands of handsome catalogues instead of advertising in trade papers.—*St. Paul Trade Journal.*

The prevailing impression is that good display is obtained by using many display lines. The reverse is true. As a general thing one or two lines displayed will create a better effect than displaying the entire advertisement. Display lines, if rightly used, attract attention and give certain parts of the advertisement more emphasis than others. Too many display lines, however, will very often serve to emphasize the parts not intended to be displayed. Writers very often make a certain word or phrase emphatic by having it set in italics. This gives additional force to the emphasized words, provided they do not appear too frequently. Emphasizing every other word, however, would have the effect of making the parts in Roman as prominent as the parts in italics. Very little display is required in ordinary advertisements.—*Business Magazine.*

SEWING MACHINES AND HARDWARE TRADE.

While the retrospect of a Weed or a Supplee is necessary to give the rising generation an idea of the changes which have taken place in the Hardware business during the last half century, there are many younger men whose memory and experience in the trade takes them back to the time when the assortment of Door Locks and Padlocks could almost be inventoried on the fingers of one hand. It does take, however, a Disston or a Maydole to recount the rebuffs, hardships and trials incident to the introduction of new lines and meritorious specialties which have become the standard goods of the trade.

A wonderful change has come over the extreme conservatism which dominated the retailer of the fifties, and even when in the sixties, he had outgrown his narrow sphere, and had come to be known as the jobber of Hardware.

To-day, the patterns and varieties of door locks and padlocks are numbered by the hundreds, and the jobbers' bins and the retailers' shelves are filled to overflowing with inventions and novelties of merit, which our forefathers little dreamed of. This change can only be accounted for by the fact that the Hardware trade has drawn to it some of the keenest business men of the age, who have grown with the times, and have grasped the opportunities as they were presented to them, for the profitable expansion of their business. The Hardwareman and drygoods dealer are the expansionists of the mercantile world of to-day.

There is no class of merchants which realizes more than the present-day Hardware dealer, the advantage to be gained from being the first to bring to the attention of the consumer or the mechanic, an improvement or an article of merit.

Not many years have elapsed since that lusty infant, the bicycle business, with hardly strength enough to win in the battle of life for itself, was seeking a sponsor. No one branch of the trade was willing to take it under its sheltering wing and adopt it, and for a time, it was buffeted about, obtaining only a foothold here and there.

The influence exerted by the trade paper and its power to shape and direct the policy of the trade, is not fully appreciated.

We have almost forgotten how much space and thought *Hardware*, and other trade papers, only a few years ago, devoted to bicycles and their place in the Hardware trade and kindred topics. Their campaign in the interest of the infant industry was carried on with such spirit and energy, that it did not take long for the jobber and retailer alike, to see the profit which might accrue to them from adding this line to their business, as they had sporting goods and cutlery.

To-day, the bicycle business is so firmly established in the Hardware trade that the consumer looks to the Hardware dealer for the goods and the sundries used in connection with them, and the Hardware dealer expresses great surprise when told by either some jobber himself, or his representative, that they are not able to supply his wants in this line.

That the Hardware dealer is on the alert and willing to add to his assortment any article of merit which will increase the volume of his business and add to his profits, cannot be questioned. From time to time, he has added, not only the lines we have mentioned, but baby carriages, express wagons, washing machines, etc., having in mind, not only the profit derived from their sale, but a belief that the greater number of persons of different classes which he could attract to his store, the larger would be his sales of Hardware.

The success which has attended the sale of bicycles by the Hardware jobber, has led him to undertake the sale of another line, which has been sold by some retailers of Hardware for many years, but has been more largely confined to small drygoods stores, music stores, and to special agents, giving their entire attention to them. The line is that of sewing machines.

While the manufacture and distribution of sewing machines cannot be said to be in its infancy, the number of them which will be handled by the Hardware trade in the next decade, will surprise those whom the manufacturers have relied upon to market their output in the past.

While sewing machines have been declared a household necessity, they have been a luxury, owing to the large expense incident to their distribution. This expense, which has been added to the price, and which the consumer has been compelled to pay, has been a barrier to their introduction into many a home.

Sewing machines can be distributed through the Hardware jobber and the retail dealer of Hardware, at less expense than by any other class of merchants, and the machine which the consumer has been compelled to pay $50 to $65 for, is now being sold under the new method, at from $25 to $35.

The title of this article does not apply to the many jobbers and retailers who, during the past three or four years, have taken up this line with so much zest and satisfaction, but its object is to call the attention of those jobbers and retailers who have failed to realize the possibilities of this line, as a general trade winner and profitmaker. That many of our most progressive jobbers have been alive to their opportunities, as well as the retailers to whom the goods were sold, is evidenced by the fact that during the year 1893, a jobber in the Northwest sold sixteen carloads, aggregating about 1800 Machines. Several wide-awake jobbers in the Missouri Valley sold from six to ten carloads, while the King Bee of the hardware jobbing trade, sold over 6000 machines. The jobber who is acknowledged as the most progressive in the Middle West, has the distribution of twenty-two carloads to his credit.

The liberty taken in the recitation of these facts will be pardoned when it is considered that without them, the retailer of Hardware could not be impressed with the magnitude of the sale already attained, through this method of distribution, in which his fellow dealers and nimble competitors, have so largely participated.

The sale of sewing machines will not equal that of bicycles, but there will be some things connected with the sale of the former, which will partially, at least, compensate both the jobber and the retailer for the lack of volume. When a sewing machine has been sold by either class, the transaction is closed in the great majority of instances. This is not the case with bicycles, owing to the necessity of having to furnish defective parts, which, though they may themselves cost the jobber or retailer nothing, the expense of handling them and the transportation on same, which both are compelled to assume in many instances, affect the net profits of the business more than those think, who have not investigated the matter and kept a record of it.

One reason the sale of sewing machines cannot be as great as bicycles, is apparent. But one is necessary to each household, while several bicycles are frequently in use in one family. The life of a sewing machine covers a greater

Digitized by Google

period than that of a bicycle, because it is used with more care. It has often been said, there is no other article made whose value approximates that of the bicycle which is given more care, and which is abused to the same extent.

Another point favorable to the sale of sewing machines, and this especially applies to the retailer, is that there is no desire on the part of the owner to dissect it. This may be partly accounted for by the fact that sewing machines are used by women who, notwithstanding their proverbial curiosity along some lines, are not given, as is a man or small boy, to the taking of a bellows apart, to see where the wind comes from.

Many dealers are prejudiced against handling sewing machines, because their memory takes them back to the time when the prospective purchaser of a wheel could ask them more questions than they could answer, and were critical because of lack of knowledge regarding the goods. With a sewing machine it is very different. Place your sample line on the floor, and say to the first intelligent lady who enters your store: "I have just purchased a line of the celebrated ———— sewing machines. It is a line I have never given any study. I would like to have you take this chair, and see what you think of them." This lady will tell you more about that sewing machine in ten minutes than many of the best informed representatives of the jobber or manufacturer could tell you regarding it, in an hour. It is often good business policy to admit your ignorance to the purchaser of a machine, while it is suicidal to do it in the case of a bicycle.

One of the attributes of a successful sewing machine salesman is to secure from the prospective purchaser, their ideas as to what particular features they desire in a sewing machine, and then endeavor to show them that the machine before them, possesses all the features mentioned, in addition to features possessed only by his machine.

This innovation, like the present wave of prosperity, had its inception in the West, and is moving Eastward gradually and surely.

It offers to the retail Hardware dealer of all sections of the country, a larger margin of profit than can be made in the future from the sale of bicycles, and fortunate is the dealer who grasps the opportunity, at once, realizing that the margins will be greater in this line in the near future, than later, when competition has greatly increased.

Indianapolis, Ind. CHAS. W. EMERY.

Hints for Employers.

At a recent social function connected with an American manufacturing firm—a machine-tool company—one of the proprietors made some remarks that are deserving of consideration by employers generally. He declared that the good will of the employes is a tangible asset, incapable of being shown on the books of any concern, but a value to be measured in profit or loss as it is present or lacking. "I believe," he added, addressing the workmen, "we have your good will and loyalty, and I assure you that you have ours. We do not believe in 'rules and regulations,' as usually understood, as you know by their absence in our shops. Were I to choose one word to write over every lathe, planer, milling machine and bench, it would be the word 'quality,' and I would have it apply in every sense. If I were to ask each of you what company stands at the head of the machine-tool industry, I guarantee that ninety-nine out of one hundred would name the same company. Their methods, from their packing to their salary list, have for a long time indicated quality. Let us pursue this object, quality, as one we are determined to attain, and having attained it in the fullest sense, we will be enabled to reflect with satisfaction upon our efforts."—*London Coal and Iron Trade Review.*

Samoa's set back. When Yale lost the three boat races in one day, it looked as tho' the same oars got a set back.

Genuine Worcester Roofing Plate.

An advertisement in our columns, this issue, calls attention to an important arrangement recently perfected by Merchant & Co., Inc., of Philadelphia, Pa., having reference to the superior brand of roofing plate known in the metal market as "Genuine Worcester."

Until 1890, tinplate was made exclusively in Wales, but subsequent to that date the industry began to grow in the United States, and up to the passage of the McKinley tariff, the Worcester plate had the largest sale of any plate in the world, but as it was not made here, its sale in America fell off as the domestic product increased.

Merchant & Co., Inc., Philadelphia, New York and Chicago, have just completed arrangements with the Upper Forest & Worcester Steel and Tin Plate Works of Wales ior the exclusive manufacture and sale of the justly celebrated Worcester brand of roofing plate, and they are now prepared to supply it promptly.

There have been quite a few private brands sent out as Worcester grade, but these are vastly different from the genuine Worcester now offered. These Worcester grade plates are frequently made thinly coated by the acid process, while the genuine Worcester is claimed to be made absolutely with the palm oil flux, is heavily and perfectly evenly coated, is carefully assorted, and every perfect sheet is resquared and stamped with the brand and thickness.

It may go without saying that the excellence of the genuine Worcester brand as established by the old Welsh makers will be fully maintained by the above well known house.

Cushman & Denison's New Location.

The firm of Cushman & Denison, the well known and progressive makers of the "Perfect" and other oilers, seem to have almost a corner in that line of popular specialties, and are deserving of special mention.

The firm was established in 1883. Although this is but sixteen years ago it is to day one ot the oldest firms in the bicycle trade, the majority of the present companies being comparatively new concerns. The head of the firm and managing man from the start is Joseph W. Cushman. Away back in the days of the old "ordinary," Mr. Cushman saw the need of a good oil-can for bicyclists' use, and from that time to this has used every effort to produce an oiler that is highly regarded by the trade, having become extremely popular. As a result the present generation of riders is not annoyed with the clumsy and leaky oilers that made life a burden to the first converts.

Cushman & Denison still make a specialty of oil-cans, which are recognized as good sellers by almost the entire bicycle trade. Their "Perfect" oiler is too well known to all riders to need any description. It has been constantly improved from year to year and continues to be used with nearly all the really high grade wheels. This firm also make the "Star," "Leader" and "Gem" oilers for lower priced or medium grade wheels. These oilers, being low in price, have had a widely extended sale.

Cushman & Denison have just removed to their new building Nos. 240-242 West Twenty-third Street, where they have greatly increased office and storage facilities. Their factory, however, will still be in Connecticut.

Few better evidences of the prosperity of the country can be given than the gain so noticeable in bank stocks, this, coupled with the growing interest rates on call loans, showing greater use is being found for the money surplus and with the lessening number of commercial failures, all point to an unprecedented state of affairs to welcome in the last six months of a year of promise and profit.

Digitized by Google

HARDWARE TOPICS BY THE WAY.

Activity in the Hardware and iron branches continues unabated, and it is evident that it is not due to transient causes. Prosperity has simply rehabilitated itself. The unprecedented demand in some lines, especially builders' Hardware and structural iron, has been the foremost fact in the year's record thus far; hence, the unpreparedness of the producing agencies. Now, since confidence has been fully restored, however, the question of getting supplies promptly will soon adjust itself. New enterprises and expansion of old ones will quickly restore the equilibrium. The future effects of this over-activity, if continued, can only be surmised at present. As we have learned to deal with the present, and let the future take care of itsefl, we need but exercise ordinary caution, instead of letting scruples and omens impede the progress of this industrial kite.

Some trusts propose only to dispose.

Let the trusts take care of themselves. They have troubles of their own.

Short vacations are in order this season. Most of the jobbing houses have a sufficiency of orders ahead to keep all hands busy throughout the summer. Some of the Hardware manufacturing plants are running night and day to clean up out-dated commissions and contracts and immediate rush orders, and the workmen will have to take their vacations between meals. Well, we have had enough of vacations since 1893, and are glad to continue at work to rid ourselves of that tired feeling superinfused *ad nauseam* by the perforce-economy regime of the depression.

Is it merely activity or a real, live boom? is the question which perplexes the industrial apostle. Well, there being no traceable speculative demand, the boom, if it is a boom, must be sound. And if it is a boom no other factor could have created it but the natural producing element of the country itself—the farmer. Well, farmers are not in the habit of overreaching themselves, no matter how prosperous. The last lesson of the depression still stands vividly before them, and, besides, the wholesalers' up-to-date credit system would prevent over-buying. The average farmer is of an economical turn of mind; the percentage of ignoramuses who are susceptible to every sharp practice, has been minimized through the propaganda of our ubiquitous newspapers and trade press. The facilities of the electric age have brought him into close contact with the pulse of the distributing markets themselves, and there is little danger of the great majority of farmers and other producers overstepping the safe lines of the modernization plan, expending their money and hypothecating their resources for improvements other than necessary or tending to ordinary comfort and happiness.

A Western Hardware dealer is so patriotic he will use nothing but Manila paper for wrapping purposes.

To judge from the manner the fire works stocks are being cleaned up, our national fireworks day is the red letter date in the annals of our revitalized trade history.

The outgoing century is going out fitfully. All's well that ends well.

The army of trade journal advertisers of America leads the world in enlightenment and originality. It's the avant courier of our international commercial conflict.

The nail trust has nailed the lie of its early collapse. Well nailed, sticks.

A Kansas wholesaler employs nothing but paper, boxes and other packing material of national tricolor hue. The house sails under the motto, "Watch our colors, and you can't go amiss." The firm intends to have its title legalized into Red, White & Blue. Said the senior member: "We propose to carry the banner in this territory, and are not afraid to show our colors. We have adopted this barber-shop complexion because we intend to shave clean all competition."

"Why have you named this style of pick and shovel, Filipino?" was asked of an Indiana manufacturer. "Because they won't wear out until they have dug their last ditch."

Some of the automobile manufacturers will petition the post office authorities to adopt their vehicles in the collection and delivery service. Great heads! They could not have selected a better medium of attest.

It is predicted that the tricycle for adults will supersede the bicycle for all purposes of recreation, fresh-air jaunting, convalescents, invalids, business and professional purposes in a few years when the American people realize that greater ease, less exertion, more safety and less haste are more conducive to a happy life.

A Western dealer sunk an artesian well under his store in order to give practical tests of the various pumps he carries.

From an ad.: If you need a pump, pump us. We are the fountain spring of information. Though we represent force pumps, our prices will enable you to pump or repump your needs with the greatest ease.

A manufacturer terms an anti-nail rust preparation, coffin nail embalming fluid.

"We are not in any combine, and we don't care who knows it," is the manner in which a Western Hardware manufacturer preludes his ads. and office stationery.

A Western dealer specializing saddlery and carriage Hardware has trimmed his window to ancient and modern notions. The display includes the horse bit up to its modern evolution of the curb and snaffle, saddles and appurtenances of all ages, in reality or portraiture, snaps, harness, bolts, clamps—in short everything of interest to the respective trades. The museum attracts thousands, and has been both prolific of free newspaper advertising and transient patronage.

From an ad.: Thousands of dollars are annually wasted in waste oil—all due to defective oilers. Modern manufacture has produced a perfect oiler, yes you will buy the oiler which is the cheapest. You thus place the wrong economical principle before the right. Come and attend our oiling exposition. It will pay you to become acquainted with the differentials. With what you will save by employing a perfect oiler, you can oil up the inner man, morning and night caps included.

From an ad.: Men's modern head gear is abominable. It's both uncomfortable and injurious to correct bodily hygiene. In short it is devoid of the proper principle of ventilation. We don't sell ventilated hats of our notion born, but immaterial, but handle all sorts of ventilators for the dwelling, business house and factory, because in them the problem of proper ventilation has been solved. Come in and let us ventilate our ideas with substantial facts, and we can manage to get along without ventilated hats.

From an ad.: If you want an axe, "ax" us. New axes may hew well, but old ones are the best. We mean the old process axes. We split the difference in the price rather than have you split your toe.

An Idaho man's motto, "We are not infallible but handle all the perfect things in the market."

A Western inventor has constructed a boat which is a

Digitized by Google

swimming basket, pure and simple. He names it *The Moses*. Who can beat America in originality?

From an ad.: Get out your corn, hedge and tobacco hook. Does it look modern? If not, "get on your sinew," or buy a new hook. The new hook embodies the sinew and saves yours. You are no longer required to put your sinew on edge, bevel your nerve and sharpen your vision. The new hook is edged sharp and beveled sinuous.

From an ad.: To the economist: What's the use to buy a check with a spring hinge, when you can buy both in one in the checking spring hinge at practically one price? Besides, the independent check and spring hinge do not work in harmony as a rule. They make too much noise. Let us show you the latest check spring hinge. If we can't convince you, we'll sell you the hinge and check separately.

Cleveland, O., June, 1899. JOHN B. RINDFLEISCH.

Growth In Our Exports of Manufactured Goods.

The remarkable growth in the exportation of manufactures has led to the preparation by the Treasury Bureau of statistics of a series of tables showing the value of each class of manufactures exported in each year during the decade and the amount of each class sent to each country. By this process it is practicable to determine the trend of our foreign trade in manufactures, both as to the class of manufactures most demanded abroad and the countries which are proving our best customers.

That this subject is one which justifies a careful study is apparent in view of the fact that the exportation of manufactures has more than doubled in the last six years, more than trebled since 1880, more than quadrupled since 1870, is more than eight times as large as it was in 1860, and in 1898 and 1899 for the first time in our history exceeded the importation of manufactures. The exportation of manufactures in the fiscal year about to end will average more than one million dollars a day for each business day of the year.

A study of the figures which cover the details of the ten years' exportation of manufactures shows that the total value of our manufactures exported has increased 110 per cent. in the decade, while an examination of the exportation of manufactures by other countries fails to show any considerable percentage of increase in any of them during the same period. Great Britain's exports of manufactures show no increase since 1890, the earliest year at which a separate statement of manufactures exported is attainable, while her total exports of domestic products (of which manufactures form about 86 per cent.) shows no increase in value in the decade 1888–97. From France the exports of manufactures show an increase of but 10 per cent. in the decade 1887–96, Germany 13 per cent., Switzerland 6 per cent., Netherlands 3 per cent., and Austria-Hungary and Russia a loss, while, as above indicated, the exports of American manufactures in the decade 1889–98 show an increase of 110 per cent., and in the year 1899 will be about three times that of 1879.

An examination of the details of our own exports of manufactures shows that it is in the production, manufacture and exportation of metals that we seem to excel. The history of nations and peoples shows that great classes of people frequently excel in certain industries, and the growth of our exportation, as well as our domestic production of manufactures seems to point to metals as our most successful line of work, at least at the present time. In 1889 manufactures of metals formed less than 20 per cent. of our total exports of manufactures, while in 1898 they formed over 44 per cent. The increase in exportation of metals and manufactures thereof in the decade 1889–98 was 339 per cent., while the increase in the exportation of all manufactures in that time was but 110 per cent. and the increase in exportation of manufactures other than those of metals during that time was but 55 per cent. In this estimate of the exportation of manufactures of metals only those articles composed exclusively of metals are included, those made up in part of metals, such as railway cars, agricultural machinery, etc., being included among the other manufactures. The rapid increase in the exportation of manufactures of metals is shown by the fact that the exports of brass and manufactures thereof in 1889 were but $321,137 and in 1898, $1,320,093; instruments for scientific purposes increased from $1,033,338 to $2,770,803, and in the year about to end will reach nearly $4,000,000; cycles, of which there were no exportations in 1889 amounted to $6,846,529 in the exportations of 1898; clocks and watches increased from $1,355,319 in 1889 to $1,727,489 in 1898; zinc and manufactures thereof, from $28,684 to $1,339,668; copper and its manufactures, from $2,348,954 to $32,180,872, and iron and steel, from $21,156,077 in 1889 to $70,406,885 in 1898, while in the fiscal year 1899 the total will exceed $90,000,000.

Another interesting fact developed by an examination of the figures is that the European countries in which manufactures have long been established furnish as satisfactory a market for our manufactured goods as do the countries where manufacturing has not yet been largely developed. In reapers and mowers, clocks and watches, sewing machines, bicycles, and the various manufactures of iron and steel, and many other articles of the higher grades of manufacture, the European countries in which manufacturing plants and machinery, and skilled workmen abound, furnish a market for a large share of our exports, thus failing to justify the expressed fear that a development of manufactures in countries where we are now seeking a foothold for our commerce would destroy their value as a permanent market.

How Plate Glass is Bent.

"The demand for plain and bevelled-edged bent glass is increasing in this country every year," said a manufacturer of the material in New York to a writer for the *Washington Star* recently. "This kind of glass is now made to suit any and every desired curve, and it is largely used not only for show cases, but forming conservatory roofs, the front and bent windows in carriages, steamboat pilot houses, store and house fronts, in buildings where domes and skylights are needed and for a variety of other ornamental and useful purposes by cabinet and furniture makers. It is made in sizes varying from 1x12 feet to 12x15 feet, and even larger, and it costs only about 50 per cent. more than the ordinary flat glass."

"How is bent glass formed?"

"The glass is not made at the bending factory. It is merely curved by us to suit the requirements of the trade or to meet some special order for the material that is not obtainable in the market. The glass, of whatever kind or size it may be, is placed in its finished state upon the top of a massive steel mould having the desired form or curve. The mould, which is mounted on wheels, is then rolled along a track on the floor to the kiln. When the glass reaches the kiln it is there subjected to a temperature of 1800 degrees, and in this intense heat it does not melt, but soon becomes so soft that it sinks by its own weight into the shape of the mould beneath. In its soft and bent condition the glass is left in the kiln to anneal and cool slowly for from twenty-four to thirty-six hours. At the expiration of that time the mould is rolled out of the kiln and the glass, if properly curved, is removed from the steel bed. The great heat to which it is subjected does not in the least disturb the polished surface of the glass. But, despite the exercise of every precaution, a great deal of glass is broken in bending, and these accidents add very materially to the cost of the article."

The political candidate who is still a road reformer after election, is to be preferred.—*L. A. W. Bulletin.*

HISTORY OF "HARDWARE."

There hangs in a conspicious position in the office of *Hardware*, framed and carefully treasured, a battered and somewhat worn bundle of newspaper leaves, that saw eventful service in the early days of 1890. They constitute the "dummy" used by Archibald Paull Mitchell, to illustrate to the Hardware world, the new journal which he had conceived, but which was then only in the early process of creation.

He had looked about him, and been impressed with the fact that there was a wide opportunity for active trade-journalism in a field by no means fully cultivated. The growth of American Hardware manufacturing had been tremendous in recent years, and bade fair to be greater in years to come. That there was need for further service to these great industries in the newspaper line, was a self-evident proposition, and the foundation for *Hardware* was then and there laid. That there was need for something of the kind was fully shown by the success of the new venture.

Mr. Mitchell chose his title wisely—one that stood with force and distinctness for the thing it was intended to represent. He made up his "dummy" of a convenient size, went out upon the war-path and touched hands with success from the very first. The trade responded generously. He was soon convinced that his review of the situation had been wisely taken. His diagnosis of the case was correct. On April 10th, 1890, the first number saw the light of print, and on the 10th and 25th of each month, from that day to this, there has been added one more number to the ever-growing list.

There are some familiar names upon the first page of that framed "dummy," hanging upon the walls of this office to-day. In the upper right hand corner, is the long-familiar name, "Union Metallic Cartridge Co." The enterprising managers of that great concern saw their chance by securing a fine position permanently, and that space has belonged to them from that day to this, without a moment's interval. Other names seen upon the same page are those of J. P. Kenworthy, Hardware," "Thomas Chalmers, Hardware," the "Connecticut Motor Co.," of Plantsville, Conn., and "H. Lamarches Sons, zincs." Across the bottom of the page, the space was reserved for the use of the Manufacturers' Advertising Bureau, whose manager, Benjamin R. Western, saw thus early the advantages offered by the new publication, and who has been a consistent and enthusiastic supporter of *Hardware* ever since.

The initial number of April 10th was an unqualified success. An examination of its pages shows the names of many men and concerns which were then prominent in the Hardware world, and still occupy a prominent place in the ranks; the names of some companies which were then prominent, but have since disappeared by dissolution or absorption. There are also found quite a number of cards which are still prominent in *Hardware*, a tribute not only to the stability of the houses, but also to the continuous and proved value of the medium which they then selected as a pure matter of faith in the promises of Mr. Mitchell. Among these latter may be named the Union Metallic Cartridge Co., Fuller Bros. & Co., Van Wagoner & Williams Co., Waterbury Brass Co., John A. Roebling's Sons Co., (now the New Jersey Wire Cloth Co.); Stanley Rule and Level Co., W. S. Estey, Plume & Atwood Mfg. Co., Sargent & Co., the Gilbert & Bennett Mfg. Co., Clinton Wire Cloth Co., Coates Clipper Mfg. Co., John Chatillon & Sons, the Yale & Towne Mfg. Co., and the Coes Wrench Co. In the several succeeding issues we see a rapid addition of names showing that the new venture had commanded respect and won support from the very start. Among the cards thus added and still found in the columns of *Hardware*, the following may also be named: Charles Morrill, the Chieftain Co., (now F. E. Kohler & Co.); the Holmes & Edwards Silver Co., the Smith & Egge Mfg. Co., the Stanley Works, J. Stevens Arms & Tool Co., Tower & Lyon, Union Hardware Co., the Armstrong Mfg. Co., L. Boardman & Sons, Bruce & Cook, John H. Graham & Co., Atlas Mfg. Co., the Wm. Rogers Mfg. Co., the Standard Tool Co., the Storm Mfg. Co., P. J. Conroy & Co., the Ausable Horse Nail Co., the Cronk Hanger Co., etc., etc. It is a grand commentary upon the value of a journal that can hold houses like these, from year to year.

In the initial editorial announcement of April 10th, there were no boasts, and not many promises made; but such as were made, have been abundantly fulfilled. "The Hardware dealer," it was declared, "needs a journal which shall record new inventions, while reporting the prices prevailing for goods already in the market, and which shall be an exchange for experiences and suggestions by retailers. It should be a journal, also, through which the Hardware manufacturers can readily attract the attention of the jobber and retailer to his wares, and from which the inventor may derive suggestions of new mechanical wants to be filled. Last, but not least, the representative Hardware journal should be written for a national circulation, so that whoever would speak to the trade through it, can hope to cover the whole country. Such is the field which the publishers of *Hardware* have defined for it."

The history of the journal in these nine years that have passed shows that this conception of the purposes and uses of a trade journal have been carried into certain effect.

The chief factor in the fortunes of HARDWARE from the beginning until his lamented death in 1896 was Archibald Paull Mitchell. He was the founder and general manager, and his wonderful personality did as much as any one thing in making the journal a success in those days of uncertainty. The editorial management was placed, at an early day, in the hands of Hawthorne Hill, an accomplished journalist who wielded a graceful pen and was a thorough student of economic and other public questions. He was succeeded by James H. Kennedy, in August, 1891, who remained in editorial control until July 1st, 1899, when he resigned and was succeeded by Henry Hopkins, who had filled the position of associate editor for several preceding years. On the death of Mr. Mitchell, Mr. Kennedy became business manager as well as editor, which position was assumed by Warren C. Brundage, in June, 1899. In this brief resume we have outlined the very few changes which have occurred in the management of HARDWARE.

An examination of the columns of the initial number shows that a wide field was covered in a very able manner and that a variety of subjects was offered for the consideration of the trade. One theme discussed was the pay due the laborer; another was the success of American Hardware in New Zealand; one urged the combination of stoves with the general Hardware trade; there was news as to a combination of exporters; a suggestion as to how goods should be handled for sale abroad; a review of the progress of the ten preceding years; an article on every-day electricity; an article on the lock-jobber; several

Digitized by Google

pages of trade notes ; a department of "New Goods in the Market," profusely illustrated ; a list of recent Hardware patents; a review of the Hardware markets, etc. Surely this was a *menu* sufficient to whet the appetite for the things that were to come. In all its history the purpose of HARDWARE has been to keep in touch with all the developments of the Hardware trade and to record the movements and changes in that trade—a worthy and ambitious purpose, which we feel safe in saying has been carried out.

Dr. W. P. Wilson.

Dr. W. P. Wilson, Director of the Philadelphia Museums and Director General of the National Export Exposition, received his early training through his own efforts and in the common and higher schools of Michigan. His taste for botany and natural history was considerably fostered by a course of study in the Agricultural College of Michigan. At a later date he received a degree from Harvard University, where he was instructor in botany for several years.

He was born in Oxford, Oakland County, in the northern part of Michigan, which was then practically a wilderness forest. The nearest neighbors were tribes of Indians. His early life was spent in farming. At a later date he entered

DR. W. P. WILSON.

a large plant in the West for manufacturing agricultural implements and machinery.

In 1893 he conceived the idea of founding a Commercial Museum with the raw product exhibited by different nations at the World's Fair, at Chicago. He secured the authority of the city of Philadelphia, and succeeded in having donated to the proposed museum the large collections exhibited by nearly every country, especially the Spanish-American countries. Dr. Wilson is a careful worker, and it is through his care and forethought largely that the successful plan of organization of the Philadelphia Commercial Museum has been carried out.

The National Export Exposition is under the direction of the Commercial Institute and Franklin Museum.

Brigadier-General Greely, chief of the United States Signal Corps, has invited proposals for furnishing the army with three electric horseless carriages, and experiments will be carried out with them near Washington. Gen. Greely thinks it will be possible for these carriages to pay out wire promptly between two points so that telegraphic and telephonic communications can be readily opened. If the experiment is successful, carriages will be used for other purposes by the Signal service.—*Scientific American.*

It has been decided that the Fisheries and Forestry exhibit of the United States at the Paris Exposition shall be utilitarian only. An exhibit of natural fish will be avoided, but tinned, preserved and dried fish, and fishing tackle will make the department of Forestry and Fisheries one of the most attractive sections in the United States division at the exposition.—*Scientific American.*

Recent Trade Publications.

MERIDEN CUTLERY CO., Meriden, Conn. Catalogue No. 11 of their finer line of table cutlery, staple goods and novelties of their manufacture.

HOLMES & EDWARDS SILVER CO., Bridgeport, Conn. Catalogue No. 25, covering a large line of knives, spoons, forks, etc.

HAYES PUMP & PLANTER CO., Galena, Ill. Catalogue of agricultural implements.

SAMUEL WINSLOW SKATE MFG. CO., Worcester, Mass. Ice and roller skates, ankle braces, skate sharpeners, etc.

TUCKER & DORSEY MFG. CO., Indianapolis, Ind. Catalogue of Hardware specialties, wooden ware specialties, including saw frames and bucks, alarm tills, towel rollers and racks, stove trucks, etc.

UNION CARRIAGE CO., St. Louis, Mo. Catalogue of buggies, phaetons, surreys, spring wagons, etc.

J. E. BOLLES IRON & WIRE WORKS, Detroit, Mich. Pocket edition catalogue made up from their larger one.

HERMANN BOKER & CO., No. 103 Duane Street, New York. Catalogue of the gun department showing double barrel shot guns, repeating shot guns and rifles, together with trade price list of ammunition, cartridges, shells, etc.

WHITMAN & BARNES MFG. CO., Akron, Ohio. Illustrated booklet of machine shop, mill and factory supplies and mechanical rubber goods.

PARKS & PARKS, Troy, N. Y. Catalogue of Hardware and house furnishing specialties.

COLEMAN HARDWARE CO., Chicago and Morris, Ill. Catalogue of hangers, hinges, casters, sash balances, etc.

Cuban Exhibition of American Wares and Merchandise.

The Cuban Exposition & Trading Co., No. 11 Broadway, New York, has been formed recently to open in Havana an exhibition of American wares and merchandise and also to establish permanently an export commission business. The company, having valuable Cuban trade connections, provides progressive American manufacturers and dealers with the most desirable and exceptional opportunities for establishing an extensive market in Cuba for their wares and merchandise. The company at present are in possession of a fine three-story stone building on Mercaderes Street, which is located in the banking and business portion of the city of Havana, and is especially adapted to the purposes designed, being attractively and suitably arranged according to modern methods and attended by a number of experienced salesmen thoroughly acquainted in Cuba and familiar with the Cuban manner of transacting business, covering all the local requirements and other features of the export trade. Ample space is given for floor room, shelving and show cases, and exhibitors will be provided when necessary with private business rooms and offices, which can be obtained for a reasonable monthly rental, and which would also include a contract for pushing the sale of all goods represented in every part of the island.

The exhibition opens in Havana on the 10th of July at the company's Exposition Building, and it will be found by those interested to be the most effective establishment in Cuba for the perfect development of an extensive business.

Attention is called to their announcement on page 38. The following gentlemen are represented in the company as officers and directors: Edwin B. Hay, president, Washington, D. C.; Pedro Casanova, vice-president ; R. R. Lanier, vice president; C. H. Worthen, secretary; Howard A. Springett, J. H. Grant, E. A. Wright and E. S. Burrows, directors.

COGITATIONS OF A COMMUTER.

It must have been an emissary from "auld clootie," that originally suggested tickling the vanity of the people by placing a mirror on the ferryboat. Just watch the crowd of folks as they meander by, and you will find the homeliest human being that ever wore trousers, the scrawniest old maid that ever cautiously carried her rubbers in her hand bag, the downiest chinned youth that ever wore an up-to-date collar, and the dowdiest old dowager that ever made her son-in-law pass sleepless nights, all move to one side as they pass the mirror in order to gaze upon their forbidding visages in all their naturalness. I sometimes wonder if they expect to find it rejuvenated and made for human association. They surely cannot plead vanity as a controlling motive.

Did you ever sit alongside of one of those self-important individuals, who with one cent's worth of a daily paper in his hands, insists upon spreading out the fourteen columns of two pages in order to read the paragraph here and there which suffices as food for his mental equipment? He will surely shut out most of the daylight from your own reading, almost punches you in the jaw with his erratic movements, firmly believes you are crowding him unnecessarily, though your proportions may be only half of his, wonders why you don't put your package—(which quite appropriately is one of the "zig-zag journeys," wrapped up)—in the basket overhead, and makes himself, and you as well, uncomfortable generally. We all know him.

An open screen door and a woman talking through it, at the Erie Railway restaurant recently, made me think it was a great deal easier to find a man who can talk with satisfaction to himself through any kind of a hat, than it is to find one of the opposite sex, "uncertain, coy," etc., who can talk through the wire of a screen door and feel that she was doing justice to her conversational ability. It doesn't seem as though it had the same effect to tell her husband not to forget to "mail that letter," or "telegraph to mother," without opening the screen door half way. There are always some people who firmly believe a wire screen keeps out the air as completely as a closed shutter, and they would prefer to get acquainted with the "swamp angels with stings and wings" rather than have a screen "between the wind and their nobility."

Of all the heart rending sights that appal our reasoning faculties and blur our visual orbs to sightlessness, is to find some travel-struck idiot lugging around everywhere a dust-begrimed dress suit case of the "has been" or "also ran" order, splotched all over with a dirty lot of foreign hotel and railroad labels, modern "tickets of leave" that are redolent only of compulsory tips. One of these "world girdlers" was on the train the other day, cuddling his grip as though it was a year old baby, and I couldn't help but think how many there are who return from an initial trip abroad, with a reminiscent flavor of tasted vintages, fitly characterized by this chromatic assortment of poor printing adorning a poorly made grip that must have "cost a guinea, in dear old Lunnun, don't yer know."

Did you ever try to get your commutation ticket with just a little more alacrity than usual? If the dealer in monthly pasteboards happens to feel a little off, how he can exasperate you, knowing you've got to grin and bear it until he gets good and ready. We've got a slow and easy specimen at our station, whose fingers are all thumbs and who takes forever and a day even to hand out a time table. He was built to be a first-class right bower to a consumptive undertaker, a job where the boss would have heart failure if he hustled any harder than three knots an hour. The other evening I kept a hack, holding another passenger, waiting for me to get my new "set of dates." I told Cabby I'd "be only a minute," but I was mistaken. Would you believe it, because I said "Heigh there; get a move on," or words to that effect. he moved as lively as a plumber on a catch job, trying to make a half day's time out of a quarter day's work. I thought he must have learned his business of ticket selling at the box office of a church fair. I got my ticket before bed time, but the other passenger in the waiting hack, said "he guessed he'd walk home as he was afraid he'd be locked out;" of course, Cabby looked to me for his lost fare. He's looking yet.

What do you think of the man who believes the seat opposite was made to put his dirty shoes upon? I suppose we've got to call him a man, although I think if he'd been sold the other day with that job lot of Central Park animals, he would have made the Zebu blush. To sit beside one of this kind of cattle and have him reach over and turn a seat so he could plant his muddy feet on the plush cushions, makes me think his door step at home is destitute of a foot scraper, and free from a door mat. I fail to have any patience with this inconsiderate tribe and am constantly trying to restrict their privileges. I think if any mode of conduct gives away the neglected amenities of a man's early life, this single dirty feature of a lack of decency will do it promptly. May his clothes sit loosely on his lazy form, and be as full of an antique shine as though they had been polished with Enameline!

Did you ever notice what a difference exists between the varying methods of the conductors, in their relations with the passengers? I have often wondered what particular faculty some of them possessed to receive the dignities so important a personage bears upon his manly brow. Even in the collecting of tickets and punching of the pasteboard, the styles are many and various.

One of the open-and-above-board kind, the kind that would succeed in any line of business, opens the door and slams the other door at his right, so that you know he's "on deck"; possibly he adds the word "tickets" in a firm, no-fooling tone of voice, that says, "Look alive now, and don't keep me waiting," then starts through the car, grabs the commutation ticket and gives it a punch, doesn't seem to care where the punch lands, so long as it leaves a hole, which it does; then zig-zagging through the car he corralls everything that comes his way, from the "ten trip" sample to the Siamese twin excursion ticket. This particular specimen has a jaunty, sporty air; you feel confident he reads the details of the latest prize fight—I beg Chief Devery's pardon, I mean boxing match—he can tell you if Brooklyn still leads or not, knows the name of the winning yacht almost as soon as the Associated Press, in fact he may be considered quite up-to-date. Knows all the lady commuters so he can pass the time of day, even gets off at the station and assists in the descent of Venus. He's one of the approachable kind, we all know him. If you left an umbrella in the car, he's the man you would ask about it; or you would seek the correct time, the cause of the inexcusable detention, or any of the ordinary queries, only from our genial friend, this affable, genial, breezy conductor.

Current Comment From Our Contemporaries.

The *American Artisan* calls attention to what ought to be a self-evident fact: "The business world recognizes the fact that our colonial administration and our consular system should be divorced from politics. The men who are sent out to administer justice and collect duties in our new possessions should have a longer tenure of their offices than is accorded by the shifting changes of American politics. The value of a consular agent to the commercial world increases with each succeeding year, and it is folly to recall a man just as his real usefulness is beginning and replace him by another man whose principal qualification for finding opportunities for the furtherance of American trade lies in the fact that he delivered the delegates in his primary district."

Farm Machinery takes an opportunity to give some of the dealers' associations some good advice: "It matters not how energetic and efficient the officers of your association may be, their efforts will fall short of the best results if the members do not keep alive to the association's interests and lend their assistance. Because a member has no grievance of his own to report is not grounds for inactivity. So far as the association undertakes to look after the interests of individual members, just that far each member is interested in every other member's business affairs, and it is not only his privilege, but his duty to call a brother dealer's attention to any irregularities whether these directly affect his own business or not."

The Hardware Trade calls attention to the fact that in Port Huron they do their business in the evening. "It is common, these progressive days, to read of resolutions by retail merchants to close stores evenings, but it is rare that the backward step is taken from closing to opening. This has occurred at Port Huron, Mich., however, where after ten years of evening closing, the merchants have decided to keep open store every evening. The reason given is that some of the smaller stores on the outskirts keep open, and for protection the business center must follow. Better organize and keep shut. No large store can afford to keep open evenings because a small store does. It isn't necessary on the ground of protection to self-interest."

The Iron Trade Review thinks a late "new idea" is a good thing. "The proposition under consideration for the manufacture of billets from old steel rails, at the McKenna mill for re-rolling rails, at Joliet, Ill., has suggested further possibilities in the use of re-worked material. Under the present scarcity of steel billets—a condition that is not likely to be changed in the near future—any augmentation of the supply by converting what has outlived its usefulness into a new and merchantable form, will be just so much relief to a strained situation."

The Metal Worker in regard to anticipating any lower prices this year says: "Under conditions, brought about wholly by the operation of the natural laws of supply and demand, it was inevitable that the prices of all goods of iron and metal manufacture should be marked up to correspond with the advance in the raw material. Thus nearly all the materials and supplies used in the trade, represented by this journal, cost from 50 to 100 per cent. more than they did at this time a year ago. Furthermore, judging from present conditions, there is no likelihood of lower prices this year, while on the other hand, they may go still higher as scarcity develops in certain lines. There is no sign of any check in the consumption of products and stocks of both raw materials, and manufactured goods are generally light throughout the country. The second half of 1899 promises to show at least an equally large volume of business with the first half of the year."

The New York Tribune fully belives that "In this country there is going to be competition for every monopoly, partial or complete. The more it advances prices to the detriment of customers the more certain it is that somebody will get into the field to fight. It is always a costly operation, but in the end the big monopoly has to pay the cost. The New York Central will carry for half a century or more a big annual interest charge, because some persons thought it would pay to build the West Shore and make a fight against the trunk line combination. Whether they gained much or nothing by that venture, they were able to drive the great railroad, with Mr. Vanderbilt at the head of it, into a bargain which has cut down the dividends of the New York Central ever since. The industrial combinations are not less vulnerable because they can work more in the dark. Every one of them which rules prices above the cost of outside production is liable to have a merciless competitor on its heels any day, and at times one which cannot be bought off as the West Shore was by the Vanderbilts and the Spreckels concern by the Sugar Company."

The *Stoves and Hardware Reporter* sees a big trade possible in our new possessions: "If any additional evidence were needed to prove that trade follows the flag it could be found in the remarkable increase of American exports to the islands which recently came under the benign influence of the Stars and Stripes. A few theorists still insist that commerce pays no attention to flags—but they are the same theorists who wearied their readers with so much drivel about the esprit de corps of the Spanish navy."

Interchangeable System in American Shops.

An important factor in America's industrial progress has been the extended application of standards. There are standard dimensions for materials; standard sizes; parts, and capacities of machines; standard gauges for close measurements; standard system of inspection and testing, and others. These different forms or methods of standardization have usually originated or developed in commercial and manufacturing activities, independent of any governmental instigation or control. This principle of standards, as carried out in individual American shops and factories, has developed the well-known "interchangeable system" of construction, which, by forcing attention and care upon little things has further specialized operations, and has stimulated the development of special machines to perform these operations to the end that the cost of production has been greatly reduced. Such standardization inside and outside of the shops also aids rapidity of production, inasmuch as standard material can be kept in stock to form standard parts or to complete standard machines, apparatus, or goods, all before these are even ordered. These results,—cheap production and prompt delivery,—in connection with a high grade of product, to which these methods contribute, are most powerful factors for securing and maintaining trade. Such influences are particularly active in America to-day.—[*Cassier's Magazine* for June.]

The Council of Rangitikei County, New Zealand, have placed an order with the Berlin Iron Bridge Co., of East Berlin, Connecticut, for a Highway Bridge consisting of a single span of 204 feet, designed to carry a distributed load of 1,500 pounds per lineal foot, or a road engine weighing forty tons. In transmitting this order the chairman of the Council says: "As far as I know this is the first order of the kind sent to the United States, and the experiment is being watched by other local Boards." The bridge will be a pin-connected structure on account of the ease and facility with which this class of construction can be erected in the field.

The greatest extravagance is the very height of economy—in road building.—*L. A. W. Bulletin.*

A good public road is every man's private joy.—*Ex.*

REVIEW OF THE MARKETS.

Hardware: Business in anticipation of an active fall trade, is being rapidly adjusted on a basis of the advanced prices now prevailing in all branches of the industry. There will be less apprehension about the future during the next six months' business, less anxiety as to the receipt of goods ordered, and less speculation in reference to ordering an unnecessary over stock. Changes in price may not be of the radical character so prevalent in the spring, which became rapid and persistent; but will be found more regular and more nominal in extent, and less discouraging as to the possible outcome. Goods are being bought freely by consumers at satisfactory profits, based on advanced costs; and this has a tendency to make the dealer less clamorous for an impossible 5 per cent. extra discount, which he would like to obtain but cannot.

Wire Nails: The dealers having grown accustomed to an advance almost monthly, in this leading staple, have been anticipating something of the kind to inaugurate the current month, but the change in cash discounts seems to fill the bill for the present, and current prices, with that exception, remain as previously quoted, and are as follows:

To jobbers in carload lots	$2.35
" in less than carload lots	2.37½
To retailers in carload lots	2.45
" in less than carload lots	2.55

Terms: 30 days from date of invoice, net cash, f. o. b. Pittsburg.

New York prices are represented by the following:

To retailers, carloads on dock	$2.60
" less than carloads on dock	2.75
Small lots from store	2 85

Cut Nails: The market for cut nails has been perceptibly strengthened by a good demand which continues in very satisfactory shape. Prices have been advanced 10 cents a keg and the following represents the market. Quotations now made are f. o. b., Pittsburg as follows: Freight being added to make a net price delivered at destination.

To jobbers in carload lots	$2.10
To " in less than carload lots	2.15
To retailers in carload lots	2 20
To " in less than carload lots	2.35

New York business is active under the advanced prices, being quoted as follows:

Carload lots on dock	$2 25
Small lots from store	$2.50

Barb Wire: A good trade still continues the feature in the barb wire market, and the quotations are held firmly at the prices named in our previous issue, f. o. b., Pittsburg.

To jobbers in carload lots, Painted	$2.45
" " Galvanized	2.95
" in less than carload lots, Painted	2.47½
" " " " Galvanized	2.97½
To retailers in carload lots, Painted	2 55
" " Galvanized	3.05
" in less than carload lots, Painted	2 65
" " " " " Galvanized	3.15

Smooth Wire: Factories are gradually catching up on old orders and new orders are being booked for the coming season, the market being in healthy condition. Previous quotations remain without change, as follows, f. o. b., Pittsburg:

To jobbers in carload lots	$2 20
To " in less than carload lots	2.22½
To retailers in carload lots	2 30
To " in less than carload lots	2.40

The charge for galvanizing is 50 cents on sizes from 6 to 14 inclusive; on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Stone and Market Wire: A gradual stiffening in prices is almost the weekly feature of an active market, the market remaining in anything but a full supply of leading goods. The following may be named as approximating current quotations of leading manufacturers.

	Discount per cent.
Bright or Annealed, Nos. 6 to 16	70 to 70 and 5
Coppered, Nos. 6 to 16	67½ to 67½ and 5
Galvanized, Nos. 6 to 16	67½ to 67½ and 5
Tinned, " 6 to 16	70 to 70 and 2½
Stone, Bright or Annealed, Nos. 10 to 26	72½ to 75
" " " " 27 to 36	75 to 75 and 10

Augers and Bits: The advanced prices determined upon by the makers of this line of tools, have been steadily maintained and manifest no weakness as stocks are by no means large. The following quotations represent the present condition of the market.

	Discount per cent.
Common Double Spur Augers and Bits	70 to 70 and 5
Nut and Boring Machine Augers	70 to 75
Car Bits, 12 Inch, Twist	60 and 10 and 10 to 70
Jennings' Pattern Auger Bits	60 and 10 and 10 to 70

Wood Screws: At a meeting of the Associated Screw Manufacturers, held on June 28th, the printed discounts on wood screws were agreed upon as indicated in the following announcement of the Russell & Erwin Mfg. Co., New Britain Conn., and New York.

June 28, 1899.

To the Hardware Trade: Until changed by us, our discounts for wood screws will be as follows, from our revised list prices of November 10, 1898, (page 2):

Flat Head Iron	82½%
Round and Oval Head Iron	80 %
Round and Oval Head Piano, Unpolished	80 %
Fillister Head Iron	80 %
Flat Head Brass	77½ & 10 %
Round and Oval Head Brass	72½ & 10 %
Flat Head Bronze Metal	72½%
Round and Oval Head Bronze Metal	70 %

Flat head iron screws, blued, 5 per cent. advance on net. We hereby withdraw and cancel all discounts and terms on screws made prior to date of this circular. Unusual assortments or excessive quantities of single sizes subject to special quotations. All orders subject to our ruling rates at date of shipment. Terms cash.—No prices guaranteed.

Yours respectfully,

RUSSELL & ERWIN MFG. CO.

Hobart B. Ives & Co.—Under date of July 1 Hobart B. Ives & Co., New Haven, Conn., announce the following discounts on Hardware of their manufacture, as shown in their 1899 catalogue, terms 60 days net, less 2 per cent. discount for cash in ten days:

	Discount. Per cent.
Window Ventilating and Mortise Door Bolts	62
Sash Locks, Wrought Steel, also with Bronze Metal Knob	62½
" " Wrought Bronze and Brass Metal	60
" " Cast Iron, also with Bronze Metal Knob	66⅔
" " Cast Iron Bronze and Brass Metal	65
Window Stop Adjusters	25 and 5
Sash Lifts and Shutter Bars	50

Registers and Ventilators: The manufacturers of Hot Air Registers under date of June 23d, announce the following discounts of Hot Air Registers and Ventilators. These discounts apply to the revised price list of 1899. The discounts quoted are intended for the Eastern territory, somewhat higher quotations being named for the Middle West and Pacific Coast sections.

Black Japanned Registers, Ventilators, Faces and Borders	discount,	40%
White, " " " and Faces	"	30%
Bronzed Finishes in imitation of Gold, Silver, Copper or Bronze.	"	40%
Nickel Plated	"	40%
Electro Plated in Brass, Bronze, Copper or Oxidized Silver	"	40%
White Porcelain	"	30%
Solid Brass and Bronze Metal	"	25%
Pedestal Registers	"	25%
Carved Ceiling Ventilators for Churches	"	30%
Dampers	"	40%
Chandelier Ventilators	"	30%
Summer Pieces	"	40%
Screens for Steam Pipes	"	50%
Slate Border Frames	"	50%
Soapstone Border Frames	"	30%

Terms 60 days, or 2 per cent. discount for cash in ten days:

Pumps: The market for cistern and kitchen spout pumps is affected by the increasing quotations on raw material. F. E. Myers & Bro., Ashland, Ohio, are now quoting 50 per cent. discount, f. o. b., Ashland.

Steel Wedges: The advanced quotation made July 1 on steel wedges is as follows: f. o. b. Pittsburg, square head wedges, oil finish, $3.70, axe finish $4 per 100 pounds.

Pruning Shears: Revised discounts on the line of pruning shears made by J. T. Henry Mfg. Co., Hamden, Conn. have been changed as follows:

Pruning Shears	50 and 5 per cent.
Orange	50 and 30 "
Grape	50 and 10 "
Tree Pruners	75 "

"Just the Time"

for renewing Porch Furniture, Floors, Front Doors, Furniture, Wood Work, etc., with our brilliant

JAP-A-LAC
IN COLORS

It produces a smooth, hard brilliant finish, and is as lasting as Japanese Lacquer. Samples of finished wood showing the following colors mailed free: Oak, Walnut, Drab, Malachite Green, Ox Blood Red, Spruce, Cherry, Mahogany, Black, Yellow, Ivory and Natural.

Write for our prices and dealers' discount.

The Glidden Varnish Co., Cleveland, Ohio, U. S. A.

Steel Crow Bars: Under date of July 1 steel crow bars have been advanced, the quotation of 3½ to 3¾ cents base, f. o. b. Pittsburg, representing the market.

Petroleum Faucets: Prices on iron petroleum faucets have become considerably firmer, the present quotation being stated at 70 to 70 and 10 per cent.

Picks, Mattocks, &c.: These goods have been advanced under date of July 1, and are now held at 60 and 10 to 66⅔ per cent., in accordance with specifications required.

Bench and Fancy Planes: Prices have become firmer in this line of goods, and the market in a general way is represented by the following discounts:

Bench Planes, 1st quality	45 to 45 and 10
" " 2d "	50 to 50 and 10
Fancy "	40 and 5

Yale & Towne Mfg. Co., Nos. 9 to 13 Murray Street, New York, have revised their list prices on locks, latches, and miscellaneous Hardware, so as to substitute them for those in their price books Nos. 1 and 2. Revised prices on padlocks have also been made, all of which date from June 15, and render unnecessary the addition to invoices of the two ten per cent. advances announced in previous circulars. Regular trade discounts still apply to these sections of their price books; other list prices, not referred to above, and which have not yet been changed, will be subject as usual to the advances on net, as previously announced, with the exception of door checks, padlocks, cabinet and trunk locks and Yale night latches.

Cordage: While quotations at present are liable to change without notice, the market is in a healthy condition.

The following quotations may be said to represent the market at the present time.

Manila, 7-16 inch and larger	per pound,	10	to 10½ cents
" ⅜ inch	"	10½	to 11 "
" ¼ and 5-16 inch	"	11	to 11½ "
Sisal, 7-16 inch and larger	"	8¼	to 8½ "
" ⅜ inch	"	8½	to 9 "
" ¼ and 5-16 inch	"	9¼	to 9½ "
" Lath Yarn	"	7¾	to 8 "

The price of jute rope is 5½ cents.

Binder Twine: The market for binder twine is at the present time fairly quiet, and prices remain about the same as previously quoted, being represented by the following:

White Sisal, per pound	9½ cents
Standard, per pound	9½ "
Manila, per pound	10¼ "
Pure Manila, per pound	11 "

Linseed Oil: Prices without change. The Dean Linseed Oil Co. quote as follows:

In lots of less than 5 barrels	40 cents per gallon.
In lots of 5 barrels or more	39 cents per gallon.

The five barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

Bright Wire Goods: The price list on these goods, established a short time since, failed to meet the approval of the trade which have become accustomed to larger discounts. The following new list has been agreed upon to supersede it, the trade discount on which as printed is 80 per cent. The new price list went into effect July 1.

THE COLUMBUS TRADE.

The time is here for a falling off in trade and while we are not rushed as we have been for the past six months, trade is still brisk. As soon as the wheat and hay harvest is over there will certainly be a few weeks of dull trade before the fall trade begins in earnest. And we will not regret

Digitized by Google

it as it will give us an opportunity to get in shape to take care of what we believe is going to be the best trade we have had for many years. Building in most all cities and towns is far ahead of what it has been. But few vacant business rooms are to be found in our city. Real estate transfers are numerous and at better prices. In fact every branch of business is in a most prosperous condition. Prices remain firm and a number of advances have taken place since your last issue. It looks very much like another advance on wire nails, and we fully expected notice on July first, but so far have not received it.

This is the week of the World's Fair in Columbus. We refer to the Elks' Street Fair, which without doubt will be the greatest street fair that has ever been held so far. Six squares of booths, built of lumber, on both sides of the street. Over fourteen carloads of boards were used. The parade on the Fourth of July was over five miles long and well worth seeing. Columbus never does things on the half shell, but must be at the top or we are not happy.

THE SMITH BROS. HARDWARE CO.

THE CLEVELAND TRADE.

We shall feel the effect of over-purchases of jobbers and retailers and can determine the result of it by September first.

The advances have continued so long that purchasing freely has continued up to July first, and many goods are yet to be delivered to close up the season's contracts. It is difficult to determine the aggregate amount of such purchases, but it is large and will supply the demand for consumption in many lines of goods for some months. Manufacturers will not receive new orders until past purchases are disposed of. This may materially decrease their sales and cause anxiety. If it does not, we shall have passed safely over the first half with a favorable outlook for the second.

Manufacturers who are compelled to contract for future supplies, or close their mills, must take the chances. It would be more difficult for them to get orders for future delivery, as jobbers will undoubtedly hesitate in making contracts at present prices. The custom of taking advanced orders is likely to be modified by these conditions.

The first half of the year 1899, has closed with prosperity everywhere evident; advances in other lines may be expected, as wage-earners now have money to spend, which will greatly increase the demand. The Southern Hardware jobbers have had a jolly time; such gatherings cement friendship and a union. The Northern members of the National Association owe a vote of thanks to *Hardware* for its manner of publishing the proceedings.

Advance in Hardware equals the advance in steel. Trade seems to increase with the approach of July; the howl of the anti-imperialists has no influence, but to encourage the rebels to fight against the flag. Every step in progress creates croakers, but "the Government at Washington still lives."

THE LOCKWOOD-TAYLOR HDW CO.

THE DAVENPORT TRADE.

Hot July weather, the usual annual vacation season, and the week of the Glorious Fourth, are conditions that are not entirely conducive to the benefit of trade. Still there is an unusual demand for staple goods, especially barb wire and nails, for this season of the year; prompted, no doubt, by the prospects of further advance in price of these commodities. Screen wire cloth is scarce; jobbers who chance to have a stock in store have no difficulty in realizing a handsome profit above early contract cost. The demand for poultry netting continues; notwithstanding the recent sharp advances in field fencing, the sales are large. Woven wire fencing has come to stay; it is used largely instead of barb wire and also in replacing the live fences, more particularly the osage orange, much of which was destroyed by the extreme cold weather last winter. Binder twine stocks are practically exhausted, and the late buyers are experiencing some difficulty in getting enough to supply their wants; the exceedingly heavy crops will require much more twine than usual to the acre. Grain crop prospects could not be better; the hay crop, now ready for harvest, is unusually large, and corn is doing well.

The new terms of the American Wire & Steel Co. of 30 days net went into effect on the first inst., and we hope that this new departure will enable the jobbers to shorten their terms on these and many other lines of goods. The nearer the wholesale dealer gets to cash transactions, both in buying and selling, the better it will be. There will be less risk in credits and less unbusinesslike competition and very much less rumors of cutting prices, better collections, less failures and consequently smaller amounts to charge to loss accounts. SICKELS, PRESTON & NUTTING CO.

THE PITTSBURG TRADE.

June was not so far ahead of June, 1898, as the earlier months, principally because that month a year ago was a good one. Spring trade holds on well into the summer this year, and the usual dull period of midsummer will be quite short this year. In all manufacturing towns the demand for goods keeps right along; in the country districts there is the usual lull.

Labor scales are now in process of adjustment for the year beginning July first and will no doubt result in increased wages. We want to see labor receive its full share of the prosperity, for every extra dollar they receive eventually finds its way through all branches of commerce and thus helps along the good times.

From all we can read and hear, prices will hold well into next year at the advances so far made and some goods higher. The product of the big steel plants is contracted for running over into 1900 at highest prices now ruling, and under these conditions it will be a necessity for Hardware manu

Digitized by Google

facturers to hold up prices, as their raw material will cost them more than double that from which this spring's stock was made. LOGAN-GREGG HARDWARE CO.

THE CHICAGO TRADE.

Prices have been withdrawn on a large number of articles in the Hardware line, dating from July first. Quite a number of lines of goods have been advanced from 10 to 20 per cent. during the last ten days, and now that we are safely past the first six months of 1899, it certainly would seem as though the increased rates for Hardware have not only come to stay for the Fall trade, but in addition, the chances are that some lines of goods would be still further advanced.

We have never billed so many goods in June, have never worked our force so many nights in June, and never had so many orders in hand for Fall shipment.

Crop prospects are good, collections are good, demand for goods excellent. We have had many inquiries for prices on stove boards, axe handles, skates, sheet iron, Acme pipe, Cutmore axes, coal hods, mica, scoops, shovels and other Fall goods.

Our traveling salesmen report their retail customers in excellent spirits, hopeful of a splendid trade during the next three months and confident that their business for our house will be larger than ever.

WELLS & NELLEGAR CO.

THE MINNEAPOLIS TRADE.

Business continues good here; don't think any one has any just cause for complaint, and dealers as a rule are taking advantage of the advances as made. There is considerable building, and while now and then we hear of some one who thought of building has decided he will not on account of the high prices for labor and material, we believe the very fact that business in all lines is so much better than it has been makes it possible for many people to build that otherwise could not, that it more than offsets those few who think perhaps there will be a better and cheaper time, which we believe will not be the case for a number of years to come.

The conditions of the crops as a whole are most favorable. This is conceded by every one who is in a position to judge; the weather conditions now are fine. If nothing unforeseen happens, we will have one of the best crops ever known, with altogether likely fair, if not high, prices. The Northwest has been very prosperous for some time now; with such a crop as is anticipated we ought to be assured of good business for some time to come.

Collections are generally fair, but with higher prices and better business it is taking more money to handle the trade.

W. K. MORISON & CO.

HARDWARE costs only One Dollar a year.

The Evolution of the Blast Furnace.

In an interesting paper read before the Philosophical Society of Glasgow Professor A. Humboldt Sexton gave some interesting statistics of the gradual development of the iron industries and the use of the blast furnace. Iron originally, he said, was undoubtedly prepared in the state of malleable iron in low hearths, the furnaces being exceedingly simple, in many cases consisting only of a low cylinder of clay in which the pure oxides of iron were heated with charcoal. Furnaces of this type had been in use from the very earliest times, traces of them being often found on ancient Egyptian sculpture. In different countries development had taken place at very different rates, so that there were many places at present in which primitive methods were still in use. About the twelfth or thirteenth century the hearths were increased in size, the result being that a higher heat was attained, and the carbon combined with the malleable iron produced for the first time cast iron. This might be taken as the start of the blast furnace. The first blast furnaces were fed with charcoal, and therefore were always planted where wood was abundant. The first in Scotland was erected in Ross-shire at Letterewe in 1607. Later furnaces were put up on Lochfyne side and at Bonawe on Loch Etive. The consumption of charcoal was so great that it looked as if the process would have to be abandoned, but in 1665 Dudley suggested the use of coal. It was not, however, till 1735 that Abraham Darby made this a success at Coalbrookdale. The first coke furnace in Scotland was erected at Carron about 1760. The furnaces were very small. In 1786 the Clyde Iron Works were established, and the furnaces were built larger. Here, in 1801, Mushet discovered blackband ironstone. In 1828 Neilson applied the hot blast. This might be taken as the commencement of modern iron smelting. —*Ironmongers' Chronicle.*

A belt recently failed at the works of the Worcester Wire Co., Worcester, Mass., after a continuous service of nearly seventeen years. It was 31¼ inches wide, originally ½ inch thick, worn to about 7-16ths, ran at 4,525 feet per minute, and was transmitting about 300 horse-power at the time of its failure. It had failed twice within two weeks, showing that it had reached its limit, the fracture showing old and poor. The section was approximately 14 square inches. The working force of the belt was about 2,188 pounds, giving a working force per square inch of section of 156 pounds and of about 68 pounds per inch width.—*Exchange.*

Hardware Dealers.

Stanley's Improved Plumbs and Levels.
All our Levels have the "HAND-Y" feature, rightly so called.
And only PROVED GLASSES are used.

In climbing ladders, walking on stagings or on the frame of a building, this form of the Level gives a feeling of steadiness.
Proved Level Glasses.

Made of extra thick tubing. Each Level Glass is marked at its highest, or crowning point, by two indelible lines; and each Plumb Glass with a single line.

Colonial Markets.

British colonies furnish a market for more than one-third of Great Britain's surplus products, and supply one-fifth of the material which she purchases from abroad. Of her total domestic exportations in 1897, which amounted to 234,220,000 pounds sterling in value, 80,675,000, or 34.4 per cent., went to her colonies, and the percentage of her exports which the colonies takes appears to be gaining. A recently published statement by the *British Board of Trade Journal*, just received by the Treasury Bureau of Statistics, shows that of the total exports of British produce and manufactures from the United Kingdom, 31 per cent. went to the British colonies in 1895, 35 per cent. in 1896, and 34.4 per cent. in 1897.

On the other hand, Great Britain annually purchases from her colonies about $450,000,000 worth of their productions, the imports from the British colonies into the United Kingdom in 1895 being 95,530,000 pounds sterling, in 1896, 93,208,000 pounds sterling, and in 1897, 94,019,000 pounds sterling. Naturally, the bulk of her importations from the colonies is articles of food and raw materials for use in manufacturing. Food products in 1897 were 34.711,000 pounds sterling of the 94,011,000 of importations from the colonies into Great Britain, while raw materials for textile manufactures imported from the colonies amounted to 26,098,000 pounds sterling, other raw materials to 25,314,000 pounds sterling, while manufactures imported from the British colonies were only 7,896,000 pounds sterling. Thus the people of the United Kingdom in buying the food products and material for manufactures for which they are compelled to send money abroad, are now able to expend over $400,000,000 annually among their own people in other parts of the world, people who represent British blood and British capital; for it is asserted on high authority that probably $2,000,000,000 of British capital is invested in various ways in the colonies, and the purchases in those markets by the people of the United Kingdom thus contribute to the prosperity of her own citizens whose money is there invested.

In other countries which have Colonial possessions, a considerable percentage of their commerce is also with the colonies, though not to as great an extent as that of Great Britain. France purchased 10 per cent. of her total imports from her colonies in 1897; Holland purchased 14.7 per cent. of her imports from her colonies in 1897, while the proportion which the German colonies furnished of the imports into Germany is comparatively small, in most cases the colonies being new and little developed.

THE WORLD'S GREATEST FILE WORKS.

ESTABLISHED 1842.

"By their works ye shall know them."

PLANT OF THE ARCADE FILE WORKS AT ANDERSON, IND., U. S. A.

BACK of an Arcade File stands the most complete and modern file manufacturing establishment in the world, directed by master minds, originators of a distinctly improved product, sold entirely on its merits, the modern plant insuring best quality. Back of an Arcade File stands this guarantee, "that an Arcade File will cut faster and wear longer than any other file made," and as an "earnest" of this guarantee, the Arcade File Works will send to any responsible Hardware Jobber, Wholesaler or Retailer, one dozen Arcade Files, to become the property of the receiver or returned at our expense if the guarantee is not fully borne out in every particular.

There are new points worth knowing about Files, and the best information is condensed into a neat little pocket volume which we will send free to readers of "Hardware" while they last. Ask for "Practical Talks on File Work," and perhaps you would like to know about prices.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Centreville, Tenn.—Craig, Son & Co.

Clarksville, Tenn. — The Elder-Conroy Hardware Co. has been incorporated by M. W. Elder, J. Hanrally, C. A. Welch, and J. M. Donnett; general merchandising. Capital stock $40,000.

Glenville, O.—W. J. Burgess.

Lewiston, Me.—The A. F. Leonard Co. has been organized at Augusta for the purpose of dealing in all kinds of agricultural implements, etc., with $10,000 capital stock of which nothing is paid in. The officers are: President, D. E. Bowman, of Waterville; treasurer, C. A. Knight, of Brunswick.

Madison, Me.—L. O. Cobb.

Newark, N. J.—Roe & Conover have incorporated; principal office, No. 200 Market Street. Manufacture and deal in Hardware. Capital $250,000. Incorporators: Isaac F. Roe, Lloyd S. Reber, William S. Roe, all of Newark, N. J.

Newark, N. J.—The Hardware Supply Co. has been incorporated by Herman H. A. Schmidt, Anton F. Muller, and Horace C. Grice, to deal in Hardware. Capital stock, $25,000.

Otego, N. Y.—A new Hardware firm, composed of W. H. Lines, C. E. Morrell and Ralph Wait, have begun business.

Rockland, Me. The Lamson Hardware Co. has been incorporated by F. I. Lamson, Ada L. Lamson, F. A. Lamson, J. M. Lamson, and C. E. Miserrey; Hardware and ship chandlery. Capital stock, $50,000.

Changes and Improvements.

Baltimore, Md.—The old ship chandlery firm of Loud, Claridge & Co., No. 119 South Gay Street, is retiring from business.

Bay City, Mich.—Hohes & Welch, dealers in Hardware and second-hand goods, have dissolved partnership. Mr. Hohes will continue.

Beardsley, Minn.—C. A. Prevey, Hardware, etc., succeeded by Wright Bros.

Buffalo, N. Y.—The Ballentine Hardware Co., of Warsaw, store building is being altered.

Burt, Iowa.—McDonald, Richards & Nafus, Hardware, etc., succeeded by Staley Bros.

Chattanooga, Tenn.—The Vance Hardware Co. have awarded to Contractors Cox & Rider the contract to build an iron-covered warehouse in the rear of their store on the west side of Broad, between Eighth and Ninth Streets.

Cumberland, Md.—The transfer of the business of the Cumberland Hardware Co. to Archibald C. Willison has taken place. Mr. Willison, who was president of the company, recently purchased the interests of the other members of the firm and will henceforth conduct the business individually.

Dolgeville, N. Y.—Norris W. Burrows has sold his entire stock of Hardware, stoves, etc., to W. H. Faville, preparatory to moving to Dispatch, N. Y., where he will open a similar store.

Eau Gallie, Fla.—Albert B. Bennett, Hardware, closing out.

Geneva, N. Y.—Dorchester & Rose, the largest Hardware dealers in this city have purchased the Franklin Hotel property, which they will convert into a large wholesale and retail Hardware store.

Hope, Ark.—J. P. Duffie, Hardware, sold out.

Humboldt, Kans.—Wm. Holtschneiner, Hardware, sold out.

Jacksonville, Fla.—The S. B. Hubbard Hardware Co. believes in good buildings and large stocks of goods. Only a few weeks ago the store was enlarged by adding another room on the south side. Now work has begun on the warehouse on Forsyth Street, south side, between Main and Laura Streets, to enlarge it by adding two more stories, which will make it four stories, not including the basement.

Jackson, Minn.—J. L. & E. L. Thompson, Hardware, succeeded by G. W. Priest.

Jasper, Tenn.—Havron Bros., Hardware, succeeded by Havron Bros. & Woods.

Keithsburg, Ill. — Stoutenburg Bros., Hardware and stoves, will sell this business.

Knoxville, Tenn.—Work will soon begin on the new McGhee building on Gay Street. The new building will be four stories in height and will have a frontage of seventy-four feet. Arrangements have just been made for the occupancy of the block by the George Brown wholesale Hardware house. The entire building will be used for its salesrooms. Besides this building the Geo. Brown people will occupy the Betterton building, the five-story block at Lucky and Betterton Streets, on the Southern railway. This will be used for warehouse purposes. This, with the Gay Street block, will give the firm twenty-seven floors of space, the same now occupied, but in a much more convenient location for the transaction of the large business. The front of the McGhee block will be one of the handsomest on Gay Street and the location being right in the wholesale district, will make it one of the most valuable properties on Gay Street. The new building will cost, completed, about $20,000.

Lansing, Mich. — The Porter stock of Hardware has been sold to Paul Dunham of North Lansing.

Marion, Ohio.—S. S. Fox & Co., Hardware and stoves, succeeded by Marion Department Store Co.

McDanields, Ky.—E. Dockery, Hardware and implements, style now W. E. Dockery & Son.

Somerville, N. J.—John M. Whitenack & Co is the name of the new firm that has taken possession of the Hardware store formerly conducted by George O. Hoadley.

Springfield, O.—James Wood & Bros. have purchased the Hardware stock of the firm of Donnelly & Wood, who assigned recently. They have reopened the store and are now ready for business.

Stark, Kans.—Coverdale & Lowe, Hardware, dissolved. Succeeded by J A. Lowe & Son.

St. Albans, Vt.—Early next fall C. H. Hale will move his Hardware business from its present location at No. 159 Main Street to the building owned by C. H. Morton just south of Merritt & Pease's store.

St. Bernier, Ind.—John H. Justice, Hardware, sold out.

Valley Stream, N. Y.—L. E. Cuinet has sold out his coal, feed and Hardware business to Hamilton & Co. The new firm have leased the store property and taken possession.

West Chicago, Ill.—Jas. Campbell, Hardware, sold out.

Wingham, Ont.—Mr. Bugg, the purchaser of James Duffield's Hardware and tin business, is now in possession.

Business Embarrassments.

Buffalo, N. Y.—Henry P. Grimm, the Hardwareman, has filed a petition of voluntary bankruptcy. The petitioner gave as his liabilities $9,007.32. He has secured claims amounting to $5220 and unsecured $3,053 05. His assets amount to $3,921.90, of which he has real estate valued at $1500.

Camden, S. C.—J. B. Wallace, Hardware, reported to have made an assignment.

Sturgeon, Mo.—The Hardware firm of Owings & Kennedy have filed a voluntary petition in bankruptcy. Assets, $3000; liabilities, $4000 estimated.

Fires in Hardware Stores.

Langford, N. Y.—Louis Steele's Hardware store has been destroyed by fire.

Laurel, Del.—S. F. Smith, Hardware, stock damaged by fire at a loss of $8000, building damaged to the extent of $8000.

Livermore Falls, Me.—W. F. Hutchinson & Co.'s Hardware store has been destroyed by fire.

Quebec, Canada.—The establishment of P. T. Legare, dealer in agricultural implements, carriages and bicycles, has been completely destroyed by fire.

Burglaries in Hardware Stores.

Bridgeton, N. J.—Joseph H. Elmer, cutlery.

Grafton, Ill.—Ripley Hardware Co., $500.

Hay Springs, Neb.—S. Dewey, $200.

Hopkinton, Iowa.—R. G. Crawford, cutlery.

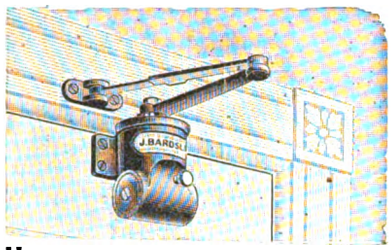
Kearney, Nebr.—W. E. Jackway, revolvers.

Lansdale, Pa.—J. Irwin Ambler, $100.

Owatonna, Minn.—Elton Bros., knives.

Philadelphia, Pa.—Nathan Engle, revolvers.

Springfield, Mo. — The McGregor-Noe Hardware Co., revolvers, cutlery, etc.



St. Joseph, Mich.—E. F. Platt, revolvers.

Toronto, Ont.—Wilkins & Co., No. 168 King Street East, razors, etc.

LIBERAL DISCOUNTS TO THE TRADE.

JOS. BARDSLEY,

147 to 151 Baxter St., NEW YORK CITY.

The

Blount Door Check

is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, over the country are requested to contribute to this page News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Etc.

Baltimore, Md. — The Blue Mountain Iron & Steel Co. has been formed with $500,000 capital. The incorporators are: Jerome Keeley, of Philadelphia; Ogden A. Kirkland, Abraham Sharp, William B. Price and Edward C. Pritchett, all of Baltimore. These, with Ernest Sharp and Charles W. Muller, will form the directorate for the coming year. Mr. Keeley will be president and manager. The company proposes to operate the iron property in Frederick County, Maryland, about sixty miles from Baltimore, known as the Catoctin Furnaces.

East Liverpool, Ohio. — The Patterson Foundry & Machine Co. has been incorporated with a capital stock of $100,000.

East Orange, N. J.—The Union Supply Co. has been incorporated with principal office, New Jersey Registration & Trust Co.'s building. Capital, $100,000. Manufacture nails, tools, screws, etc. Incorporators: J. Russell Clarke, Charles C. Miller, Richard Merrifield, all of East Orange, N. J.

Elwood, Ind.—The Elwood Lawn Mower Mfg. Co. has been organized with A. H. Hopper, treasurer, and I. W. Gregg, secretary.

Lorain, Ohio.—The new Automatic Steam Shovel Co. will establish its plant at this place.

Louisville, Ky.—Brennan & Co., of the Southwestern Agricultural Works have filed amended articles of incorporation. The chief feature of the change is that the capital stock will be made $300,000 instead of $200,000. The board of directors will now consist of five members instead of three, and the corporation is to exist for fifty years. The indebtedness shall not exceed two-thirds of the capital stock.

New York, N. Y.—The Aroostook Mfg. Co. has been incorporated to deal in dish washers and other patents and inventions, capital, $25,000. Directors: Augustus M. Halsted, Rye, N. Y.; Henry D. Ritter, and J. Henry Halsted, New York City.

New York, N. Y. The Imperial Metal Co. has been incorporated with a capital stock of $10,000. Directors: Frederick Elkan and Moses S. Leipziger.

Paterson, N. J.—The Benjamin Eastwood Co. has been incorporated by Sarah Eastwood, James Eastwood, and Benjamin B. Van Wagoner, to manufacture machinery, tools, etc. Capital stock, $250,000.

Portland, Me.—The Contractors Plant Co. has been organized for the purpose of manufacturing tools and machinery for contractors' use with $250,000 capital stock, of which $500 is paid in. The officers are: President, F. B. Gilbert of Boston, Mass.; treasurer, J. H. Colby, of Boston, Mass.

Pittsburg, Pa.—The Shenango Furnace Co. has been incorporated by W. P. Snyder. H. Irwin, Jr., A. W. Adair, W. H. Sturgeon, Jr., and J. G. Butler, Jr. Capital stock, $120,000.

Portland, Me.—The National Drafting Tool Co. has been incorporated for manufacturing drafting and carpenters' tools. Capital, $100,000. Incorporators: G. W. Ridlon, West Paris; W. S. White, W. C. Day, Livermore Falls; F. K. Daggett, Boston, Mass.

Taunton, Mass.—The Taunton Rivet Co., with a capital stock of $12,000, is licensed in Illinois for $25,000.

Toledo, Ohio.—Isaac D. Smean & Co., hot water heaters, new firm, have commenced business.

Utica, N. Y.—The International Heater Co., capital stock of $1,800,000, has been licensed to do business in Illinois, with a capital stock of $13,000.

Washington, D. C.—The Union Furnace Co. has been incorporated under the laws of West Virginia, by G. L. Taylor, O. D. Swett, and others; manufacturing, selling and installing furnaces. Capital stock $1,000,000.

Changes and Improvements.

Baltimore, Md.—Kirwan & Riggs, can makers, at the foot of Cross Street, have purchased the building at the corner of Eastern Avenue and Port Street, formerly occupied by Henry Evans as a tinware factory. The new owners will remodel the building and occupy it. The building has a frontage of sixty feet eight inches and a depth of one hundred and forty feet to a 15-foot alley. It is a one-story structure, but will be enlarged to a three-story building. When completed it will be equipped with the most improved machinery for canmaking. Kirwan & Riggs expect to occupy their new building next fall.

Chicago, Ill. — The Chicago Hardware Foundry Co. has increased its capital from $5000 to $15,000.

Cleveland, O.—The Chisholm & Moore Mfg. Co., Lake and Kirtland Streets, manufacturers of chain hoists, cranes, etc., has purchased the new plant in course of erection for the Garry Iron & Steel Roofing Co., adjoining the present property of the former company. The entire property has a frontage on Lake Street of 501 feet and extends back 330 feet to a switch of the Pennsylvania Railroad. The main building, which is 100x318 feet, will be used for a malleable iron foundry, and a building 60x190 feet adjoining it, will be used by the annealing and shipping departments.

New Britain, Conn.—The Malleable Iron Works will build a foundry addition 40x60 feet.

Pittsburg, Pa.—Chess Bros. have leased the Anchor Nail & Tack Works, on the South Side, to Neal Bros., of this city, who have begun the necessary repairing to the furnaces and mills, and who expect to have the same in operation within a few days. The plant contains 24 puddling furnaces, which will be fired up as soon as repairs are completed. Messrs. Neal Brothers intend to use the plant for rolling muck iron, and will later on utilize the finishing mills. This plant has been idle for some years.

Scranton, Pa.—The Scranton Nut & Bolt Mfg. Co. have purchased five acres of land from the Lackawanna Iron & Coal Co. and construction work will be begun at once.

St. Louis, Mo.—The Coplan Galvanized Cornice Co. are to remove their works to Joplin, where they have acquired the Eagle Cornice Works, and will operate same until an entirely new factory can be erected.

Utica, N. Y. — The Savage Arms Co. which has been prospering from the time it opened its plant on Broad Street, and began the manufacture of guns, now finds that owing to the constantly increasing demand for its guns, its capacity is inadequate. With positive assurances from orders already received in advance that the demand will continue to increase, the directors have decided to double the capacity of the plant, and have given their superintendent instructions to arrange to do so. This will necessitate the addition of a large amount of new machinery of a class that has to be manufactured expressly for this purpose, and months will therefore unavoidably pass before the change can be made. It is, however, intended to have the duplication of the present plant completed by January first next, and the company will be in a position next season to make the output forty guns a day.

Ypsilanti, Mich.—The Clayton & Lambert Mfg. Co., makers of gasolene fire pots, paint burners, plumbers' and tinners' tools, will remove the first week in July to their new factory in Detroit, Mich., where they will be nicely situated and will be able to take care of any business placed in their hands.

Recent Embarrassments.

Bellevue, Ohio.—The Bellevue Plow Co., one of the largest concerns of its kind in the State, has gone into the hands of a receiver. Assets and liabilities not stated.

Recent Fires.

Joplin, Mo.—The Missouri Lead & Zinc Co's plant, south of Joplin, has been burned. The mill had a capacity of 200 tons of ore a day, and cost $15,000. The plant was partially insured.

Northampton, Mass. — The Lamb Wire mill on Clark Avenue, which was leased by Charles M. Johnson, of New Haven, has been badly damaged by fire. The extent of the damage is hard to determine, but those acquainted with values place the loss at from $4000 to $5000.

Miscellaneous.

East Berlin, Conn. — The Berlin Iron Bridge Co. have received an order for an iron bridge from one of the country councils in New Zealand, the chairman of the council saying it is the first order of the kind ever sent from New Zealand to this country. The bridge is intended to carry a 40-ton traction engine, and was chosen because of its easy construction by pins instead of rivets.

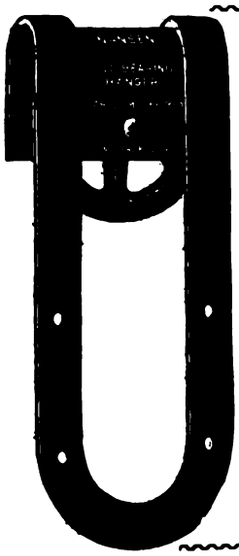
Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of



EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

Dallas, Tex.—Millard Storey, Hardware, sporting goods, etc., has just commenced business.

Fall River, Mass.—The Callahan & Daley Co. has been incorporated by J. Daley, P. Callahan, and J. E. Sullivan; bicycles, Hardware, etc. Capital stock, $15,000.

Herkimer, N. Y.—P. A. Stubblebine will move his bicycle business to Union Block.

Kittery, Me.—The Goodyear Rubber Carriage Tire Co. has been incorporated by T. E. French, A. J. Quensler, E. P. Saunderson, and R. L. Kingston; to manufacture rubber tires. Capital stock, $50,000.

Langdon, Kans.—Fehr Bros., Hardware, sporting goods, etc., have just commenced business.

Long Branch, N. J.—Wm. H. Martin and W. G. Herbert have formed a partnership and will open a store and repair shop.

Los Angeles, Cal.—Hager & Brookner is the style of a new firm at No. 454 South Broadway. They operate the store under the title "Tremo Cyclery."

Los Angeles, Cal.—The South California Arms Co. has reopened at its old address, No. 113 West First Street.

Naugatuck, Conn. — R. Jennings has opened bicycle repair shop on Hill Street.

Perrysburg, Ohio.—The National Wheel Co. has been incorporated by J. M. Drury, I. M. Lott, T. Schmitt, H. K. Auth; manufacture children's wagons, velocipedes, etc. Capital stock, $50,000.

Sacramento, Cal.—The Bicycle Safety Lock Co., of San Francisco, has been incorporated. Making and dealing in locks. Capital, $40,000. Incorporators: W. H. Paulin, Emma Paulin, C. N. Kirkbride, J. Russell, San Mateo; F. C. Paulin, Chicago, Ill.

Seattle, Wash.—The Forbes Cycle & Supply Co. has been incorporated by E. N. Forbes and C. E. Shepard; cycle business. Capital stock, $25,000.

Sloan, Ia.—R. S. Hammond has opened a bicycle store.

Two Rivers, Wis.—W. W. Mitchell has opened bicycle store.

Changes and Improvements.

Auburndale, Mass. — Fiske Bros. have closed their store.

Boston, Mass.—Haines & Battefield, bicycle dealers, succeeded by J. D. Battefield.

Chattanooga, Tenn.—J. W. Clouse & Co., bicycles, succeeded by Clouse & Shepherd.

Eddy, N. M.—J. M. Pardue, groceries, has taken up a line of sporting goods, Hardware, etc.

Enfield, N. H.—Fred A. Fogg, Hardware, bicycles, sporting goods, etc., has just completed an addition to store building.

Fort Wayne, Ind.—Columbia Machine Works, dealers in bicycles and machinery, have sold out.

Gainesville, Fla.—Graham Bros., bicycles, etc., closing out.

Johnstown, Pa.—Seigh & Co. have succeeded to the business of Beachy & Co. and will continue their cycle livery and repair shop.

Los Angeles, Cal.—A. C. Post is removing his stock to Salt Lake City, Utah, where he will establish himself.

Middleboro, Mass.—Edward C. Gurney has sold his business to Joseph E. Allen of South Yarmouth.

Moline, Ill.—Skinner & Mahon, bicycle dealers, have moved into their new store on Market Square.

Newark, N. J.—The Marshall Cycle Co.; succeeded by Leonard Lorentowicz.

Niles, Mich.—Miller & Johnson, dealers in bicycles, have been succeeded by Subber & Johnson.

North Manchester, Ind.—Baker & Rogers, bicycles, reported to have sold out.

Nyack, N. Y.—The business of the Nyack Cycle & Photo Co. has been purchased by P. D. L. Heddell, who will continue it as heretofore.

Ocala, Fla.—Otte Monte, dealer in bicycles, is reported to have sold out.

Oneida, N. Y.—Theodore Coles, having purchased all of the interests in the Aldrich & Coles Bicycle Co., has removed the business to his own building on Cedar Street, at the end of the Phelps Street pavement. James Backer will continue in charge of the repair shop.

Rochester, N. Y.—Spin-Roller Co., bicycle gears, increased capital stock from $35,000 to $50,000.

Savannah, Ga.—Moore & Higgins, bicycles, succeeded by W. F. Higgins.

Savannah, Ga.—Fred Myers, Jr., bicycles, succeeded by the Cleveland Bicycle Co.

Seattle, Wash.—Forbes Bros. & Niles, bicycles, succeeded by Forbes Cycle & Supply Co.

Springfield, Mass.—The Industrial Cycle Co. plant has been repaired after the damage recently sustained by fire, and all departments except the enameling shop are in good order. The company are about three weeks behind on outside orders.

Trenton, N. J.—Capital Cycle Co., dissolved, John Sykes continues under same style.

Troy, N. Y.—Sweet & Packard have been succeeded by Sweet, Packard & Co.

Recent Embarrassments.

Boston, Mass. — J. A. Hitchins & Co., manufacturers of bicycles, John A. Hitchins gave voluntary petition in bankruptcy.

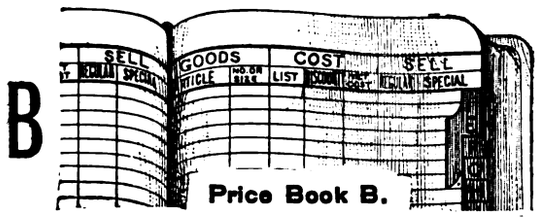
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

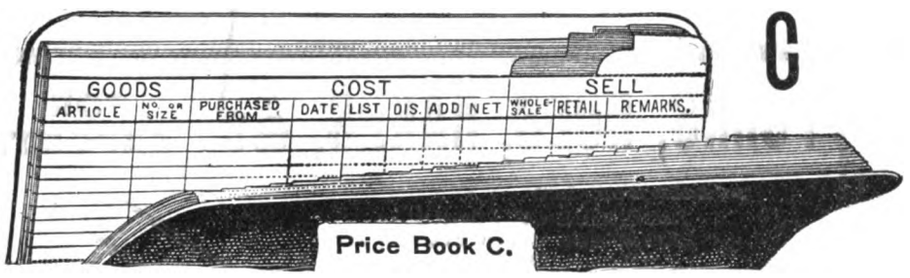


Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

A, 200 pages,	$1.00	**A 2**, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2**, 400 pages with flap,	1.75



Price Book B.

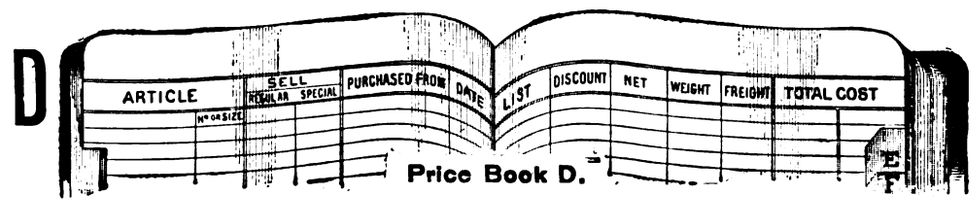
In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages,	$1.00	**B 2**, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2**, 400 pages with flap,	1.75

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



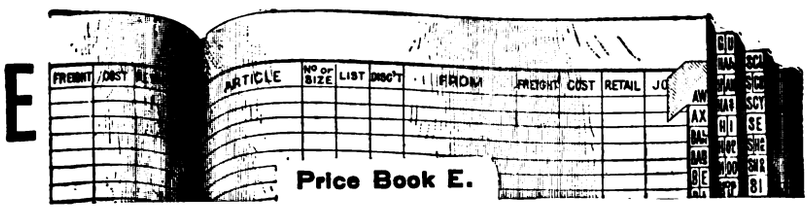
FOUR EDITIONS:

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50



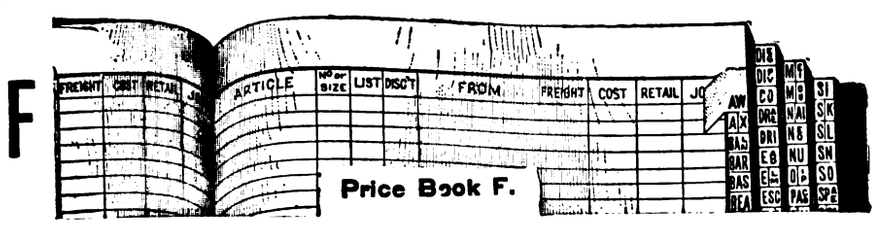
Price Book D.

MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to AU	For Chisels,	turn to CHI U	For Iron,	turn to IRO
" Parers, Apple	" PA P R	" Cutlery,	" CUT	" Irons,	" IR'S

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.



Price Book E.

Has unexceptional ability in any line of work connected with the distribution of a large product. Address, H. O. P., P. O. Box 618, New York.

"ONE OF THE FEW PAPERS WE READ."

Tabb & Jenkins Hardware Co., Baltimore, Md. [*Hardware, Cutlery, Guns, Ammunition, etc.*]: We have always considered HARDWARE as a valuable acquisition to trade literature, and it is one of the few papers which we read through from cover to cover. It is valuable in calling the buyer's attention to new goods on the market, and we should think to the manufacturers, it would be a good medium of introduction. W. L. Fairall.

"A PROFITABLE MEDIUM TO ADVERTISERS."

Gilbert & Bennett Mfg. Co., Chicago and New York. [*Wire Goods*]: You have reason to be proud of HARDWARE's success both as a journal of interest and of usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been steadily published in its columns from the first number, it must be concluded that we have found you a satisfactory medium.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished th dealer upon request, by the manufacturer quoted.

APPLE PARERS.

SINCE 1864 the making of apple parers has been an important feature of our business, and, as we are constantly looking for improvements, and making use of them too, our present line, which consists of nine different machines, although not all new, may be said to be the culmination of thirty-five years of practical experience.

The illustration here given represents the WHITE MOUNTAIN PARER, COREER and SLICER. It has been imitated (not once or twice), but never equalled, and is to-day the most durable, substantial and satisfactory low priced Parer, Corer and Slicer for family use; and, we may also say, the one most widely known and used.

We have made it a point to supply every need in the line of apple parers for homes, hotels, restaurants, bakeries and evaporating factories.

Our new machine, THE TURN TABLE "'98" (it pares and knocks off the apple) is meeting with wonderful favor. We verily believe it has more good points to the square inch than any other parer we ever saw. If you haven't seen it, you should. Most jobbers are selling our parers. Catalogue free. . . . .

NEW YORK OFFICE, 10 WARREN STREET.

GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

NEW YORK OFFICE: 90 Chambers St.

Send for Free Sample, List and Prices.

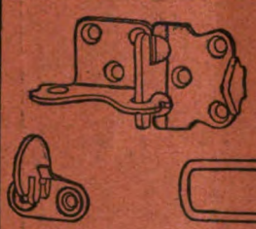
Can You Afford- to carry in stock unknown brands of stove polish that your customers know nothing about, brands they do not call for, the quality of which is inferior, gives them dissatisfaction, and the consequent sale of which brings discredit to your store? Your best judgment answers NO! Then sell **ENAMELINE**, the Modern Stove Polish. Paste, Cake or Liquid. If you are doing business for a profit it will pay you to handle our whole line.

J. L. PRESCOTT & CO., NEW YORK.

Straight Shooting

Depends upon

Reliable Ammunition.



The charge in a factory-loaded shell is always uniform--its carrying power and accuracy never vary. We make every class of cartridge used in a firearm, and will be pleased to send you descriptive price list upon application.

WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1¼

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for **hard wood.** The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in **hard wood** We have combined two **principles in one,** and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

C. E. JENNINGS CO., *Sole Manufacturers,* **101 Reade St. NEW YORK.**

U. S. BONDED WAREHOUSE.

The Cuban Exposition and Trading Company

11 Broadway, New York City

Offers floor, shelving and show case space, or private business rooms, in its Havana Exposition and Sales' Building at a reasonable monthly rental, **with contract for pushing the sale of represented goods** in all parts of the island.

The Company having valuable Cuban connections provides American manufacturers and dealers with exceptional opportunities for establishing markets in Cuba for their wares and merchandise.

The exhibit opens this month in Havana in the Company's Exposition building, which has been designated a U. S. Bonded Warehouse which obviates the necessity of outlay for duties. This will be the most effective trade developing establishment in Cuba.

THE NEW YORK PUBLIC LIBRARY

HARDWARE

George Munson will spend his vacation this summer down by—buy the "Fallstock," near "Oldprices," if—well, just if—.

President Sargent, while abroad, will find many a haven of rest, but when he returns, he will find a New Haven where he is better known.

Some of the boys are enquiring if the recent litigation between prominent makers of Builders' Hardware was superinduced by the prevailing epidemic of Lock-jaw.

The "Kid", who when asked if he "wanted to see the new baby," said "No! I'd rather see the stork that brought it," must certainly have heard the grand mother's talk.

C. B. Judd, vice president of the Bissell Carpet Sweeper Co. is summering at his cottage at Ottawa Beach on the banks of Lake Michigan where he has his naphtha launches at his disposal.

At the last annual meeting of the Norton Door-Check & Spring Co. the stockholders voted to discontinue the business of manufacturing and selling door checks, and to wind up its affairs.

When Treasurer Keating, while abroad, gazed upon the beautiful dome of St. Peter's at Rome, he is supposed unconsciously to have uttered the "Keating" trade mark—"See that Curve!"

The *City of Paris*, when leaving the Manacles, was evidently better "off," even with the "list to port," they mention. But the Hardware Club is certainly better off with a List to wait.

Someone jokingly asked Manager Prentice: "What kind of sheets are used on brass bedsteads?" He promptly answered, "Discount sheets!" Upon the further enquiry, "When?" came the pat reply, "On the Spring's approach."

Governor Bissell, of the Club, designs taking his rest this Summer on a yacht, where he's sure of a big boom, and where daily sails can take place without his taking a commission, for there the nautical log knocks out the catalogue.

Trade with the Argentine Republic is reported to be in an exceedingly flourishing condition at present. Last month's shipments of a prominent commission house in the Coffee Exchange Building consisted of agricultural, electrical and general industrial machinery and Hardware to the value of nearly $200,000.

Mr. Thomas F. Keating, well known to the trade from his long connection with the Yale & Towne Mfg. Co., and as treasurer of the Hardware Club, returned July 5th by the steamer *Teutonic*, from an enjoyable trip abroad, during which he visited many points of interest in Great Britain and spent some time in Continental trade centres.

The Cuban Exposition & Trading Co., No. 11 Broadway, New York, open their exhibit in Havana during the present month. They have had their establishment in that city declared a United States bonded warehouse, which precludes any necessity on the part of exhibitors of making any preliminary outlay for the customary duties.

The American Tin Plate Factory at Elwood, Ind., the largest in the world, resumed operations July 16, giving employment to 2000 persons, and all receiving more wages than under the old scale. The payroll is increased $5000 per week. The plant is being still further enlarged by the addition of five more mills and 30 tinning shops.

George N. Lusson, the traveling representative for Greene, Tweed & Co., No. 17 Murray Street, New York, departed recently on *La Normandie* for a trip abroad, intending to take five weeks for an inspection of the markets of Paris and London for novelties in the brass goods line that can be duplicated in this country in a more popular manner. Greene, Tweed & Co. have under way an entirely new catalogue of their line of brass goods which will be ready for the trade about September 1st.

James H. Oliver, the younger brother of Frank J. and Thomas E. Oliver, who form the firm of Oliver Bros., No. 127 Duane Street, New York, having been associated with his brothers since the original formation of the firm, was recently admitted to partnership therein. It is a pleasure to note the reward achieved by persistent activity and recognized fidelity. He has been thoroughly trained in all the details of the important business established by his brothers, and in his promotion he has the best wishes of his many friends.

The man who started this new industry deserves a crow-mo. At Brookville, Pa., there resides an inventive genius, who, learning that he could obtain twenty-five cents for the head of a crow be-caws they make a handsome trimming for a lady's hat, has rigged up an ordinary chicken incubator, and is engaged in hatching out an even hundred crows every fifteen days. It only takes eight weeks for the birds to mature sufficiently so they can gracefully "get it in the neck" and become a merchantable commodity at twenty-five dollars a hundred. How this up-to-dater must crow over his success!

Tom Connors, the veteran waiter, got off a good thing at the Club the other day, and like all genuine Irish wit, it was impromptu. He was bringing in a tray full of small clams, and the necessary et ceteras for their proper enjoyment for a party of three, when the bottle of Tabasco sauce, which formed a part of the outfit, fell off the tray landing upon the carpet. For a wonder it held its own and didn't break as one would naturally suppose it would. One of the members said, "Tom, that was lucky indeed, it's a wonder it didn't break." "Oh! I don't know," replied Tom, "sure everybody understands its the strongest stuff in the club."

Some time ago while a party of four were regaling themselves in the Club Cafe at a cool table, a convivial bottle was ordered and it arrived with the usual delicate wine glasses which aid so much in its proper enjoyment. Through no fault of anyone in particular one of these fragile pieces of tray furniture went overboard and was wrecked on the arm of the chair. As the waiter was slightly disconcerted by his apparent carelessness the host of the party reassured him in this original manner: "Never mind it John, 'twas very cleverly done; the man who can turn a wineglass into a 'tumbler' with such unstudied grace, ought to be up at 'Keith's' drawing 'fifty' a week."

HARDWARE

VOL. XIX. JULY 25, 1899. NO. 8.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
E. N. ROOT, - - - - Treasurer.
W. C. BRUNDAGE, - - Business Manager.
HENRY HOPKINS, - - Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

While vacations during the past fortnight have not been indulged in with the freedom which in former seasons made an extended loafing spell possible, still trade and traffic has diminished sufficiently in volume to enable even the indispensable members of the staff in many large establishments to take an occasional day off. Much attention is now necessarily devoted to stock requirements for fall trade, many buyers knowing the importance of being in complete preparation for the advent of the possibly largest and most aggressive demand for fall and winter goods, which the trade has known for a number of years.

It seems scarcely necessary to caution the pessimistic members of this established industry, that these prosperous indications apply not only to our own country, but form an encouraging feature of the conditions surrounding business in Great Britain and on the continent. The fact of so much industrial activity being in evidence in the countries referred to, has made it possible for us to push our wares and our mechanical devices, our machines, tools and other important products of our skilled mechanics successfully, in the face of advancing prices, made necessary by increasing cost of material. To-day by aid of largely increasing facilities, we are able to cope with a home demand of unusual importance, showing natural apprehension born of pressing requirements, and delayed deliveries, and deliveries that are delayed quite frequently through export obligations.

There is no use in the dealers finding fault with manufacturers who are endeavoring to get a few of the plums themselves, under a state of affairs indicated by those prosperous conditions. They surely cannot expect mills and factories to keep on supplying goods at old prices, as they did for the spring trade, early in this year; especially when having used up all their own low-priced material, they are compelled to go out in the market and pay $20 for pig iron, instead of an old price that was half as much, with a similar state of affairs affecting the metal market throughout from tin to copper.

There will be fewer of those vague, unspecified orders taken from dealers for the coming season; and when large orders are entered, more care than usual will be taken that material is purchased somewhere near the figures on which the contract prices are based.

It may be possible in some lines that consumption will be curtailed, although the consumers generally are buying with unusual freedom at advanced prices, and without as much criticism of trust methods as may be noticed among the jobbing division of the trade which has really been favored the most in booking orders, reaped the greatest profits in selling, and now fear the future trend of prices when the manufacturer, trust or no trust, wants to know how it is himself.

Even at the existing scale of prices, our export trade is bound to greatly extend from now on; and this is an element of strength back of our industrial importance, that is of incalculable benefit to our manufacturers should any agitation of the industrial condition of affairs tend to lessen the home demand, and make a more limited consumption face the too conservative dealer.

Art in Advertising.

General magazine advertising has reached a state of perfection in which artistic expression of an idea assists the vigorous personality of type description, especially when used for an article possessing underlying merit. This is the style of an announcement that captivates the reader by its beauty and impresses the mind with its honesty and integrity of purpose. The brightest intellects identified with this important branch of illustrated exploiting are taxed to the last degree in the effort to obtain an originality of expression, apposite description and intelligent effect. It is but rarely the trade journal has any such skill bestowed upon its advertising pages as is evident in the magazines and similar popular periodicals.

Advertisements in trade journals are usually much more direct in the methods employed, being intended to influence the mind of a merchant instead of that of a lay reader. A more commercial technique is consequently given scope, and the art and ingenuity employed to attract the attention of a consumer whose tastes are not usually as firm as the fixed stars, are ignored in the manner of attracting, or in the nature of the arguments used on more mature minds. The types are consequently relied upon to furnish the attracting novelty, assisted to some extent by an arrangement natural enough to the skilled hand of the compositor, by which the latest magazine types of various face or color, combined with a border, as a frame, contribute in giving a harmonious effect, pleasing to the eye and impressive to the judgment. This is frequently assisted by an illustration of the article to be advertised, but rarely by the advantageous indirectness of the purely artistic announcement which is intended more especially to attract and not necessarily to convince.

We could cull from our own columns in the past and present, a number of advertisements which would illustrate the idea we are dwelling upon, for this direct style now in vogue to an almost unlimited extent in the many trade journals, springs from a belief in the possibility of tracing direct results, and too many advertisers imagine that a simple announcement in any such paper of a large but not phenomenal circulation for its grade, will be answered on sight by the interested reader, and thus the value of space used can at once be calculated. They could each and all of them disprove this by their own personal experience, for they themselves although not necessarily joined to their commercial idols, have not had them dethroned by any iconoclastic impulse at the first appeal of something

Digitized by Google

that possible merited their vacated places. The reason must first be consulted, the mind must yield a tacit approval, a desire on the part of every buyer to secure the best for the money must be impressed, before the convincing effect can become a possibility from the advertising cause.

No such experimental method of exploiting the fortunes of any trade winner can scarcely be expected to achieve a popular success, for it is only obtainable by persistence in advocating its merit, and a constant endeavor to make it sell even under the conditions that predicate a fortune within reach. No relaxation of tried methods, no cessation of persistent push, no belief that it ought to sell from what *has* been done, should for a moment suspend the natural operation of the laws governing publicity. Advertise wisely, discreetly and artistically, any article of merit, and realize the fact that any moment you drop out of this characteristic warfare with equally zealous competitors, another warrior takes your place, uses your armor, and your weapons, and leaves you lying by the wayside awaiting the chance of a decent burial.

The Pan-American Exhibition.

It is gratifying to be able to say that good progress is being made with the extensive preparations having in view the Pan-American Exhibition to be held in Buffalo in 1901.

Having been fully chartered and authorized to issue bonds and stocks amounting to $5,000,000, it may be said to have already been placed on a secure footing. Subscriptions are being proffered very generously. The Federal Government recognizing its great importance, has announced it officially and by an appropriation of $500,000 for its own representation, has endorsed the project in a manner about which there is no question, the State of New York cheerfully responding with an appropriation of $300,000. These movements of characteristic approval will be followed by the other States, many having already expressed their desire and willingness to forward this deserving enterprise. The site having been chosen in the center of an enormous population, gives an earnest of the wisdom directing this enterprise to a successful issue.

It is stated for the sake of a comparison that while Chicago at the time of the Columbian Fair was at the centre of a population within 500 miles of 20,000,000 people, Buffalo within a similar radius, is in the centre of nearly twice the number, or, say 38,000,000.

The Pan-American Fair will prove a fit opening of the commercial prestige of the 20th century, and will emphasize to the governing nations, not alone the dominion of American ideas in international affairs, but also the industrial and commercial power possessed by us in our relations with the rest of the world.

We desire to call attention to the new advertisement of the Parry Mfg. Co., which will be found on page 43. They are very anxious to have the readers of *Hardware* write them asking for information regarding a new road wagon which they have just placed upon the market. They have named it the "Iwanta." It is noteworthy from the fact that it has a high stick seat which can be trimmed in almost any style, and the specifications call for a first-class job all the way through.

HARDWARE costs only One Dollar a year.

The Adsmith Criticized.

Having reference to a happy thought article in our previous issue, we have received the following:

Editor Hardware: Dear sir.—When perusing your most admirable issue of this week, the writer was struck with the originality of the "Ad-Smith" as well as the aptness of his happy thought. But does it not seem to you that the word should have been "Pollewantsa?" This would undoubtedly read better in those expressions that are fast becoming classical such as "Everybody knows Pollewantsa cracker." "You know—etc., etc."

Yours for up to date "ads."

HERMES.

In reply we are hardly satisfied that "Pollewantsa" rolls from the tongue as glibly as "Pollewanta," and possibly on that account would not sell as many crackers. We think the desire to change the word arises from the fact that the domestic circle of our esteemed correspondent has never numbered one of these "Irish Canarys" among its attractions. It is customary to talk *to* the emerald bird, not talk *for* it. In our case, assuming the parrot had no objection, we invariably interrogated it with "Polly; want a cracker?" from whence arose the happy thought and the suggestive trade mark. While we are willing to admit either word would be unique enough to command respect, our friend the adsmith thinks that to rival "Uneeda" it would be proper to talk *to* the possible customer as that does, and not make each individual member of the cracker-eating populace consider itself as exclaiming its wants from the standpoint of the parrot and calling itself one to do so. The parrot-hating class would be antagonized at once, and in ordering the same from the nearby grocer, would be exposed to undeserved ridicule; while "Pollewanta" would suggest crackers without any such endorsement of what in some neighborhood is a squawking terror.

New Members of the Hardware Club.

At a recent meeting of the board of governors of the Hardware Club of New York, the following gentlemen were unanimously elected to membership in the Club:

Joseph Dahlbender, No. 263 Broadway.
Charles S. Redfield, No. 9 Murray Street.
Willis T. Gridley, No. 271 Broadway.
James H. Oliver, No. 127 Duane Street.
Cuyler K. Sanborn, No. 150 Nassau Street.
George W. Davis, No. 146 Duane Street.
Joseph D. Weed, Savannah, Ga.

John A. Walker, vice-president and treasurer of the Joseph Dixon Crucible Co., who has been abroad for some time enjoying a well-earned vacation, returned about ten days ago by the steamer *Germanic*, after a very delightful voyage, and feeling much refreshed and recuperated. While away he visited all the continental points of interest including in his trip Great Britain, Belgium, Holland, Germany, Austria, Switzerland, Italy and France. Mr. Walker states that in all his traveling, with the exception of Austria, he found the entire European business world pushing their industrial resources at full speed. In Germany, especially, the factories were being run in many instances on double turn, night and day, and showing how productive facilities were being multiplied throughout the world. He states the machine using and machine making nations visited by him, with the single exception above noted, are in a condition of unprecedented activity, with no appearance of any cessation for at least two years, from this prosperous condition of business affairs.

From the Suez Canal report for 1898, just issued, we learn that the total receipts of the canal last year amounted to $17,580,000, against $15,120,000 in 1897, showing an increase of $2,460,000. The net profit for the year 1898 amounted to $9,758,000.—*Ex.*

American Industrial Expositions.

The information contained in the following resume of American industrial exhibitions was obtained from a recent issue of the *Popular Science Monthly*:

International exhibitions at which specimens of the arts and industries of the great nations of the world were contrasted began with the International Exhibition held in London in 1851, and three have been held in the United States, as follows: In New York, in 1853; in Philadelphia, in 1876, in Chicago, in 1893. The great magnitude of such expositions has led in recent years to their specialization or subdivision into expositions at which only a specialty was presented. Notable among such have been the following, for the most part international: Of articles connected with the leather industry, in Berlin, 1877; of all kinds of paper and pasteboard, in Berlin, 1878; of fisheries, in Berlin, 1880; of electricity, in Paris, 1881; of geography, in Venice, 1881; of cotton, in Atlanta, Georgia, 1881; of early data in American history, in Madrid, 1881; of fisheries, in London, 1883; of matters pertaining to Columbus and the discovery of America, in Madrid, 1892; and of hygiene, including chemical, pharmaceutical and sanitary objects, in Naples, 1894. Of interstate expositions, the following have been held: Cincinnati Industrial Exposition, Cincinnati, O., September 30th to October 4, 1883; Southern Exposition, Louisville, Ky., August 16th to October 25, 1883; World's Industrial and Cotton Centennial Exposition, New Orleans, La., December 16, 1883 to June 30, 1884; Central Exposition of the Ohio Valley and Central States, Cincinnati, O., July 4th to October 7, 1888; California Midwinter Fair, San Francisco, Cal., January 1st to July 4, 1894; Cotton States and Industrial Exposition, Atlanta, Ga., September 18th to December 31, 1895: Tennessee Centennial Exposition, Nashville, Tenn., May 1st to October 31, 1897; and Trans-Mississippi International Exposition, Omaha, Neb., June 1st to November 1, 1898. Of the foregoing, the more important were those held in New Orleans, San Francisco, Atlanta, Nashville and in Omaha, especially so from the fact that all of these received recognition by the Government; and with the exception of that held in San Francisco, liberal appropriations were made for their support by Congress. Moreover, at each of them, excepting again that held in San Francisco, a special Government building was erected in which the national government made exhibits of the workings of the several executive departments, together with the Smithsonian Institute and its dependencies and the Fish Commission. That of New Orleans was held as a celebration of the centenary of the cotton industry in the United States. The exposition held in San Francisco, in 1894, had for its purpose the affording of an opportunity to foreign exhibitors at the World's Fair to further display their goods in the United States, and in consequence a great number of goods were shipped direct from Chicago to the Pacific Coast. The Atlanta Exposition had its inception in a belief that the agricultural, mineral and manufacturing resources of the South were not adequately represented in Chicago in 1893. It was believed that a better exhibit of the productions of the Southland would tend to foster greater trade relations between that section of our country and other parts of the United States, as well as with foreign countries. The exposition in Nashville was designed primarily to celebrate the one hundredth anniversary of the admission of Tennessee into the Federal Union. The exposition held last year in Omaha had for its purpose to do for the Trans-Mississippi States what the more local exhibitions had done for Atlanta and Nashville. It was claimed that it would for the "first time fully illustrate the wealth-producing power and the extent of productive industries of the Greater West," and it did.

Some men are like dice—easily rattled, but hard to shake. —*Exchange.*

A Straight Tip via England.

The British Consul at Mariupol, Russia, writes to the home office as follows:

"Notwithstanding the rapid development in home industries and heavy import duties, there is still a large market in Russia for machinery, machine tools, leather belting, wire ropes, shovels, coke forks, mining and other tools. I prevailed upon some of the local dealers to pass some trial orders for shovels, coke forks and tools to England, and they were much pleased with the quality and finish of the goods they received, but informed me that the English prices were too high, and they could have bought the same articles from Germany or the United States more cheaply.

"I can, in a measure, understand this remark as applying to Germany, which supplies goods of somewhat inferior quality, and also gains on the cost of transport, owing to its more favorable geographical position, but I am at a loss to account for the American competition, when one takes into consideration the heavy cost of transport (the goods are generally transshipped once or twice), and especially when it must be admitted that the goods are said to be in no way inferior to those of British manufacture.

"In my opinion, there is a good opening here for an enterprising firm fully conversant with the machinery trade and other relative branches who would work on commission.

"The business would not require a large capital, and I see no reason why an energetic and pushing man should not do a large and profitable business. It is true that commercial travelers from other parts of Russia are continually visiting Mariupol and the neighborhood, but this town, owing to its position, as one may say, in the heart of the Donte Basin, offers every advantage and should serve well as a distributing center.

"Agricultural machinery is another article which should receive attention. The Mariupol district is very large and devoted principally to agriculture. The two or three dealers in the town have very small establishments, keep no stock, and deal almost exclusively in native machinery."

A Record Production of Copper.

The production of copper in the United States in 1898, as reported by the United States Geological Survey, was 526,375,591 pounds, which is by far the largest product ever reported.

"The year," says the report, "was one of general prosperity for the copper mining industry, the full product being marketed at prices slightly better than those of 1897. The actual scarcity of copper, with its accompanying upward rush in price and its enormous expansion of stock speculation, did not in reality develop until the end of the year, and it did not tell upon the returns. As was expected, the increase in the production of copper was largest in Arizona, while the Lake district also recorded an advance. Montana fell off considerably."

Intense activity has developed in the search for new copper mines, and a large number of new undertakings have started. But the preparations for output on even a moderate scale in the way of opening mining property and providing a reduction plant are so large and require so much time that few of the new comers will add materially to the copper market of 1899. What increase there will be will come from the older mines, and that chiefly from Arizona, the Lake, California and Utah.

Seven million dollars in fish waste.—In this country our fisheries are worth about $45,000,000 a year. The fish refuse is so economically and ingeniously utilized in the preparation of oils, glues, fertilizers, etc., that these conquests of waste realize about one-seventh, or 14 per cent., of the total income from the fisheries.—*Exchange.*

South Dakota Retail Merchants' Association.

The second annual convention of the South Dakota Retail Merchants' Association was held at the home office of the association in Mitchell, S. D., on Thursday, June 29th. The convention was called to order with President Harvey J. Rice, of Huron, in the chair. The president made his annual address, in which he dwelt with pleasure upon the success obtained, although he felt the Association was still in its infancy, and the members should not feel discouraged if some business was yet to be accomplished. He admitted that many obstacles had yet to be overcome, and many prejudices conquered, and a greater degree of cooperation from those in the organization secured to establish complete confidence as to possible results before anything of note could be expected. Mr. Rice stated that they had endeavored to get several bills through the legislature, which, if they had become laws, would have been of exceeding benefit to the retail merchants of the State and likewise the consumer. But the legislature's work had not been accomplished in the thorough manner which the Association had anticipated, and circumstances mostly of a political nature, caused them to fall by the wayside. He still felt that by a community of interest, a greater degree of work could be accomplished in the future, from which the most beneficial results could be anticipated.

The secretary made a very voluminous report, detailing the work performed by his office during the past year, touching on the numerous measures which the Association had endeavored to have become laws, among which may be mentioned the following: An effective garnishment law; a change in the exemption laws; the block law; the pure food law; a law against fraudulent advertising, and a law decreasing interest rates. The good financial condition of the Association was referred to in detail, and attention was called to the large amount of correspondence made necessary, which formed a large part of his employment. A good portion of the correspondence he was able to accomplish by the form of circular letters, of which many thousand were sent out.

Many subjects were touched upon of importance to every member in the Association in this correspondence. He also advocated raising the annual dues to three dollars, and he summarized the work which should be taken up during the ensuing year, among which may be mentioned the following important features. The Association should continue to correct in so far as possible, the illicit shipment of goods by jobbers and manufacturers. To issue a bulletin to dealers monthly; to issue some publication to farmers who regularly send away for goods; this publication to contain such information as will divert their trade from the catalogue houses, and prevent the trade of the retail dealers of this State being given to firms that sell to these catalogue houses and supply houses—in fact to continue such legislative work as will secure the passage of laws that will better protect the credit business of the business men of this State.

The following officers and members of the board of directors were elected:

H. J. Rice, Huron, president; A. O. Ringsrud, Elk Point, vice-president; L. J. Ochsenreiter, Webster; R. S. Wessey, Wessington Springs; Mark C. Betts, Mount Vernon; L. S. Tyler, Salem; T. W. Dwight, Bridgewater.

At a meeting of the Board of Directors, held immediately after the election of officers, at the annual meeting, W. J. Healey, of Mitchell, was unanimously chosen as secretary, and A. F. Grimm, of Parkston, was elected to the office of treasurer for the ensuing year.

Rela Kittridge of Belfast, Me., holds the world's record for fine writing by placing 4600 words on an ordinary postal card.—*Exchange.*

HARDWARE'S "Prices Current" are reliable.

A Heavy Hardware Business Outing.

On Tuesday, July 11th, representatives from the Heavy Hardware committees of the New England Iron & Hardware Association, the Eastern New York and Vermont Hardware & Iron Association and the New York City & Brooklyn Iron & Hardware Association met at the Pequot Club House, Morris Cove, New Haven, as the guests of the Western New England Iron & Hardware Association. Col. R. S. Woodruff, of C. S. Mersick & Co., New Haven, conceived the plan of bringing these organizations together, and in this he was supported by President Peirson, and the Association which bade them welcome. A large number was in attendance, and great interest was shown by the visitors.

When all had arrived on the lawn in front of the beautiful club house, the special business of the day was immediately taken up. H. C. Bangs, of Providence, R. I., an ex-president of the New England Iron & Hardware Association, was called upon to speak of the working methods of that successful organization, now entering on its seventh year of usefulness.

He was followed by Allan J. Chase, of Boston, chairman of the price committee, who spoke of the methods employed in that particular branch of the New England Association's work, and dwelt upon the importance of the credit or collection bureau, which is a prominent feature of that association. By answering many questions propounded to him, many valuable points were given to the various organizations. Among those present who made addresses may be mentioned William E. Klein, president of the New York City & Brooklyn Association, Charles H. Turner, of Albany, president of the Eastern New York & Vermont Association, M. McBarron, of Boston, and L. L. Ensworth, of Hartford, Conn. General good feeling was shown by all present, and a very hopeful spirit was manifested by those participating in this enjoyable affair. Many practical suggestions were discussed, and not a few adopted, and from the result of the meeting a closer alliance between the four associations was foreshadowed. The business part of the entertainment was followed by an adjournment to the dining room, where the party participated in a genuine Connecticut Shore dinner, the discussion of which occupied their close attention for more than two hours. The menu included everything of importance usually obtained on such occasions, in more than one department.

After a few good-bye speeches were made by Col. Woodruff and President Peirson and Joseph Ruppert, of Brooklyn, the visiting guests were permitted to turn their faces toward home. Everything possible for the comfort of the visitors was made the special care of Col. Woodruff, who had entire charge of the entertainment. A careful attention to details, in which he had the hearty co-operation of every member of the Association, made the affair one of more than the usual success.

Thomas E. Oliver, of Oliver Bros., No. 127 Duane Street, New York, sailed on the steamer *La Normandie* on Saturday, 15th inst., to enjoy a few months' well deserved leisure in Great Britain and on the Continent. It is to be hoped among the good things he will encounter, and the pleasurable scenes which his outing is intended to embrace, he will forget how hard he has had to work this year in order to take advantage of this opportunity.

The Sydney, Australia, cycle track has been lighted in a novel way, by means of inverted arc lights. Fifty-five arc lights and seventy incandescents are placed around the track at intervals of thirty-five feet, the lamps being inverted with the reflectors immediately over the arc. There are absolutely no shadows cast, and leading cyclists are of the opinion that it is safer to ride at night under this light than by daylight.—*Scientific American.*

Export Notes.

Large shipments of Coldwell lawn mowers are being sent to Rotterdam.

The Goodell Bros. Co., of Greenfield, Mass., are exporting bench drills to Hamburg.

The Enterprise Manufacturing Co., Philadelphia, are shipping pumps to Hamburg.

The Goshen Sweeper Co., of Grand Rapids, Mich., is shipping carpet sweepers to Rotterdam.

The Zucker & Levett & Loeb Co., of this city are shipping nickel platers' supplies to Birmingham, Eng.

The International Silver Co., of this city, intend shipping several cases of plated ware to Adelaide, Australia.

The Cincinnati Machine Tool Co., of Cincinnati, recently shipped eleven cases of machine tools to Rotterdam.

Henry Disston & Sons, of Philadelphia, have just made an important shipment of saws to London via New York.

John H. Graham & Co., of this city, are ready to ship two carloads of Sharp's chopping axes to Adelaide, Australia.

E. T. Fraim, of the Keystone Lock Works, Lancaster, Pa., is shipping locks to Gothenburg through Hammacher, Delius & Co.

Sargent & Co., of this city, have ready for export forty-five cases of miscellaneous Hardware to Melbourne and other Australian ports.

Alfred Field & Co., of this city, are shipping quantities of table glass and lampware, also a general line of Hardware to Havana and Buenos Ayres.

The Pratt & Whitney Co., of Hartford, Ct., recently shipped five cases of machine tools to Bremen, three cases to Genoa and a smaller lot to Havre.

W. R. Ostrander & Co., of this city, recently shipped some electrical fittings to Yokohoma. The order was received through Takata & Co., of this city.

The Columbus Shovel Works are about to ship a lot of Boss shovels to Christiania, Norway. The order came through Hammacher, Delius & Co., of this city.

The Stanley Rule & Level Co., of New Britain, Conn., are exporting its specialties to Gothenburg, the orders coming through Hammacher, Delius & Co., of this city.

The Logan & Strobridge Iron Co., of New Brighton, Pa., are exporting large lots of mop handles to Havana. The orders are secured through Alfred Field & Co., of this city.

The Stanley Rule & Level Co., of New Britain, Conn., are exporting increasing lots of Hardware specialties to South African ports, the orders being secured through Flint, Eddy & Co.

The Nicholson File Co., of Providence, last week exported several cases of files to John Tragarth & Co., of Gothenburg, Sweden. The company is said to supply no less than fifteen foreign governments.

Henry Disston & Sons, of Philadelphia, are making a number of important shipments of saws to South African ports. American goods of this kind are in general request. The shipments are made through Flint, Eddy & Co.

Fayette R. Plumb, of Philadelphia, is about to export several hundred steel wedges to Clarkson & Co., of Vladivostok, Eastern Siberia. The wedges, which were ordered through W. R. Townsend, are to be utilized for stone and wood splitting.

The L. S. Starrett Co., of Athol, Mass., are shipping important lots of machinists' tools to Bombay and Calcutta, India, through Markt & Co., of this city. Australian shipments are also being made through Henry W. Peabody & Co., of this city.

The Thornton N. Motley Co., of this city, recently exported a complete outfit of molders' tools, intended for the equipment of a large foundry at Vladivostok, Eastern Siberia. The shipment was made to Clarkson & Co., through W. R. Townsend, of this city.

The Brown & Sharpe Manufacturing Co., of Providence, recently shipped a No. 1 universal milling machine to London through E. Houston & Co., of this city. Three No. 2 machines at the same time were forwarded to Antwerp, Belgium and Christiania, Norway.

V. Lowener, of Copenhagen, who is the principal handler of heavy machine tools in Denmark, sailed recently for Europe after a lengthy sojourn in this country. He placed orders here for over $130,000 worth of various kinds of machinery, principally machine tools.

W. C. Heller & Co., of Montclair, N. J., will make two shipments of steel shelf boxes to Capetown, South Africa. A consignment of the same description with cabinets is soon to be forwarded to London, and an important lot of fence ratchets, cabinets and steel boxes will be exported to Dublin.

C. E. Jennings & Co., of this city, are exporting quantities of carpenters' bits and braces and a general line of Hardware to South Africa, where there is stated to be a rapidly increasing trade for American goods of this description. These orders were secured through Flint, Eddy & Co., of this city.

The Hilles & Jones Co., of Wilmington, Del., yesterday shipped fifteen big cases of machine tools to the Nicopul Mining & Metallurgical Co., of Mariopul, South Russia, which concern is equipped with over ninety-five per cent. of American machinery. The order was received through Manning, Maxwell & Moore, of this city.

The American Steel & Wire Co.'s foreign shipments in one week this month, included 3960 kegs of wire nails to Hong Kong; 1800 kegs to Honolulu; 1280 kegs to Hamburg and 800 kegs to London. The shipments of wire during the same period were 203 tons to Yokohama, 75 tons to Buenos Ayres, 43 tons to Liverpool, 18 tons to Santos and 15 tons to Rotterdam.

Shewan, Tomes & Co., of this city have just made big shipments to the East. In the lot were 2500 kegs of wire nails, supplied by the American Steel & Wire Co., which were forwarded recently to Hong Kong, China, and 1800 kegs were shipped to Kobe, Japan. Included in the cargo for the first named port, were quantities of builders' Hardware, locks, saws, hatchets and the like, which were furnished by Sargent & Co., of this city. Collins & Co., of Hartford, Ct., forwarded several cases of cast steel axes. The value of the consignments was about $12,000.

The Niles Tool Works, of Hamilton, O., shipped recently by Hamburg steamship, sixteen cases of heavy machine tools. Three of the cases weighed no less than 60,000 pounds. One contained a boring mill, which is twelve feet in diameter. The consignment is intended for the Ascherleben Maschinen Aktien Gesellschaft, which is one of the largest machinery concerns in Germany. The shipment was negotiated through Knauth, Nachod & Kuhne, of this city. Another shipment last week comprises twenty-three cases of machine tools, which were exported to Hull, England.

GASTRONOMIC REMINISCENCES.

It's all well enough for us at the present time to experience the highest sense of gastronomic enjoyment, with our "Regal" shoes planted under the mahogany of the Hardware Club, while looking longingly over one of Prof. Blanc's menus, and then try to forget the divers and sundry places at which ten years and more ago we were only too glad to sate our hunter appetites and partially quench our insatiable thirst. Many a time and oft, have we tried all the various refectories in the neighborhood successively, from Holtz' to Schedler's, from Hollender's to Otto & Hillman's, and have alternately groped our way from the "Merchant's" to Brush's, in a search for some special dish which was a characteristic of the place selected, like those elegant "broiled oysters on toast" which were only procurable at Brush's, having first obtained celebrity at Crook & Duff's. Very few ever knew in what consisted their superior excellence, but every oyster was stuffed with cracker crumbs, this delicate method of preparation enabling it to receive that lovely russet color, and absorb just sufficient of the oyster juice to fit it for the palate of the most exacting Hardware gourmet.

The "Merchant's" being a temperance house, was famous for milk dishes and coffee and brown bread, and was called upon to furnish in addition nearly all the breakfasts and suppers for the "boys" compelled to begin their work earlier than usual, or to linger at night to finish up. We have all studied those variegated Scripture texts adorning the walls of that well-known place, and they did so adorn them long before "Surpassing Dennett's" time, and most of us have frequently wondered if Close really meant all the texts conveyed.

What a place Holtz' in Duane Street used to be for the more epicurian tastes of the high-toned principals and heads of departments in the Hardware trade; those who could stand the good-times expansion of a dollar lunch. At Holtz' good beer could always be found, which was served up by request either in glasses or steins, according to the grade of his patrons, and as for his wines, they were noted, from Medoc to Chateau Lafitte, as being the correct thing *par excellence* for any commercial function. I remember well how he, to avoid having his patrons murmur their objurgations out loud, established a complaint book, the location of which was passed by every one on the way out, and its pages were daily filled with a lot of the most humorous as well as apparently serious complaints which fertility of invention and mendacity of execution ever inscribed. I would give something to find that volume now, in order to refresh the fading memories of the numerous old timers still with us, while it would also illuminate the pages of *Hardware* with its witty contents, which in this complaint book were frequently jotted down in verse, and, I may say, worse. It finally became too farcical and ridiculously personal, which compelled Holtz to abolish the whole business. Many heads of firms and "fresh roosters" of office boys sat cheek by jowl one day after another at the lunch counter, where those frugally inclined would find a choice of two hot dishes at 25 cents each, which was a noted specialty. On one of the counters every variety of imported cheese obtainable in the market was clustered in all that rich and odorous state compatible with cheese perfection, from the mild and beer-suggestive Swiss to the high-toned Limburger and low-lived hand cheese, any one of which seemed always to say with Hamlet's step-dad; "my offense is rank and smells to heaven."

The first time I took lunch at Holtz', I went around alone, being on a trial trip, and took a seat at the counter presided over by the Teutonic "August." My old friends, Ransom Lamb and Ferd. Bonsall will remember August, having sat under his ministrations to my knowledge. He was an original character, extremely self-assertive, and being the senior in authority, was very touchy regarding his personal prerogatives, which included an occasional gratuity. I remember as well as though it were yesterday that a toothsome dish, called venison stew, was the *piece de* lunch-counter *resistance* on that particular day, and when a liberal portion of it was passed to me, it seemed to have an odor surrounding it that suggested "rifle and shot-bag." Phew! Wasn't it gamy? "I cannot stand this" I said to August. "Vat's the madder vid it?" looking me over, for he could see at a glance I was a new comer. "Smell it," said I. "I don'd schmell noting," said August. "You don't?" said I. "Ye gods, I wish I owned your nose for ten minutes." "Ach, dere's noting the madder vid it; just taste it," from August. Well, I hadn't touched my tongue to it yet, and I did taste it, and it was as sweet as sweet could be, extremely enjoyable, very appetizing and I must confess I saw the bottom of my plate appear with sincere regret. I could not explain to my satisfaction the violent antipathy conceived at first, but left the place satisfied my diagnosis was "off" or my nose was at any rate. The next day was "pot roast and red cabbage" day. Now you can imagine my state of mind when I found that dish also very rocky in the way of unpleasant odors. I complained again to August, naturally, and he remembering me as the disgruntled being of the day before, thought I was making "game" of him. But I assured him as far as I knew *he* smelled all right, but that the pot roast didn't. A happy inspiration struck August about that moment, and he fired it at me in one, two, three order. "Vy, vat is de madder by you? Don'd you know vot it ails you is?" "What?" asked I, feeling I was on the verge of heart failure. "Vy," said he, laughing all over his honest Austrian countenance, "you vas sedding on de cheese end of der gounder." "Well, I should say so." I came, I saw, I conquered, in those two days a more intensely concentrated effluvia than a D. L. & W. passenger encounters in going over the meadows toward Newark's fertilizer industry. I shunted my seat to the other end thenceforward, and the victuals no longer antagonized my appetite.

Many of us in those days thought the German cooking that was a prominent feature of the Hollender hostelry, in the basement of the granite building corner of Broadway and Chambers Street, was simply unapproachable in excellence, until the Hardware Club made Hollender "pale his ineffectual fires," and eventually decline business, retiring to his estates in his native land. Many and many a good Hardwareman graced Hollender's lunch counter or sat in an extremely satisfied mood at his tables. Many of the well-known faces have passed away from us, gone where there are no appetites to be appeased, no tastes to gratify. What a host of names that are now represented on the Hardware Club manual could I mention as having discussed the viands and enjoyed the good natured confabs always to be had from 12 to 2 at that historic counter, and these names would be led by President Sargent, who occasionally honored the place with his distinguished presence.

Digitized by Google

It was at Hollender's the amusing scene occurred which I think I may have told before, but if I have, it may bear repeating.

A few years ago when the City Hall had Mayor Gilroy in the forecastle, and the Emerald Isle furnished a large proportion of the crew, one of the lesser luminaries was entertaining at the lunch counter a relative from the "old dart," and was explaining that among other restaurants Hollender's stood pre-eminent for many things it furnished under the head of "imported." Said he: "They sell more imported lager beer than all the other places put together, and you can have a sandwich made with imported Westphalia ham; or of imported Swiss or Rochfort cheese; or you can have Frankfurters and sauer-kraut with both the ingredients made on the borders of the Rhine." He mentioned other enticing dishes which owed their importance and increased value to the fact that they were born "abroad." Finally, reaching the dessert portion of their lunch, he asked his friend what he would have in the way of pastry, and cranberry pie being mutually agreed upon, John, the lunchman, looking toward the entertainer with a look in which "cheese" was the interrogation point, asked simply: "Swiss or American?"

"For heaven's sake!" said our recent arrival, with his eyes open with astonishment, "are the *pies* imported too?"

I wonder what has become of little Louis, the all-around waiter at Hollender's, who was with that restaurant for so many years, and whose appearance never gave his age away. Louis went over to Germany one summer to surprise his folks, and to prove at the same time that a waiter could make more money in this country on tips than he could on his wages. And to paralyze them beyond redemption, as nothing of the kind forms an element of luxury over there, he took with him an immense watermelon, weighing about forty pounds, intending eventually to plant the seeds and initiate a new industry. He feasted his fancy daily during the voyage on the round of enjoyment the cutting of that melon would bring to the festal board in the far-off Fatherland. He nursed it with extreme care, and upon arriving at Bremerhaven, after the steamer was warped into her slip, and his baggage on the dock, he made a special journey to his state-room, and brought up the magnificent beauty. I regret to say, as a veracious chronicler, that the gang-plank was just steep enough for him to slip on the first step. Downward the smooth-skinned melon slipped from his Teutonic grasp, and bounded ever and anon along that cussed plank, and landed finally an unmitigated watermelon wreck on the dock. If the melon hadn't shed so much water on its own account, Louis would doubtless have felt a few salt tears course down his disgusted cheek. All he could utter was "Vell, dot's a tam schame."

Heller Brothers Co.

Tha firm of Heller & Bros., Newark, N. J., who have been engaged in business since 1836, have incorporated under the style of Heller Bros. Co. The new company are a close corporation with a capital of $500,000, the stock being owned and managed by the same persons as controlled it heretofore. The following officers and directors constitute the company: Elias G. Heller, president; Paul E. Heller, vice-president; Arnaud G. Heller, secretary and treasurer; George E. Heller, manager rasp and file works; John J. Heller, assistant manager rasp and file works; Ernest A. Geoffroy, manager steel and tool works.

The Oxford (Mo.) *Register* contains a paragraph to the effect that Mr. Coffin has gone to visit his cousin, Mr. Graves, in Tombstone, Ariz. The paper says that Mr. Coffin is on pleasure bent, but nevertheless, the item sounds funereal.

Recent Trade Publications.

SAMUEL A. ROGERS & CO, Buffalo, N. Y. Booklet having reference to saw gummers, knife grinders and band-saw sharpeners.

JOS. DIXON CRUCIBLE CO, Jersey City, N. J. An interesting pamphlet of 48 pages, covering improved modern methods of brazing by immersion. Fully illustrated with half tones, showing all the various processes, making it a very desirable publication for those interested to write for.

THE FERROSTEEL CO., Cleveland, Ohio. "The Blue Book for the Register Trade." A very handsomely illustrated catalogue of 50 pages, filled with fine illustrations of various patterns of hot air registers, faces and borders, together with separate pages covering electro-plated finishes in Antique and Japanese bronze and brass varieties.

THE BRAINERD-TANNER CO., No. 90 Chambers Street, New York. Booklet on Lightning Absorbent Graining Paper, for which they are sole agents.

THE AMERICAN SCREW CO., Providence, R. I. Booklet of the Declaration of Independence, showing a fac simile of the original Declaration.

THE MICHIGAN STOVE CO., Detroit, Mich. Booklet on "The Radiant Garland," their latest "self-feeding slack burner" smokeless stove.

CHARLES P. MOORE, Ravenswood, W. Va. Catalogue of shelf boxes and other store fixtures, including in its illustrated arrangement the layout of an entire Hardware store, which will form a very good guide in re-arranging a store not supplied with these latest appliances.

THE H. H. MAYHEW CO., Shelburne Falls, Mass. Catalogue of Hardware and mechanics' tools, and other specialties of their manufacture.

HARRISON BROS. & CO., INC., Philadelphia, Pa. Catalogue of 100 pages, covering their line of manufactures in colors, paints, varnishes, chemicals, etc.

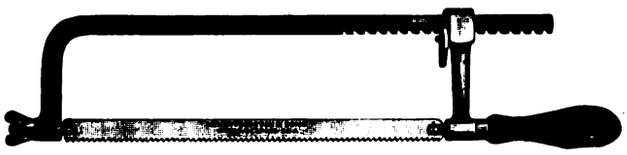
ERIC S. LAGERQUIST, Oxford Depot, Orange Co., N. Y. Booklet of the L Q Milk Strainer for dairy use.

THE MARLIN FIREARMS CO., New Haven, Conn. Booklet giving testimonials and prices of the Marlin repeating shot guns.

THE E. JENCKES MFG. CO., Pawtucket, R. I. Small catalogue giving the new list on bright and brass wire goods, screw hooks, screw eyes, etc.

How Coal Dust is Utilized.

About one seventh of the coal mined in the world is lost by being broken up too finely to be burned with profit. This coal dust accumulates at the rate of about twenty-eight million tons annually in the United Kingdom, and about twenty-two million in the United States. A prominent railway company is now mixing the dust with pitch and compressing it into blocks that burn like hard coal, with the advantage that they are entirely consumed to ashes. These "briquettes" are used on Continental railways of Europe. It is now suggested that the coal dust may be fed to furnaces through a nozzle, as though it were gas or petroleum. The vast hills of coal dust, or culm, in Pennsylvania, have in them wondrous possibilities. Nearly all the electric power now used in lighting the city of Scranton and in running its car system comes from the culm heaps. It is now claimed that the coal dust can be made into a cheap gas, while its success as a heating fuel for boilers has been proved. With culm-firing, a horse-power per annum will cost but $3.93, while at Niagara Falls, recently harnessed for man, the annual cost of a horsepower is $15.



The taste of strychnine can be detected when one grain is diluted with 600,000 parts of water.—*Ex.*

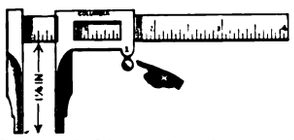
NEW GOODS AND SPECIALTIES.

Disston's Adjustable Hack Saw Frame.



Henry Disston & Sons, Philadelphia, Pa., are distributing through the Hardware trade their new Adjustable

Hack Saw frame shown in the accompanying illustration. It is made more than usually useful for the purpose desired, by the frame being adjustable for blades from 6 to 12 inches in length and is well and strongly made for the use required.

Simth's Handy Pocket Caliper.

E. G. Smith, Columbia, Pa., is placing before the Hardware trade the very useful handy caliper, an illustration of which we give herewith: The utility of these sliding beam calipers is not as well known as it should be, among those mechanics requiring some ready means of mechanical adjustment that can be carried in the pocket

to be immediately available. A caliper of this description is extremely useful in working up to standard sizes, for by the use of one hand only this caliper can be used on the work, and a glance shows how near to scale the filing or forging has reached. The eccentric fastener which forms one of the improvements of this modern tool, admits of a much quicker adjustment, with a single hand, than is usually possible with the old set screw style. The Handy caliper is made from steel and is perfectly finished throughout. Being furnished to the Hardware trade at a moderate price, it should meet with a ready sale.

The Oneida National Drill Chuck.

The Oneida National Chuck Co., Oneida, N.Y., Geo. W. Church, No. 183 Greenwich Street, New York, sales agent, are placing upon the market the National Skeleton Drill

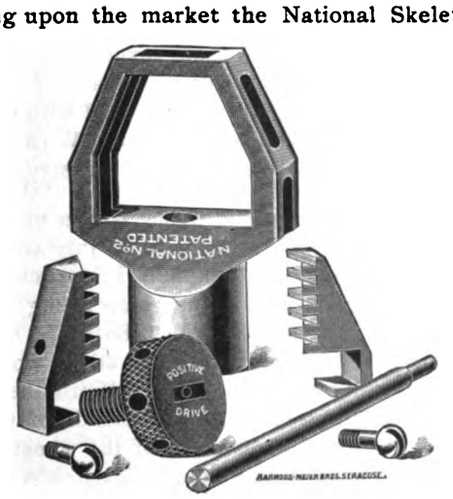


FIG. 1.

Chuck, illustrations of which we present herewith. This chuck is claimed to have an absolutely positive drive that will adjust itself by the revolution of the chuck; furnished also with taper jaws, if so ordered, that will hold taper shank drills without the use of wrench, as the greater the strain on the drill the tighter is the grip of the jaws. There is no projection to catch anything, and the flat, open body while enabling it to drill a round hole, makes it easy to

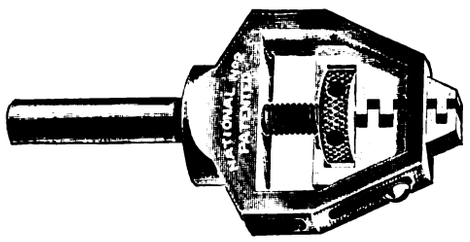

FIG. 2.

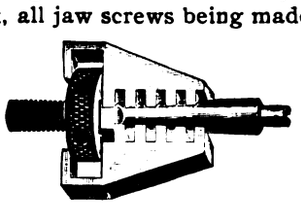
clean, light to handle and operate, while very substantial and durable. In Fig. 1 its construction is shown in its simplicity, all the parts being displayed, it being claimed that any one without being a skilled mechanic can take it apart and clean it. Fig. 2 illustrates it in shape for use, the positive drive being worked automatically by the revolving of the chuck, all jaw screws being made with left hand



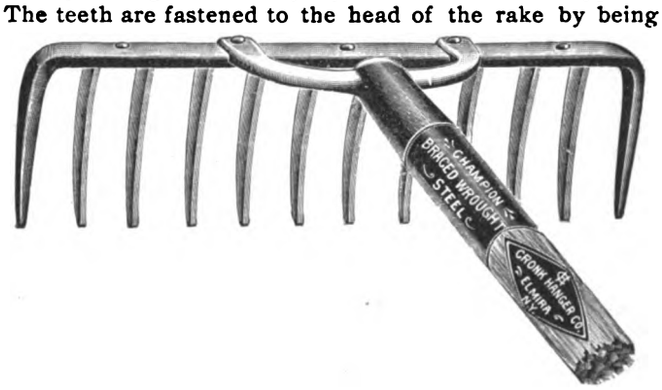


FIG. 3.

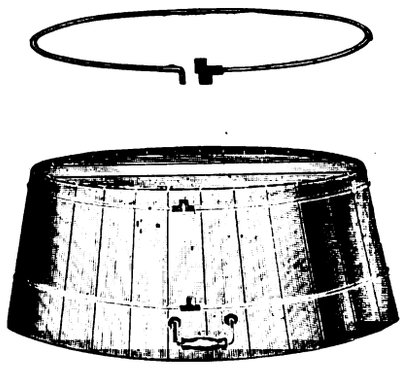
thread. Fig. 3 shows its adaptation for using taper shank drills, which must be ordered when wanted, otherwise regular jaws are sent. One of the important features claimed for this skeleton construction is that the work can always be seen, as no shadow is cast in its use.

Champion Steel Braced Garden Rake

The Cronk Hanger Co., Elmira, N. Y., are placing before the Hardware trade something new in the way of a wrought Steel Braced Garden Rake, which is denominated the "Champion." It is of patented construction, the teeth being made thin and broad, which makes them doubly strong in the way by which all strain is applied. The teeth are fastened to the head of the rake by being



strongly riveted in pairs, as indicated in the illustration shown herewith, the end teeth being crimped down from the channel steel from which the head is formed. The rake is strongly braced, and with the addition of a strong malleable socket, is claimed by the manufacturers to be of great strength and more than usually durable.

Herrick's Wire Hoops.

The F. A. Herrick Co., Jackson, Mich., are placing upon the market something new, which is meeting with approval by Hardware dealers generally. It is marketed under the name of Herrick's O.K. Wire Hoops, an illustration of

Digitized by Google

which, and its mode of application, is given herewith. They are made of galvanized wire, with a galvanized clip, and are designed for use on tubs, pails and barrels. The manufacturers claim that as they will not rust, they may be relied upon to outlast several of the ordinary hoops in general use. No other tool than an ordinary hammer is needed to put them on. When shipped they are sent out with one end of the wire in the clip, as illustrated, and are put up in neat boxes, from which they may be retailed. The pail hoops are 40 inches in length, and are put up 35 in each box. Tub hoops are 80 inches long and 25 in a box. Barrel hoops are 144 inches long and 15 in a box.

Hints to Advertisers.

A beautiful engraving may make your catalogue, circular or paper look handsome and attractive, but if the picture is nothing but a work of art, it conveys no message for you.—*Agricultural Advertising.*

The man who puts up a ladder that does not quite reach the point he desires to reach, is like the man who does just a little too little advertising. Both would be as well off if they did nothing at all.—*Printers' Ink.*

A Colorado gentleman advertised for a well preserved skeleton, and shortly after the paper was out an old maid of his town appeared in her best bib and tucker and asked if his intentions were honorable.—*Denver Post.*

Lavish expenditure is not as necessary to advertising as intelligent expenditure. He who spends a thousand dollars in ways that experience has proved profitable will get more returns than he who disposes of three times that amount in injudicious directions.—*Printers' Ink.*

Duplication of circulation is accentuation of effect. The more times a person sees an ad. and the more places he sees it, the more he is impressed by it. The shrewdest advertisers in the country "duplicate" circulations and do it for a purpose. That purpose is to sell more goods by more thoroughly interesting the readers of advertisements. *Fame.*

Advertising is largely a matter of experience, and we can not rely to-day upon the successful methods of yesterday. To know just how to arouse the attention and awaken the interest of a capricious public is a problem that cannot be solved by any set rules. The best that we can do is to generalize certain principles that experience, observation and study have developed.—*Agricultural Advertising.*

It is the momentum of advertising that carries a business along. It is like the steam power which carries along the railroad train. Cut off the steam and the train will move on for some distance without any perceptible diminution of speed. But gradually it comes to a full stop. It is the same way with advertising. The only way to keep the business engine going, whether the engineer be an individual or a combination, is to keep up steam.—*Morse.*

Don't claim too much for your ad. Talk clearly and as interestingly as possible about the good points of your goods. Talk exactly as you would to a customer before you. Tell of the endeavors you make to have your stock the best. Even tell, if you will, why you claim your store or stock is the best. Tell facts, quote prices, and let the buyer judge whether or not your claims are logical. But don't claim it all. You won't be believed anyway.—*Advertising World.*

One step won't take you very far,
You've got to keep on walking;
One word won't tell folks what you are,
You've got to keep on talking.

One inch won't make you very tall,
You've got to keep on growing;
One little "ad" won't do it all,
You've got to keep 'em going.
—*Publicity*, London, Eng.

The matter that goes in answer to an inquiry elicited by an advertisement is more important than the advertisement itself, because upon it depends whether or not a customer is made. If it does not satisfy the curiosity of the potential buyer all the excellence of the announcement which caused it to be sent for is wasted. Many advertisers who recognize this fact expend most of their time and energy upon the matter sent in answer to inquiries.—*Printers' Ink.*

Mind you, I don't advocate the use of nothing but humor in any advertising. I say to use just enough to season the dish you are serving up. Be judicious in the use of humor. Life is a serious thing at best, and it needs a touch of humor now and then to even things up. It takes a vast deal of skill to use humor properly in advertising. The novice makes his humor so predominant that the reader forgets the article advertised, and remembers only the joke. The man who knows how to introduce a sparkling bit of humor, a bright, happy, twinkling sentence, makes the rest of his advertising matter stand out all the stronger by contrast.—*E. D. Gibbs.*

Harrison Bros. & Co., Inc.

The name of Harrison Bros. & Co., Incorporated, Philadlephia, has been so long and successfully associated with whatever was recognized as standard in the lines of manufactures connected with white lead, colors, paints, varnishes, chemicals, etc., there is but little new we can add in calling attention to their advertisement on page 18. This house, founded in the last century, was incorporated in 1898, and their plant is to-day, in all probability, the most extensive in the entire paint industry. Every item necessary for the successful production of their enormous output, is manufactured in some part of their extensive works, the Grays Ferry works alone, covering an area of thirty five acres, over two thirds of which is covered with sixty buildings of the most approved construction. We hope to refer again to this representative American industry.

The Iver Johnson's Arms & Cycle Works of Fitchburg, Mass., secured a good advertisement on July 4th, when the American Biograph Co. biographed Kilpatrick—the one-legged cyclist—in his sensational step riding act before 20,000 people, at the Point of Pines, Boston. This daring rider uses the Iver Johnson bicycle in all his work, and, as these pictures will be shown at all the Keith theatres with their famous biograph machines, thousands of people will gain an idea of the great strength of the wheel subjected to the terrible strain of this ride.

It is not generally known that by an order issued by Perry S. Heath, acting Postmaster General the redemption at face value is now permitted for all stamped envelopes and newspaper wrappers which have been damaged by fire, water, printing or otherwise inadvertently defaced so as to render them unfit for use.

WHAT I WOULD DO.

To be thrown out of employment is not a pleasurable anticipation. Yet in these days of combines and consolidations, it sometimes happens to those who are most worthy and competent, and less prepared for this phase of adversity. A case recently came under the notice of the writer of a man who had been employed for twenty-six years by one firm and was discharged because his employers had sold out their business to a trust, so that his services were no longer required. This case was one that peculiarly excited my sympathies, for a service of such a length of time surely was entitled to something more than a summary dismissal. But length of service does not count for much with hard-headed business men. The almighty dollar is forever uppermost in their minds, and the bodies of men are only of value to them when they can be used to supplement their wealth.

Every bookkeeper, especially, should know how such a state of affairs would affect them, and make some little provision for a possible contingency. He should improve the prospect by saving a portion of his present salary. Many do not do this, but imagine their positions are secure and live up to their stated incomes. Or they reason that they can easily obtain another situation should they need one, and take the good of their wages as they go along. Any man who does this makes a mistake, as ready cash, even if the amount be small, is a desirable possession to a person without steady employment.

It is well for the man who is comfortably situated to sometimes ask himself "What would I do if I should lose my present employment?" Such a possibility may seem apparently very remote, but under present conditions a man working for a firm should think the matter over occasionally as his chances for an unexpected dismissal are often greater than he imagines.

One or two things have suggested themselves to me as means of affording a livelihood should I, at short notice, find myself in such unfavorable circumstances. The first that would occur to me would be to start business on my own account. There are many arguments for and against such a procedure, and the person interested is the only one who can weigh the conditions and determine the matter for himself. Of course if one had sufficient capital, such a course need not long be debated; but even if possessed of a small amount of hard earned savings, say of one or two thousand dollars, it would be quite a question to decide, Yet I would feel very much like making the attempt, feeling confident the requisite managing ability would be forthcoming. A man should always obtain a good grasp of the business where he is employed, and with this knowledge in particular and his general industrial knowledge, his chances of success ought to be fairly good.

He would soon show that he has been trained at a good school of experience and being fairly well equipped, from a mental standpoint he is sure of making a strong fight in the business world. Lack of capital would be the greatest handicap, for few office men can save enough from their wages to make much of a start in this way; but if they have a reputation for honesty and sobriety in their immediate locality, they can generally secure assistance in a financial way on application to aid them in their venture. 'Tis true there is the risk of failure, but there is risk in every undertaking in life and the proverbial saying, "nothing ventured, nothing gained," is true to-day. It is a very small and limited business which does not give a man a moderate salary; added to which the independence and knowledge that one's position is sure, is indeed a comfortable one. There is nothing which develops a man like being thrown upon his own resources, and, oftentimes, the loss of a situation proves a blessing in disguise.

Then again, providing one does not have any capital, or any inclination to start in business, canvassing for life insurance is an occupation that is always open for recruits. It requires no money, and often men with no experience achieve great success at it. I know of a friend of mine who lost a good situation a few years ago and went into the insurance field, and to-day he is earning double what he formerly did. Not every one can succeed at it, but it would be worth the trial for a person needing employment. To a man who has been accustomed to figures it has peculiar attraction, and with ordinary aptitude and perseverance, one must be of very limited ability who could not make a living anyway.

To a man out of employment the cultivation of the soil affords an opportunity of retrieving fallen fortunes. An office man's health may be weakened, and a change to an out-door occupation might be chosen for this reason alone. But poultry and fruit raising near a city is an employment which any man with energy and a taste in this direction could soon make profitable. To one who has had no experience in the work there would be much to learn, but the many publications devoted to poultry raising and farming and fruit raising would soon furnish needed information. Living expenses would be thus cut down, as the little farm would produce almost everything required for the table. The cash capital required for the start need not be much, as land and tools could be rented.

The many changes constantly taking place in the business world render it necessary that a man should keep his eyes open and be prepared for an unforeseen emergency at any time; and in view of a loss of employment it does no harm to have a thought or two about the future. In fact, every man is the better of having something outside of his daily occupation by which to divert his mind, and educating himself for another occupation, affords this diversion even if the necessity of a change never arises.

LYLE MERTON.

The National Cutlery Co.

As an additional department in the already extensive plant of Thomas Devlin & Co., Philadelphia, a new enterprise has just been inaugurated with the best prospect for success in the especial line contemplated, which is the manufacture of steel laid shears. The assortment includes a full line of straight and bent trimmers, barbers' shears, etc., which assortment will be increased gradually in accordance with the demands of the trade. The finest goods on the market is the aim and ambition of the projectors of the company.

The manufacturing department of the new company will be under the charge of L. A. Nickerson, who has had a large experience in the manufacture of shears, having formerly been in charge of the manufacturing department of the Davenport Cutlery Co., Davenport, Iowa. The sales department will be managed by C. W. Sprague, formerly of the Waterville Cutlery Co., Waterville, Conn., and well known to the Hardware and cutlery trade of the country.

The enterprise will undoubtedly meet with a fair share of trade in the important line covered by their product.

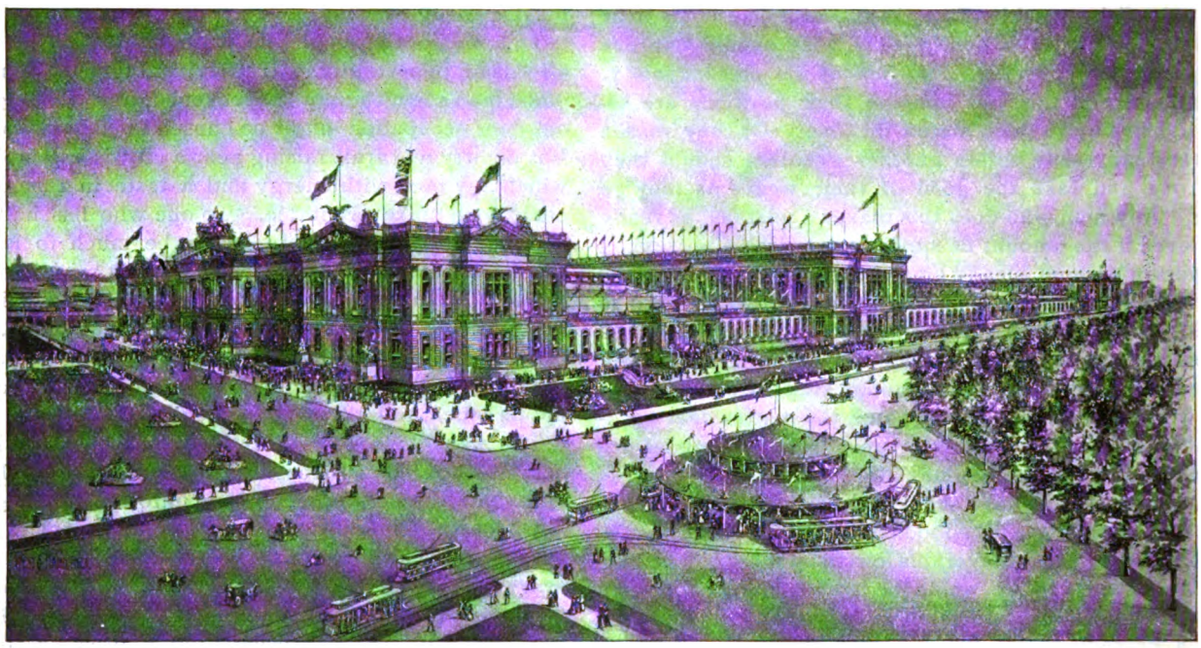
THE PHILADELPHIA EXPOSITION OF 1899.

Nowhere in the history of the world have such rapid strides in export trade been recorded as those made by the United States within the last two years. Our manufacturers have made their efforts felt by foreign exporters in every corner of the globe, with the result that we are being jealously watched from those quarters, in the expectation that there may be a "slipping up" in some branch of our extensive export trade.



We are thoroughly awake to these possibilities, however, and are not to be taken unawares. In order to strengthen our grip in every possible manner, the National Export Exposition, which opens in Philadelphia early in September, will give the world another opportunity to examine American manufactures and find for themselves just why our advancement is so rapid.

For the Exposition, great preparations have been made to insure its success. Handsome and stately buildings will give it the prestige which such an exhibition rightly deserves. There will be a Main Building composed of five separate structures, together with a building devoted solely to implements, vehicles, and furniture, and in these it is intended to display the best of American manufactures. Statistics show our iron and steel exports to be greater than any other class of goods, and it behooves the Exposition to make this branch one of, if not the principal, displays. The entire south pavilion of the Main Building will be devoted to Hardware exhibits, showing the products which have given us the advantage in this direction.

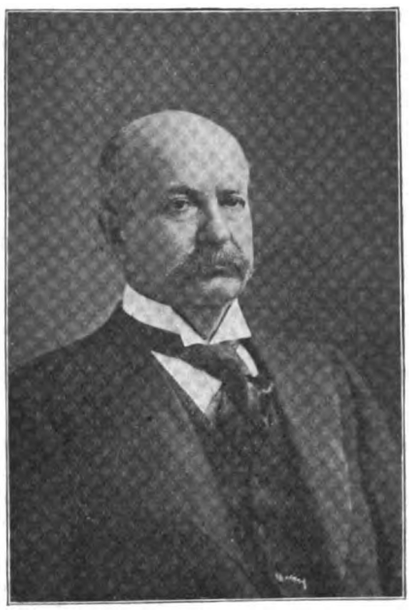
Not only have we increased the capacities of materials from the standpoint of strength, but we have produced the manufactured articles lighter, cheaper, more durable, of greater variety and perfection than any other country on the globe. Our output of steel rails and billets alone has startled the commercial world. We have shipped railway supplies, bridge materials, wire of every known variety, builders Hardware, cutlery, and hundreds of other Hardware products to the remotest countries imaginable, and have wrested business from what have heretofore been known as the world's iron and steel centres. Sheffield, Birmingham and cities with like reputations, that have hitherto controlled exclusively the output of iron and steel products, now admit our wares to be superior to their own and it is not to be wondered at that American Hardware is handled right in their very markets.

The most improved tools, labor-saving devices and machinery will be on exhibition. Thousands of strangers from all over the world will view the exhibits, and as there is now a great demand for American Hardware of all kinds in foreign countries, especially Australia and South Africa, exhibits in this line will not only be advantageous in an advertising way but will undoubtedly tend to create trade.

A space 381 feet long and 85 feet wide, covering the whole of the south wing of the Main Building will be devoted to exports of Hardware of all kinds. Leaving out the aisles there will be about 16,000 square feet of exhibition space in the Hardware section. The greater part of this space has already been taken and most of the allotments made. The display will be most comprehensive and complete, covering every branch of the trade. It will be in fact one of the best represented lines at the Exposition. The best known manufacturers in the country are among the exhibitors.

MAIN BUILDING, NATIONAL EXPORT EXPOSITION, SEPTEMBER 14 TO NOVEMBER 30, 1899.

European manufacturers of Hardware are feeling American competition to a very great extent. American goods are preferred to home products, not because they are cheaper, but because the American manufacturer has reached a higher state of perfection in turning out his products.



Wire and cut nails, barbed and smooth wire, table and household cutlery, railroad tools, blacksmith's Hardware, augers, bits, drills, locks, and other general and heavy Hardware will be exhibited to merchants, manufacturers, buyers and representatives of all the countries of the world.

In his wildest fancy, no one could have pictured the future of our iron and steel trade, for it seems to be unending in its upward march.

Digitized by Google

A few years ago, our supply was scarcely equal to our demands, and foreigners were simply reaping a harvest at our expense. They were, however, keenly observing that our own makes were giving better satisfaction and that inventions were progressing which would eventually oust them from our markets.

Anticipating prolonged peace and continued stimulation of the iron and steel trade, the National Export Exposition will use its utmost endeavors to impress more forcibly upon foreigners that we are second to none in these productions and intend to remain so.

P. A. B. WIDENER, PRESIDENT NATIONAL EXPORT EXPOSITION

Illinois Retail Hardware Association.

A meeting is called for the purpose of organizing a State Association of Retail Hardware merchants in Illinois, and will be held in Chicago on August 16th, 17th and 18th. The following circular having reference to the matter has been issued by Ehler Goettsche, No. 1049 Milwaukee Avenue, and Fred. Kurtz, No. 1061 West Madison Street, Chicago, of the Organization Committee, who are desirous of supplying any further information desired:

To the Hardware Dealers of Illinois:

Greeting: The Chicago Retail Hardware Dealers' Association believe that the Hardware dealers of Illinois should follow the example of the trade in surrounding States and form a State association for mutual benefit and improvement.

The Organization Committee appointed at a recent meeting of the Chicago Retail Hardware Dealers' Association hereby extend to you an earnest and hearty invitation to attend a convention called to meet at Schoenhofen's Hall, Milwaukee and Ashland Avenues, Chicago, August 16th, 17th and 18th.

There will be a discussion of matters of interest to every Hardware dealer in this State, and no member of the trade should miss this meeting. Kindly inform us whether you will be present or not, as in order to secure a rate of a fare and a third for the round trip 100 dealers from out of the city must be present. Try and arrange it so as to do your fall business in Chicago at that time. Dealers expecting to attend this meeting will please follow these instructions.

Directions are also given in the circular how to secure transportation for one and one third fare, and reduced hotel rates in Chicago.

A Reasonable Doubt.—Judge—Prisoner, you are accused of stealing this watch. Are you guilty or not guilty?

Prisoner.—I's guilty, Yo' Honah; but I's 'spicious dat ain't de same watch what I stole.—*Jewelers' Weekly.*

About one hundred years ago the use of starch for stiffening frills around the neck was considered highly reprehensible, if not positively sinful.—*Ex.*

The Carriage Builders' National Association.

The Carriage Builders' National Association intend holding a convention at Indianapolis, during the week of October 23d, and for the first time the president, D. N. Parry of the Parry Mfg. Co., was successful in his efforts to obtain a modified reduced rate of fare as will be noted from the following letter from the Commissioner.

CENTRAL PASSENGER ASSOCIATION.

Office of the Commissioner. Chicago, July 17, 1899.

Carriage Builders' National Association, Indianapolis, Ind.,
Mr. D. N. Parry, President,
Carriage Builders' Association, Indianapolis, Ind.

Dear sir: Referring to previous correspondence with respect to the matter of reduced fares for the above convention. We have pleasure in informing you that, during the meeting of this Association held on July 11th, a telegram from Indianapolis Passenger Committee strongly recommending reconsideration of previous action with regard to the question of reduced fares for the above convention was presented, and the question having been reconsidered, a rate of one fare for the round trip was established (subject to the restrictions of rule 5 stamped thereon); tickets to be sold from all points in Central Passenger Association territory on two days which will best suit the convenience of your delegates, good to return the day following the adjournment of the convention. Will you, therefore, kindly select two dates which will best suit your purposes, which we would respectfully suggest should be the day immediately preceding the opening of the convention and the first date thereof, and advise us as to the date on which the convention will adjourn, in order that we may make proper announcement to all interested.

Yours truly,
F. C. DONALD,
Commissioner.

Rule 5, to which the above refers is as noted below:

When reduced round trip rates are granted of one fare for the round trip, such rates will not apply from stations of less distance to point of meeting than thirty-three miles, but the rates within the territory described will be $1, except where a fare and a third makes less than $1. When rate of one cent a mile each way is authorized, rates for less than fifty miles will be $1, except where a fare and a third of the regular one way rate makes less than $1.

American Bicycle Co.

At a meeting held at the Waldorf-Astoria for several days lately, the organization of the various bicycle manufacturers into one company to be called The American Bicycle Co., was modified as to the necessary capital desired, by perfecting the organization on the following basis:

The new company is to be incorporated with a capital of $40,000,000, divided into $10,000,000 of twenty-year bonds, $10 000,000 of preferred stock and $20,000,000 of common stock. The concerns going into the combination will receive 30 per cent. of their estimated assets in cash, 30 per cent. in preferred stock, and 50 per cent. in common stock. The companies going into the combination thus get 110 per cent. for 100 per cent. put in or a bonus of 10 per cent. of their contribution, either in cash or common or preferred stock.

It is reported that the Pope Mfg. Co. and Gormuily & Jeffery preferred taking the securities of the company for the entire amount of their property in lieu of a portion in cash.

The hundred or more representatives of the forty-five firms said to have gone into the combination were present at the meeting last week, but many left after signing their agreements, and the officials will be elected and the remaining business of the incorporation done by proxies.

It is believed that A. G. Spalding will be chosen president of the company.

The principal exports of Puerto Rico are coffee, honey, sugar and tobacco, worth for 1895, $13,500,000.—*Ex.*

The population of Puerto Rico in 1887 was 813,937—300,000 of them negroes.—*Exchange.*

MICHIGAN HARDWARE ASS'N CONVENTION.

The fourth annual convention of the Michigan Hardware Association was held at the Russell House, Detroit, on Wednesday and Thursday the 12th and 13th inst.

Although composed of retail houses only, the convention was of sufficient importance in the Hardware world to attract a large representation of the manufacturing and jobbing interests throughout the entire State. The attendance is referred to as having exceeded in number those present at any previous meeting of a similar character, and the importance of its proceedings was participated in by a largely increased number of delegates.

The convention was called to order on Wednesday afternoon by President C. G. Jewett of Howell; the roll was called by Secretary Henry C. Minnie of Eaton Rapids, after which a Committee on Credentials was appointed, consisting of W. A. Tower of Muskegon, J. W. Jochim of Ishpeming and F. J. Cook of Fowlerville.

Mayor Maybury, of the city of Detroit, then welcomed the members of the convention and their friends in a happy speech, in which he alluded pleasantly to many of the honored names connected with the early days of the Detroit Hardware trade, and to the changes which had since taken place. He dwelt upon the taste and attractiveness introduced in the forming and finishing of goods in these days, and claimed that men now make their business instead of letting their business make them. He expressed the desire that a more kindly feeling should be cultivated between the merchants and manufacturers of Detroit and the business men of the other parts of the State, and ended with some humorous remarks relative to the key of the city.

President Jewett responded, accepting the kindly welcome in behalf of the Association, and expressed much gratification at the cordial greeting extended by the citizens of Detroit.

The Committee on Credentials subsequently reported 109 names registered at that time of members entitled to seats in the convention. The minutes of the last annual convention were read by the secretary, also minutes of meetings held by the Investigating Committee on October 12th and January 17th, to settle complaints by members against jobbing houses and manufacturers who had been selling to consumers, all of which were adjusted satisfactorily save one. The minutes of a meeting by the Executive Committee on April 11th were also read.

The President, C. G. Jewett then read an extended address, which was of an aggressive and stalwart character throughout. We are only able to make the following extracts:

Our association has a purpose, I take it, or else we would not be organized. We hope by association and yearly exchange of ideas, new and otherwise, to improve ourselves in a social and business way. We have here, gentlemen, a judicial combination of like interests for mutual protection. We wish to better ourselves as merchants, to improve our methods of merchandising and to get closer in touch with the trade which we in part represent and of which we are the vital arteries. We are nearest to the consumers, and being nearest act as signalmen to the manufacturers, giving notice of the ebb and flow of visible staples in our line; barometers of the Hardware trade, if you please, revealing its conditions from time to time better than any other agencies that are dependent upon or related to it. I think it is for us to say first and with authority that prosperity has returned to the country in a large measure. We feel the pulse of it in our daily sales. We think it permanent and yet we are able to see that the greed, or worse, of manufacturers may check the rising current and bring on an inertia and stagnation.

He referred to several abortive attempts to curtail department stores, as follows:

I am aware that attempts which have proved abortive have been made in one or two of the States of this country to curtail the department stores. The trouble with these efforts has been that they have been promoted by the politicians for politieal purposes only. Not until the masses can be shown through education along the right lines the true character of the department store will it be possible to make a crusade that will result in making the owners of them pay their just share of the taxes, and paying such find themselves unable to keep out of business the thousands of retail dealers who are ruined by their taxless and soulless competition.

He concluded his interesting address as follows:

Trusts will not fight each other to death in competition. They must be discouraged by taxing them proportionately to the benefits claimed by their beneficiaries. We cannot rid ourselves of them by praying against them, by deploring their existence, nor by confessing our helplessness to cope with them. They are mighty and unscrupulous. They are intrenched behind capital defended by the brightest minds money can command. It is your function and mine, gentlemen, to appeal to the law for self-preservation, to ignore the glib-tongued politician and patronizing demagogues, to apply to the trust problem the only restraint that we can command—the restraint of taxation.

A committee to consider and report on the president's address was appointed, as follows: Charles F. Bock, of Battle Creek, Henry C. Weber, of Detroit, and H. W. Weber, of West Bay City.

Henry C. Minnie read the secretary and treasurer's report, a portion of which is given herewith:

I am pleased to submit herewith my annual report as secretary-treasurer of this association, and which I trust may meet with your approval:

Active members at last report	144
Honorary members at last report	35
Active members added since	8
Honorary members added since	1
Total	188

Seven active members have withdrawn during the year, leaving the total membership at this date 181, made up as follows:

Active members	145
Honorary members	36
Total	181

A net increase of two members since our last annual meeting.

A. H. Dane, of Detroit, read a very graphic and entertaining paper on "The Experiences of a Traveling Man," which concluded with the following amusing incident from his experience:

You frequently hear people who pride themselves on being shrewd judges of human nature assert that they can tell what a man is by his looks. I claim it cannot be done. The two years I have referred to were spent in traveling in the State of Indiana. My headquarters were in Indianapolis, where I spent most of my Sundays. I arrived one Saturday afternoon, removed the stains of travel and, encasing my manly figure in a spic span new suit of clothes, left the Dennison House about 7 o'clock to walk down and call on our customer. I had gone but a few paces when a gentleman whom I had never seen before smiled and spoke

Digitized by Google

very pleasantly to me. A little further and another one, and then another, and so it kept on, when finally a man rushed up to me, grasped me by the hand and said, "Hello, Sim, old boy, I saw by the paper to-night that you had just returned." I told him that I had just returned but my name wasn't Sim. He appeared much confused, begged my pardon and retired, leaving me in the dark as to who this Sim that so many seemed to know was. Of course I thought it a good joke and took some pains to speak to every one in whose eyes I could detect a gleam of recognition, and I should say there were about a hundred of them before I reached the store. I went in laughing heartily, told the story to the customer, and asked him who it was that I so closely resembled. He thought a few moments. "Sim, Sim," then suddenly said, "Oh, I have it, you do look like Sim Coy." "And who is Sim Coy?" I asked. His reply was, "Oh, he runs a saloon and is a Democratic ward heeler. He was convicted of stuffing ballot boxes. He just returned to-day. For the past two years he has been in jail." Then everybody laughed but me.

He was followed by Dudley W. Smith, of Detroit, who made an amusing address on the subject of "The Hustler."

In the Thursday morning session, among other matters of importance, a committee of nominations was appointed, which later in the day reported the following recommendations:

PRESIDENT.

Henry W. Weber, West Bay City.

VICE-PRESIDENT.

W. J. Boyce, Port Huron.

SECRETARY AND TREASURER.

Fred H. Cozzens, Detroit.

INVESTIGATING COMMITTEE.

Jacob Stahl, Lansing.
G. W. Bruske, Saginaw.
W. A. Towner, Muskegon.

ENTERTAINMENT COMMITTEE.

C. G. Jewett, Howell.
Chas. Gariner, Wyandotte.
John Popp, Saginaw.

TRANSPORTATION COMMITTEE.

Frank Brockett, Battle Creek.
John Capen, Detroit.
H. A. Scott, Marine City.

Executive Committee, in addition to the president and vice-president and secretary, Geo. A. Wilcox, of Adrian, and Bert Edwards of Kalamazoo, for two years, and J. B. Sperry, of Port Huron, and G. W. Hubbard, of Flint, for one year.

The question box, when opened, was found to offer the following subjects for discussion, which was participated in at considerable length:

1. Are you in favor of a National Retail Hardware Dealers' Association?
2. Do jobbers belong to the Michigan Hardware Association, and to what extent?
3. What will you do with a furniture store which puts in a Hardware line simply as an advertisement?
4. What are the real aims and objects of this association, and how can we best keep it alive?
5. What shall be done with jobbers who sell to department stores?
6. Is it right and just to the dealers that manufacturers and jobbers sell at retail?
7. How can a dealer keep his stock free from dead stock?
8. Do we realize profits from advances?
9. What policy should Hardwaremen adopt with reference to Catalogue houses?
10. Is it advisable to have a mutual fire insurance department in connection with this association?
11. What is the best mode of collecting old accounts?
12. What line of advertising pays?
13. What is the best way to compete with racket stores and catalogue houses?
14. What is the best method of keeping Hardware catalogues?
15. How shall we avoid dull seasons?
16. Is it policy to cut prices on staple articles to meet competition from bankrupt stores?

After the transaction of some other routine business, and the postponement of the question at what place to hold the next annual meeting, the discussion of which was left to the executive committee, the committee adjourned *sine die*.

Albany Festivities.

The employes of the Albany Hardware & Iron Co., Albany, N. Y., on the 15th inst., participated in one of the most enjoyable outings ever experienced by the Hardware and Iron trade in that part of the country. The affair was given by Charles H. Turner, president of the company, and was entirely under his auspices. Saturday being a half holiday, when the business of the day was over, the employes, numbering sixty, including the guests, all formed in line, wearing white felt hats with blue and white narrow ribbons, and with blue badges adorning the same, having on them "Albany Hardware & Iron Co. Outing, Averill Park, July 15, 1899," in gold letters. At the right were Charles H. Turner, the president of the company, and his official staff, composed of William B. Wackerhagen, secretary; James K. Dunscomb, treasurer, with Peter Kinnear, Col. William E. Fitch and Warren S. Hastings. Col. Daniel S. Benton was in command of the batallion, with James O. Hovey, adjutant and chief of staff. The procession formed in two platoons, reaching from curb to curb, and filling complete two open cars that were waiting them at the starting point, the side of each car being decorated with long banners, inscribed "Albany Hardware & Iron Co. Outing."

The ride to the park was most picturesque, passing through farms and woodland, past babbling brooks, with the mountains in the distance standing like guards to prevent an invasion of the peaceful valley. Mine host of the Averill Park Hotel was waiting for his guests, and escorted them to the dining room, where a dinner was served in a most excellent manner.

After the enjoyment of a first-class *menu*, and coffee had been quaffed and cigars lighted, Mr. Charles H. Turner welcomed his employes in a happy speech, stating that his talks to them were usually of a business character, but at this time he felt as though no "shop" talk would be considered the proper thing. He felt that employer and employe were equal on this occasion, and he had but one object in view, and that was that each and every one should thoroughly enjoy himself, and make the event something long to be remembered.

Short addresses were made by Peter Kinnear, Col. Fitch, Warren Hastings and James K. Dunscomb.

After the conclusion of President Turner's address, Mr. Wackerhagen, on behalf of the employes, presented Mr. Turner with a magnificent cut-glass loving cup trimmed with silver. Mr. Turner was deeply affected by the gift, and for the time could scarcely find words to express his full appreciation of the kind surprise. After the cup had been passed around, and Mr. Turner's health drank, the party adjourned to the ball field, where the next two hours were spent in athletic enjoyment. The bicycle race followed next on the programme, and broad jumps and tugs of war and other athletic sports passed the day away.

Lunch was served at a later hour, and at eight o'clock a start was made for Albany, which was reached at 9:35. The boys departed for home after three cheers had been given to President Turner, and a more enjoyable day it was confessed by all of them was never passed.

REVIEW OF THE MARKETS.

Hardware: Trade generally progresses in a very satisfactory volume. No longer are comparisons with last year's business assumed to be of much importance, the business of the present year being too greatly in excess on many lines to convey any especial lesson except that more money has been earned by people who are willing to spend it. Builders' Hardware, notwithstanding advancing quotations, continues in excellent request. Considerable activity in building is one of the conditions of prosperity for which the West is noticeable. This affects many more lines than builders' Hardware generally, and creates a gratifying impulse through so many analagous industries that a happy state of affairs is everywhere apparent. Stocks are becoming depleted on every hand. and some indisposition to purchase at prevailing quotations may make lighter stocks carried by the jobbers, form a bad feature to face a possibly unusual demand. Delay seems only to act as an incentive for higher quotations, and for the dealer to reap some of the advantages obtained by good stocks in the spring trade, it would seem as though customary purchases cannot very well be relegated to the rear.

Wire Nails: The advance anticipated by the trade to arrive, has been announced, and as will be seen by the schedule printed below, prices to jobbers are 15 cents a keg higher than noted in our previous issue, and 20 cents higher to the retailer. The American Steel and Wire Co. are evidently making prices that will placate the jobbers, and enable them to make prices to the retailer more tempting than are given by the company. We quote present prices as follows, f. o. b. Pittsburg, 30 days, net:

To jobbers in carload lots	$2.50
" in less than carload lots	2.57½
To retailers in carload lots	2.65
" in less than carload lots	2.75

Terms: 30 days from date of invoice, net cash, f. o. b. Pittsburg.

New York prices are represented by the following:

To retailers, carloads on dock	$2.80
" less than carloads on dock	2.95
Small lots from store	3.05

Cut Nails: Although it was thought that higher prices would follow upon the advance when made on wire nails, the present condition of the cut nail market does not seem to warrant any such action on the part of the mills, and prices consequently remain as previously quoted, which are f. o.b. Pittsburg. Freight being added to make a net price delivered at destination:

To jobbers in carload lots	$2.10
To " in less than carload lots	2.15
To retailers in carload lots	2.20
To " in less than carload lots	2.35

New York business is fairly active under the previous prices, being named as follows:

Carload lots on dock	$2.25
Small lots from store	$2.50

Barb Wire: The market on barb wire being subject to similar conditions as those affecting wire nails, was made subject to the same advances. Present quotations being named as follows, f. o. b. Pittsburg, net 30 days:

To jobbers in carload lots, Painted	$2.60
" " Galvanized	3.10
" in less than carload lots, Painted	2.62½
" " " " Galvanized	3.12½
To retailers in carload lots, Painted	2.75
" " Galvanized	3.25
" in less than carload lots, Painted	2.85
" " " " Galvanized	3.35

Smooth Wire: Smooth wire prices, in common with the other wire products were advanced as follows, f.o.b. Pittsburg, 30 days net:

To jobbers in carload lots	$2.35
To " in less than carload lots	2.37½
To retailers in carload lots	2.50
To " in less than carload lots	2.60

The charges for galvanizing is 50 cents on sizes from 6 to 14 inclusive; on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Spring Butts: Under date of July 1, the Chicago Spring Butt Co., Chicago, Ill., issued a revised discount sheet making the printed discount on steel and iron Chicago Spring butts 30 per cent. uniformly, to take effect on and after that date.

Metal Key Faucets: John H. Graham & Co., No. 113 Chambers Street. New York, have been appointed selling agents for F. P. Welton, Waterbury, Conn., manufacturers of metal key and ivy key liquor and ale faucets.

Faucets and Brass Cocks: Brass racking and liquor cocks have been advanced in price, and are now quoted at 60 and 10 to 70 per cent. discount. Compression Bibbs have been advanced and are quoted at 50 and 10 to 60 per cent. discount.

Post Hole Diggers: Gibbs patent post hole diggers have been advanced 10 per cent. over previous quotations.

Wire Lawn Rakes: Gibbs wire lawn rakes have been advanced as follows:

Ohio Girl,	20 tooth	per dozen,	$2.75
Model,	24 "	"	3.00
Gibbs,	20 "	"	3.50
"	24 "	"	3.75

Coffee Mills: John H Graham & Co., No. 113 Chambers Street, New York, have been appointed selling agents for the Bronson Co., Cleveland, Ohio, manufacturers of the Ever Ready and None Such Coffee Mills.

Wire Rope: The manufacturers of wire rope have adopted new list prices, which are announced in full, under date July 1. They have also adopted a new list on wire rope fastenings, including sockets, hooks and thimbles, swivel hooks and sockets, clips, etc. The new list on wire rope is subject to a discount of 30 per cent. to consumers and 30 and 2½ per cent. to the trade, terms 30 days, or 1 per cent. discount for cash in ten days.

Sleigh Bells: This line of goods have taken time by the forelock and made quite a little advance in prices, owing to the constantly increasing cost of raw material. Bevin Bros. Mfg. Co., East Hampton, Conn.; John H. Graham & Co., No. 113 Chambers Street, New York, selling agents, have issued an entirely new catalogue, which is No. 69, of their line of goods, including sleigh bells, in which the following discounts are quoted: All sleigh bells, 50 per cent. discount, with the exception of chimes, pages 40 to 46, which are 25 to 30 per cent., and Norwegian and Swedish bells, pages 67 and 68, which are 60 per cent. Hame attachments, page 67, list net, and team bells, net prices quoted on application.

Cordage: The following quotations may be said to represent the market at the present time:

Manila, 7-16 inch and larger	per pound,	10 to 10½	cents
" ⅜ inch	"	10½ to 11	"
" ¼ and 5-16 inch	"	11 to 11½	"
Sisal, 7-16 inch and larger	"	8½ to 8¾	"
" ⅜ inch	"	8¾ to 9	"
" ¼ and 5-16 inch	"	9¼ to 9½	"
" Lath Yarn	"	7¾ to 8	"

The price of jute rope is 5½ cents.

THE COLUMBUS TRADE.

Our letter this time can only be a promise of a better one next time. Your regular correspondent is taking a "much needed rest." You are probably aware that about this time of the year people in almost all kinds of business and professional life begin to break down and it becomes absolutely necessary for them to lay aside the cares of business and "take a rest." So it is with your correspondent, and the trials of a jobbing Hardwareman are known to him only in his dreams. (Do not think he has even heard of the last advance in nails), so we can only promise you greater things to come when he returns, recuperated, and with renewed strength and vigor can probably tell a fish story of huge proportions.

As to business, it is not taking so much of a rest as usual in July. The prosperity that has spread all over our broad land continues to prosper right in the heat of summer, and mail orders are much more plentiful than usual at this season, showing that dealers are having a continual call for goods and must keep up ordering to supply the demand. This is certainly a good evidence of improved

Digitized by Google

business, especially when it is remembered that dealers generally bought much more freely during the spring season on account of the advance in prices. In this section of the country prospects are certainly extremely good for a very large fall and winter business. Farmers are enjoying a season of extraordinarily good crops, and with fair prices will be in position to supply their wants, and with plenty of money those wants are likely to be much more numerous than for some years past. For these reasons, we can see no excuse for taking any other than an optimistic view of the situation and looking forward to a continued good demand with prices fully maintained, and in some lines possibly going quite a little higher. We think the "Bugbear" of trusts and anti-expansion is rapidly dying out and with another season of improved conditions which will be felt by all classes, the pessimist will find few followers and there will be few indeed that would want to return to the conditions of a few years ago, trusts or no trusts.

THE SMITH BROS. HARDWARE CO.

THE PORTLAND TRADE.

Maine is reaping her usual summer harvest from her visitors, and the travel this year is very heavy, due to prosperous times, and favorable weather. Last year summer business was curtailed by the nervousness of some of the more timid, fearing that the Spanish fleet might make trouble for them.

The crop conditions are more favorable than they were some time ago, although the hay crop is very short, and many other farm products are far behind the average.

Trade continues good, orders are well assorted, and the quiet, incident to ordinary July trade, has not yet developed. Collections are good. All classes of trade feel confident that present prices will continue for a long time to come, and that it is desirable to anticipate their wants far in advance of the season.

THE EMERY-WATERHOUSE CO.

THE PITTSBURG TRADE.

Travelers are off the road at present taking their vacations and this makes the usual midsummer quiet, yet a comparison with last July shows that the percentage of increased sales keeps up in July as in the earlier months. Hurry orders in good quantities from railroads and manufacturing plants show that they are needing supplies for repairs and new work and needing them quick.

The recent advance in wire and nails, bringing nails to $2.75 to the retailer, is quite as high as they should go, and we trust no further advance will be made. There is no apparent lessening of the demand for nails as yet, but we hear reports of farmers deferring fence building, and if this becomes general, storekeepers will soon quit buying, and thus react on the manufacturer.

The consummation of the railroad coal trust seems to be a fact. This includes 119 mines, and it is probable that only about half will be run to their capacity and the rest allowed to stand idle. Stores and miners at these idle plants will have to close up and move away, which will entail hardship on a great many people, but in the evolution of business, this plan is having its innings, and we shall know more of its success five years hence.

The natural gas companies are having an increased flow from their wells lately, and during the summer take on manufacturing plants as customers. They are building a holder, said to be the largest ever made, to hold five million cubic feet, this to be a reserve for winter weather, when accidents sometimes interfere with the supply.

LOGAN-GREGG HARDWARE CO.

THE VICKSBURG TRADE.

The reason that you have not heard from us more regularly is due to the fact that we have been kept very busy working on a pleasant task—marking up goods. Hardware has been sold so cheap so long that it's quite satisfactory after a number of years of small profits, to see the silver lining to the clouds. As the tidal wave of prosperity only comes every ten years '99, '89, '79, it is but proper the Hardware dealer should get his full share of the liberal profit obtainable by the improved condition of business. From this on will be a golden opportunity, and the general manager of stock companies that does not make an increased showing in profits, will, in all probability, have to hunt for a new job, and the proprietor who fails to make money, ought to go back to his farm, and raise more hay and less h——, as Sam Jones would say. Now, while things are so bright and promising for the Hardware jobber, there is a question that commands our serious consideration, in this section particularly, where cotton is king. The manufacturer makes his profits out of the jobber, the jobber makes his out of the retailer, the retailer out of the consumer. Now if the consumer cannot get a fair margin of profit on the products of the farm, he is not in position to consume the quantity of goods he would had he sold his cotton for a profit, and thereby hangs the tale: If we are to have continued high prices, and in consequence, good times, we have got to help the farmer make a good profit on his goods. Reciprocity is the life of trade.

LEE RICHARDSON & CO.

THE ST. PAUL TRADE.

The conditions of trade in the Northwest are not materially different from what they have been during the past month. We are much nearer to the time of maturity of our crops, and as much depends on their condition at maturity, we naturally notice the prospects for satisfactory results. So far, the reports from the "field" are all satisfactory. The season has been a good one and the indica-

tions are that we shall have a large crop of all small grains. The hay crop is also very heavy which is favorable to our dairy industries. Corn is rather backward than otherwise, still we may look for a fair crop as there is yet ample time for it to catch up.

Country dealers, as we see them from time to time, all report an increased business for the first six months of this year over that of previous years, and are very hopeful as to the result for the balance of the year.

The jobbers are very busy and all complain of more or less difficulty in getting some kinds of goods, a difficulty which is not peculiar to this locality, if we may judge from trade reports all over the country.

From present appearances, the usual midsummer dullness will not be experienced this year, but what in former years would have been considered an active business, will be realized.

As far as we can observe, the disposition of all dealers is to take advantage of all advances as they occur and the belief is general that the end of advances is not yet.

C. W. HACKETT HARDWARE CO.

THE CLEVELAND TRADE.

The action of Gen. Otis opening the ports of the Philippines created a panic in London, causing a heavy decline in Manila hemp. This suggests the sensitiveness of commercial relations and reminds us that this country in acquiring the Philippines, secured a monopoly in one of the most important articles in the world's commerce.

The shipping interests of every country are dependent upon us for what cannot easily be dispensed with, and the obligation to restore order and increase the cultivation of Manila hemp seems imperative.

That the people of one part of the country in a sectional civil war would rejoice in the repulse of the Federal army one could easily imagine, but that citizens of this country should be gratified at our inability to keep our international obligations by suppressing a rebellion in our own territory, is inconceivable.

If in the mad scramble to furnish an issue, one of the great parties will give the people of this country an opportunity to express their opinion of anti-imperialism, there will be a first class funeral with a postponed resurrection, but neither party will commit suicide in this way. Anti-imperialists will not furnish the issue, and they may as well go out of business. The relation of tariff to trusts will be safer, but the poor laboring man will be too busy to listen to the story of his wrongs, so that does not promise a lively campaign.

It is difficult to organize an opposition to a party unless there is some basis. The outs want an inning, but the great mass of voters are not interested in this. The woes of the working men, which is the stock in trade of politicians, are a little scarce, so that it is difficult to organise a campaign on ordinary lines. We may be compelled to have one on principle.

Civil service reform, which the politicians fight shy of—both sides will claim to favor to prevent its discussion, but with our colonial and municipal governments, it is of the greatest importance.

The spectacle of a municipal council passing an ordinance at the dictation of a mob present in the council chamber in one of our most enlightened cities, recently, is a disgraceful commentary on municipal government. Carlyle and Macauley will prove true prophets unless the spirit of Josh Giddings or Ben Wade is revived. We need a church to promote physical and moral courage among law-abiding people, or United States troops will be necessary in every city to protect the people from themselves.

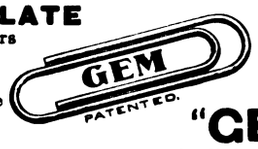
July still keeps its power to suppress the rush of trade notwithstanding the boom. Customary vacations among merchants will be observed, so that the mills will have time to close up their back orders.

The hard times that compelled our manufacturers to put in new machinery to enable them to compete, seems to have been a blessing in disguise. The increased demand found our factories in condition to make better and cheaper goods than any nation in the world. The fact was soon discovered that our superior machinery gave us an advantage, and it resulted in an immense foreign demand for American machinery, from which our machine tool factories are reaping rich reward.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE OMAHA TRADE.

July trade is exceptional in the volume of business being transacted, as never before do we remember a July when trade held up as it is doing now, nor when orders were as large and as numerous and covered so wide a range. Not only are season goods called for, but the orders apparently cover the entire Hardware list, beginning at Genesis of the catalogue and ending in the Revelations of it. The future prospects were never more favorable than at present. The wheat crop which a short time ago was anticipated as being a total loss, will develop considerably in excess of a half crop and outside of this, grains of all kinds promise a larger yield. Prices are being reasonably well maintained, though what cut prices are being made, contrary to the usual rule, are made by the larger jobbers, who possibly figure that the present market may be used to a large extent to secure foothold in territory which is being gradually, but none the less surely, absorbed by the smaller houses.



The usual scarcity of goods still causes complaint, though we all appreciate the fact that were retailers, jobbers and manufacturers alike to conclude that the time was ripe to stop buying and use up their surplus, the amount of goods and material in stock throughout the country would be as great a surprise to some of us as is the present so-called scarcity. Collections are good. RECTOR & WILHELMY CO.

THE BIRMINGHAM TRADE.

We are glad to report that business continues good and we do not anticipate any falling off later on, as the best season for selling goods is now approaching. Most of the idle furnaces are being overhauled ready for going in blast, and the demand for ore is heavy, also for coke. We hope before the close of the year to see the steel plant and rod mill actively turning out steel billets, wire and nails. The railroads are busy and find difficulty in getting cars to take all the freight offered. The bank clearings last week were the largest in the history of the city. The chief complaints come from the agricultural districts on account of the continued low price of cotton, while there has been heavy advances in many of the articles they have to buy. The rural merchants, who depend largely on the farmers,

have not felt the prosperity which they read so much about, and in consequence are not so buoyant.

We hope that less cotton will be produced and that the farmers will learn other ways of making a living and that they too may feel the benefit along with those of other lines, and in this way all grounds of complaint will be removed.

We are glad to report business much ahead of same month last year and prospects encouraging in the mineral district. The condition of the farmer who depends on cotton for revenue, while most things he has to buy have advanced and cotton continues low, is rather discouraging. It is true he has no cotton to sell yet, but he cannot project any enterprise with the hope of having success later and paying for the improvements with cheap cotton. We are glad to see new cotton mills being constructed, and in this way the South will get more profit out of its great staple, and we hope will make her rich in the not distant future. There are too many farmers to effect any concert of action and reap the benefit of united action, as so many of the manufacturers are doing, and hence the difficulty with the agriculturist. We will hope that wider markets may yet do something for them.

MOORE & HANDLEY HARDWARE CO.

THE BALTIMORE TRADE.

Sales during the past week have been unusually numerous embracing many good sized orders.

Collections are improving and from encouraging reports from different sections of our territory, concerning the splendid condition of crops, we anticipate a large fall trade. Advances in Hardware have not as yet reached the point where they might be termed prohibitory, and as merchants in the country are getting accustomed to higher values it is not difficult to secure orders at prices now ruling.

H. W. WEBB & SONS.

THE GRAPHITE TRADE.

Vice-President John A. Walker has returned from a seven weeks' vacation in Europe. He reports the Graphite market in a state of great activity, with prices higher and a prospect of advance.

While this has not affected the prices of our general products, it has compelled us to raise the price on crucibles another point, and prevents us from accepting contracts for future deliveries. Our invoices all go out stamped "Prices Subject to Change Without Notice," and still the orders keep us on the jump

There has been a special demand for black and colored plumbers' crayons, so that we have for some weeks been working overtime on these goods without making noticeable headway against clearing up deliveries. Lubricating graphite has gained a strong hold upon the foreign market, where it is known as "Dixon's Pure Ticonderoga Flake Graphite," and a number of large contracts have been made with prominent houses in Germany and Denmark to handle it.

It is a matter of record that the Dixon graphite products are sold in every country excepting Turkey and Arabia. Australia has become an important field for us, so that we are compelled to keep a permanent salesman confined to that country.

General business is good, with a prospect that July, which is generally one of the "off" months, will give us a remarkable showing.

There is not one of the graphite products neglected. Everything is in demand and jobbers are evidently hustling.

JOSEPH DIXON CRUCIBLE CO.

Salesman Wanted.

SALESMAN acquainted with New York City architects and contractors. One thoroughly conversant with all details pertaining to builders' Hardware Competent to make estimates from plans and specifications. Address CAPABILITY, care HARDWARE, No. 143 Chambers Street, New York.

Side Line Wanted.

SALESMAN calling on the jobbing Hardware trade through the West and Northwest would like good staple side line on commission. Best of references. Address "B," care HARDWARE, No. 143 Chambers Street, New York.

For Sale.

WISHING to retire from business, I offer my Hardware business, or a controlling interest in it, for sale. Situated in one of the best cities in the South; this is a rare opportunity to step into an established and paying trade with nice stock and store and cheap rent. RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Alamagordo, N. M.—Laurie & Frazier, Hardware, sporting goods, etc., new firm, commenced business.

Cumberland, Md.—A certificate of incorporation has been granted to the Potomac Hardware Co. The following persons named in the certificate have been made directors for the first year: Arthur H. Amick, Thomas Pownall, Frank A. Blaul, J. W. Thomas and A. L. Glissan.

Galveston, Tex.—The Bryan Hardware Co. has been incorporated, with a capital stock of $15,000.

Montreal, Can.—The Notre Dame Hardware Co.

Oxford, Ohio.—The Stevenson Hardware Co. has been incorporated with a capital stock of $10,000.

San Francisco, Cal.—Philpott & Armstrong, Hardware merchants, have filed articles of incorporation. The directors are Charles H. Philpott, S. V. Armstrong, George T. Hawley, J. M. Robinson and Alex. G. Eells. Capital, $50,000, of which $20,000 has been subscribed.

Changes and Improvements.

Bay City, Mich.—D. B. Martin & Co., Hardware, No. 808 Water Street, succeeded by F. B. Phillips & Co.

Bedford, Va. — The Hardware establishment of Parker & McGhee has been purchased by L. R. and C. W. Gills and George W. Johnson, the price to be paid being between $12,000 and $15,000. The sale includes the building also.

Bloomfield, Mo. — The Drysdale-Ulen Hardware Co. have filed a statement showing increase of capital stock from $500 to $10,000.

Browntown, Ind.—Brodhecker & Vance, Hardware, dissolved; suceeeded by D. B. Vance.

Charleston, Tenn.—Hall & Johnson have sold their stock of Hardware here to Hall Bros., at Cleveland. They are removing the stock.

Cincinnati, Ohio.—F. W. Schneider, stoves, etc., discontinued business.

Franklin, R. I.—The firm of Irwin & Hussey, who opened a Hardware store on Depot Street a few months ago, has decided to give up business. Their stock has been purchased by Hosie Bros.

Gowanda, N. Y.—Lee & Stafford, Hardware, succeeded by A. C. Stafford.

Hancock, N. Y.— Samuel N. Wheeler, stoves, etc., succeeded by S. N. Wheeler & Sons.

Huron, S. D. — Waibel & Donaldson, Hardware, dissolved.

Independence, Kans.—The Union Implement Co. have determined to put up a splendid building for their use on the corner just east of the Heckman house, the former site of the old Arter mill. The company will put up a two-story building 47x130 feet with a basement, for which the ground is admirably adapted.

Keokuk, Iowa.—S. E. Seehorn, Hardware, sold stock.

Lafayette, Ind. — The Johnson-Barnes Hardware Co. have obtained possession of the room adjoining their present quarters on the south and will use the additional space as a carriage repository and show room. The addition of this room to the present quarters gives the company one of the largest sales rooms in the city.

Lakeland, Fla. — One of the most important business changes which have occurred for a long time is that wherein J. C. Street, of the firm of J. C. Street & Co., has purchased the Hardware business of A. E. Sloan, who retires from business. Mr. Street will occupy the large warehouse now occupied by Mr. Sloan; also the handsome storeroom of Sloan & McRae, at the corner of Kentucky Avenue and the railroad. He will immediately purchase a large stock of Hardware, doors, sash and blinds.

Marlboro, Mass.—George R. Hall & Co. have moved their stock in trade of stoves and Hardware from their store in Lawrence block to their store at No. 571 Lincoln Street.

Milwaukee, Wis.—Edward Barber & Son have negotiated the lease of a warehouse on Clybourn Street, between West Water and Second Streets, to the William Frankfurt Hardware Co., for a term of years. The lease involves $21,000. In addition to three stories, the building has a basement, and contains 16,000 square feet of storage room.

Mt. Pleasant, Mich.—L. N. Smith, for twenty-five years engaged in the Hardware business in this city, has sold his stock to F. B. Clark, of Lowell, Mich.

Nelsonville, Ohio. — L. F. Carpenter, Hardware, succeeded by L. F. Carpenter & Co.

Newark, Ark.—W. A. Edwards, Hardware, etc., sold out.

Paola, Kans.—P. E. Brooks, Hardware and implements, sold out.

Penfield, N. Y. — Charles Stenner has moved his Hardware and tin shop into the Jetty building.

Saline, Mich.—S. H. Maher, Hardware, has retired from business.

San Angelo, Tex.—Work has already begun towards the erection of a two-story stone building on Chadbourne Street, which will be occupied by the C. & G. Hagelstein Hardware business.

Sault Ste. Marie, Mich.—The Chippewa Hardware Co., succeeds the Ferguson Hardware Co.

Sherman, N. Y.—The partnership heretofore existing between Wm. H. Sperry and A. H. Fraser, under the firm name of Sperry & Fraser, has been dissolved by mutual consent. Wm. H. Sperry will continue the business at the old stand and assume all the debts of the firm.

Stockbridge, N. Y.—The Hardware business of C. C. White is so flourishing that he occupies the two adjoining blocks with goods at the present time.

Taunton, Mass.—The Pierce Hardware Co. are planning to build an addition in the rear of the present quarters to be utilized as a storehouse.

Webb City, Mo.— Harrison, Lawyer & Co., Hardware, selling out.

Wellman, Iowa.—Nicola & Gardner, Hardware, succeeded by E. A. Rea.

West Toledo, O.—Anthony & McFarlane are moving their Hardware stock to their newly erected building on Phillips Avenue.

Business Embarrassments.

Elizabethtown, Ky.—B. T. Reid & Bro., dealers in tinware, stoves, and Hardware, have made an assignment. It is believed that the firm will pay dollar for dollar.

New Orleans, La.—A receiver has been appointed for Henry Rice & Son, wholesale and retail Hardware dealers. The business was established in 1848. Their last statement, showing their condition on March 31, was: Assets, $245,000, and liabilities, $193,000, including mortgages on real estate.

Fires in Hardware Stores.

Bangor, N. Y.—Daniel W. Grannis, stoves, etc., destroyed by fire.

Bothwell, Ont.—S. B. Anderson's Hardware store has been destroyed by fire.

Burlington, Vt.—The Hardware store of W. H. Buckley & Co., in the Hayward block, has been destroyed by fire.

Cuba, N. Y.—The Hardware store of Grant Ingalls, located on Genesee Street, has been destroyed by fire with all its contents. The loss is about $1200, with a partial insurance.

Grand Valley, Pa. — The double store building occupied by C. D. Allen & Son., Hardware merchants, has been burned with contents. Loss on building, $2000; store, $5000, with $2000 insurance.

Langford, N. Y.—F. L. Thiel, Hardware, destroyed by fire.

Ottawa, Ohio.—Fire has damaged the Hardware stock and building of W. H. Long to the extent of $4000; partly insured.

Paris, Tenn.—The Hardware stock of Hill, Freeman & Co. has been destroyed by fire; partially insured.

Burglaries in Hardware Stores.

East Bridgewater, Mass.—G. M. Webber, cutlery.

Hartford, Conn.—Tracy & Robinson, revolvers, etc

Julesburg, Colo.—Fred. Dye, knives, etc.

Manawa, Wis. — Shipman's Hardware store, bicycle.

Mansfield, O.—J. S. Dunlap, revolvers.

Niantic, Ill.—Pritchett Bros., $400.

Philadelphia, Pa.—R. Woodrow, No. 1384 Ridge Avenue, $35.

Philadelphia, Pa.—Allen & Allen, No. 1608 Ridge Avenue, revolvers.

Philadelphia, Pa.—G. F. Creutzberg & Son, No. 119 N. Sixth Street, $40.

Prescott, Ont.—R. W. Ross & Co., cutlery.

Shreveport, La.—Vordenbaumen & Eastman, cutlery.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, over the country are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Adrian, Mich.—A. M. Keeney, H. C. Smith, P. Novesky, T. Z. Mason and W.W. Curtis are the incorporators of the Adrian Spring Steel Wire Fence Co., capitalized at $100,000, for the manufacturing and dealing in wire fencing, etc.

Allegheny, Pa.—C. E. Christman, E. E. Christman, Elizabeth K. Totten and R. D. Totten are the incorporators of the Star Enameling & Stamping Co., capitalized at $1000 for manufacturing articles of commerce of metal and wood.

Camden, N. J.—A. L. Rice, Henry A. Mathieu, Peter N. Mathieu and J. William Mathieu are the incorporators of the Anglo-American Slate Syndicate, capitalized at $500,000, to deal in slate.

Camden, N. J,—The Murphy-Hayes File Co. have filed articles of incorporation. The object of this corporation is to manufacture files. The capital stock is $6000, and the amount paid in is $1000. The corporators are D. B. Murphy, Frederick Hayes, George B. W. Smith, all of Camden, and Thomas S. Chambers, of Trenton.

Carthage, Mo. — The Parrott Stove & Range Co. has been incorporated by G. W. Barnhart, H. G. Hood, C. A. French, B. F. Barnhart, E. T. Hardaway, Louis A. Hatton and R. H. Fry; manufacturing stoves, ranges, etc. Capital stock, $5000.

Chicago, Ill.—The E. H. Wachs Co. has been incorporated by E. H. Wachs, C. W. Greenfield and H. F. Langworthy; manufacturing boilers, machinery, etc. Capital stock, $24,000.

Detroit, Mich.—The Rider Heater Co. has been incorporated by J. B. Horning, Mary B. Miller and E. W. Rider; manufacture and sale of stoves, etc. Capital stock, $60,000.

Jersey City, N. J.—Michael McCarty, Daniel E. O'Brien, Michael B. Mayhar, John J. Kelly and Marshall Van Winkle are the incorporators of the McCarty Slate Co., capitalized at $50,000, for the manufacture of roofing slate.

Jersey City, N. J.—The Wanzer Lamp & Cooker Co. has been incorporated; principal office, No. 259 Washington Street; manufacture the Wanzer Cooker Lamp. Capital, $25,000. Incorporators: John M. Enright, Theron A. Gould, John M. Fair, all of Jersey City.

Jersey City, N. J.—The Imperial Mfg. Co. has been incorporated, with principal office No. 148 Randolph Avenue; manufacture patented specialties, such as hand cars, wrenches, locks, etc. Capital, $100,000. Incorporators: Henry Berg, Orange Valley, N. J.; Josephus Plenty and Adrian Hitt, both of Jersey City.

Little Valley, N. Y.—Chase Bros. have agreed to establish a plant in this village for the manufacture of razors, strops and general cutlery. Citizens will contribute $1200 to the plant.

Meriden, Conn.—The M. B. Schenck Co. has been incorporated; manufacture and sale of castors and other Hardware. Capital, $45.000. Incorporators: M. B. Schenck, W. A. Schenck. Margaret W. Schenck, Jessee M. Schenck, all of Meridan.

Minneapolis, Minn.—The Hawley Down-Draft Furnace Co. has been incorporated by Charles E. Bleyer, M. B. Moon, Joseph Chapman, Jr., Frank B. Semple and Horace M. Hill to manufacture furnaces and boilers. Capital stock $100,000.

New York, N. Y.—L. L. Grey, W. J. Solomon, S. Sultan and J. J. V. Bengle are the incorporators of the New York Chain Co., capitalized at $1,000, for making chains.

San Francisco, Cal.—The Blum-Walter Mfg. Co. has been incorporated by G. X. Wendling, A. J. Hechtman, F. H. Buck, I. Blum and F. H. Buek; manufacture and deal in tools, machinery, etc. Capital stock, $30,000.

Shreve, Ohio.—The Ohio Self-Heating Flat Iron Co. has been incorporated with a capital stock of $5000.

Washington, D. C.—The Hubbard Heating Co. has been incorporated under the laws of West Virginia by J. Hubbard, S. Bilson, E. E. Murrill, C. V. Kellogg and D. E. Monroe, steam and hot water heating. Capital stock $25,000.

Changes and Improvements.

Augusta, Ky.—G. H. Holliday, of Manchester, Ohio, will move his $30,000 stove foundry to Augusta; will employ about forty operatives.

Batavia, N. Y.—The Johnson Harvester Co. have purchased 2200 acres of hardwood timber in the northern part of the State and from the factory about 190 miles. There is a sawmill on the property, now being operated by the Batavia company, and the timber is to be turned into lumber on the spot and shipped to Batavia for the company's use. Adjacent to the tract purchased are thousands of acres of good land which the company will draw on when their own tract gives out. They are to erect four houses on the property for the use of their employes, which will consist of a force of twenty men. The company are also building a knife factory at their plant in Batavia and will manufacture the knives for their own machines, which heretofore were purchased in another State.

Chattanooga, Tenn.—The T. A. Snow Stove Foundry and the plant of the Mountain City Stove Mfg. Co., will resume operations after having been extensively repaired.

Chicago, Ill.—The McCormick Harvesting Machine Co. have obtained a building permit for the erection of a brick five-story twine mill on Blue Island Avenue, between Leavitt and Robey Streets. The mill is to cost $300,000. The company, which has heretofore made twine in Boston and four other places, in the future will do the most of this manufacturing in Chicago.

Cincinnati, Ohio.—The Fosdick & Holloway Machine Tool Works building is being rapidly built, and will be ready for occupancy by September 1st.

Quincy, Ill.—The Quincy Stove Mfg. Co. are putting up a new plant.

Versailles, Ky.—The old casket factory building will be refitted with machinery and a new company will manufacture Hardware specialties, giving employment to about 50 men.

Recent Embarrassments.

Louisville, Ky.—Scanlon & Co., stove foundry, have filed involuntary petition in bankruptcy.

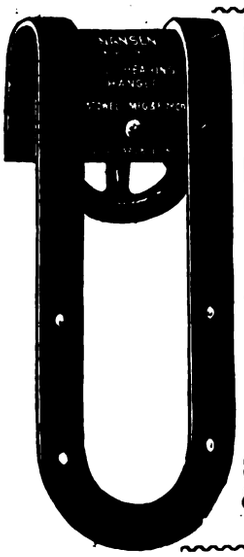
Recent Fires.

Henderson, Tenn.—The Priddy Tin Mfg. Co.; damaged by fire, at a loss of $750. Insured for $250.

Worcester, Mass.—The M. M. Whitman Refrigerator factory has been burned to the ground. The origin of the blaze is a mystery and the loss amounts to about $5000.

Miscellaneous.

Bethlehem, Pa.—At the annual meeting of the Bethlehem Steel Co. the following directors were elected: Robert H. Sayre, Sr., Joseph Wharton, E. P. Wilbur, R. P. Linderman, Beeuveau Borie, J. B. Lippincott and R. W. Davenport. Immediately after the stockholders' meeting, the directors convened and re-elected R. P. Linderman, president; Abraham S. Schrop, secretary, and C. O. Brunner, treasurer. In circulars issued and signed by President Linderman, notice is given that the Bethlehem Steel Co., having taken a lease of all the property of the Bethlehem Iron Co., all outstanding contracts of the Bethlehem Iron Co. have been taken over by the Bethlehem Steel Co., and all officers, employes and agents of the iron company will be continued by the steel company with their present powers until further notice.



Cincinnati, Ohio.—The Cincinnati Safe & Lock Co. have received orders from Lima and Callao, Peru: Sydney, N. S. W., and Honolulu.

Southington, Conn. — The Southington Cutlery Co. have orders for wood screws on their books which will keep this department running constantly until November.

Springfield, Ohio.—The Springfield Machine Tool Co., when they get their present additions and improvements complete, will have space enough to accommodate 500 employes. The firm have one of the most up-to-date plants in Springfield.

Taunton, Mass. — Forty new tack machines, each with a capacity of 200,000 tacks a day, are being set up at the Fairhaven branch of the Atlas Tack Co. Forty more are coming, making 80 in all. With this addition the number of machines will be increased to 380, which will turn out 75,000,000 tacks daily. The new machines will give employment to at least 25 men. The new machines were built in Taunton.

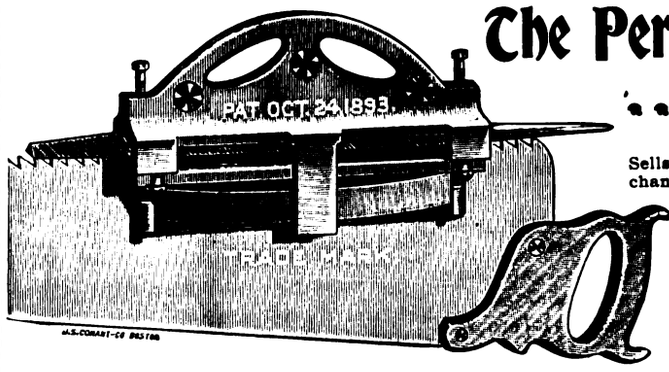
Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of

EASY ON THE LATCH BOLT.



FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Allegan, Mich.—The Allegan Wheel Co. has been established, with a capital stock of $12,000.

Beloit, Wis.—F. A. Barish has opened a store.

Charleston, S. C.—The B. H. Worthen Arms Co. has been incorporated by B. H. Worthen, George H. Swan and George H. Peterman; to manufacture and sell bicycles, guns, locks, etc. Capital stock, $2500.

Connellsville, Pa.—C. L. Clarke has opened a store.

Dover, Del.—A certificate of corporation of the United States Vehicle Co., with an authorized capital of $25,000,000, has been filed here. The company is incorporated to manufacture vehicles to be operated by compressed air as motive power.

Jersey City, N. J.—The New Century Air Motor Cycle Co. has been incorporated in New Jersey, with principal office No. 1 Montgomery Street, to manufacture goods, wares and merchandise. Capital, $100,000. Incorporators: Z. Taylor Ubil, Philadelphia; John W. Avery, Osborn Congelton, both of New York.

Nashville, Mich.—J. Hurd, formerly of South Haven, has opened a store.

Niagara Falls, N. Y.—The Niagara Automobile Co. has been incorporated at Albany with a capital of $10,000. Incorporators: P. F. King, Lockport; J. H. Leggett, Mrs. E. Burns, M. Brown, J. F. Murphy, all of Niagara Falls.

Ottumwa, Ia.—Lee M. Wheeler, Main Street, opened a store.

Owosso, Mich.—Merrick Blair will go into the bicycle business with his father, carrying a line of bicycle supplies, guns and ammunition.

Paris, France.—The Columbia Automobile Co. have now started business seriously in Paris. It has secured a five-acre factory at Clement's Bicycle Works, and Hart O. Berg the Paris manager who came back from New York about a fortnight ago, has already set up over 400 machine tools of the latest patterns. When the factory is fairly started and the heavy freight and duty now paid on the American built cars thus avoided, the present prices of $3600 will probably be considerably reduced, and the cost will better bear comparison with the price of the French oil-cars, of which over 3000 are now running in this country. It seems evident that now is the time to push American electric vehicles in Paris. Out of 150 stands where vehicles and motor cars are shown, very few French electric cars are seen Besides the Columbia, the Cleveland has shipped half a dozen cars over just in time for the show, and the Waverley people show a Stanhope. The accident to the *Bretagne* prevented their run-about arriving in time. All seem to be doing business. These American cars are far more elegant and compact than the French and English models, and will probably become popular as soon as their excellent qualities are duly set before the public. The Columbia Co. propose to introduce the American electric cabs into Paris. There is a big opening here also. The few electric cabs running here are rarely idle. Cars running twenty-five to thirty miles only are not salable here.

Philadelphia, Pa.—The A. W. Stroud Mfg. Co. has been incorporated by A. O. W. Stroud, W. G. Thomas and W. N. Morris. The company will make, sell and deal in bicycles, and is capitalized at $100,000.

Portland, Me. — The Roxbury Rubber Works has been incorporated by J. C. Ward, B. A. Ward, H. H. Thomas, S. H. Hopper, and A. F. Flint; manufacture rubber goods. Capital stock, $10,000.

Providence. R. I.—The Rhode Island Automobile Transit Co. has been incorporated in Rhode Island for the purpose of manufacturing automobiles, carriages, etc. Capital $200,000. Incorporators: J. J. Banigan, J. A. Chase, D. McNeven, H. C. Luther, Providence; E. L. Freeman, J. Chase, W. B. Banigan, Central Falls.

Rochester, N. Y.—The Tierney Mfg. Co. has been incorporated to manufacture and sell bicycle supports and rests. Capital, $18,000. Directors: Charles Englert, Jr., August P. Weitz, and Edward J. Tierney, Rochester.

San Jose, Cal.—The Garden City Cyclery has been incorporated by W. H. Krause, Eli Wright, R. R. May, and I. Trone. Capital stock, $10,000.

Terre Haute, Ind.—Haworth & Engles, No. 515 Ohio Street, have opened a store.

Changes and Improvements.

Atlanta, Ga.—Walcott & Drake, bicycles, succeeded by R. H. Drake.

Baltimore, Md.—The Maryland Sporting Goods Co., succeeded by A. G. Alford Arms Co.

Cleveland, O.—The Standard Tool Co. announce a change in the manner of conducting their business. The seamless steel tubing business, electric welding of bicycle parts and their general welding business has been transferred to a new company to be known as the Standard Welding Co. The stockholders and officers, of the new company are the same as those of the Standard Tool Co., but the business will be conducted separately. The new tubing plant of this company, built some months ago, is now in full operation and they are rapidly closing contracts with prominent manufacturers for their season's supply of tubing. As is generally known, the Standard Tool Co. are large manufacturers of twist drills and other machinists' tools.

Dexter, N. Y.—Warren & Watts, sold out.

Edwardsville, Mich.—C. M. Dennis, succeeded by D. W. Ray & Co.

Gainesville, Fla.—Graham Bros. are closing out business.

Indianapolis, Ind. — Sterne & Schwabacker, bicycles, dissolved. E. C. Sterne continues.

Los Angeles, Cal.—The Starr Novelty Mfg. Co., No. 206 W. Fifth Street, sold out to W. F. Watts.

Richmond, Ind.—The Jones Hardware Co., Hardware, sporting goods, etc., are erecting new building, which they expect to have ready for occupancy by December 1.

Rochester, N. Y.—The Hall-Shone Co.'s petition to the courts for permission to change its name to the E. H. Hall Co. (Inc.) has been granted. The company manufacture and wholesale bicycle goods at No. 17 Elm Street, and have made no change in their management.

Savannah, Ga.—Moore & Higgins, succeeded by W. F. Higgins.

Recent Embarrassments.

Boston, Mass.—Kleh & Hopkins, bicycles, reported to have given voluntary petition in bankruptcy.

Chicago, Ill.—Charles H. Steiner, bicycle sundries, made voluntary assignment. Assets, $500; liabilities, $500.

Chicago, Ill.—The Cycle Repair Co. are reported to have given involuntary petition in bankruptcy.

Mobile, Ala.—T. T. Wentworth, dealer in bicycles, is reported to have filed a petition in bankruptcy.

Salem, Mass.—The Witch City Cycle Co., Thos. R. Chapman, proprietor, assigned.

Recent Fires.

Albany, N. Y.—The Albany Rubber Tire Co., damaged by water.

Escondido, Cal.—The Escondido Cyclery, burned out.

Knoxville, Ky.—E. M. Rich & Co., bicycles, damaged by fire, caused by the explosion of a gasolene stove.

Minneapolis, Minn.—The bicycle store of A. N. Anderson has been damaged by fire.

Oswego, N. Y.—The Ontario Bicycle Works, damaged by fire.

Portsmouth, Ohio.—J. H. Buckland, burned out.

Quincy, Mass.—The bicycle store of John Gillis has been damaged by fire.

Recent Burglaries.

Pitman Grove, N. J.—William C. Libb, bicycles, store burglarized and goods to the amount of $70 stolen.

Miscellaneous.

Ball bearings are said to have been in use about 140 years.

Bombay claims to have nearly 10,000 cycle riders.

Fourteen States require railroads to carry bicycles as baggage.

In the Rochester High School there are accommodations for storing 500 bicycles.

New York, N. Y.—The 20th Century Mfg. Co. have sent their tally-ho coach through Connecticut advertising the merits of the 20th Century lantern. The coach will visit Bridgeport, Waterbury, New Britain, Meriden, Hartford, New London, Middletown, Norwich and Willimantic.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

The metric system is based upon the distance from the equator to the pole. The ten-millionth part of this arc was chosen as the unit of measure of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin:

TABLE FOR THE CONVERSION OF METRIC WEIGHTS AND MEASURES INTO ENGLISH.

Metres into Yards.	Kilometres to Miles and Yards.	Litres into Gallons and Quarts.	Hectolitres into Quarts and Bushels.	Kilogrammes into Cwts. Qrs. Lbs. Oz.	Hectares into acres. r. p.

"HAS OUR ESTEEMED FAVOR."

Edward Darby & Sons, Philadelphia, Pa. [*Wire Goods*]: For the past few years we have been in HARDWARE, and we beg to remind you that it has our esteemed favor, and will recommend the same to anyone desirous of a good, useful, common-sense trade journal such as HARDWARE is.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

"ONE OF THE FIRST AND LAST ADVERTISERS."

New Jersey Car Spring & Rubber Co., Jersey City, N. J. [*Rubber Goods*]: This company was one of the first to enter your list of advertisers, and we expect to be among the last to retire. We feel that it is one of the publications we can't afford to stay out of.

"HAVE FOUND YOU VERY USEFUL."

Alfred Field & Co., New York. [*Cutlery, Guns, etc.*]: We can say in all sincerity that we have found you very useful, and we can most cheerfully recommend you to our friends in the trade.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished th dealer upon request, by the manufacturer quoted.

THE "98" TURN TABLE.
Pat. May 24, 1898.
Pares and Pushes Off the Apple.

WE ARE THE PEOPLE

who have made Apple Parers since 1864.

Having profited somewhat by our experience of thirty-five years we modestly claim if there is one thing we know all about that one thing is

. . . APPLE PARERS.

Our 1899 line consists of nine different Parers (no experiments), suitable for every requirement. We make a specialty of Parers for

EVAPORATORS, BAKERS, HOTELS, RESTAURANTS & FAMILY USE.

CATALOGUE FREE.

NEW YORK OFFICE, 10 WARREN STREET.

GOODELL COMPANY, Antrim, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

R. HEINISCH'S SONS, CO.
NEWARK, N. J.

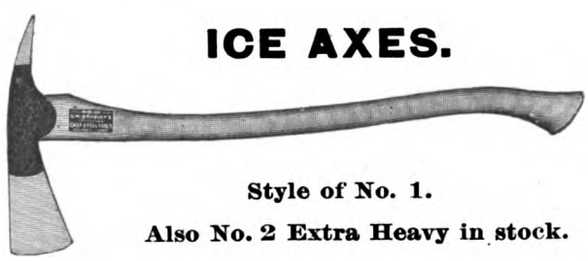
"RESULTS ARE SO SATISFACTORY."

Capewell Horse Nail Co., Hartford, Conn. [*Horse Nails*]: We have been liberal advertisers in your journal for years, and the results are so satisfactory that we expect to be much more liberal for many years to come.

"EACH YEAR RECEIVED BETTER RESULTS."



Standard Tool Co., Cleveland, Ohio. [*Tools*]: During the four years we have had an advertisement in HARDWARE we have each year received better results.

"BEEN WITH YOU FROM THE BEGINNING."

Union Metallic Cartridge Co., New York. [*Ammunition*]: We have been with you as advertisers from the beginning and expect to continue.

G. W. BRADLEY'S SONS,

ICE AXES.

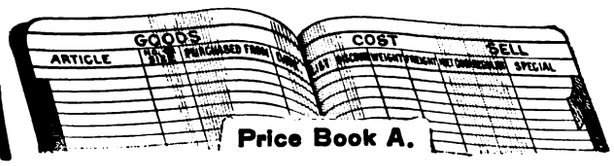
94 Chambers St., NEW YORK.



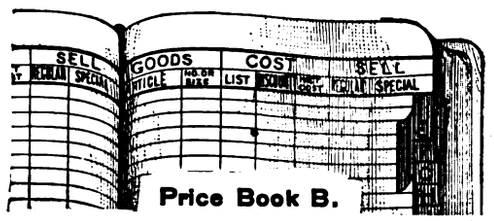
Digitized by Google

HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

A



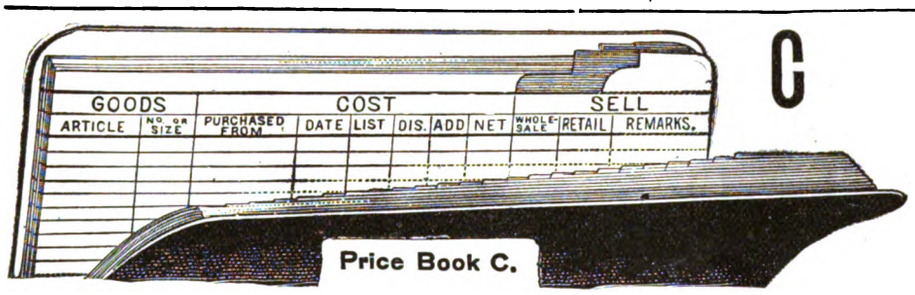
Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

A, 200 pages,	$1.00	**A 2**, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2**, 400 pages with flap,	1.75

B



Price Book B.

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

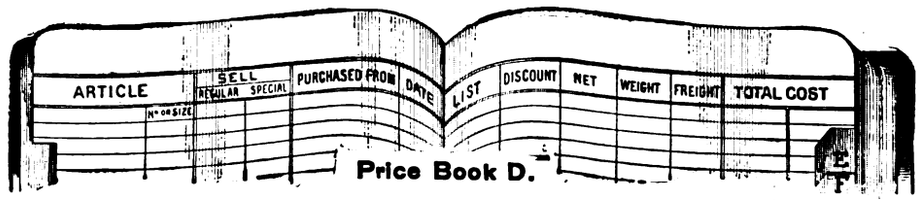
B, 200 pages,	$1.00	**B 2**, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2**, 400 pages with flap,	1.75

C

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¼ inches.***

FOUR EDITIONS:



C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

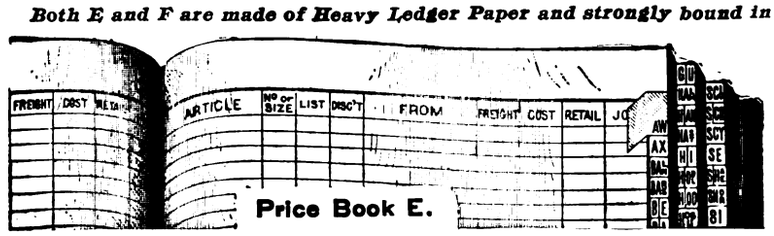
Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50

D

Price Book D.



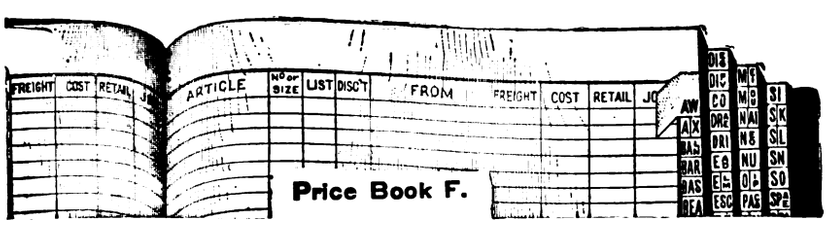
MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to **AU**	For Chisels,	turn to **CHI**	For Iron,	turn to **IRO**
" Parers, Apple	" **PAP**	" Cutlery,	" **CUT**	" Irons,	" **IR'S**

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

E



Price Book E.

AD	GU	SCI	
AN	HAM	SCR	
AU	HAN	SCY	
AW	HAT	SE	
AX	HI	SHE	

Fac Simile of Indexing.

Price Book E—350 pages, 7 x 10 inches, canvas tab indexing. Price, $5.00.

F

Price Book F.

AD	DIE	MF	SI	
AN	DIP	MO	SK	
AU	DO	NAI	SL	
AW	DRE	NE	SN	
AX	DRI	NU	SO	

Fac Simile of Indexing.

556 pages, 8¼ x 11 inches, black leather tab indexing with gilt lettering. Price, $7.50.

Note.—In Price Books E and F there is an Index Character to EVERY PAGE.

WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for hard wood. The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in hard wood We have combined two principles in one, and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.

CHAMPION MODEL.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order. all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. **List, per doz., Enameled, $30.00; Full Nickel, $42.00.**

No. 4, Nickel-Plated	$5.00

For household and general use.

FOOT POWER MACHINE.

No. 1, $25 00 each

For Packers, Tanners, Butchers, Farmers, Hotels and Restaurants.

Liberal Discount to the Trade.

Most perfect knife sharpener made.

Easily operated and quick work.

The degree of perfection attained by the use of this machine is far superior to that accomplished by the ordinary method of hand work.

These machines are practical, based on correct mechanical principles and have reached their present state of perfection after many years of experimenting.

They are simple in their construction, very durable and sharpen with great rapidity.

Knives keep their proper shape and last much longer when sharpened with the "Universal" machine. Silver-plated knives can be sharpened without damaging the blade.

Every dealer and every family should have one of these machines.

We guarantee the "Universal" machine to be as we represent it, "practical, convenient and perfect."

Cronk's Patent Fencing Plier and Staple Puller. . .

THIS newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters They are the same weight as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. The Cuban Exposition and Trading Company

11 Broadway, New York City

Offers floor, shelving and show case space, or private business rooms, in its Havana Exposition and Sales' Building at a reasonable monthly rental, **with contract for pushing the sale of represented goods** in all parts of the island.

The Company having valuable Cuban connections provides American manufacturers and dealers with exceptional opportunities for establishing markets in Cuba for their wares and merchandise.

The exhibit opens this month in Havana in the Company's Exposition building, which has been designated a U. S. Bonded Warehouse which obviates the necessity of outlay for duties. This will be the most effective trade developing establishment in Cuba.

THE BURR PATENT STEEL

Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block.
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of." J. C. DEBES, Supt. of the C. & G. Cooper Co., Mt. Vernon, O.

Paints are Profitable

WE SELL PAINT TO THE FOLLOWING LEADING HARDWARE FIRMS WHO DEAL IN OUR GOODS EXCLUSIVELY.

JANNEY, SEMPLE, HILL CO., - - - Minneapolis, Minn.
BARNEY CAVANAGH HARDWARE CO., - Mobile, Ala.
BECK & GREGG HARDWARE CO., - - - Atlanta, Ga.
LEE-GLASS-ANDREESEN HARDWARE CO., Omaha, Neb.
JONES HARDWARE CO., - - - - - Richmond, Ind.

Besides these there are hundreds of prominent Hardware dealers in other cities who find that it pays them well to sell our paints.

We want the best Hardware house in each town where we are not represented.

We allow each agent exclusive sale in his town and have our salesman assist in building up his trade.

We give our agents the benefits of 106 years of business experience and back them up with all the resources of the largest factory in the world which manufactures paint.

We are anxious to correspond with progressive Hardware men who want to do more business in a better way.

HARDWARE

The best maxim for a country merchant to chalk on the inside of his desk, is to "Stick to no salesman who knows so little as to 'stick' you."

If the new secretary of war wants to Root out all trouble in the Philippines he will adopt the wishes of the anti-imperialists and put Miles between our army and the insurgents, Come now—get there, Eli-hu.

An American paper published in Paris recently contained the following advertisement: "A young man of agreeable presence, and desirous of getting married, would like to make the acquaintance of an aged and experienced gentleman who could dissuade him."

If our Councilmen, now under the ban of the Court, should be compelled to sojourn awhile in jail, it wouldn't be the first time some of them had seen the inside of "the bars," behind which coign of vantage has been a money making position for too many of our politicians.

President Mandlebaum, of the Southern Hardware Jobbers' Association, states that he has an order out for souvenir knives, which formed one of the features of the recent convention, and as soon as received, it is his intention to send the same to the members of the Association, each of whom is entitled to one of them.

It will be admitted by every one who reads the papers that Aguinaldo has had several hard runs of luck during the past season, so that his name during the wet period might as well be "Mud." But when he opens up for the Fall, let us hope that his company will play as usual to no longer engagements than "one night stands."

By the way of Michigan City, Ind , we learn that the skunk farms, availing themselves of New Jersey facilities, intend forming a trust. There will be no trouble in placing that trust in the front rank, for it will be very rank. Our only fear is that there will be so many "skins" connected with it, before long it will be reduced to its last *scent*.

It must have been a pretty tough proposition to digest after that fiery fighting speech of Jewett's before the Detroit Convention, that the leading Hardware manufacturers of the country should, by concert of action, push prices up twenty per cent. further, even then believing they are not getting their just due. There is always room enough—at the top.

An English economist has discovered the reason why the British workmen are degenerating and the American forging to the front. He contends that ale is what ails them. These "mugs," as Jeffries would say, keep too full. We have long been thinking their mechanical excellence was dead, but never felt bitter enough to lay the corpse on the *bier*.

He turns over the seat in front of him so as to have the two seats in the car at his disposal, put his wife in one of them, taking the opposite one himself, and distribu ed two handbags and several packages picturesquely around in the remaining space; when suddenly looking into the rapidly-filling car in front, the lady raised her head and said, blandly, "George, I'm confident we can find better seats in the forward car."

Charles G. Kilpatrick, the clever one-legged trick and fancy cyclist, has been sojourning at the Point of Pines, where his riding act has proved to be a sensational hit. "Kill" claims to be the roughest rider of them all, and his "Rough Rider" costume, in addition to his daring exhibition in riding the steps, proved a big attraction to the thousands of pleasure seekers at this delightful resort.

The Lancaster Machine & Knife Works, Lancaster, N. Y., have just completed their new factory, which doubles their old capacity. They have increased their capital to $100,000, introduced the newest up-to-date machinery, added largely to their force of experienced mechanics, and feel they are now prepared better than ever before, to furnish their superior line of goods promptly. This important product includes machine knives, cleavers, and ratchet and plain bit braces.

Alder & Boyd, No. 37 Warren Street, New York, who are manufacturers' representatives for the export trade exclusively, have recently been appointed to act in that capacity by C. E. Jennings & Co., No. 101 Reade Street, New York. As this company have on the press almost ready for issuing, a new catalogue which illustrates their entire line in a very satisfactory manner, this is an opportune time in which to make an arrangement such as is contemplated above. The distribution of these catalogues to the export trade will be in the hands of Alder & Boyd, with best quotations for the territory sought to be covered.

Mike was colicky and cranky, but above all he could not sit up straight with his lumbago any more than he could double over with his trunk line disadvantages. The doctor left a dose for his stomach and a plaster for his back, with the clearest instructions to his good wife Bridget as to their proper disposition. Warming the plaster with care after the departure of the medical gentleman, Bridget applied it scientifically to the right angle of his well-developed back, and just at that moment another wave of pain threw a series of howls upon the air. This sudden effect of the application made her imagine an error, and running over to the physician, who was, fortunately, across the way, she said, with great emotion: "For the love of God, Docthor, come over and aize him. Shure I made a terrible misthake, for I put the belladonna plasther on his *back!*

It shows in what giant strides the world is progressing; that when the trans-Siberian Railway is completed it will make possible the girdling the world in less than half the time Jules Verne's seemingly improbable proposition counted on, which for so long a time has been the accepted standard. The Russian Minister of Railways declares that by the aid of the new railway the time required for different stages of the journey would be as follows: From St. Petersburg to Vladivostock, 10 days; from Vladivostock to San Francisco, 10 days; from San Francisco to New York, 4½ days; from New York to Bremen, 7 days; from Bremen to St. Petersburg, 1½ days. This programme gives an illustration of how small the world has really become since steam as a propelling power came into use. Distance has been annihilated and seeming impossibilities become possible.

HARDWARE

VOL. XIX. AUGUST 10, 1899. NO. 9.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
E. N. ROOT, - - - - Treasurer.
W. C. BRUNDAGE, - - Business Manager.
HENRY HOPKINS, - - Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

From all over the country come the most encouraging reports of the prospects for a continuance of the conditions surrounding business which have made the year 1899, so far, forever memorable in commercial annals.

Advancing quotations, made necessary in almost every instance by changes in prices that surpass in importance all previous fluctuations within so short a period, are being made on every hand. Those old conservative manufacturers blest with long stocks of metals bought at low prices, and who are still able to supply their specialties at nearly old prices, are few and far between. They must soon succumb to the general trend, and possibly enjoy for a season larger profits than their line of manufactures has been able to stand for many years, if ever.

The demand extending away back to the consumer is something unprecedented and covers every section of the country. Retailers are obtaining prices for their wares that are calculated on possible costs, which have only been announced, and at which many of their lines have not yet been purchased. The ease with which sales have been made, both by the retailers and the jobbers based on current quotation sheets have made the trade less critical as to the marked changes they in many instances have been forced to face; their principal apprehension having been their inability to obtain the supplies promptly with which to replenish stocks depleted beyond all sanguine expectations.

Stocks have been ordered on every hand fairly generous as to amount, a speculative feeling possessing the buyer that at the then current price anything left over would be worth carrying; but these same excess requirements have been used up in meeting the unexpected and unlooked for demand, and they find the warehouse floors and shelves so greatly in need of a replenishing of stocks that the manufacturer is working long hours and straining every nerve to fill his orders and the jobber is astonished to find at even this early date so many of his pet customers are anxious to take time by the forelock and get their fall stocks in running order, knowing how difficult it was during the spring to obtain a full supply from any of the sources within reach.

This unparallelled condition of prosperous affairs suggests to many jobbers the advantageous opportunity which it offers to bring the regular business down more nearly to a cash or "thirty days'" basis; more especially to make nails, rope, shot and other supplies on which profits are understood to be light and positively unremunerative in a close market, assume the conditions of net cash on delivery, with no discount and no thirty days' terms of payment.

Money in every trade centre is now in extremely favorable supply and no better time to inaugurate a change so radical as this could be selected. There has, until the present year, been too much laxity shown as to any fixed terms on which sales are made; a dealer had only to ask for extra time or a dating ahead, and he succeeded in obtaining it, if not from his regular source of supply, certainly from a zealous competitor anxious for his trade. Now, when they are all fighting for a supply of goods not always accessible, terms can be hardened with comparative safety, and the prospects are if this plan is followed it will result in making losses assume a smaller percentage and bring about a more interested feeling between the jobber and his customer that will prove of advantage to both.

Another thing in connection with the present state of affairs can be borne in mind by the jobber: this year has been the first in which his fears of the manufacturer being a competitor for his own trade have not been prevalent. With jobbers willingly offering large orders covering a big field of trade requirements, the manufacturer has been able to avoid the by-paths, the smaller towns, and the jobber and his representatives have had full sway. Now that the requirements for export trade have reached the importance witnessed at present on every hand it would look as though that element of weakness, the fear of the manufacturer, in figuring on the future fullness of a season's trade, would never again form part of the worry, apprehension and deterring influences which the jobber has had to contend with for more years than one cares to remember.

The manufacturer has and will have for a long time to come an abundant field to cultivate without any necessity whatever of reaching after the smaller trade, which has proved so demoralizing to both interests in the more recent past. This fact will enable the jobbing trade eventually to feel safe in demanding from their customers manufacturers' current quotations, and possess less inclination to cut prices when excess stocks are no longer counted among the perplexities and anxieties usually forming commercial environments.

Nothing Succeeds Like Success.

Every successful man knows the buoyancy of feeling, the self-confident mental exhilaration, which invariably accompanies successful achievement in any especial line. It is an electrical inspiration to greater effort, feeding ambition with hope and the heart with promises of golden opportunities, until the world seems full of joy, and clouds are nowhere to be seen to counsel caution.

This condition of affairs seems to be abundantly manifested on every hand at the present time. As one of our trade letters happily expresses it, "Electricity is in the air." It permeates every channel of possible profit. There is no place to-day for the slow-moving, cautious plodder in the plentiful paths of commercial supremacy, unless magnetism incites the venture, elec-

Digitized by Google

trical influences quicken the apprehension, and a love of labor makes glad every physical impulse. The plodder must give way to the ambitious leader of the present, who becomes the pacemaker in the race for superiority, and whose confidence in the future of the country's industrial strength is opening the ports of the known world.

Our Increasing Exports of Manufactures.

Manufactures are now forming more than one-third of our total domestic exports. During the last month they represented a percentage of 33.77 of the total domestic exports, during the three months ending with May they were 35.50, and during the fiscal year just ending they will form a larger percentage of our total domestic exports than in any preceding year, and exceed by many millions the total exports of manufactures in any preceding year. The fiscal year 1898 showed the largest exports of manufactures in our history, $299,697,354 and in the eleven months of the fiscal year 1899, the increase over the corresponding months of the preceding year has been $45,164,000, so that it is now apparent that the export manufactures in the fiscal year now ending will be about $335,000,000, as against the high water mark $290,697,354 in the fiscal year 1898.

Iron and steel continue to form the most important or at least by far the largest item of value in the exports of manufactures. In the month of May, 1899, the exports of iron and steel, and manufactures thereof amounted to $8,601,114, making the total for eleven months $84,873,842, against $63,235,029 in the corresponding months of last year, a gain in the eleven months of over $21,000,000. The recent advances in prices of iron and steel caused the belief that a reduction in the exports of iron and steel would follow, but certainly this has not been realized up to the present time, since the exportations of iron and steel in the month of May are 20 per cent. in excess of May of last year, while those of April are nearly 50 per cent. in excess of April, 1898.

Cuba, Porto Rico and the Philippines afforded a market for over $40,000,000 worth of Spanish goods per annum, according to a statement of the British Consul at Barcelona, just received by the Treasury Bureau of Statistics. About three-fourths of this amount was in manufactured goods, and considerably more than one half of this market was that of Cuba alone. According to the statement which Mr. Consul Roberts sends to the British Foreign Office, dated June 18, 1899, the exports of Spain to Cuba in 1896 amounted to 134,461,675 pesetas; to Porto Rico, 37,660,809 pesetas, and to the Philippines, 38,357,757, making a total of 210,480,241 pesetas, and accepting the value of the peseta at 20 cents, makes a total of $42,096,048. Consul Roberts expresses the opinion that Spanish manufacturers and dealers are not going to give up the markets of Cuba, Porto Rico and the Philippines without a struggle. He also intimates that other nationalities have in the past participated in the so-called Spanish trade with these islands by locating in Spain and thus getting the advantage of low tariff rates into the islands, which was originally given to commerce originating in Spain. On this subject he says: "In the year 1892 the Spanish customs tariff on manufactured goods was very considerably increased with the view of virtually giving a monopoly to goods manufactured here for exportation to the colonies; this, of course, gave an enormous impetus to manufacture in this province; factories increased largely in number, and the Catalan manufacturers grew rapidly rich. The only way in which foreigners who had good clients in the colonies could meet this competition and retain their markets was by starting factories in the country, the goods thus being manufactured in the peninsula, entering the Spanish colonies on the same terms as those of the Spanish manufacturers, whereas if shipped from England or elsewhere, the prohibitive duty rendered competition impossible; or by having a resident agent in this city who, purchasing from the Catalan manufacturers, exported the merchandise from here free of duty."

Banks Cannot Affix Stamps to Checks.

Having reference to the stamping of customers' checks by banks, Commissioner Wilson has written from Washington to Collector Treat, at New York, calling his attention to an article in a New York paper stating that the banks say they are advised by their attorneys that there is no section of the war revenue law forbidding the practice.

After quoting section 7, of the act, which makes it an offense punishable by a fine of $100 for any person to make, sign, or issue any bank check, as well as any other instrument requiring stamps, without first stamping the same, the Commissioner says:

"To permit the stamps to be affixed in such cases by the banks or any other person is really to condone the offense above denounced by law. The only way that a bank check or any other instrument issued without a stamp can be validated is by being presented to the collector for that purpose, under section 13, of the war revenue act, and section 3422, of the Revised Statutes. Therefore, instead of there being no law forbidding the practice of banks stamping bank checks presented to them unstamped, all the law there is on the subject forbids such practice in the strongest manner by a necessary implication."

The distribution of the product of the American Bicycle Co. has been under consideration, and the following statement is given, with President Smith, of the Indiana Bicycle Co., as authority:

The capitalization is $40,000,000, and forty-two bicycle plants have been absorbed at a cost of $31,000,000, leaving $9,000,000 for working capital, and to force out competition.

Under the agreement, each factory will hereafter make but one grade of wheels. All tires will be bought of the Rubber Goods Co., which has absorbed the principal rubber factories of the country not owned by the la ger bicycle plants, and all seamless tubing will be provided by a Cleveland company, capitalized at $8,000,000, which will form part of the Trust.

The automobile patents controlled by the Indiana company pass into the possession of the Trust, and it is predicted that electric automobiles can be made very cheaply.

It is believed in Chicago that the wire nail combine will have competition of importance within a few months. A big rod mill is under construction by the Grand Crossing Tack Co., and it is expected to have the mill ready by January 1st to turn out daily 100 tons of rods to be converted into nails. A refusal to sell the tack company rods, which is expected to be given by the wire nail combine when the former's contracts with the latter expire, is the reason for the undertaking. The new plant will have one-seventh of the total capacity of all the mills of the country. For this purpose an increase of $125,000 in the capital stock of the Grand Crossing Tack Co. was made recently.

Those desirous of purchasing an established business in a fine Southern city, will find in our advertising columns, under the heading "For Sale," an admirable opportunity. The stock is a desirable one and in good condition; the store is eligibly located and with a moderate rent.

The Gormully & Jeffery Mfg. Co., of Chicago, are shipping quantities of bicycles to Liverpool.

Reading Hardware Co.'s New Catalogue.

The Reading Hardware Co., Reading, Pa., have just issued from the press one of the most important catalogues they have ever gotten out. It is designed more particularly from the standpoint of an architects' catalogue, covering extensively all the varieties and styles of Hardware necessary for filling the specifications emanating from an architect. It is a catalogue of 448 pages, measuring 9¼x6½ inches, on heavy coated paper, and filled with illustrations of the most artistic character. They are admirably printed, and the contents are arranged in such a manner that there is no excuse for anyone consulting it to go astray in the number of articles made of any special design, or in the list prices which are printed on the same page, or in the technical description in regard to sizes and corresponding numbers which is usually so essential in a catalogue, and yet rarely provided for in as simple a manner as is done in the one under consideration. The catalogue is much reduced in bulk, from the previous catalogues issued by this company, lines of goods having been condensed on single pages, where previously they occupied several; and the illustrations throughout being almost invariably one-third size, makes an extremely portable volume and one which will undoubtedly become very popular.

The frontispiece to the volume is an illustration of their extensive works at Reading, Pa. The general index is followed up by an index of designs, which number upwards of fifty, and give on the same page, the pages in the catalogue where the escutcheons, lock sets, store-door handles and cabinet trimmings that are made in this same design, can readily be found. This is a great convenience, and is in very compact shape. Following this page is a numerical index of locks and latches, covering the entire line shown in this catalogue with the pages noted upon which each article may be found. Engravings showing right-hand and left-hand doors and indicating right-hand and left-hand reverse bevel are also given, in order to facilitate a clear expression of the buyers' wants when ordering goods. This is followed by a page covering their various finishes which represent about fifty different styles, the difference between which can be readily understood from the description. Certain classes of information are given in this catalogue as referred to above, which have not always been given in previous issues, such as thickness of case, width of front, and from the front to the centre of escutcheon, all of which are indicated in a very complete manner, as well as many other items of intelligence that will be appreciated by those who use it.

In this catalogue will be found a great many new designs under the names, among others, of Hampton, Berkley, Quincy, Majestic, Verdon, Rocroy, Beaumont, etc. A number of designs are shown in groups or schools, which include styles corresponding to the periods of the Empire, Louis XIV, Louis XV, Louis XVI, Italian Renaissance, German Renaissance, Romanesque, Gothic, Greek, Colonial, etc.

The company are to be congratulated upon having issued a catalogue that will greatly facilitate ordering, and will undoubtedly be appreciated by the Hardwaremen handling their line of goods.

Rolling Mills Combine.

The Wheatland Rolling Mill and the Coleman-Shields Mill have been combined under the name of the Continental Iron Co., and capitalized at $200,000. The main offices will be located at Niles, O. and the mills will employ from 500 to 600 men. It is understood that the Continental Iron Co. will operate its mills independently of the combine.

The Stanley Works, of New Britain, Conn., are about to ship many lots of their wrought steel shelf brackets to England, South Africa and Australia.

Our Increasing Exports.

Of the remarkable growth in our exportations of manufactures during the fiscal year just ended, that of the manufactures of iron and steel is the most striking. The total increase in our exports of manufactures during the year, as shown by the figures of the Treasury Bureau of Statistics, is in round numbers $48,000,000, and of this increase, $33,000,000 is in manufactures of iron and steel. The total exports of iron and steel and manufactures thereof in the fiscal year 1899 were $93,715,951, against $70,406,885 in 1898, $57,497,872 in 1897, $41,160,877 in 1896, $32,000,989 in 1895, and $29,220,264 in 1894. It will thus be seen that the exports of manufactures of iron and steel in 1899 were more than double those of 1896 and more than three times as much as those of 1894.

On the other hand, the imports of manufactures of iron and steel continue to fall, having been during the year but $12,098,239, against $25,338,103 in 1896 and $53,544,372 in 1891. Thus, while the exports of iron and steel have been steadily growing, the imports have fallen, so that they are now less than one-half what they were in 1896 and about one-fifth what they were in 1891.

All the classes of manufactures of iron and steel have shared in the growth and popularity abroad, but this is especially marked in the higher grades of manufactures, such as steel rails, railway engines, builders' Hardware, machinery of all sorts, and especially those used in manufacturing. The number of railway engines exported during the year was 517, against 468 in 1898, 338 in 1897, 261 in 1896, 252 in 1895, and 142 in 1894, while the value of the exports of locomotives in 1899 was $4,728,748, against $1,028,236 in 1894.

Of the 517 railway locomotives exported during the year, 99 went to Russia, 69 went to Japan, 61 to China, 59 to Mexico, 50 to Canada, 36 to British East Indies, 25 to England, 23 to Sweden and Norway, 20 to Brazil, 14 to the West Indies, and 11 to Africa. One interesting feature of this large exportation of locomotives in 1899 is that 211 of the 517 exported went to Asiatic countries.

The following table shows the exports of manufactures of iron and steel during the year 1899, compared with those of the preceding fiscal year.

	1898.	1899.
Machinery, not elsewhere specified	$13,336 930	$18,722 251
Metal working machinery	4,618,683	6,491 586
Pipes and fittings	3 092,016	5 874,228
Steel rails	4,614,376	5,298,125
Locks, hinges, etc	3,907,796	4,898,752
Locomotive engines	3 883,719	3,728,748
Wire	2,593,306	3,831,180
Pig iron	2,729,995	3 311,295
Sewing machines	3,136,364	3,264,344
Saws and tools	2,430,536	2,943,620
Electrical machinery	2 052,564	2,736,110
Pumps and pumping machinery	2 023,034	2,710,654
Typewriters and parts of	1.902,153	2,449,205
Structural iron and steel	1,183 482	1,759,088
Steel sheets and plates	354,579	1,634,866
Other steam engines	1,333,619	1,481,523
Castings	804,975	1.055,525
Scrap iron	632,334	1,041,229
Wire nails	458,787	973,434
Bars or rods of steel	470,052	944,874
Billets, ingots and blooms	290,727	882,700
Shoe machinery	805,788	853,036
Printing presses	874,515	847,006
Firearms	672,223	681,440
Cut nails	612,234	604,215
Rods	330,022	580,490
Stoves and ranges	382,080	503,739
Scales and balances	343,200	390,214
Bar iron	163,261	365,144
Iron sheets and plates	182 809	324 747
Cutlery	156,558	196,040
Other nails, including tacks	245,722	286,947
Safes	87,614	145 349
Iron rails	37.150	141 706
Car wheels	129,446	132,124
Hoop, band and scroll	47,327	107.703
Tin plates, terne plates, etc	962	10,045
All other manufactures of	9,305,977	10,450,779
Total manufactures of iron and steel	$70,406,885	$93,715,951

Twenty locomotives from the Baldwin and the Schenectady Locomotive Works will be shipped to England in the steamship *Nutfield* of the Lambert & Hope Line. This shipment makes something over sixty American locomotives that have been shipped to England in the past year. The engines are for use in the freight division of the Midland railway in England.

Interesting Railway Accident Statistics.

The following list of railway accidents looks formidable enough, although one passenger killed out of every two and a quarter millions carried is not so bad a showing.

The total number of casualties to persons on account of railway accidents during the year ending June 30, 1898, was 47,741. The aggregate number of persons killed as a result of railway accidents during the year was 6859, and the number injured was 40,882. Of railway employes, 1958 were killed and 31,761 were injured during the year covered by this report. With respect to the three general classes of employes, these casualties were divided as follows: Trainmen, 1141 killed, 15,645 injured; switchmen, flagmen and watchmen, 242 killed, 2677 injured; other employes, 575 killed, 13,439 injured. The casualties to employes resulting from coupling and uncoupling cars were: persons killed, 279; injured, 6988. The corresponding figures for the preceding year were: killed, 214; injured, 6283.

The casualties for coupling and uncoupling cars are assigned as follows: Trainmen, killed, 182; injured, 5290. Switchmen, flagmen and watchmen, killed, 90; injured, 1486. Other employes, killed, 7; injured, 212. The casualties resulting from falling from trains and engines are assigned as follows: Trainmen, killed, 356; injured, 2979. Switchmen, flagmen and watchmen, killed, 50; injured, 359. Other employes, killed, 67, injured, 521. The casualties to the same three groups of employes caused by collisions and derailments were as follows: Trainmen, killed, 262; injured, 1367. Switchmen, flagmen and watchmen, killed, 13; injured, 69. Other employes, killed, 38; injured, 367.

The number of passengers killed during the year was 221, and the number injured was 2945. Corresponding figures for the previous year were 222 killed and 2795 injured. In consequence of collisions and derailments, 72 passengers were killed and 1134 passengers were injured during the year embraced by this report. The total number of persons, other than employes and passengers, killed, was 4680; injured, 6176. These figures include casualties to persons classed as trespassers, of whom 4063 were killed and 4749 injured. The summaries containing the ratio of casualties show that 1 out of every 447 employes was killed and 1 out of every 28 employes was injured. With reference to trainmen—including in the term enginemen, firemen, conductors and other trainmen—it is shown that 1 was killed for every 150 employed and 1 was injured for every 11 employed. One passenger was killed for every 2,267,270 carried, and 1 injured for every 170,141 carried. Ratios based upon the number of miles traveled, however, show that 60,542,670 passenger-miles were accomplished for each passenger injured.

Experiments are being carried out in the United States to test the applicability of electroplating to the hulls of vessels. The hull of a sea-going tug which was electroplated in February, 1895, has recently been examined and found to be free from barnacles or marine growth of any kind. During the past year she has been in the lower waters of the Chesapeake, and while other tugs were hauled out every four weeks, this tug remained constantly at work.—*The Engineer.*

A new building material is coming into use in some parts of Germany. It is termed keramo, and is said to be made of powdered glass waste, devitrified, and molded under high pressure. The center of the industry is at Penzig, Silesia. The price is given at $1.60 per square yard. The material is weather proof, fire proof and acid and grease proof, is opaque and of different colors to suit individual tastes. There should be a good demand for such material, as it is tough and practically indestructible.—*Ex.*

Bommer Bros. New Factory.

Bommer Bros, manufacturers of the well-known Bommer Spring Hinges, have removed to, and are now completely installed in their new factory building, Nos. 257 to 271 Classon Avenue, Brooklyn, N. Y. The main building has an abundance of light on all sides, is in dimensions 60x120 feet in size and four stories in height, situated on a plot 200x100 feet. The engine and boiler rooms, storage for coal, etc., being located outside and separate, shows that the factory is in every respect modern in design, and of slow-burning mill construction. Every precaution of tried value, such as automatic sprinklers, etc., has been taken to minimize all fire risk, and special pains were taken to secure good light, perfect ventilation and superior sanitary surroundings for the employes.

The power plant, consisting of a battery of Bigelow high pressure boilers, is arranged for either forced or natural draft, and a Watts-Campbell 100 h. p. Corliss engine is working perfectly. The building also contains fireproof vaults for the storage of dies and special tools. Bommer Bros., with their largely increased facilities, hope to be enabled better than ever before to give prompt attention to the demands of their patrons. They feel very thankful to the trade for the liberal patronage of the past, and say they will do their level best to continue to merit the same.

Stover Mfg. Co.'s Improvements.

The Stover Mfg. Co., Freeport, Ill., have decided to erect a large plant, especially for the manufacture of their line of implements, consisting of wind mills, grinding mills, etc. They will begin operations upon the factory at an early day, and have it ready for use by the first of next year. At the present time they are crowded out of their present quarters by a volume of business entirely too large for it.

In establishing a new plant especially for the lines above mentioned, they intend utilizing the present plant for the Hardware part of their business and will give employment to a largely increased number of men, and will also increase their efforts in the field of publicity.

The buildings designed to be erected by them, will be of a substantial character, composed largely of stone, brick and steel, and will be mainly one story high. The plant in its entirety will cover about five acres to start with, and will be constructed on plans laid out so as to admit of future expansion when it becomes necessary. Some of their lines they have been obliged to buy outside in many instances for the want of sufficient factory room, but with the new plant they will be enabled to manufacture all of their lines of specialties in quantities sufficient to meet the wants of their growing trade.

Order Suspending Use of Hektograph Revoked.

A delegation of New York importers called on Assistant Secretary Spaulding, of the Treasury at Washington, July 6th to protest against the department's circular issued in April last prohibiting the use of the hektograph, copygraph, chromograph or similar devices in reproducing invoices. In connection with this order the Secretary of State instructed United States Consular officers abroad to refuse authorization of invoices made out by any of these means.

The delegation represented to Assistant Secretary Spaulding that the order imposed not a little hardship on shippers and importers, and that a modification of the order was necessary to facilitate their business. After hearing the complaint Assistant Secretary Spaulding decided to revoke the order, but it is still required that inventories shall be made with permanent inks, so that their value as official records may not be impaired.

Hobart B. Ives & Co., of New Haven, are shipping sash locks and window Hardware specialties to England.

The Cradle Season of 1884.

"There is a reminder of the summer of 1884," said a man from an agricultural implement warehouse as hurrying to catch his suburban train he paused at a crossing while an express wagon filled with old-fashioned cradles pulled deliberately past. These were not "cradles of the deep," nor the swaying, rocker-furnished receptacle for babies which an earlier generation enjoyed, but the cradles used in harvesting wheat. And they were getting out to the country in response to a small, lingering demand that survives from the era when King harvesting machines and twine binders were unknown.

"The summer of 1884," said the implement man, "was very wet. It rained almost every day from March to July. The lowlands were flooded. The 'Sni bottoms' along the Illinois and Mississippi rivers were great lakes. The fields were so soft no wheels could be driven upon them; and makers of machine harvesters lost thousands and thousands of dollars. The demand for cradles came with a rush, and factories worked night and day to supply them. Every bit of machinery for turning the long wooden 'fingers,' for making the scythe blades, for bending the 'snath,' had to be built and installed. Never was such a record for quick work among the manufacturers. Carloads by the hundred went hurrying out of Chicago as June drew to a close, and the whole country was supplied. Not ten per cent. of the wheat of 1884 was cut by machines. Practically all of it was gathered by hand. And the old-fashioned 'cradler was dead or forgotten. His sons had to remember the big stories of 'cutting wide swaths' and go in at an unusual occupation. It was not a big harvest that year, but it was more trouble to the farmers than to anyone else. Wheat sold that season, I think, rather lower than in any year since the war—until Cleveland and hard times set a new figure. Cradles! I had almost forgotten them.—*Chicago (Ill.) Post.*

American Cranes for English Gun Factory.

The Brown Hoisting & Conveying Machine Co., of Cleveland, O., has just closed a contract, through W. A. Stadelman, its Eastern representative, for two electric battleship cantilever cranes and trestles, and the same number of electric cantilever yard cranes, for the works of Vickers, Sons & Maxim, Limited, of Sheffield, England.

This will be the largest shipment of cranes ever made to England from this side, and by far the biggest plant ever erected there. The contract calls for the use of no less than 6000 tons of material, and will be worth some $350,000.

Other orders recently received by the company include a large plant of Brown Standard bridges for unloading ore at Malmoa harbor, Sweden, and a duplicate of the above equipment for another harbor in the vicinity of Stockholm. The first order was received direct, and the other was obtained through Graham Bros., of Stockholm, who acted on behalf of the Swedish government. The value of these two contracts amounts to more than $80,000.

The Brown company, which is the largest concern of its kind in the world, is stated to have European orders on hand for more than $1,500,000, which is sufficient, coupled with exceedingly heavy domestic demands, to keep the works busily engaged for the next two years, notwithstanding that the employes are working day and night, the fires not having been banked for several weeks.—*N. Y. Commercial.*

The Shryock-Johnson Mfg Co., who advertise themselves as "Inventors of Sellers for the Jobbing Trade," have removed from corner of Broadway and Washington Street, to No. 507 North Second Street, St. Louis. They advise us that they would be pleased to receive catalogues and prices from manufacturers of house furnishing specialties and novelties.

Recent Trade Publications.

The Bevin Bros. Mfg. Co., East Hampton, Conn. Catalogue of sleigh bells and kindred goods. A completely illustrated pamphlet of seventy-five pages with new discounts suitable for the current season.

The Lalance & Grosjean Mfg. Co., New York, catalogue of Agate, Nickel-steel, Pearl agate and other enameled wares. A completely illustrated pamphlet of 125 pages under date of July, 1899.

The Philadelphia Lawn Mower Co., Philadelphia, envelope catalogue of Genuine Philadelphia Pony and Horse Lawn Mowers.

The Waterbury Rope Co., New York, special catalogue covering the line of their manufactures, with very interesting articles on rope and rope-making, ancient and modern, from the fibre to the finished article. Handsomely illustrated, and of great interest to anyone interested in their product.

The Waterbury Rope Co., New York, envelope catalogue and new list of wire rope and fittings.

Cronk Hanger Co., Elmira, N. Y., envelope catalogue of twenty-eight pages, covering the entire line of their productions of barn door hangers, rail, plyers and pruning shears, and lawn and garden rakes, etc.

The Plume & Atwood Mfg. Co., New York, very handsomely illustrated catalogue of 24 pages giving illustrations of metal lamps of latest description manufactured by them. Illustrating modern goods, red, green or Rookwood body, to be trimmed with decorated amber globes. Also styles in old brass and Japanese bronze, verd antique, and oxydized silver.

The Sedgwick Machine Works, Poughkeepsie, N. Y., catalogue "D" of automatic lock dumb waiters, hand elevators and other hoisting appliances from domestic purposes to those desired for warehouses or carriage elevators. It is a very admirable catalogue for this line of goods.

J. B. Colt & Co., Nos. 3-7 West Twenty-Ninth Street, New York, finely illustrated catalogue consisting of sixty pages, illustrating acetylene gas apparatus and accessories, this catalogue being Part III of a series. It is a very handsome pamphlet completely illustrated, with numerous dwelling houses already in possession of the apparatus described therein, making it an extremely interesting publication for those interested in the subject under consideration.

The Russell Jennings Mfg. Co., Deep River, Conn., handsomely illustrated catalogue on coated paper of twenty four pages, showing their complete line of boring implements known to the trade under the name of the "Russell Jennings," including auger bits, dowel, boat and hand-rail bits, car bits, and machine dowels both round and square shank, machine bits in large variety, and machine augers and countersunk bits, bung boring bits, carpenters', millwrights' and ring augers. It is the most complete line ever given by them in the pages of a catalogue, making it a very important publication for the Hardware dealer to request.

The assistant secretary of the Bissell Carpet Sweeper Co. is again on deck with an announcement to the jobbers for the fall trade. He makes a very handsome offer in the circular letter announcement which was sent out August 1st with enclosure of order blank, which we think will be found very acceptable to buyers. The Bissell Co. are fully up to date as to the demands and necessities of the trade, and their many progressive movements at all times are very marked. The announcement just mailed should meet with a gratifying response.

HARDWARE TOPICS BY THE WAY.

Don't be a clam—nor a Paty du Clam—for a perversion of the truth is worse than silence that betokens ignorance or rot.

Press dispatches of a Wall Street lining speak of rusty grain in the new crops. It needs an iron constitution to digest such news in the face of the truth to the contrary. A crop without rusty grains is a crop that has never been harvested. But, go ahead! Run up grain prices! The farmers can stand it, and a little rust with our bread may steel our nerve.

Trust does not mean "bust" to the man who knows how to mind his own business and take care of his opportunities.

I wager England against a German-made knife that America's future commercial supremacy will be based on the combines now coming into existence. The trusts will fully eradicate that *far niente*, tired, conservative or indifferent feeling which now inhabits our commercial soul. The trusts will bring out the full scope of Yankee ingenuity and enterprise. The trusts will pit brain against brain, muscle against muscle, the weak against the strong. Individuality has its virtues, but under favorable conditions it degenerates into selfishness, haughty pride, unworthy greed, which in the end even obscures the patriotic impulse, and amalgamates with un-American conditions—in short, becomes foreignized. Give the trust its due. Don't prejudge. Time, alone, is the great equalizer.

Who'd ever "think" it! That that mosquito-ridden commonwealth of New Jersey, burlesqued as being "out of the United States," should produce a town that will Trentonize our whole commerce and trade! When New Jersey is rebaptized Trentonia, our geologists will probably find ways and means to straighten out the peculiar malformation of its circumference.

Why not dramatize this yaller sheet dry fuss into a Dreyfusiade and Filipinade, and give us the necessary time to properly receive our own Dewey, who has escaped from a devil's island on his own ship without fuss and feathers, and no morbid intentions of becoming a court-martial hero. I'll be Deweyfied if he won't beat the whole string of sudden heroes without Hobsonizing his opportunities of stepping into the halo of George Washington.

I am drifting out of the Hardware sphere, but my readers will make allowances for the incubus brought by a "white man's burden" during dog days.

There was an apprehension felt in certain quarters that pig iron would "hog" the whole iron market, but the furnaces were not reckoned with by the price-stuffing prophets. The industrial volcanoes of America can do wonderful things once they are given their quota of action.

They say Edison is about to bring out an auto-baby-carriage, baby auto-mobile or infantile auto-car. Trust it will have no graphophone attachments, for baby's language, poetic, lyric and prosaic, is as yet unintelligible to us, and therefore, disinteresting. Tete-a-tetes between the nurse and park policeman are often in the vernacular. But the Wizard will probably have a tubular attachment to receive the lung momentums of the occupant when aroused, and use it as propelling power.

Fishhooks and minnows! But this has been an active season for fishermen's paraphernalia! In fact, sporting goods of all descriptions enjoyed an unprecedented demand—all indicative of more prosperous times. When the American enjoys himself without stint, you may rest assured he feels he can afford it. And no calamity surroundings would infuse such a feeling.

Trusts cure dyspepsia. Just keep on bothering your head about them, and the undertaker will hand you a pratique for the dark river.

It is not uncommon now to find German commercial catalogues or price lists in American hotels. The American-made articles are generally in fat type. They are just as proud of the "American-made" trade phrase over there as we are unproud of the "German-made" over here.

Go abroad, young man! Expand with the new American policy, is the improved Greeley of it. If it were not a hyphenated outgrowth, I'd term it "Hanbyish."

Some of these days are corkers. Don't look askance at a man if he, by mistake, produces a corkscrew instead of the pass key. Both instruments are related, anyway. They both key up.

A Kentucky dealer placed one of these new-fangled steam painting devices in front of his store by way of novelty. While he was about fixing up a danger sign, the ambulant Kentuckians had a high old time trying what they thought to be a new chemical fire engine. Oh, yes, it worked perfectly! So did several revolvers. The dealer will have to keep shop gratis for a whole year, before all feud expenses are condoned for.

Picnic gratuities such as the Jeffrey Company, of Columbus, Ohio, is wont to tender its employes, are the *sine qua non* feature which cements the relations between employer and employe. Such generosity is worthy modeling after.

The new condition workman is not a striker. He has learned to think for himself and weigh his own fate. The agitator has almost concluded to go to work for want of sympathy and usefulness.

The advance fall trade is full of happy omens. Aye, the dog days may be rough on friendly smiles, but there isn't a misanthropist among them—nary an one.

Cleveland, O., Aug., 1899. JOHN B. RINDFLEISCH.

The gross earnings of the railways of the United States, covering an operated mileage of 184,648.26 miles, were $1,247,325,621 for the year ending June 30, 1898, being greater by $125,235,848 than the corresponding item for the fiscal year preceding. The operating expenses during the same period were $817,973,276, being an increase of $65,448,512 as compared with the year 1897. The items comprised in gross earnings from operation for the fiscal year under consideration were: Passenger revenue $266,970,490, increase as compared with the previous year $15,834,563; mail $34,608,352, increase $853,886; express $25,908,075, increase $1,007,009; other earnings from passenger service $7,224,000; freight revenue $876,727,719, increase $103,878,405, other; earnings from freight service $4,683,205 increase $473,548; other earnings from operation, including a few unclassified items, $31,203,780.

Export Notes.

The Pittsburg Reduction Co., of Pittsburg, will export 200 cases of aluminum to St. Petersburg.

The Union Fence Co., of De Kalb, Ill., are shipping quantities of poultry fencing to Swedish ports.

C. E. Jennings & Co., of this city are shipping a number of lots of miscellaneous Hardware to Yokohama.

The United States Radiator Co., of Dunkirk, N. Y., are shipping large quantities of radiators to Hamburg.

The Skinner Chuck Co., of New Britain, Conn., are shipping many lots of chucks and other specialties to Yokohama.

The Pittsburg Shovel Co., of Pittsburg, are about to ship two carloads of shovels to Yokohama and Kobe, Japan.

The New Jersey Wire Cloth Co., of Trenton, N. J., have been shipping quantities of steel wire screen cloth to Beirut, Syria.

The Niles Tool Works, of Hamilton, O., have ready for shipment 40 cases of heavy machine tools of various descriptions to Berlin.

The J. S. Fay & Egan Co., of Cincinnati, are about to ship several cases of wood working machinery to A. W. Horne, Nagasaki, Japan.

The H. W. Johns Mfg. Co., of this city, are shipping large quantities of asbestos to the Deutsche Asbest Gesellschaft, Duisburg-on-Rhine, Germany.

The Norton Emery Wheel Co., of Worcester, Mass., have been making heavy consignments of emery wheels to Schuchardt & Schutte, of Berlin.

E. & T. Fairbanks & Co., of St. Johnsbury, Vt., recently shipped several cases of scales and weigh bridges to Sydney, Australia, and Para, Brazil.

Quantities of the American brand of wringers are being exported to Gothenburg, Sweden. The orders are principally placed through Hammacher, Delius & Co., of this city.

The B. F. Sturtevant Co., of Boston, are about to ship a small lot of forges for use in the temporary machine shops on the Port Arthur section of the Chinese Eastern Railroad.

The Hay-Budden Mfg. Co. are supplying 40 anvils weighing 300 pounds each, for use in the temporary machine shops on the Port Arthur section of the Chinese Eastern Railroad.

The Sedgwick Machine Works, of Poughkeepsie, N. Y. have made a big shipment of hand elevators and dumb waiters, which are intended for use in one of the leading hotels in Amsterdam.

The Marseilles Manufacturing Co., of La Salle, Ill., have ready for shipment several cases of windmills to Johannesburg, South Africa. The orders were obtained through Flint, Eddy & Co., of this city.

Chas. A. Schieren & Co., of this city have secured a contract for the supply of all leather belting needed for the machine shops now being built for temporary use on the Chinese Eastern Railroad. The first order of $1000 worth is ready to be shipped to Vladivostok.

The Van Wagoner & Williams Hdw. Co., of Cleveland, have received an extensive order for its specialties, to be used on the Port Arthur section of the Chinese Eastern Railroad. The order was secured through the M. S. Friede Co.

The Brown & Sharpe Mfg. Co., of Providence, recently shipped No. 3 plain milling machines with oil pumps to Antwerp. Several cases of various specialties were also forwarded to Schuchardt & Schutte, of Berlin, and Laude & Fils, Havre.

The Peck, Stow & Wilcox Co., of Southington, Conn., are supplying the tinners' tools and machinery used in the temporary machine shops on the Port Arthur section of the Chinese Eastern Railroad. The order was obtained through the M. S. Friede Co.

Edward Miller & Co., of Meriden, Conn., have ready for shipment a big consignment of brass and gilt parlor lamps, founts and so forth, to go to Birmingham, England. American lamps, it is evident, are making serious inroads into the English domestic and foreign trade.

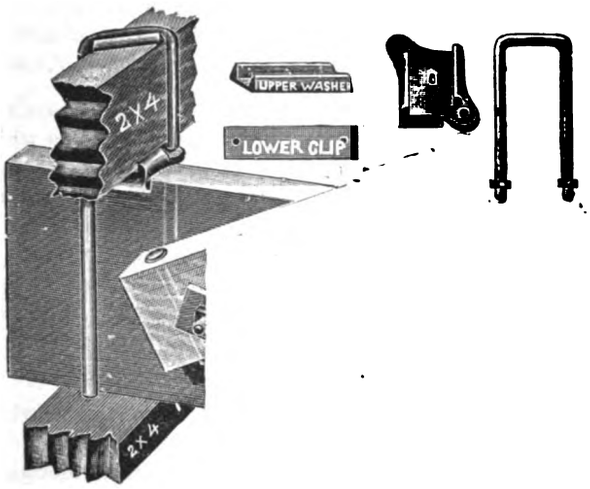
Many lots of mining machinery are being shipped to Japan. These shipments average 200 tons per steamship. They are principally made by Fraser & Chalmers, Ltd., of Chicago, and the Toledo Foundry Co. The orders are secured through Middleton & Smith, of this city.

The Cleveland Twist Drill Co., of Cleveland, have received an initial order for a $2000 lot of twist drills and small machine tools for the temporary machine shops on the Port Arthur section of the Chinese Eastern Railroad. The order was obtained through M. S. Friede & Co., of this city.

The Nicholson File Co., of Providence, have secured the contract for supplying the files needed by the temporary machine shops on the Port Arthur section of the Chinese Eastern Railroad. The order, which was received through the M. S. Friede Co., calls for an immediate delivery of a $2000 shipment. The full value of the contract it is understood, will be $6000.

The Brown & Sharpe Manufacturing Co., of Providence, number among its last month's shipments two No. 4 automatic gear cutting machines, with oil pumps, which were forwarded to Bremen. Some No. 3 plain milling machines went to Wanderen & Fahrenwerke, of Berlin. A No. 4 automatic milling machine, complete with oil pump, was exported to London, and a No. 3 plain milling machine, with oil pump, to Antwerp.

One good thing to be said of the trusts is that they have already contributed several million dollars to the Federal Treasury under the stamp act. All the bonds and mortgages and all the certificates of stock issued by the numerous industrial combinations of every description must be provided with stamps, which in several instances have amounted to several thousand dollars. In the formation of these monopolies in New York the stamps required for one transaction amounted to $95,000, another to $65,750, and in a third to $57,200.—*Philadelphia Record.*



A vase cut from a single emerald has been preserved in a cathedral of Genoa, Italy, six hundred years. Its dimensions are; Diameter, 12½ inches: height, 5¾ inches. Every precaution is used to insure its safekeeping. Several locks must be opened to reach it, and the key of each lock is in the possession of a different man. It is publicly exhibited very rarely, and then only by order of the Senate. A precautionary decree was passed in 1476 forbidding all persons to approach the priceless treasure too closely. An antiquarian advances the theory that it was one of the gifts made Solomon by the Queen of Sheba, and has written a book to prove his assumption. It is difficult to believe that so large an emerald has ever been found, and it would be interesting to hear the verdict of a gem expert after he had carefully examined the vase.—*Ex.*

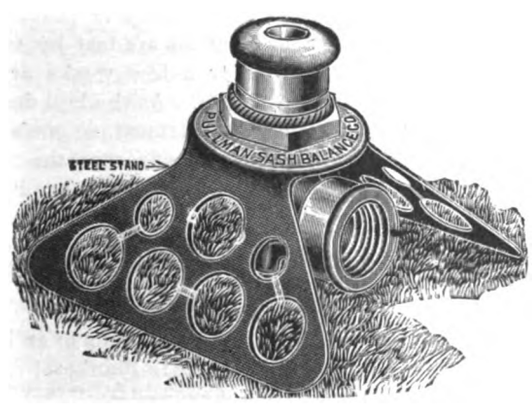
NEW GOODS AND SPECIALTIES.

Wenzelman's Hay Rack Brackets and Clamps.



The Wenzelman Mfg. Co., Streator, Ill., are placing before the Hardware trade an excellent device in the way of a Hay Rack Bracket and Clamps, well worthy of the attention of the dealers who are interested. With a set of these brackets and clamps, as will be noted in the illustration we present herewith, a farmer can erect a neat and

strong hay rack without the necessity of boring holes through its main framework, making a stronger and lighter rack than would be possible by using bolts. By using these clamp bolts, the bolt never turns and can readily be tightened when necessary. The brackets are set at such an angle as to make the rack narrow in front, which enables a much shorter turn to be made with a team. The metal bracket has flanges ⅜-inch high to receive the upper 2x4 inch flanges, extending ⅜-inch down over the 2x8-inch studs, in order to enter the 2x4 and 2x8 inch, to keep them from slipping; it forms a longer bearing surface, and adds much strength and rigidity to the frame work. They are furnished in sets complete by the manufacturers, who will name an attractive introductory price that will soon make them popular with the trade.

Pullman Lawn Sprinkler.

The Pullman Sash Balance Co., Rochester, N. Y., A. G. Sherman, agent, No. 14 Warren Street, New York, are

manufacturing the Pullman Lawn Sprinkler, which is illustrated herewith. Although somewhat similar in appearance to one previously made by this company, some modified improvements have been introduced greatly increasing the efficiency of the umbrella spray delivery, which is now claimed to cover 500 square feet under ordinary pressure. The nozzle and other parts, excepting the black enamelled sheet steel stand, are made of cast brass, finely nickeled. In addition to its use as a lawn sprinkler, by removing the upper portion and attaching the tip directly to the hose in the same way as an ordinary nozzle, it can be used for spraying bushes, shrubbery, etc. A steel pin 3-16x4 inches in size, is delivered with each sprinkler, so that one end, which is threaded, can be screwed into the brass work underneath for the purpose of sticking the spike in the ground or on terraces or other angular places, where the stand would not be level. In such cases the stand can be quickly removed, when desirable, or even used as it is.

The "Maserir-Losch" Absorbent Graining Paper.

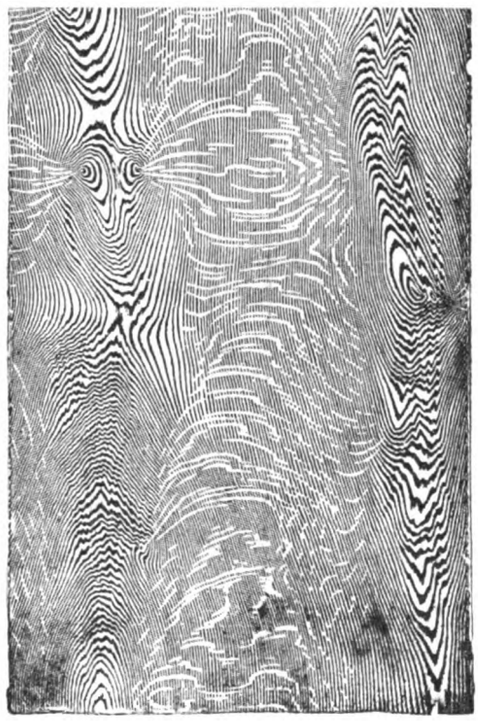
The Brainerd-Tanner Co., No. 90 Chambers Street, New York, have been made sole agents for the Maserir-Lösch,

FIG. 1.

which is an absorbent graining paper, which the agents state is meeting with a steady sale. The paper is not a transfer paper, but is of the nature of a prepared blotting paper, which is always used dry, the wood graining being always printed thereon. Fig. 1 shows the mode of application. After a coat of oil color is given to the surface which it is designed to grain, it is painted over again with a sap color or graining stain. The imprinted portion of the graining paper absorbs the sap color, while the printed parts which show the various wood grains are prevented by a chemical used in its preparation from absorbing the color. The natural grain left upon the surface can be softened if desired. The grain of every variety of hard wood used in building and cabinet work can be easily reproduced by these simple methods. A large number of grainings can be made with a single copy of the absorbent paper, each having a different appearance. The paper is put up in the usual widths of wall paper, and in rolls of

Digitized by Google

sixteen different kinds of primary grainings. Much time is saved by the use of this paper which does not require wetting. In the illustration that accompanies this article,



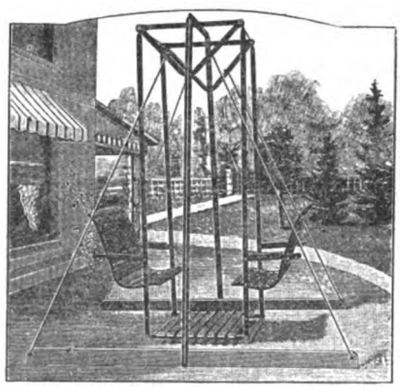


FIG. 2.

an oak grain is shown—see Fig. 2—of which six varieties can be furnished. Samples of the entire sixteen styles will be mailed upon request.

The Kingman Steel Swing.

Kingman & Co., Peoria, Ill., with branch houses at St. Louis, Kansas City, Omaha and Des Moines, are placing on the market the steel swing illustrated herewith. It is made in two sizes, for two or four persons, very graceful in appearance, and is claimed to be as strong as it is possible to make a swing under the most improved construc-

tion. It is referred to as having all the special advantages of the wooden swing also made by them, but being an improved and up-to-date article of steel construction, occupies less space, and is possessed of many additional advantages. If so ordered, awnings can be furnished for either style of swing manufactured by the above firm at a slight advance in price.

Anderson Bros., No. 394 Grove Street, Jersey City, N. J., who have for a number of years been engaged in the steam heating, plumbing and sheet metal business, have recently become incorporated as Anderson Bros. Co., with John Anderson, president; W. J. Anderson, vice-president, and Robert Anderson, secretary and treasurer.

Puerto Rico's trade with the United States in 1893 was $6,500,000; in 1897, $4,100,000. Its trade with Spain in 1893 was $8,700,000; in 1896, $12,700,000.—*Exchange.*

Advertisers' Corner.

Advertising will not work miracles. It will not make a badly managed business pay. It is not a substitute for careful buying, cash discounts, wise arrangements or effective organization. You must have the right article, purchased or manufactured to the best advantage, handled in the best way, offered at the right price, or advertising will prove a useless expense. Organize your business so as to secure for the public the best that is going for the money; buy in the best market; get your cash discounts and all other advantages and—advertise!—*Des Moines (Ia.) News.*

Fair Advertiser.—Do you classify your advertisements?

Clerk.—We do.

Fair Advertiser.—Where would you put this advertisement for a husband?

Clerk.—In the "Flats Wanted" column.—*Town Topics.*

Throw a stone into a stream, and the disturbance of the water will not cease until the concentric circles which roll on from the point of the stone's immersion be stopped by the farthest shore. Advertising stirs the tide of business as resistlessly as the stone moves the surface of the water. Even if it miss the particular object of its aim, like a poorly directed missile thrown into a stream, the advertiser's thought will run out through the great current of publicity with results as certain as the motion caused by a pebble tossed into a brook.—*Philadelphia (Pa.) Record.*

The Editor's Wife.—I'd just like to know what you wanted to buy me that measly old calico dress for?

The Editor (humbly)—Because, my dear, I thought you'd look well in print.—*Southern Printer.*

The average merchant will get angry if you tell him you don't believe there are any good reasons why people should patronize him in preference to his competitors. Thus aroused, he will pour out reasons—good reasons, too—enough to fill a book. But it rarely occurs to the average merchant to give the public those reasons in his advertising. He doesn't seem to realize that such is the best sort of advertising—the only sort of advertising that is real advertising.—*Augusta (Ga.) Herald.*

First Burglar.—Did you see de "ad" uv dat big jewelry house? I wish I could break in dere some night.

Second Burglar.—Well, if you do, you might leave some word mentionin' de name uv de paper where you saw de "ad."—*Roxbury (Mass.) Gazette.*

In this pushing, hustling age, people forget to-morrow what happened to-day. It is only by repetition, by constant hammering day after day, week after week, month after month that one may expect to keep in range of the public eye. More advertising battles are lost by "letting go" at inopportune moments for a few weeks or a few months than from any other cause. As the bull dog's grip tightens when his antagonist is uppermost, so one's advertising grip should become firmer as one sees the wave of business depression towering above.—*Keystone,* Philadelphia, Pa.

A Western farmer advertises for a woman to "wash, iron and milk two cows."

This is an advertisement from the columns of an English court journal: "Blankets! Blankets! Blankets! For domestic and charitable purposes of every description, quality, size and weight."

The following advertisement is from an Australian paper: "Wanted, a young woman (the plainer the better) to help a small genteel family in their domestic matters; one without ringlets preferred."

Digitized by Google

NAIL MANUFG. IN ESSEX COUNTY, MASS.

For more than a century and a half after the settlement of Essex County, all nails were made by hand. Large quantities were used, and a great deal of manual labor was expended in their manufacture. They were usually forged from strips of iron of good quality called nailrod, being bars rolled at the mills into a size suitable for the purpose. Nailrod was flat, about three-eighths of an inch wide and three-sixteenths thick, and remains of that size at the present day.

The making of nails has always been the first accomplishment of blacksmiths' apprentices, who probably made the larger part of the hand-wrought nails used in this country.

The appliances for hand manufacture were simple and few. A small forge, a small anvil, having a chisel set in it, a hammer and a "bolster," comprised the outfit, with the exception of a pair of tongs with which to handle the nailrod when the bar became short. The "bolster" was a piece of steel, ordinarily about ten inches in length, one and a quarter inches wide, and half an inch thick. If only one size of nails was to be made by it there was a hole of the size of the wire of the nail to be made in one end of it.

If two sizes were to be wrought with it, there was a different sized hole in the other end.

The operation was simple, and quickly done by a dexterous hand. The rod was first heated, which in a hot forge fire was done in a moment or two, but generally two rods were heating at a time, that no time might be lost by waiting for a heat. When heated, the end of the rod was rounded to the size desired by being pounded with the hammer on the anvil, then pointed or flattened. A little uneven mass, slightly rounded, was left for the head, and on the chisel, by a stroke of the hammer, the section was nearly severed just above the part left for the head. It was then re-heated, for being so small the rod cools quickly, and when of the right heat the end was thrust into one of the holes of the "bolster," and severed from the rod by a twist of the hand. The "bolster" was held on the anvil on the left hand by the end that was not in use, and with the hammer in the right hand the nailmaker drove it to its head, which was quickly formed by a few skilful blows. The heads were generally oval, round and from one-half to three-fourths of an inch in diameter. Sometimes, for special uses, the head was made long and narrow, and then it was called a "T" head.

Brads and other kinds of small nails as well as spikes were made in the same way. Horse shoe nails required the best Swedish iron and the most skilful workmanship, as tough and hard hoofs were liable to break or split them, and thus injure the foot.

In the early days, large quantities of nails were imported from England, Birmingham and its vicinity being the place of their manufacture. They were made there much cheaper than they could be here. But after the trouble with the mother country began, in 1767, "sheathing and deck nails" were included in the non-importation agreement of the American merchants; and in January, 1774, the Provincial Congress recommended, among other things, the manufacture of nails.

The Revolution caused a great scarcity of nails, and when the war was over their manufacture received a great impulse. Many of the farmers set up little forges in their kitchens, and in the long winter evenings and cold stormy days made nails, the children rendering assistance. So many of the people did this that large quantities of nails were thus produced. The nailrod was furnished to them by merchants, to whom the nails were duly returned, compensation being made for the work and cost of manufacture.

The demand was so great and the hand method of manufacture so expensive and slow that American inventors turned their attention to devising some mechanical contrivance that would perform the work. The old world kept on in its old fashioned methods, and allowed America to produce the first nails made by machinery.

Jeremiah Wilkinson, of Cumberland, R. I., a manufacturer of hand cards for carding cotton and wool, about 1775 adopted the plan of cutting the tacks he used from a sheet of iron with a pair of shears, and afterward heading them in a vise. He subsequently cut nails in a similar way, and is said to have been the first to make nails and tacks in that manner.

It is claimed that Ezekiel Reed, a native of Bridgewater, about 1786 invented a machine for cutting cold tacks and nails, which was adopted at Abington.

The first machine to make complete nails was invented by an Essex County young man in 1790. This was Jacob Perkins, son of Matthew and Jane (Noyes) Perkins, of Newburyport, where he was born July 9, 1766. He was sent to the district school at the usual age, and continued to receive instruction there until he was twelve. His father being poor, he was then apprenticeed to a goldsmith in Newburyport named Davis, having indicated a fondness for the mechanic arts, which probably germinated by hearing a watch tick, and in the execution of a purpose to know why and how it ticked. The business of the goldsmith was the making of gold beads, which were then commonly worn by girls and women. Mr. Davis died three years later, and Mr. Perkins, then only fifteen, continued the business, adding the manufacture of the then popular shoe buckles. He was industrious and honest, and soon secured an excellent reputation. He also made the Portugese joes which were then in circulation. He discovered a new method of plating shoe buckles, and was by the new process enabled to undersell all competitors. Before he was of age he turned his attention to machinery.* When twenty-one, he was employed by the master of the Massachusetts mint to make a suitable die for striking copper coins, and the result of his genius was the die which formed the old cent bearing the engraving of the eagle and the Indian.

At the age of twenty-four, in 1790, he invented machines for cutting and heading nails—machines which, with subsequent improvements, increased the daily product of one man's labor from one thousand nails to one thousand pounds. It is said that he produced this machine at Byfield, where he made the first cut nails in America, in the barn of Leonard Adams.

At Amesbury, there were iron works, and Mr. Perkins went there and perfected his nail machine, a patent being granted him therefor January 16, 1795. The heading machine would head six thousand brads an hour, and the slitting machine would cut several times as many, very little personal supervision being needed. The carpenters approved of the nails, and they came into immediate use.

SIDNEY PERLEY.

* The building occupied by Jacob Perkins as a laboratory and workshop in Newburyport is still standing in the rear of a dwelling house on the upper side of Fruit Street. It is of brick, and three-storied, narrow in proportion to its height, and sadly out of repair. I think the lower part is used for storage.

The Ideal Salesman.

At the recent convention of the National Stove Manufacturers' Association, at Cincinnati, a paper was read by E. C. Hanrahan, on "The Ideal Stove Salesman," some points of which are worthy of repetition, and will apply with equal force to almost any branch of business connected with the selling of Hardware.

"The selling of stoves," claims Mr. Hanrahan, "is an art, with features peculiar to itself. Nails, wire, oils and a great many staples are sold with price as the exclusive governing factor. Stoves, however, have an individuality, and questions of reputation and meritorious features, either of structural or ornamental character, are potent agents in their sale.

"It is necessary, therefore, that to sell stoves, the salesman must be possessed of the qualities which enable him to command the attention, respect and confidence of the merchant whom he wishes to interest, and having placed his goods he must deport himself in such a manner that he will retain the good will and confidence of his customers. To this end he should never make a statement which cannot be borne out by facts, and should be careful in all his transactions to have everything so clear that a misunderstanding cannot possibly occur.

"The ideal stove salesman will have a thorough knowledge of his own goods and be familiar with the goods which he meets in competition, that he may be able to make necessary explanations in presenting his stoves; at the same time he will never refer to a competitor's goods unless obliged to do so and will then do so in a fair and considerate manner. Under no circumstances will he speak of a competitor's goods disparagingly, particularly if his customer has made a purchase of such stoves, as to do so would be to insult the intelligence of the customer."

Commercial Opportunities.

Drawing a line at the Isthmus we find that Mexico and the republics of Central America buy from us just about the same amount as all of the great continent of South America. Mexico, our largest Latin-American customer, buys nearly $25,000,000 worth of merchandise from us annually. This is one half of all the foreign goods that go into Mexico. This is not only the largest item, but the largest proportionate amount in our Latin-American trade.

Brazil is our next best customer, with annual purchases amounting approximately to $15,000,000, but this is only one-tenth of the imports into that country. The $235,000,000 of yearly trade in Brazil which we do not enjoy at present is certainly something of an object toward which our efforts might properly be directed.

Our commercial opportunities in the Argentine may be reckoned at about $90,000,000 annually, as that is the value of imports from countries other than our own. What we send there amounts to only $6,000,000 or $7,000,000 annually.

Even the small republic of Uruguay imports about $25,000,000 worth each year, but less than $2,000,000 of this amount represents our share of the trade.

We might analyze the entire commerce of South and Central America and in every case the result would be the same, varying only in the extent of the deficiency in our share of the trade. It should not require extended argument to show that it is well worth vigorous effort to secure control of a larger portion of the commerce of Latin-American republics than we now have.—*American Trade.*

Arecibo, a town of 6000 or 7000, in Puerto Rico, is on the north coast, fifty miles distant from San Juan. Though the harbor is poor, the place is important, and has a tributary district of 30,000 people.—*Exchange.*

New Nut and Bolt Combine.

Augustus B. Stoughton, of Philadelphia, gave notice that he would make application to Gov. Stone, August 17, for a charter for the proposed new American Iron & Steel Mfg. Co., which will result in the consolidation of a number of the nut and bolt interests in and about Reading, Pa., altogether employing 4000 hands, with a capital of $30,000,000.

The incorporators are William J. Jackson, Clayton E. Platt, Frederick Maurer, Walter Woolcott and Edward Daly, all of Philadelphia. The charter does not name all the persons who will be in the new concern, and the capital proposed is not stated, a purely nominal sum being named as the capitalization. It is understood that the following industrial plants of Eastern Pennsylvania have already been agreed upon to form the combine referred to, namely: The bolt and nut works of J. H. Sternbergh & Son, Reading; the Lebanon Iron Co., comprising the rolling mill plant in Lebanon and the National Bolt, Nut & Rivet Works, of Reading; the Pennsylvania Bolt & Nut Works, of Lebanon, and the East Lebanon Iron Co., of Lebanon. Mr. Sternbergh's plant was established in 1865, and now gives employment to over 1200 men in the manufacture of bolts, nuts, rivets, merchant bar iron, etc. The Pennsylvania Bolt & Nut Co.'s plant was organized in 1881 for the manufacture of the same line of goods and now employs over 1700 men. The National Bolt, Nut & Rivet Works was organized in 1890 for the manufacture of bolts, nuts and rivets and now employs about 300 men. The Lebanon Iron Co. and the East Lebanon Iron Co. were organized for the manufacture of merchant bar iron and now employ each about 300 men.

The National Steel Co. recently acquired the well known Chapin and Winthrop mines and the steel fleets of the Mutual Transportation Co. and the Menominee Transit Co.

All these properties are familiarly known in the trade as allied to the Hanna interests, and L. C. Hanna, who is the active head of M. A. Hanna & Co., represented in the negotiations the various owners of both mining and vessel properties. On the part of the National Steel Co. the deal was conducted by President W. E. Reis.

The National Steel Co. has also acquired all the stock of the following companies: Chapin Mining Co., holding a 10-year lease, dating from 1894, of the famous Chapin mine of Iron Mountain, Mich., Menominee range; Winthrop Iron Co., owning the fee of the Winthrop mine in the Ishpeming, Mich. district., Marquette range; the Mutual Transportation Co., of Cleveland, owning four steel steamers, also an interest in the P. Y. & A. docks at Ashtabula; the Menominee Transit Co. of Cleveland, owning five steel steamers. These vessels have an aggregate capacity of 1,000,000 gross tons of ore per annum. The amount of money involved in the deal is said to approximate $6,000,000.

Sawdust and shavings are not the industrial outcasts usually believed. They have been turned to account in making a finely powdered vegetable charcoal, excellent as a filtrating medium. Sawdust is now mixed with mortar in the place of hair. In sawmills, by a series of automatic fans and flues, the sawdust is carried to another building and fed to the engine as fuel. Sawdust is converted into oxalic acid—this method of making the chemical having by its cheapness and rapidity displaced every other method. The sawdust of hard woods, such as rosewood, ebony, etc., is, by a French invention, reduced to a powder and mixed with blood into a paste, some other materials are added, and it is pressed into moulds, where it receives beautiful medallion impressions.—*Ex.*

The total imports of Puerto Rico for 1895 were $16,100,000; exports, $14,600,000.—*Exchange.*

SMALL ARMS OF THE MIDDLE AGES.

It is our intention, says a writer recently in the *Ironmonger's Chronicle*, to devote as much as possible of the space at our disposal to the description of the small arms used during the present century, and to point out the rapid development of the gunsmith's art during the last few decades. Our account of the gun and pistol would, however, be incomplete if we did not mention some of the earliest known forms of small arms and armor.

The weapons used previous to the discovery of gunpowder were fashioned with the purpose of being used in hand-to-hand fight, or with the object of throwing with force a projectile which was in itself made on a similar pattern. In this way the famous British archers used arrows which were but a miniature form of javelin or spear. In the time of Alfred the Great the followers of the "men-at-arms" were armed with little besides slings, bows and arrows, and spears; but the former were clad in mail and mounted on powerful war-houses, and armed with strong, heavy swords. It was such as these that met the Norman William on the field of Hastings. Accustomed to wield long swords and to balance heavy lances at close quarters, it will be readily surmised that even more important than a development of offensive weapons was a strengthening of the arms of defense. The shirt of mail, headpiece, shield, etc., tested the skill of the armorer, and as time went on our ancestors seem to have increased the weight of their armor, and taxed their energies to carry arms of heavier weight. In these days we can hardly realize that it was possible for even these sturdy men to bear the strain of fighting under such conditions. It is said that the change of form and style in armor and trappings but followed the altered fashions in the ordinary dress of the period.

In the thirteenth century many changes had crept in; the armor was more complete, covering every exposed part of the body, the jointing being ingeniously covered. Gloves made of strong leather and plated over with metal were introduced. In the time of Richard I. the cylindrical, flat-topped helmet took the place of the small, tight-fitting headpiece hitherto worn, and the Crusaders used two broad bands of iron across their face, concealing their features. Dreadfully inconvenient these must have been. In the fourteenth century further defensive armor was added, strips of metal and loose pieces strapped across every joint and vulnerable part were devised, and plates strengthened, and even the large shields were still further increased.

In contact with the light-armed, rapid moving bodies of Saracen horsemen, English knights found the disadvantages of being too heavily weighted. The fifteenth century saw many changes in warfare. Early mediæval armor had reached its limit, and light arms, and lighter, although perhaps more perfectly formed armor, took its place; the heavy helmet passed away and the bastinet was substituted, and the heavy sword became a rapier.

Of the transition periods we cannot touch, nor yet of the armor worn during the civil wars in this country. The arms of the footman and retainer consisted for several centuries of longbow, and later of crossbow, worked by complicated machinery. All these interesting topics we must leave and pass on to the discovery of gunpowder, and the use of artillery out of which small arms sprang.

Catapults and battering rams were among the earlier forms of artillery. We need not trouble about the various claimants for the honor of discovering gunpowder. The Chinese made explosives which they sent off in crackers, and the discovery of the force thus created would by easy stages be followed by placing it with a projectile into a tube, and we find our own countrymen using this new method of warfare in the fourteenth century. Cannon made of hammered iron, and strengthened by rings, were afterwards made larger, but owing to their defective construction, frequently burst, not offering sufficient resistance to the discharge. Guns now overcome the recoil by yielding to it. It was an important innovation when cannon were made of bronze and cast. Gunpowder was next improved, and artillery made in smaller pieces, and more readily and safely handled. In the middle of the sixteenth century the mortar was invented, and about this time German peasants first began to use small shot in artillery or guns of portable size. Previous to this a kind of portable culverin had been used by the Swiss army. The arquebus, invented in Spain in 1540, had a long barrel, and a complex piece of machinery for firing the priming pan. The wheel lock followed, and a short time after a short arquebus, called a petronel, became the forerunner of the pistol. In 1630 a Spaniard invented the guncock, which held a flint; to this was attached a trigger, by which the flint struck the blow, causing sparks to flash into the open pan. Double-barrelled guns followed, and percussion caps rapidly caused the flint-lock to sink into the background. The idea of loading at the breech, although not a new one, led to the discovery of the pinfire cartridge. Many of our readers remember the introduction of the central fire system into this country in 1861. This method possesses many advantages. There is a greater certainty of ignition, a more speedy loading, and a comparative freedom from accidental discharge. The rebounding lock was another gain, but hammerless guns have since superseded even that improvement.

The breech-loader of to-day has attained a high state of perfection, alike in its appearance, its killing powers, and in beautiful finish. The guns and weapons we have already mentioned were used for purposes of sport as well as warfare, but modern skill and science have caused the manufacture of guns during the past half century to be divided into two sections, the rifles and guns required for military purposes being quite different from those used by sportsmen.

Pistols are but little required in modern warfare, and are an obsolete possession of the civilian. It is true revolvers, many of beautiful workmanship, are sold for protective purposes, and pistols to be used more as toys are sold. The small arms which will in the way of business interest our readers most, are those used by their sporting customers, and we will close this article by a few descriptive remarks on the modern methods of manufacture of such guns.

Old horse shoes and scrap-iron were once the material used in the manufacture of barrels; now bars of steel and superior gun-iron are placed in bundles bound together. After heating to a welding heat they pass under a tilt hammer, the bar thus made passing through rolls, after which it is cut up, the same process to be again repeated. The well-known Damascus twist is obtained by two or three welded bars being twisted at a red heat in a machine with cogs and winch; these are afterwards welded into barrels. Barrels made in England must be tested at the London or Birmingham proof houses, and the stamp placed upon

Digitized by Google

them; but, after all, the best guarantee of safety is the name of a good and reliable maker.

A good, well-made, and well-balanced stock is a desideratum, but the construction of a lock is of more importance. If the mechanism fails, the gun is useless. Every good maker has some minor differences of construction, but nothing but the most perfect and easy working should be accepted in the lock. We have already referred to the various actions and different hammers, and to the hammerless guns; they have all doubtless their good points, but a tradesman in making his selection must follow the favorite of the moment, and consult his customers' fancies. There may be room for gunsmiths in certain localities, but we hold that the ironmonger and Hardware dealer of to-day is the legitimate vendor of firearms, just as much as his early prototype was the maker and seller of arms and armor in the Middle Ages.

REVIEW OF THE MARKETS.

Hardware: Changes in current quotations continue to form the feature of the prevailing markets, the advance announced by the leading makers of builders' Hardware being the most far-reaching and important. By the time the preparations are being made for the opening of the season for 1900 trade, there will be but few lines but what will be under the prosperous influences of advanced prices. Differing from any other similar period when advancing quotations were necessary, there exists more substantial reasons for such a state of affairs to-day, when prices are higher in other countries beside our own, and even our own goods, high priced as they are, become the favorites in foreign markets.

Wire Nails: At the present no changes in current quotatisns on wire nails are anticipated at any early day, the market being held at the advanced rate named in our previous issue, which is still maintained. We quote present prices as follows, f. o. b. Pttsburg, 30 days, net:

To jobbers in carload lots	$2.50
" in less than carload lots	2.52½
To retailers in carload lots	2.65
" in less than carload lots	2.75

Terms: 30 days from date of invoice, net cash, f. o. b. Pittsburg.

New York prices are represented by the following:

To retailers, carloads on dock	$2.80
" less than carloads on dock	2.95
Small lots from store	3 05

Cut Nails: The advance of 5 cents a keg, which occurred about the date of going to press with our previous issue, is still being held as representing the market, which we quote as follows, f. o. b. Pittsburg, freight being added to make a net price delivered at destination:

To jobbers in carload lots	$2.15
To " in less than carload lots	2.20
To retailers in carload lots	2 25
To " in less than carload lots	2.40

New York business is fairly active under the advanced prices, named as follows:

Carload lots on dock	$2.30
Small lots from store	$2.55

Barb Wire: The market for barb wire is at present extremely dull. Prices noted in our previous issue still hold the market and are well sustained. We quote as follows, f. o. b. Pittsburg, net cash, 30 days:

To jobbers in carload lots, Painted	$2.60
" " Galvanized	3.10
" in less than carload lots, Painted	2.62½
" " " " Galvanized	3.12½
To retailers in carload lots, Painted	2 75
" " Galvanized	3.25
" in less than carload lots, Painted	2 85
" " " " Galvanized	3.35

Smooth Wire: Smooth wire prices, in common with the other wire products remain the same, as follows, f. o. b. Pittsburg, 30 days net:

To jobbers in carload lots	$2.35
To " in less than carload lots	2.37½
To retailers in carload lots	2 50
To " in less than carload lots	2.60

The charge for galvanizing is 50 cents on sizes from 6 to 14 inclusive; on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Boring Machines: Snell Mfg. Co., Fiskdale, Mass., announce the following revised prices on boring machines:

Angular Boring Machines, each	$2.90
Upright " " "	2.60

Pruning Shears: Seymour Smith & Son, J. H. Graham & Co., No. 113 Chambers street, N. Y., selling agents, quote the following net prices on pruning shears of their make:

No. 1.	2.	14.	21.	23.	Levin's Patent.
$2.00	1.90	3 00	3.25	3.75	
				No. 0,	00.
Concord Pruning Shears				$1.75	1.95

Mouse and Rat Traps: Edward S. Hotchkiss, J. H. Graham & Co., No. 113 Chambers Street, N. Y., selling agents, announce the following changes in prices of mouse and rat traps.

Wood mouse traps are advanced one cent a hole.

Sure Death Mouse Traps, per gross	$3.25
" " Rat Traps, " "	10.00
Dead Easy Mouse Trops " "	3.75
" " Rat Traps " "	12.00

Builders' Hardware: The associated lock manufacturers, embracing all the leading makers of builders' Hardware, under date of July 28, have agreed upon the advanced prices noted in the circular given below, which sufficiently explains their importance to the trade.

July 28, 1899.

Gentlemen:—We hereby advise you that we have this day advanced our prices twenty per cent. (20%) above the prices given in our Discount Sheet No. 7, of July 15, 1899. The advance in labor and the further increase in the cost of metals and other materials used in the manufacture of our Hardware necessitates this further advance in our selling prices.

This advance includes all door locks and trimmings, and covers the entire line of Hardware manufactured by us, as shown on pages 1 to 817 of our catalogue of 1894, excepting the following:

Pages 320 to 323	Iron butts.	Page 597	Cup hooks, No 81.
328 to 329	" "	598	Screw hooks, No.
330AA	Steel "		418.
343	Parliament butts.	600 to 602	All goods.
344A	Parliament butts and flap h'nges	604A to 604E	Bright wire goods
346A	Shutter hinges.	615 to 618	All goods.
348A	Wrought butts.	619, 620	" "
350B, 350C	Refrigerator hinges & fasteners	644, 644A	Window springs and bolts.
352 to 357½	Spring hinges.	665 to 668	Axle pulleys.
358 to 359	Door springs.	686, 686B New	Brackets.
360 New to 362	Eclipse checks & springs.	692 to 724	All goods.
362	No slam check.	726 to 734	" "
364 New	Strap & T hinges.	749	Meat cutters.
366, 367	All hinges.	754 to 756	Balances & scale beams.
369	Blind hinges.	771 to 773	Screw drivers.
382	Wr't shutter bolts	774 to 777	Planes.
384, 385	" barred bolts.	778 New, 779 New	Steel squares.
390	" spring bolts.	780, 781	All goods.
391	" neck bolts.	784	Clamps.
392	" square bolts.	787	Bench screws.
566A New, 567 New	Wire coat and hat hooks.	788 to 790	Vices.
		796 to 806	Casters.

Yours truly,
SARGENT & CO.

Shears: The National Shear Co., Newark. N. J., announce the following discounts on their line of shears stamped "Clauss."

Razors,	list, net
Scissors	60%
Shears, Nickel	60%
" Japan	70%
" Pruning, Japan	70%
" Rubber, Nickel	60%
" Tailors'	40%
" Tinners'	40%
Snips, " Solid Steel	40%
" Dental, Japan	70%
Pruners, Buckeye	33⅓%

Coes Wrenches: The current quotations on these leading goods have been advanced, and the following discounts are now quoted by the manufacturers, Coes Wrench Co., Worcester, Mass.:

Coes Genuine Wrenches	33⅓&10&5&5
Mechanics' "	33⅓&10&10&5&5

Sash Locks: W. & E. T. Fitch Co. have advanced the prices on Fitch Sash Locks, which are now quoted as follows:

Iron	70%
Bronze and Brass	66⅔%

discount from list prices.

Dumb Waiters, Elevators, etc: The Sedgwick Machine Works, Poughkeepsie, N. Y., advise us that having reference to their new catalogue just published, their regular discount to the trade is 20 per cent. on all the lists contained in the catalogue.

Digitized by Google

Nuts: The market on these goods continues to stiffen in harmony with the advance on raw material, and the following prices now represent the market:

Hot Pressed, Square	Off list	5	cents.
" " Hexagon	"	5.40	"
Cold Punched, Square, Plain	"	4 80	"
" " Hexagon	"	4 80	"
" " Square, C. T. & R	"	4.60	"
" " Hexagon, C. T. & R	"	5.10	"

Carriage Bolts, Machine Bolts, Etc.: At a recent meeting of the associated manufacturers the following prices on carriage bolts, etc., were agreed upon:

Common Carriage Bolts	Discount per cent.			50 & 10
Machine Bolts	"	"	"	60
Bolt Ends	"	"	"	60
Coach Screws Gimlet Point	"	"	"	70
Lag Screws, Cone	"	"	"	70 & 5

Full freight allowed. No freight allowed on any shipment under 300 lbs. Terms, 60 days or 2% cash 10 days.

Quotations on picks and mattocks apply to new list adopted February 23, 1899.

Linseed Oil. Dean Linseed Oil Co. quote as follows:

In lots of less than 5 barrels ..... 40 cents per gallon.
In lots of 5 barrel or more ..... 39 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.

Calcutta Oil, 58 cents per gallon.

THE PHILADELPHIA TRADE.

Three months ago the wise ones in the trade were shaking their heads and saying "advances are coming too fast, they cannot last; and by the middle of July the inevitable reaction will appear." July, however, has come and gone, and, instead of any reaction in prices, the situation is undeniably stronger and growing stronger every day.

Goods are still advancing, and the recent advance of twenty per cent on the entire line of building Hardware is one of the most radical advances the Hardware trade has seen for many years. It carries the minds of the old stagers back to Anti-Bellum times, when, instead of selling goods at a discount, they were sold at an addition from ten to twenty per cent. to the list.

Conservative manufacturers who have held back are now being forced into making advances, and it is hard to pick out an item of any consequence in the Hardware trade which has not seen higher prices.

Already there are rumors we will see still higher prices

Digitized by Google

in the year 1900, and there is certainly much to be said to justify such a belief.

It is a favorable occupation with some to compare the boom of 1879 with that of this year, but, in these times, the conditions of bnsiness change so rapidly that the factors are hardly the same in any two periods—the marked difference in this year being the entire market is practically controlled by half-a-dozen or more huge combinations, who, apparently, have the control in their own hands, and who have too much at stake to let it slip.

Material is even now growing scarce, while the labor market is one which requires very careful handling.

It is not necessary here to enumerate the advances of the past two weeks—which will be found probably in the trade columns—but the tendency is still upward and prices are being well maintained, while the immense crops reported throughout the country seem to promise a large Fall trade, and the reports from our local customers are all encouraging and speak of a good business in hand to day.

BIDDLE HARDWARE CO.

THE BALTIMORE TRADE.

August with us is generally a very busy month, and from present prospects will this year record much larger sales than did the corresponding month of last year. It is the time when the retailers who cater to the trade of the oystermen lay in their supplies, which embrace shovels, oyster-knives, cheap table cutlery, axes, nails, stove pipe, woodsaws, galvanized goods etc. Ammunition and guns are also in demand. While these items are conspicuously noticeable owing to the volume moving, we might say that in this market and during this month nearly everything handled by the Hardware jobber is brought into requisition. To meet the demand and in consequence of recent advances, which were in a measure anticipated, we laid in an exceptionally heavy and well assorted stock, and are feeling very happy over the fact that we can ship immediately upon receipt of orders at least 90 per cent. of the items which we carry regularly. What is also gratifying is the knowledge that when an article cost you $1, and you sell it for $2, you are not losing anything, but when you really experience the sensation following such sales you just feel like calling another meeting of directors and making another advance in wire nails of 25 cents per keg.

There is, however, a company known as the American Steel and Wire Co. who attend to matters of this kind, and whose raw material has advanced wonderfully since last December. A letter received to-day from one of our customers in Newport News advises us that 12,000 people have left that city owing to the yellow fever scare, and that goods we shipped him last week are in quarantine at Norfolk, and that business there and at Hampton is practically dead.

During the afternoon of August 3d a very severe wind storm passed over this section of the country accompanied by rain and hail, and a little to the southwest of our city took the form of a cyclone, sweeping everything in its path, destroying barns, churches, dwellings, crops and persons. Tobacco and corn were destroyed to the extent of many thousands of dollars.

Collections are fair. H. WEBB & SONS.

THE COLUMBUS TRADE.

I am in the harness once more after a three weeks' vacation and with the exception of being the color of an Indian, can't see any difference. I work, eat and sleep just the same as I did before going. Our secretary intimated that I would have some fish stories to tell but he must have forgotten that I am a man of veracity and would not tell stories. When I left Columbus I had not made up my mind where I would go but finally decided to take a trip up to the Soo. I have heard so much about the locks at the Soo that I thought possibly I might strike some bargains, since the lock manufacturers have advanced prices ten per cent. twice and twenty per cent. the last time. I knew the Soo was a great place for locks; but after looking over their stock I decided they were too big for our trade and did not buy any. They weigh 154 tons apiece; two pieces to each lock, or 308 tons for a complete lock. I don't know of any town they would be suitable for unless it is Chicago and I doubt if they could handle many of them. Well they beat any locks I ever saw, and hold water in the canals to perfection. While I was there I saw quite a number of fishermen but did not fish any myself. No doubt there are plenty of fish there. I saw hundreds of shad fly. Now some of your readers may doubt this statement but nevertheless it is true. They were flying around everywhere, and fishermen used them for bait. All they had to do was to go in the Park or up to stone walls, trees or any place and pick them up; put them on their hooks and fish for shad

AT THE TRAPS
OR IN THE FIELD

Laflin & Rand Smokeless Powder will give a better pattern with the same velocity than any other powder made. Further than this you can always depend on its being just the same; hot or cold, wet or dry and in any climate. We guarantee this and invite tests. If you shoot a revolver or rifle you will be interested in our latest output, SPORTING RIFLE SMOKELESS. Write for information.

and herring. They catch a blamed sight more on land than in the water. I saw a Cincinnati gentleman and he went fishing every day while I was there. He had two Indian boatmen at an expense of $5 a day, but I never saw him bring any fish home. He always explained that the wind was from the wrong direction;—too cold or some other plausible reason for the fish not biting. I know how it is myself. If you catch fish the weather is favorable even if it comes in chunks. If you don't catch any you must blame something and as it does not hurt the wind much you might as well lay the blame on the wind as anything; and it soon blows over, you know. When I left Cleveland it was summer but when we got to the Soo we needed overcoats, flannel underwear and fires. When you breathed you could see your breath the same as in winter. I hadn't been drinking, either, (my wife was with me). I could not help feeling bad to see so much water going to waste when we could use it to such good advantage here in Columbus. It is too bad, but I don't see how I can help it. I had heard about shooting the rapids at the Soo and thought of taking my Winchester with me and have a little sport, but when I got there I found they shot them with boats, so I was glad I did not bother taking my gun along. It costs fifty cents a shot and the Indians furnish the boat and do the shooting. All you need is a gum coat to keep the water off you. If any of your readers think of going to the Soo they won't need a gun to shoot the rapids. I enjoyed the trip, got home safely and had just $2.25 left. I found on my return that there had been numerous advances on Hardware, and it looks as though the top notch has not yet been reached on a great many articles. It would be a satisfaction to know for a certainty how much of a famine exists in iron. One report says there is no iron in sight and other reports are just the opposite. One thing is certain and that is that it is too high. One year ago a farmer could buy a keg of 8 penny nails with two bushels of wheat; now it takes five bushels to buy a keg. This has a tendency to make the farmer feel as though he was getting the worst of it, and he is. His turn may come later. If Chicago brokers would only get up another boom in wheat, such as they did last year, farmers would not kick about the price of nails and wire. Business is remarkably brisk for this season of the year and it looks very much as though there would not be any dull season in 1899.

THE SMITH BROS. HARDWARE CO.

THE DAVENPORT TRADE.

The novelty of rapid changes in prices seems to be subsiding. Announcements of the withdrawal of prices, or advances of ten to twenty-five per cent. have become so commonplace that they produce very little sensation. The new conditions are accepted with very little murmuring. The reasons assigned for the changes are the formation of some sort of combination or an advance in material controlled by pools or trusts. The change in the attitude of the manufacturers towards the buyer "before and after" joining a pool is so radical that it is really amusing. Oh! well, every dog has his day. The buyer has had the advantage for, lo these many years, and the seller is now having it his own way, but the buyer who bought before the pools were formed, and is fortunate enough not to be caught with a large stock on hand when they dissolve has little to fret about.

Orders are many, but quantities are small, showing that the people are only buying to cover present needs, but in the aggregate the amount of sales is about normal. Collections are better than usual this season of the year, and a larger proportion of the trade are taking the advantage of cash discounts. SICKELS, PRESTON & NUTTING CO.

THE CLEVELAND TRADE.

July will show a gain in volume of trade over last year equal to any previous month of the year, notwithstanding the supposition of overpurchasing on account of advancing prices. Every indication promises large trade for the last half of the year. Stocks remaining on hand January 1st will be invoiced at a much higher price than the same goods were in 1899, greatly increasing the total value of merchandise in the country and requiring increased capital to do business. There is a strong tendency to shorten time of credit and abandon discounts for cash, so it seems probable that thirty days will be substituted for sixty in the Hardware trade for 1900.

Money is so plenty that business can be done on a cash basis, which would make losses much less and relieve manufacturers and jobbers from furnishing capital for their customers to do business with, which is the legitimate business of the banks.

Changes in the methods of doing business are rapid, and those who are encumbered by habits and unwilling to change will be left in the race. Electricity is not confined to street cars, it is in the air and eight hours out of twenty-four will accomplish as much work as fourteen would ten years ago. Old fogies will grumble, but they must get out of the way. It will require vigilance and alertness to avoid collisions and smash-ups, and cool heads to bear the increased nervous strain. The law of the survival of the fittest, and the devil take the hindmost, was never more manifest. Throwing stones, and making faces will not stop the train; we must either take it or take to the woods. The writer chooses the latter for a brief season and asks *Hardware* for a vacation. THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURG TRADE.

If there are still doubters as to the permanency of the present revival of business they must be very hard to convince. Everybody and everything connected with the iron and steel business are pushed to their utmost with orders for goods wanted quick. While there was some buying for investment by jobbers, the increased demand upon these stocks has drawn upon them until little surplus remains, and goods are wanted for immediate consumption.

The change within the past year has been little short of marvelous. The whole world seemed to wake up to the fact that they were hungry for iron and manufacturers cannot keep pace with the demand.

There need be no idle men about Pittsburg, at present, contractors and manufacturers are seeking them and paying good wages.

During travelers' vacation, mail orders have kept our clerks quite busy and now that the travelers are again taking the road we expect a rush of business for August.

As a rule the new prices are asked and paid without complaint by retailers, who in turn find it easier to sell now than when goods were at the extreme low point.

In a word Prosperity has the rule in this city at the present and our cry is "long may she reign."

THE VICKSBURG TRADE.

Vicksburg and vicinity just at the present time are enjoying very lively times. There is about one million dollars of Government work going on. The canal which the Government is digging is second in interest, from a scientific point to the Hennepin Canal. The object in view here is to give Vicksburg a permanent water front which it enjoyed for years, but partially lost after the cut off of 1874. If the canal is a success, Vicksburg, formerly on the Mississippi River, will be on the Yazoo River.—The National Park is assured and will be as famous, from a scenic view, as it is in historic lore. Perfecting this Park will require hundreds of thousands of dollars. The new electric railroad has given an impetus to the town, which it never had before. The new opera house is up-to-date in every respect. The town is rapidly forging ahead. Crops in this vicinity are excellent, people happy, and merchants start the last half of 1899, encouraged. LEE RICHARDSON & CO.

THE ST. PAUL TRADE.

The conditions in this section of the country remain about the same. The weather continues favorable, and from present indications, our fall trade will be heavier than it has been for many years past.

Prices on all goods have advanced materially, and are still advancing so rapidly that it is difficult for us to keep in touch with the manufacturer, but this condition does not in the least affect the sale of goods; in fact, with us, and we believe ths same can be said of all other jobbing concerns, it is more difficult for us to secure goods at the present time than it is to dispose of them.

The retail man, also, seems to realize the condition of affairs if we can judge from the number of orders we are receiving from day to day for fall delivery.

Taking everything into consideration, the prospects for this fall's business for both the jobber and the retailer are exceedingly promising.

C. W. HACKETT HARDWARE CO.

THE MINNEAPOLIS TRADE.

While business is somewhat more quiet of late, still there is but little difference in our sales, trade being quite good in spite of the hot weather. There is considerable building, thus far building permits showing up well as compared with the years previous to 1893, with indications that there will be quite as much or more during the balance of the year.

Our bank clearings are exceedingly large and show a very gratifying condition; collections excellent. Our city directory shows a large increase in population, which we have no doubt will be verified by the official count.

Crop conditions, as reported by our leading elevator owner, who has recently made a personal trip all over the lines on which his elevators are located in Minnesota and the Dakotas, as well as Nebraska and Kansas, show the most favorable conditions ever known, and unless we have an unusual hot spell we will have the banner crop, with indications of good prices.

In spite of the large stock of lumber carried over from last year and the unusual large cut so far this season, the lumbermen have already discovered a shortage, and have again advanced prices one dollar per thousand feet, with the promise of a still further advance; but there appears to be no let up in the demand.

The country tributary to these cities is in an unusually prosperous condition, and in spite of advanced prices we can see no reason why we should not have an excellent business for the balance of the year, at least.

W. K. MORISON & CO.

THE SAGINAW TRADE.

There have been a great many changes in the way of doing business in Saginaw since you, Mr. Editor, were here over thirty years ago. Our store is now practically 50 miles wide and 100 miles long, for the reason we get telephone orders every day, all the way from five to one hundred miles from here. We have a telephone exchange in our store, which enables us to handle the business successfully. The old ways of doing business, of thirty years ago, would not do in this age.

Although goods are high, they are not as high as they were in 1872. In looking over our inventory of that year, I find inventoried Mann's common axes at $10.70 per doz., and Blodgett's at the same price; 1-inch round iron at 3⅝ cents per pound, and ⅝-inch at 3⅞ cents; 8d nails at $4.50, and other goods in proportion.

The crops in this part of the country are all good but the wheat. Wheat has been harvested, but will be a short crop. Oats are doing well, and bid fair to be one of the largest crops ever raised. Corn and potatoes are also do-

ing well. We have had plenty of rain this summer, and fall feed will be good, and the farmers are feeling encouraged. The sugar beet crop looks promising, and there will be enough raised to supply the five sugar beet factories in this section of the State.

Lumber has advanced materially, and the yards here have all the orders they can handle.

Salt is very low, selling in large lots at 48 cents per barrel, barrel included.

Our coal mines are working, and most of the product is used in this State. MORLEY BROTHERS.

THE TRADE "ON THE ROAD."

Having been absent from the City of New York for the past six months, visiting the Hardware trade of the Middle and Western States, it is a pleasure for me to announce that during all my sojourn on the road in the past seventeen years, calling on the trade in this and other territory, I never experienced a pleasanter or more successful trip; never met the trade in better spirits, and never found them quite so ready and anxious to purchase. Notwithstanding the multiplicity of advances in close succession, nearly every one seemed ready to place their orders; expecting to pay the advance, apprehending further advances which have been in most instances realized. Merchants who have the past eight years been striving with untiring zeal and closest economy to show a balance on the correct side of the ledger, now find they have new courage, brighter hopes, and a more cordial shake of the hand to the traveling representative.

The crops throughout the country seem very promising, and the farmers are quite jubilant. There is every indication of the largest and most successful business in the next two years this or any other country have ever experienced in the annals of trade history.

Most of the factories are taxed to the utmost of their capacity to manufacture. A number having orders placed many month in advance of their ability to execute. Many foundries decline to entertain any contracts, or even name a price on castings; claiming they have more business than they can provide for up to July 1, 1900.

Many orders have been placed for the spring season of 1900 on lawn rakes, lawn mowers and other staple goods. The trade is looking forward to further advances. On the whole, confidence is restored, prosperity achieved, happiness and content prevail. Long may it continue.

GEORGE B. MAIN.

THE GRAPHITE TRADE.

July is naturally with us an off month. The salesmen take their vacations, and spend a few days at the home office talking over matters of business, and to receive instructions for fall and winter work.

This July, however, has gone through with a full head of steam on, easily breaking any previous record.

The three leaders are crucibles, graphite paint and lubricating graphite.

Paint orders have been particularly large, and notibly from concerns who have before used it in quantities for structural iron and bridge work.

Latest advices from the graphite mines show another marked advance, which has compelled us to raise the price on crucibles.

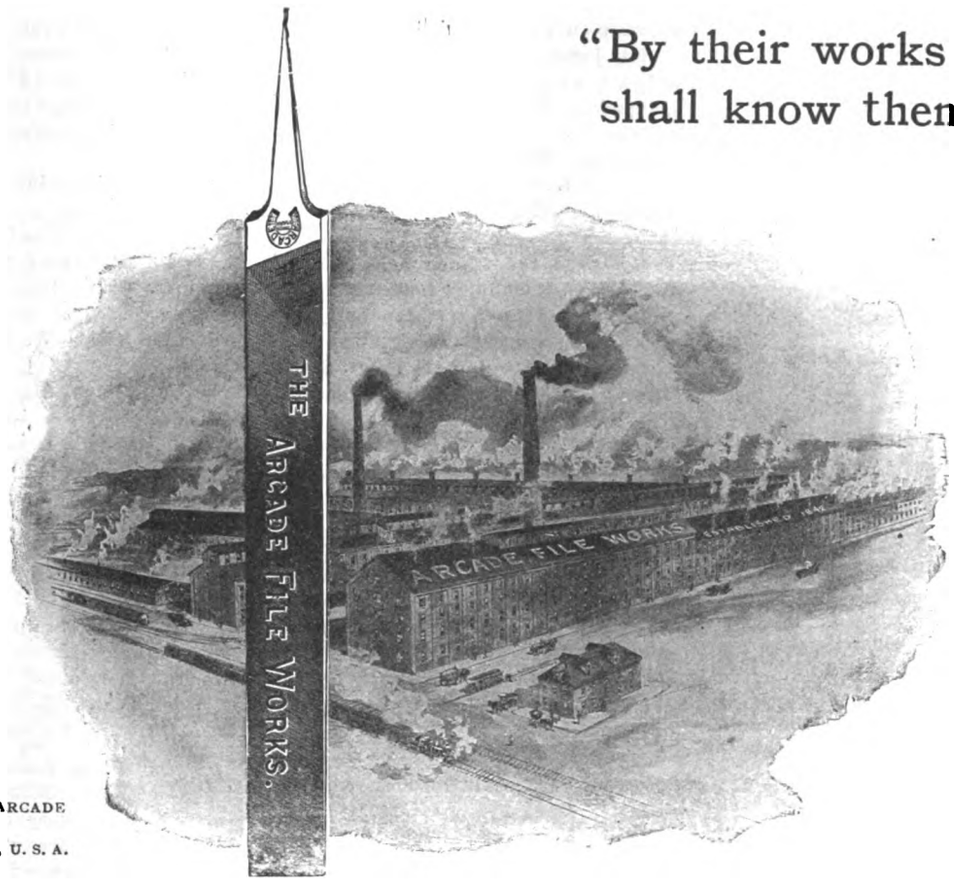
Electrotyping and brazing graphite have been marked up to forty cents per pound, and dealers have been notified of a new schedule of prices on cheap pencils, the increase being ten cents per gross, and fifteen cents per gross when sharpened. As "cheaps" have sold for years at about the cost of production, this raise is proper and just.

The outlook is for a very large and prosperous season, as the next four months are the most active of the year.

JOSEPH DIXON CRUCIBLE CO.

President Mandlebaum of the Southern Hardware Jobbers' Association has appointed F. K. Spicer, formerly of Memphis, Tenn., as the secretary of the Association. It is the intention of the President to push at once the publication of the minutes, and have all other matters pertaining to the Association promptly attended to.

Situation Wanted.



WANTED—A situation on the road by a sober young man who is honest and reliable. Have had 15 years' experience as clerk and assistant buyer in a Hardware, stove and housefurnishing store. At reference. Address SALESMAN, care HARDWARE, No. 143 Chambers Street, New York. 50

THE WORLD'S GREATEST FILE WORKS.

ESTABLISHED 1842.

"By their works ye shall know them."

PLANT OF THE ARCADE FILE WORKS AT ANDERSON, IND., U. S. A.

BACK of an Arcade File stands the most complete and modern file manufacturing establishment in the world, directed by master minds, originators of a distinctly improved product, sold entirely on its merits, the modern plant insuring best quality. Back of an Arcade File stands this guarantee, "that an Arcade File will cut faster and wear longer than any other file made," and as an "earnest" of this guarantee, the Arcade File Works will send to any responsible Hardware Jobber, Wholesaler or Retailer, one dozen Arcade Files, to become the property of the receiver or returned at our expense if the guarantee is not fully borne out in every particular.

There are new points worth knowing about Files, and the best information is condensed into a neat little pocket volume which we will send free to readers of "Hardware" while they last. Ask for "Practical Talks on File Work," and perhaps you would like to know about prices.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Bisbee, N. D.—E. W. Cairncross.

Boise, Idaho.—Articles of incorporation of the W. M. Jack Hardware Co., Ltd., have been filed. The capital stock is to be $10,000. The principal place of business will be Grangeville, and the first directors will be W. M. Jack, H. Orchard, J. M. Jack, Rudolph Bertsch and Holly Orchard.

Boise, Idaho.—W. A. Taylor.

Brooten, Minn.—The Nelson Hardware Co.

Charleston, Ill.—John Van Meter.

Chicago Heights, Ill.—W. F. Stoll.

Columbus, N. J.—G. Frank Harvey.

Enderlin, N. D.—W. F. Ginther.

Galveston, Texas.—G. M. Bryan, Jr., & Co.

Galveston, Texas.—The Clark Hardware Co.

Howard Lake, Minn.—Charles Munson.

Lindstrom, Minn.—Theodore E. Lindstrom.

Magnolia, Minn.—Sheehan Bros.

Nerstrand, Minn.—Simon & Ben Lechfeldt.

Sanford, N. C.—Sanford Hardware Co.

Seattle, Wash.—The Union Hardware Co. has been incorporated by John Campbell, James Campbell, Wilbert Campbell and Lucy Campbell with a capital stock of $25,000 in fifty shares of $500. The purpose of the company is to buy and sell Hardware, and the main office is Seattle.

Shawnee, Ohio.—The Shawnee Drug & Hardware Co.

Spokane, Wash.—The Geo. Spalding Co. has been incorporated by G. Spalding, W. H. Shields and H. Brewer, dealers in farm implements. Capital stock, $100,000.

St. Kilian, Minn.—Charles Fritz & Ludwig Von Holtum.

Tippecanoe, Ind.—Isaac Rhodes.

Whitney, Texas.—R. E. Finch, Jr.

Changes and Improvements.

Altoona, Iowa.—H. S. Mason & Son succeed John Porters.

Augusta, Ga.—Patterson & Conner succeed Charles Conner.

Bridgeport, Texas.—L. H. Bomar.

Bristow, O. T.—P. D. Stout has purchased the interest of M. Lumley in the firm of Stout & Lumley.

Brownsburg, Ind.—Shirley & Sons, dealers in Hardware and implements, have been succeeded by Shirley & Evans.

Canton, Ohio.—F. E. Piper succeeds Henry Warner.

Champaign, Ill.—Miebach Bros. succeed Henry J. Arenz in William Meibach & Co.

Colfax, Wash.—The stock of the Colfax Hardware Co. has been sold to E. R. Barroll, a local Hardware dealer, and J. M. Mahoney, a farmer living northwest of the town, and the store is closed while the stock is being invoiced. When the invoice is completed, if the sale is confirmed by the stockholders, Mr. Barroll will move his stock from the present quarters to the Colfax Hardware Co.'s building.

Davis Junction, Ill.—Rice & Lyman, Hardware, etc., dissolved.

Dimondale, Mich.—Cole & Eddy succeed Mr. Cole.

Dowagiac, Mich.—The Clark Hardware Co. succeed L. N. Smith.

Elgin, Ill.—H. B. Starr succeeds J. H. Payne.

Fort Wayne, Ind.—Koehlinger Bros. dissolve. H. G. Koehlinger continues.

Gainesville, Fla.—A. O. Steenburg withdraws from Thomas & Co.

Greenview, Ill.—James Tripp & Son, Hardware dealers, have been succeeded by Tripp Bros.

Grafton, N. D.—E. W. Cairncross will remove his stock to Bisbee.

Grand Rapids, Mich.—L. E. Adams is enclosing his Hardware building with steel siding, and will soon open for business.

Hixton, Wis.—C. A. Adams succeeds Winner.

Hubbard, Iowa.—Conrad Blom buys an interest with J. V. White.

Humboldt, Kan.—Broucher & Johnson, have succeeded J. W. Holtschmidt in the Hardware business. The new firm will shortly add a stock of furniture.

Hustburg, Tenn.—Crockett & Rogers succeed J. M. C. Young & Co.

Loomis, Neb.—W. E. Gamel succeeds D. T. Garrett.

Loveland, Col.—The Hardware store and stock of B. F. Jennings has been purchased by J. W. Vinarke, of Blanchard, Iowa, and the same will be moved to the two vacant rooms in the Opera House block.

Marlboro, Mass.—J. J. Hanley, the Hardware dealer, who opened business at No. 117 B Main Street, five years ago, and has done a profitable business since, finding his present quarters much too small for his present trade, is about to occupy the former location of G. R. Hall & Co. in the Lawrence block, a few doors west of his present quarters, where he will endeavor to still further increase business by the addition of many lines of goods which he could not keep here tofore because of a lack of room.

Macedonia, Iowa.—F. A. Lane succeeds Mr. McCready.

Nampa, Idaho.—E. L. Nettleton, Hardware, sold out.

New Haven, Conn.—The firm of Linsley & Lightbourn, Nos. 33 and 39 Broadway, has been dissolved, the business having been bought by the Lightbourn & Pond Co., a joint stock corporation organized under the laws of Connecticut, the officers being: R. C. Lightbourn, president; G. H. Pond, secretary and treasurer. F. J. Linsley has sold his entire interest to this company.

San Angelo, Tex.—J. Findlater, Jr., Hardware, has moved into the N. G. Taylor block, which has just been completed.

Owego, N. Y.—The mica department of A. P. Storrs & Co. will be removed from the floor over the company's Hardware establishment at No. 175 Front Street to the new factory on the rear of the Storrs' premises on the same street.

Paris, Ky.—Cook & Winn, Hardware, have been succeeded by Cook & Lowery.

Renville, Minn.—Prahl & Bean succeed H. Hagg & Co.

Richmond, Va.—Hankins & Mahoney dissolve partnership.

Roanoke, Va.—The Price-Arms Co. Ltd., succeed Butt, Price & Co.

Saline, Mich.—John McKinnon & Fred Jerry succeed S. H. Maher.

Sturgis, Mich.—W. T. Favorite succeeds Goff & Favorite.

Union Springs, Ala.—J. T. Robertson & Bro., dealers in Hardware, sold business.

West Mitchell, Iowa.—Grieg Bros. succeed Henry Indra.

White City, Kan.—A. Nordern & Son succeed K. L. Le Baron.

Whitehall, Wis.—Hulcatt & Hulcatt succeed C. F. Hulcatt.

Willis, Mich.—John C. Rosenworth succeeds Henry Rosenworth.

Worthington, Minn.—Burke Bros. & Sheeran are closing out.

Wylie, Texas.—L. D. McConley succeeds W. R. Scott in Hardware business.

Business Embarrassments.

Boston, Mass.—M. Masse, dealer in Hardware and crockery, has made an assignment. He has three stores.

Denison, Texas.—T. W. Dollarhide has filed a petition in bankruptcy.

Franklin, Ind.—Joseph M. Storey, a Hardware merchant of this city, has filed a petition in voluntary bankruptcy. Mr. Storey made an assignment about a year ago, and since that was disposed of, he has been the manager of a Hardware store, owned by outside capital. The amount of his unsecured indebtedness is $2063.13, with no assets.

Fires in Hardware Stores.

Flora, Ill.—Southwick & Barnum's Hardware store has been destroyed by fire.

Gallatin, Texas.—The Hardware store of M. A. Ewing & Co. has been destroyed by fire.

Manchester, N. H.—John B. Varick & Co., wholesale and retail Hardware dealers, damaged by fire.

Princess Anne, Md.—E. P. Fitzgerald's Hardware store has been destroyed by fire.

Burglaries in Hardware Stores.

Bobcaygeon, Ont.—Bottum's Hardware store, silverware.

Caro, Mich.—Lazelle Bros., revolvers.

Eden Valley, Minn.—F. C. Meier, Hardware, store burglarized and about $50 worth of cutlery carried off.

Hull, Ont.—G. J. Marston, small loss.

Newport, Ark.—Newport Builders' Hardware & Supply Co., cutlery.

Whitney's Point, N. Y.—F. E. Nowlan $150.

"Has Our Esteemed Favor."

Edward Darby & Sons, Philadelphia, Pa. [*Wire Goods*]: For the past few years we have been in HARDWARE, and we beg to remind you that it has our esteemed favor, and will recommend the same to anyone desirous of a good, useful, common-sense trade journal such as HARDWARE is.

The Blount Door Check

is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.

The Yale & Towne Mfg. Company.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, over the country are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Bay City, Mich.—An industry, which promises to become very important, is the Bay Cutlery Works, owned and operated by George Reigel. The factory is located in the Fifth Ward, and has recently, by the addition of new machinery, greatly increased its capacity. The knives made specially by the Bay Cutlery Works are sugar beet knives.

Buffalo, N. Y.—The Union Iron Works has been incorporated by C. R. Baids, T. B. Riter, W. C. Cromwell, W. C. Ely, H. J. Pierce, H. P. Bissell and P. White; manufacturing iron, etc. Capital stock, $350,000.

Chicago, Ill.—The Fortune Mfg. Co. has been incorporated by C. L. Jenks, Jr., R. S. Cook and E. N. Sherburne, for the purpose of manufacturing and dealing in locks and other specialties. Capital stock, $4000.

Despatch, N. Y.—The Despatch Brass Hardware & Rolling Mills Co. has been incorporated by Peter S., Martha A. and Wm. Fletcher. Capital s ock, $134,500.

Jersey City, N. J.—The Pattison Ventilating Co. has been incorporated by Peter Whitney, David M. Bressler, and Leonard M. Ridgway, to manufacture ventilators. Capital stock, $125,000.

Lorain, Ohio.—Lorain has secured another industry, the latest being the American Shovel & Stamping Co., with a capital stock of $100,000. A building 80x200 feet will be erected at once, and 250 men will be employed. The capital is furnished largely by local men, the Johnson company being financially interested.

Newark, N. J.—The Heller Bros. Co., manufacturers, with $500,000 capital, has been incorporated.

Ottawa, Ont.—Ottawa has a new industry in the way of a file factory. It has been established in connection with the Ottawa Saw Works, Middle Street, Chaudiere. Considerable machinery has been added to the establishment, and about fifteen new hands have been taken on. All sizes of files are being manufactured and several hundred dozen of the implements will be turned out every week.

Philadelphia, Pa.—The Erric & North Co. has been incorporated: manufacturing emery, etc. Capital, $30,000. Incorporators: H. Erric, R. L. North, A. M. North, F. A. North, W. E Chapman, all of Philadelphia.

Pittsburg, Pa.—Another new plant is to be added to the industrial establishments of Allegheny County. It is at present being erected in Allegheny by a corporation of Pittsburgh capitalists, headed by Frank Moore, who is connected with the Westinghouse interests. This plant will manufacture exclusively all kinds of machine tools and tools used in various industrial works. It is intended to cover every known form of tool, special attention being given to the manufacture of lathes and steel and iron turners. The corporation is called the Pittsburg Machine Tool Co. and is incorporated at $50,000. Frank Moore is president and T. F. Curtis secretary. The new plant will give work to 500 men.

Pittsburg, Pa.—Spang, Chalfant & Co. has been incorporated; manufacturing iron and steel. Capital, $1000. Incorporators: C. H. Spang, Pittsburg; D. E. Park H. Chalfant, Allegheny; G. A. Chalfant, C. C. Chalfant, Etna.

Scranton, Pa.—The Connell Powder Co. has been incorporated; manufacturing powder. Capital, $55,000. Incorporators: A. J. Connell, H. A. Connell, W. L. Connell, J. R. Davis, C. M. Price, all of Scranton.

Steubenville, Ohio.—The certificate of incorporation of the Ohio Valley Iron Co. has been left for record at Clerk Robertson's office. The stock is limited to $150,000, of which $70,000 has been subscribed and $7000 paid in. The incorporators are C. F. Banning, G. C. Cooper, R. Hoffman, Jr., and Thomas A. Arthur, of Pittsburg, and D. J. Sinclair, of Steubenville.

Toronto Ont.—The Citizen Stove Co. has been incorporated by J. J. Westgate, president, and others; principal place of business, Montreal.

Uniontown, Pa.—The Uniontown Acme Radiator Co. has been incorporated by F. Hogsett, A. L. Moser, J. M. Husted, L. G. McCrum and I. W. Seamans and others, manufacturing radiators. Capital stock, $28,000.

Changes and Improvements.

Anderson, Ind.—The Union Steel Mills have resumed operations with 500 men, which will be increased to 1600 by the time the plant is in full operation. T. W. Wright who purchased it recently for $503 000 cash, signed the Amalgamated scale, which gives workers an advance of 15 per cent. in wages. The plants have been in the hands of a receiver for several years.

Fairmount, Ind.—The Fairmount Zinc Smelting Co. will immediately commence the erection of a $250,000 rolling mill, which is to be of steel entirely, and will cover five acres of ground.

Grand Crossing, Ill.—An extensive addition to the plant of the Grand Crossing Tack Co., South Chicago Avenue and Seventy-ninth Street, will shortly be erected at an expense of $125,000. The addition will take the shape of a rod mill, having a capacity of 100 tons of nail rods daily.

Island Falls, Me.—S. E. Howard recently purchased an engine, and with that as power, will arrange a trip hammer with which to manufacture axes. Mr. Howard has made an enviable reputation in this vicinity as an axe maker, and has been unable to fill all his orders during the past year, but as soon as he gets his trip hammer in operation he expects to be able to fill all orders promptly.

Lansing, Mich.—The business of the Lansing Wheelbarrow Co., which already has the largest wheelbarrow factory in the country, has increased to an extent which calls for a large addition to the plant. Work on the improvement will be commenced at once.

Middletown, Conn.—Doebler & Co., who are to commence the manufacture of Hardware in what is known as the old shirt factory at the Farms, are contemplating the erection of a three-story addition of brick to their factory, 50 feet long. It is hoped to start business immediately, with about 30 men at work.

Quakertown, Pa.—The new stove works of Roberts, Winner & Co. is under roof, and the firm expect to commence operations in the new building some time next month. The new structure certainly is a credit to the owners. It will be one of the largest foundries of the kind in this part of the State, and will give employment to a large number of hands. It is thought that another building will be required for the transaction of the business of the firm on the scale projected. It will be erected on a lot adjoining the main building.

Reading, Pa.—The Reading Iron Co. have bought the Ringgold Furnace in Pottsville, from the Philadelphia & Reading Co. It is said the new owners will operate the furnace, which has been cold for twenty-five years.

West Fairview, Pa.—The large nail works here, after an idleness of several years, will resume work in a few days. The resumption of this plant will give employment to several hundred men.

Recent Fires.

Albany, N. Y.—Part of the agricultural and machine works of P. K. Dederick's Sons, situated in Tivoli Hollow, in the North End, has been destroyed by fire, and the loss was greatly augmented by the destruction of scores of valuable patterns of machines built and patented by the Dedericks since 1876. Considerable of the firm's business consists in furnishing sections of machines built at the works years ago, but now, with the patterns destroyed, the loss is irretrievable.

Hamilton, Ont.—The Barrow, Stewart & Milne Co.'s stove foundry, scale works and iron foundry, damaged by fire to the extent of $40,000, principally on stock.

Miscellaneous.

Warren, Mass.—Business at the shop of Torkelson Gun Mfg. Co. is rushing, and big shipments are being made every few days. Extra help is being put on and 60 hands are employed by the concern.

Wheeling, W. Va.—The McKay shoe nail concern on South Water Street, is humming away at a lively rate making six days per week. For some little time the company has not experienced any of the annoying shortage of material that hampered operations earlier in the season. Over a score of machines are turning out nails as fast as they can possibly do so.

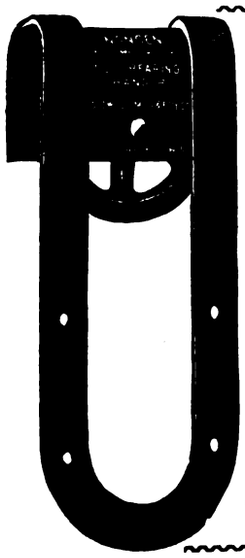
Physical and Accounting Examinations.

In addition to accounting examinations, the charter of The Audit Company of New York authorizes it to examine and report upon the physical condition and economy of operation among others of Electric Railway, Illuminating and other Companies. It also appraises the values of manufacturing and other plants.

Physical and accounting examinations combined afford a correct basis for corporation financing and for valuation of corporate securities or partnership interests.

Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of



EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

The ROOT BROS. CO., Plymouth, O.

Digitized by Google

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Chicago, Ill. — The Howard H. Brown Automobile Co. has been incorporated; capital, $100,000; manufacture automobiles, motors, bicycles, etc. Incorporators: Howard H. Brown, A. L. Kull, Harold A. Smith.

Columbus, Ohio.—The Admiral Bicycle Lamp Co. has been incorporated by C. C. Armstrong, S. W. Court, W. R. Gault, O. S. Sears, E. C. Thomas, for the purpose of manufacturing bicycle lamps, etc. Capital stock, $7000.

Elkader, Ia.—A. C. Reinck has opened a bicycle store.

Jersey City, N. J.—The American Dunlop Tire Co. has been incorporated with a capital stock of $200,000.

Logansport. Ind.—Cramer, Barnhart & Dollohan.

Milwaukee, Wis.—A company, for the manufacture of ice bicycles, has been incorporated in this city with a capital stock of $80,000, by E. H. Streissguth, E. F. Mertz and P. G. Lewis.

New York, N. Y.—The New York Tire Co., to manufacture, purchase and sell bicycle and carriage tires; capital, $1000. Directors: Ernest J. Euphrat, George B. Woodworth, and W. B. Parker, Brooklyn.

Portland, Me.—Chapman & Sons Mfg. Co. has been incorporated by G. F. Chapman, W. L. Hodges, W. J. Chapman, W. F. Chapman, all of Stoughton, for the purpose of manufacturing motor bicycles and automobiles. Capital stock, $150,000.

Rockford, Ill.—The National Specialty Mfg. Co. has been incorporated; capital, $2500; manufacture hydro-carbon lamps, Hardware specialties, etc. Incorporators: Charles F. Sperry, A. E. Fisher, A. M. Picken.

Rowley, Mass.—Charles O. Bishop.

San Jose, Cal.—The Garden City Cyclery has been incorporated to sell and repair bicycles, etc. Capital, $10,000. Incorporators: W. H. Krause, H. M. Krause, E. Wright, R. R. May, I. Trone, all of San Jose.

Trenton, N. J.—The National Tube Co. has filed a certificate, signed by Edmund C. Converse, president, and A. F. Luke, secretary of the company, setting forth that its entire $80 000 000 of authorized capital stock had been paid in, $5000 in cash and the balance in the purchase of property.

Washington, D. C.—The Columbia Motor & Mfg Co has been incorporated with Theodore J. King, president, and Arthur O. Babendrier, secretary; for the purpose of selling motor vehicles, etc. Capital stock, $2,000,000.

Changes and Improvements.

Allston, Mass.—The Parkway Cycle Co., Cambridge Street, closed.

Boston, Mass.—Haines & Battefield, dealers in bicycles, have been succeeded by J. D. Battefield.

Cambridge, Mass.—The W. B. Churchill Co. removed from No. 1914 Massachusetts Avenue to No. 1900 Massachusetts Avenue.

Freehold, N. J.—The bicycle lamp and saddle factory, formerly leased by the George Pierce Co., has been sold. The property was purchased by Rulif P. Smock, Frank C. DuBois and Hubbard F. Weeks, for $675, which is about $270 more than the indebtedness. The company will occupy their new purchase as a manufactory of pneumatic wheel carriages.

Hartford, Conn.—The Columbia & Electric Vehicle Co. have acquired the plant of the New Haven Carriage Co., which will be used for the manufacture of automobile bodies. The purchase price is said to have been $200,000.

Indianapolis, Ind.—The Indiana Bicycle Co. of this city has sold its seamless tube plants at Albany, this State, and Auburn, Pa., to the Shelby Steel Tube Co., of Cleveland, Ohio, which, in addition, has bought the tube factory belonging to the Pope Mfg. Co., of Hartford, Conn. The absorption of these plants gives the Cleveland company control practically of all the seamless tube factories in the country. The Cleveland company now controls eleven plants, and is backed by a capital of $10,000,000.

Kenosha, Wis.—The C. H. Sieg Mfg. Co. will be reorganized, and instead of making bicycles will manufacture automobiles and gasolene engines.

Linden, Mass.—Cuenin & Herbert, Beach Street, closed.

Morristown, N. J.—The J. H. Carlson Bros. Co., dealers in bicycles, succeeded by F. A. Trowbridge & Co.

Pittsfield, Mass.—L. L. Atwood has leased his block and bicycle business on Bank Row to W. J. Devall, who has for some time conducted a bicycle repairing establishment in West Street. Mr. Devall will now run both.

Rockford, Ill.—J. W. Hurd, formerly superintendent of the Rockford Cycle Co., has purchased the stock and machinery of the concern at Sheriff's sale for $1050.

Trenton, N. J.—The United States Tube Co. has changed its name to the National Tube Co., and increased its capital stock to $30.000.000.

Union City, Pa.—Fenno & Howland, bicycles, reported to have dissolved business, continued by Ray K. Fenno.

Willimantic, Conn.—The bicycle stock of Chesebro & Elliott, has been sold to Jordan Brothers.

Tarrytown, N. Y.—The Kingsland Point property here, comprising 600 acres of land, has been sold for a consideration of $150.000 to Amzi L. Barber and John Brisben Walker. It is said they intend to remove their automobile factory now at Newton, Mass.

Toledo, Ohio.—The Lucas Cycle Mfg. Co., reported to have sold out.

Warsaw. N. Y.—Gardner & Montgomery, succeeded by Gardner & Gage.

Recent Embarrassments.

Chicago, Ill.—Albert D. Brewster, bicycle supplies, has made an assignment. Assets, $2000; liabilities, $800.

Recent Fires.

Hopkinsville, Ky.—E. M. Rich, Main Street, loss, $900; no insuranee.

Montreal, Can.—N. Lariviere, No. 682 St. Denis Street, damage $4000.

Newton, Mass.—Chas. L. Lynch's bicycle store in the Nonantum building, has been destroyed by fire.

Saratoga, N. Y.—Chas. Leggett's bicycle store has been damaged by an explosion of naphtha.

Vineyard Haven, Mass.—Frank Golart, completely destroyed, loss unknown; caused by explosion of naphtha tank.

Waterville, Kan.—E. G. Steele.

Winsted, Conn.—The factory of the L. M. Jones Co., manufacturers of bicycle handles, has been completely destroyed by fire, together with the contents, entailing a loss of $22,500. The fire was caused by a spark from a chimney. Fifty people were thrown out of employment. The company carried $14,000 insurance, and will probably rebuild at once.

Recent Burglaries.

Clayton, N. J.—Parties unknown broke the windows of Smith's bicycle shop recently and stole $30 worth of stuff, such as lamps, bells, etc.

Woodbury, N. J.—The bicycle store of George Arnold has been broken into and robbed of a hundred dollars' worth of sundries.

Miscellaneous.

Springfield, Mass.—The Lamb Mfg. Co. are busy preparing to turn out new wheels of 1900 model. There will be some notable changes from the models of this year. The new wheels will be lighter, and the adjustments will be changed and made more convenient.

Toledo, Ohio.—The Maumee Cycle Co.'s plant is for sale by the receiver, Terry. An effort has been made by the receiver to interest a number of capitalists in the place, but nothing definite has been done. The plant is being held at $7000, and the actual cost of the place was about $15,000 when built. It is one of the best equipped small factories in the State.

A GOOD well-established Hardware, clean stock and well located. Will invoice about $3000, bought while prices were low. Splendid opening for a good tin shop in connection with the store. Rent reasonable. Good reasons for selling. Population 7000. Address M. N., Box 322, Thomasville, Ga. 37

HARDWARE business for sale, thirty-five miles from New York City. Chance for an energetic man. Price low. Satisfactory reasons for disposing of same. Address H. O. G., P. O. Box 2383, New York City. 15

COMPLETE up-to-date Hardware stock and fixtures, inventorying $4500, in a thriving town of 3000 inhabitants. Best location. Tinning business in connection, and fine opening for a plumber. Good chance for an active man For sale cheap. For particulars apply to R. W. WHINFIELD, Burlington, Wis. 23

Agency Wanted.

MANUFACTURERS' AGENT, with well located store in machinery district in New York, would like to hear from manufacturers wanting a reliable representative; have an established trade and years of experience. Address GEO. W. CHURCH, No. 183 Greenwich Street, New York. 3

Foreign Agency Wanted.

A GENTLEMAN with large experience and with good connection in all the principal towns in Newfoundland, is prepared to undertake additional agency in Hardware trade; good testimonials and references from firms represented. Address GEO. B. PARSONS, P. O. Box 331, St. Johns, Newfoundland. 10

Agency Offered.

AGENTS wanted to handle Burr's Cushion Stroke Adjuster, greatest wind-mill attachment ever invented. Quick seller, and liberal commission. BURR-FESLER CO., Batavia, Ill a

WE would like to hear immediately from a few live Hardwaremen who would like to be sole representatives in their towns, of a concern that is in the market for business, and have a line made for "men now on earth"—a modern line THAT CAN BE SOLD to your customers. Address "Box 88," care HARDWARE, No. 143 Chambers Street, New York. 4

WANTED agents to handle a patented, labor saving device of universal sale; investigation solicited by men who desire quick returns from a legitimate, profitable business. Address (C) BURR MFG. CO., Cleveland, O., 823 Society for Savings. a

PROPER Clothes Line Reel; simple, strong and durable: needed at every home. A money maker for agents. BURR-FESLER CO., Batavia, Ill. a

Attention, Manufacturers!

SALES MANAGER. An opportunity is presented to any large manufacturer in Hardware business to obtain the services of a competent sales manager, who has just completed his twenty-fifth year with his late employers who are now declining business. Has unexceptional ability in any line of work connected with the distribution of a large product. Address, H. O. P., P. O. Box 618, New York. 38

Store To Let.

CORNER STORE in new building in the upper part of Bayonne, N. J. This is a good stand for a crockery and household furnishings store. Moderate rent. For particulars inquire P. O Box 195, Hoboken, N. J. 29

"ONE OF THE FEW PAPERS WE READ."

Tabb & Jenkins Hardware Co., Baltimore, Md. [*Hardware, Cutlery, Guns, Ammunition, etc*]: We have always considered HARDWARE as a valuable acquisition to trade literature, and it is one of the few papers which we read through from cover to cover. It is valuable in calling the buyer's attention to new goods on the market, and we should think to the manufacturers, it would be a good medium of introduction. W. L. Fairall.

"SHOULD MISS IT VERY MUCH."

Morley Bros., Saginaw, Mich. [*General Hardware*]: We receive HARDWARE every issue, and find it of such interest as to oblige us to look through its pages quite carefully, and note with considerable interest the items you publish. It is quite an aid to the writer in his branch of the business, and we wish to say, that we should miss your paper very much indeed, if we did not receive it. W. L. Sandford.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished th dealer upon request, by the manufacturer quoted.
